## The Beckley-Ralston Co.,

180 LAKE STREET, - - CHICAGO.

# The Eclipse Cleanable.

(Made in Burlington, Vermont.)

The only removable ice chamber refrigerator that introduces cold dry air at the bottom of provision room, getting it under and between the food and forcing the warm, moisture-laden atmosphere upwards and away to the ice, the great condenser and purifier. This is positive circulation.

It is original and has no imitator or competitor. It is a success, and the dealer who wishes to build up a permanent trade in refrigerators can do it with the *Eclipse Cleanable*.

The people like it. It does good work economically, and is attractive in appearance. Made in plain and ornamental finishes. Every one sold is a standing advertisement.

We want your trade. Let us send you a couple of samples and we will get it. We have the utmost confidence in what we are offering you. There is money in it for you and ourselves. Our interests are mutual.

1901 CATALOGUE NOW READY.

# HARDWARE

J. C. McCarty & Co., 10 Warren Street, New York, are the sales agents of the Ohio Tool Co., Columbus, Ohio, and Auburn, N. Y. This company has recently issued an illustrated catalogue and price list for 1901, and its contents indicate most thoroughly how large and important a product is distributed by this well known plant, which has been in touch with the Hardware trade for so long a period. The dealer makes a mistake who doesn't send for one.

The numerous State conventions of Retail Dealers have kept quite a number of the traveling representatives of the leading manufacturers off the road on their regular circuits, enabling them to be present to represent their companies on these festive occasions. It is very enjoyable for "the boys" thus to keep in touch with the trade generally, and the factory salesmen have many good chances of steering trade to some favorite jobber who handles their line of goods exclusively for some particular city.

In our advertising columns under the head of "Agency Offered" an opportunity is given American manufacturers to secure the services of a representative in Berlin, who will travel throughout Germany representing their interests. Having resided in this country twenty-five years, his knowledge of American advantages amply qualifies him for this position.

The business of A. V. Taylor & Co., Cincinnati, Ohio, manufacturers of enameled letters and signs, has outgrown its present quarters and is now being moved to 1056 Central Avenue, where new quarters are being fitted up. They will also occupy the rear of the building 1058 Central Avenue. They are putting in several entirely new gas furnaces and when the new plant is ready for business, which will be in a very short time, their capacity will be greatly increased.

George William Hoffman, 295 East Washington Street, Indianapolis, Ind., the manufacturer of United States Infalible Metal Polish Paste and other similar specialties, which, through his judicious advertising have achieved a reputation truly national, reports a largely increasing circle of customers and an improved output of his wares, which, from the freedom with which the orders come in, he believes promises the most productive year since the establishment of his business.

Realizing the importance of an announcement of this character at this period of trade Association development, E. C. Atkins & Co., Indianapolis, Ind., desire the trade everywhere to understand the position they take on the question of supplying "Catalogue Houses" with such salable goods as their large plant is capable of turning out. They instruct us to place in their usual advertisement these lines: "HARDWAREMEN, REMEMBER that you don't find Atkins Saws in 'Catalogue House' catalogues. We don't sell them."

Beers & Mitchell, 98 Chambers Street, New York, have recently formed a partnership as manufacturers' agents and direct representatives to the jobbing trade, and will represent in the Southern States a number of important manufacturers to whom this connection will undoubtedly prove a valuable one. There are few men who have traveled

through the South more generally known or thoroughly appreciated than Henry H. Beers, the senior partner, he having had that section of the country for his traveling territory for more than a quarter of a century. The junior partner, Guy Mitchell, formerly of Atlanta, will be the resident representative, making a working concern that will achieve distinction. The firm will represent the following manufacturers: Schmachtenberg Bros., Hay-Budden Mfg. Co., R. Heinisch's Sons Co., William N. Merriam, Herrman Bros. & Co., the Atha Tool Co., Benj. Atha and Illingsworth Co., Atlas Shear Co., the Norton Tool Co., Baltimore Shovel Co., Oneida Community American Cutlery Co., Harding Edge Tool Works, Griffin Manufacturing Co.

The G. & J. Tire Co., Indianapolis, Ind., are sending to the trade an announcement to the effect that they now make 28x1 3-4-inch G. & J. tires for use on the 28x1 1-2—1 5-8-inch G. & J. rim. The 1 3-4-inch G. & J. tire formerly required a rim of special diameter.

This change will no doubt be welcomed by the entire trade, especially by manufacturers, as it will no longer be necessary to use special rims and special spokes for 1 3-4-inch tires.

For the present, the G. & J. Tire Co. explain, the new style, or size, will be shipped only when specially ordered. They will continue to carry a stock of tires suitable for the 1 3-4-inch rim that has been used in the past.

At a recent exhibition of arts and crafts held at Willenhall, England, some very interesting specimens of microscopic Hardware were shown. Among these was a complete set of implements—comprising anvil, vise, files, etc., used by the locksmiths of the district in the pursuit of their craft. All these little articles stood on the surface of a half dime. A tiny padlock and key were also exhibited. The manufacture of microscopic Hardware may be regarded by most of our readers as a useless expenditure of time and money, but there is a certain amount of training both of hands and brains in their construction which is invaluable. It would seem natural to suppose that a watchmaker should be capable of microscopic workmanship, but many may well say that the wielder of a heavy hammer is scarcely competent to operate with precision on miniature works of art. Yet one of the best tinsmiths I ever knew was capable of producing a tea-kettle with loose lid, beautifully shaped handle and spout (which would pour) out of a half dime. Ironmongers who wish their apprentices to become proficient in fine work should not discourage them in the practice of such efforts as the Willenhall locksmiths have been employing their spare time in.

The growth of Germany since the war with France is the most remarkable phenomenon of modern Europe. Since the treaty of peace was signed in 1871 Germany has not extended her territory by a single acre on the Continent of Europe (if we except the acquisition of Heligoland), but she has increased her population by 16,000,000. The Germans numbered 40,000,000 in 1871; they number 56,000,000 now, and yet, although there are so many more mouths to feed, the Germans are better fed, better clothed, and in every way more prosperous than they were then. This is attributed largely to the fact that for twenty years Germany devoted herself to improving the elementary education of her people.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted Exclusively to the Hardware Trade.

## Editorial Trade Review.

February, among the retail houses in the country, is not usually regarded as being a very busy month as far as sales are concerned, and this has doubtless been one of the reasons why it has been selected by so many of the Retail Hardware Associations as the best month in the year in which to hold their regular conventions, get more thoroughly acquainted with their competitors in the neighboring towns, and canvass the methods by which goods may be purchased at closer margins of a jobbing profit and sold to the consumer at a rate varying according to the time he takes to pay up.

These rapidly multiplying associations are of greatly increasing importance to the industry, annual and semi-annual comparisons of views enabling the dealers to learn methods of transacting their business intelligently, economically and safely. By combination of their purchases in many cases, lower freights are obtainable, carloads being made up with orders to separate houses, which a few years ago would have been highly incensed to have any such mode of shipment adopted. It seems now to be an act of courtesy to be considered from such a money-saving standpoint, and the friction formerly so inseparable from the trade conditions of an active competition has worn away all unpleasantness and lack of harmony, and local trade has been greatly augmented by this more sensible policy.

No man in business at the present time, under Association influences, finds it profitable to make enemies of his competitors through such underhanded methods as results in senselessly cutting prices, which suicidal system was usually the first to be attempted before the com-

peting dealers were placed upon this higher association plane of trade morality, which is calculated to result in mutual commercial advancement.

At the Convention manufacturers are brought more closely in active friendliness to the genuine distributors of their varied products, a complaint is made and adjusted on the spot, face to face with the man who makes it, and not filtered through the several departments of a large establishment, meeting with objection and provoking acrimony at every step of the way. Those of the manufacturers who find it profitable to sell catalogue houses and department stores in States where such competition is considered fatal to general trade, are able to learn at once what the trade in that particular State thinks of them. A wise use of the power which such associations give these combinations of dealers cannot but prove of great advantage, increasing this desire for harmony throughout the industry so worthy of emulation, so provocative of good morals and proving the greatest factor in an ever-increasing general prosperity.

The orders taken during the month of February indicate a conservative buying, which will prove the steadiness which results in an increasing demand at a later date. Many of the retail dealers are either preparing to go to their State conventions, or are preparing some interesting points with which to enliven the discussions which form the commendable features of such a gathering. Consequently unless entirely out of stock, their wants do not appeal to them so greatly until after the delegate returns to his own establishment and finds a greater number of stock requirements staring him in the face.

There is an undercurrent of belief among many dealers that some slight concessions in prices of general Hardware may be discovered by the buyer who isn't in too much of a hurry. In this they may be disappointed, as the anticipations of a rapidly increasing trade for March have sent forward many large orders for goods needed for a Spring demand, which have kept the manufacturers reasonably busy and free from a wish to bid for less profitable transactions. However, this state of the market prevents any desire to indulge in orders of a speculative tendency, the facilities for increased production being too well known, and frequent orders are preferred under the circumstances, especially when they are filled without unreasonable delay.

The financial condition seems to be generally in a very satisfactory state. Money needed for trade transactions in its general movement is readily obtainable at moderate rates. Collections are reported as being extremely good in almost every direction. Business embarrassments are by no means numerous at this, the proper period of the year to become familiar with insolvent conditions should any present themselves. In fact, prosperity seems to promise a condition of comfort to all dealers alike, retail as well as wholesale.

## Our Commercial Growth.

The growing popularity of American products in those parts of the world in which all the manufacturing and exporting nations are making earnest endeavors to extend their commerce is illustrated by the figures of the Treasury Bureau of Statistics, showing the exports by grand divisions and countries in 1900 compared with 1890. These figures are published in the December number of the *Monthly Summary of Commerce and Finance*, and cover the calendar years

from 1890 to 1900. They show that our exports to Europe increased during that period from \$682,000,000 to \$1,116,000,000, or 63 per cent.; to North America, from \$95,000,000 to \$198,000,000, or 108 per cent.; to South America, from \$35,000,000 to \$41,000,000, or less than 20 per cent.; to Asia, from \$22,000,000 to \$58,000,000, or 163 per cent.; to Oceanica, from \$17,000,000 to \$40,000,000, or 132 per cent., and to Africa, from \$4,500,000 to \$23,000,000, or 416 per cent.

To South America the growth has been comparatively small, but to Asia, Oceanica and Africa the percentage of growth, it will be observed, has been phenomenally large, and in nearly every instance the gain has been greater than that of the other countries competing for that commerce.

A more detailed analysis, considering the exports country by country, also shows some interesting facts, and this is presented in the table which follows. The United Kingdom, which stood at the head of our list of customers in 1890, still maintains that position, but only shows an increase of less than 50 per cent., while Germany, whose commercial relations with the United States have been the subject of much discussion, shows an increase of more than 100 per cent., and an increase of over \$35,900,000 in the single year of 1900 compared with the preceding year. France, which stood third in the list of our customers in 1890, is now fifth; Canada, which was fourth on the list in 1890, has taken third rank, and the Netherlands, which were sixth in 1890, are now fourth in the list. To Hong Kong the exports of 1900 are double those of 1890; to British Australasia, two and one-half times as much; to China nearly three times as much, and to Japan more than five times as much as those of 1890, while to British Africa the figures of 1900 are six times as much as those of 1890.

The following table shows the exports from the United States by countries in 1890 and 1900, arranged in the order of magnitude:

Exported to—	1890.	1900.
United Kingdom .....	\$434,468,506	\$602,221,375
Germany .....	91,321,216	197,603,400
Canada .....	38,629,367	102,900,250
Netherlands .....	25,541,189	83,721,501
France .....	49,741,216	82,563,335
Belgium .....	27,779,096	46,929,953
Mexico .....	13,822,796	38,270,933
Italy .....	15,272,806	36,731,704
British Australasia.....	11,661,398	28,163,722
Cuba .....	13,329,493	26,934,524
Japan .....	5,072,038	26,492,111
China and Hong Kong....	9,686,248	20,459,385
British Africa .....	2,953,335	19,190,653
Denmark .....	4,825,351	15,499,371
Spain .....	12,471,516	15,200,917
Sweden and Norway.....	4,479,253	11,520,574
Brazil .....	12,902,356	11,516,681
Argentina .....	4,840,403	11,096,538
Russia in Europe.....	9,490,439	8,498,950
British West Indies.....	9,094,474	8,630,347
Austria-Hungary .....	1,171,603	7,667,019
Portugal .....	4,798,843	5,705,179
British East Indies.....	4,662,472	5,227,032
Chili .....	3,629,283	4,596,525
Hayti .....	5,907,514	3,720,279
Philippine Islands .....	153,904	3,523,146
Total, including other countries, not herein specified .....	\$857,502,548	\$1,477,949,170

### Farwell, Osmun, Kirk & Co.'s New Catalogue.

Farwell, Osmun, Kirk & Co., St. Paul, Minn., have recently issued and are now distributing to the trade their new illustrated and descriptive catalogue, covering the line of goods handled by this progressive house. The book is an ambitious publication, containing 1,311 pages, 12 1-2x10 inches in size, and weighs six pounds. The size, being somewhat lighter than some of the mammoth catalogues issued by other jobbing houses, makes it an extremely convenient one for purposes of reference. In many respects it shows considerable originality on the part of the compiler, as he has in several instances departed from the stereotyped method of compilation of a Hardware catalogue, and also in the manner in which it has been printed and bound. The compiler has endeavored to use reduced cuts whenever full-size cuts were not positively necessary, in order that convenience of reference may be assisted by avoiding the taking of an unnecessary amount of space for the sake of making a

larger volume than is essential. The result of this is, the catalogue contains a very large amount of matter, the object being to make it primarily from the retail merchant's standpoint. For this purpose no pains have been spared in the way of illustrations or descriptions or in giving size, weight of packages, and other useful information, which has a tendency to facilitate orders through the convenient jobber. One special feature of this catalogue is a handy compilation of the Western classification of articles in the Hardware line when required in less than carloads. This is arranged alphabetically, and bound in the back part of the book, so that a retailer, at a glance, can tell how the different articles in Hardware are classified as to freight. A number of tables of useful information will be found among its contents, useful for purposes of reference, in which tabular information may be found on the decay of building material, transverse strength of timber and cast iron, strength of cast iron columns, weight of dry pine lumber, weight of stone, weight of masonry, weight of marble slabs, weight of various materials, weight of floors and their load, strength of piers, estimate of materials, brick work, pointers on roofing, slating, capacity of boxes, nails required, contents of various receptacles, dimensions of various measures, tanks and contents, mathematical rules, weight and fuel value of wood, capacity of cisterns, various measures, lawful weight of a bushel in the various States, wire gauges, receipts for putty, removing rusty screws, preparing fence posts, gear equivalent for cyclists, table of transmission of power by wire, rope and by belting, contents of cylinders and pipes in cubic feet and gallons, interest laws of the United States, methods of detecting counterfeit money, postal regulations, value of American coins, war revenue law of 1898, documentary stamp taxes, short interest rules, table of weights per lineal foot, etc. It is provided with a serviceable index occupying 48 pages, which will give a pretty good idea of the large number of articles that are classified within the covers of this volume, and the immense stock this jobbing house finds it necessary to carry. It certainly is a noteworthy one for Northwest trade. In its plan of construction the catalogue is designed to inform the trade, not only of the goods carried by this house, but also to give as much useful information as can be conveniently furnished in such an important book.

### New York State Hardware Dealers' Association.

The New York State Hardware Dealers' Association met on February 6th, in the rooms of the Troy Club, Troy, a morning session being held at 10.30, J. W. Black, of the Burhans & Black Co., Syracuse, in the chair. This session was entirely devoted to executive business, in which matters were discussed pertaining to the trade. About thirty delegates were present, representing all the principal cities of the State. As is usual with the meetings of the Association, business was combined with pleasure. A banquet was given at 3 o'clock in the afternoon, at which Charles W. Tillinghast, of J. M. Warren & Co., Troy, was toastmaster, a number of impromptu toasts being given. The hosts of the entertainment were members of the firm of J. M. Warren & Co. and A. E. Bonesteel. The guests presents included Mayor Daniel D. Conway, Howard M. Davis and E. H. Brooks, of New York, representing the American Tin Plate Co.; T. James Fernley, secretary-treasurer of the National Hardware Association, George Reuter, of Woonsocket, R. I., representing the American Wringer Co.; Col. John Don, representing the Aird-Don Co.; Congressman William H. Draper, Superintendent of State Prisons C. P. Collins, and Peter McCarthy. The members of the Association who were present from out of the city were: Charles H. Turner, W. B. Wackerhagen, James K. Dunscomb, of Albany; Henry W. Millar, George S. Dana, J. R. Lewis, of Utica; J. W. Black, Joseph Born, of Syracuse; J. H. Underwood, of Binghamton; Captain Frederick Barker, Irving D. Booth, of Elmira; J. H. Boucher, S. J. Weaver, of Rochester; Hobart Weed, C. W. Wells, of Buffalo; Cyrus Straw, of Wilkesbarre, Pa.

## LEGAL CORRESPONDENCE.

Conducted by William Marston Seabury, Attorney and Counsellor at Law,  
No. 43 Cedar Street, New York.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

QUESTION: In the course of my business I received from a man in payment for some goods a promissory note made by a third party. About a week later a fire occurred in the store, which destroyed most of my papers, among which was the note. The maker of the note refuses to pay it unless I produce it. Is there any way in which I can recover the amount of the note?

REPLY: You can recover the amount of the note if you can prove that you were the holder of it, and that it was destroyed, but you will be obliged to give a bond of indemnification to secure the maker of the note against any loss which he might sustain if the note should ever turn up. This requirement we deem reasonable under the circumstances as an evidence of good faith.

QUESTION: I am the owner of some property at Ruthersford, N. J., and I inadvertently paid the taxes on somebody's else property. I only discovered this error upon having my property advertised for sale for taxes. Have I any recourse against the man upon whose property I paid the taxes, or against the tax commissioners?

REPLY: We have made a very thorough search of the authorities and given the matter considerable attention, but are unable to find any theory upon which such a recovery would be permitted. The law is that if a party voluntarily pays the debt of another, he has no right of action against that other, or against him to whom he paid the money. We find, however, decisions in two jurisdictions which allow such a recovery, in Iowa and Missouri, in the cases of Goodnow vs. Litchfield, 63 Iowa 282; Goodnow vs. Oakley, 68 Iowa 25, and The Union R. & T. Co. vs. Skinner, 9 Missouri Appeals 189. On the contrary, we find a decision in the case of Carr vs. Stewart 58 Indiana 81, which sustains our opinion, and whatever the moral obligations may be, we believe this case to be right on legal principles and the prevailing rule in this country.

QUESTION: A short time ago I had occasion to travel from New Orleans to New York by railroad. I checked my trunk through, and when it arrived its contents were badly damaged. I am anxious to recover for the loss sustained by me, but as the trunk has passed over five or six different railroads, and I do not know where the damage occurred, I am uncertain as to whom I can hold liable.

REPLY: Under such circumstances, where the baggage has passed over several different roads on any one of which the damage might have happened, and you have no means of knowing where it actually did happen, the courts of this country have laid down this rule of convenience, if not of necessity, that a presumption arises that the accident happened upon the last road. This presumption can, of course, be rebutted, and if the last road can prove that the damaged condition existed when the trunk came into their possession, you will then be obliged to proceed against the next to the last road, and so on back. A leading case on the subject is Moore vs. New York, etc., R. R. Co., 173 Mass. 335.

QUESTION: I made an offer to sell some goods to a man at a certain price. He asked me to keep the offer open for a week, and I assented. Two days later the market suddenly changed, and I wrote withdrawing my offer. The next day he came to me and said that he had received my letter, but inasmuch as I had agreed to keep the offer open a week, could not withdraw, and he would accept my offer. I refused to deliver the goods, and he threatened to sue me. Can he do so successfully?

REPLY: The agreement which you made to keep the offer open a week must be treated as any other contract, and as such is not binding in the absence of a consideration. If

we understand the circumstances rightly, there was none in this case, and you were at perfect liberty to withdraw your offer at any time.

## Lessons Taught by Labor.

EDITOR *Hardware*: Once in a while now, there is a pleasant day when the rigor of Winter is abated and the increasing warmth of Old Sol's rays remind us that he is climbing up the long slope again. Then the streets are filled with shoppers, the baby carriages are brought into play and the white-faced little ones are trundled up and down in the fresh air. The sunny sidewalk across the street, with a big building conveniently placed so as to shut off the north wind, is a favorite promenade for the womenkind of the factory workmen, and I frequently look out to see the uplifted smiling faces of mother and child and hands waved in greeting someone, and know that upstairs in the big establishment behind me some man with a warm feeling at his heart is doing three strokes where he did two before for the sake of the wife and baby.

And what more powerful incentive for doing his best can a man have? What to the ordinary chap is wages, promotion and added responsibility but a means to raise his home life to a higher level and to ensure the future prosperity of his family? It is this that forms the basis of his ambition and nerves him to greater effort. It is to his home that his thought flies in the event of any success, and it is the knowledge of the effect upon those whose life is bound up with his that is the very essence of bitterness when misfortune overtakes him.

I like to stand before the factory at meal time and watch the throng of people leaving for their homes; to know that the hoarse cry of the big whistle has set children in all parts of the town watching for their fathers, and that in hundreds of homes steaming dishes are being placed upon tables for the refreshment of the breadwinners; that there is a place where each tired worker can find rest from the stress of effort, and someone to enter into the thoughts and aspirations of his inner personal life—to halve the sorrow by sharing it, and to double the pleasures of existence by adding happiness in equal measure. It is good to think that at the evening meal the day's doings at the shop are made matters of interest, and that to all this army of breadearners the prosperity of the factory is of paramount importance.

What a wealth of human interest, born of association, is centered in such an establishment and grows with the added years! The operations of buying and selling bring its principals into contact with a host of people over the country who come in time to have a friendly feeling for the concern and to wish for its prosperity "for auld sake's sake" aside from any selfish interest, and at home we touch elbows with and look into the faces of the other members of the great family sheltered under the same roof-cluster and working for a common end. Then, there is the mother on the walk whose faith in the future grows stronger as she notes anew the size of the buildings and hears the hum of machinery, that seems to tell of steady work—and the little boy who dreams of the time when he shall be a man, and whose present ambition rises no higher than the day when he shall join the workers with his father.

THE FACTORY PHILOSOPHER.

## Humason &amp; Beckley Mfg. Co.'s New Catalogues.

The Humason & Beckley Mfg. Co., New Britain, Conn., and 80 Chambers Street, New York, have recently issued two new catalogues illustrating to the fullest extent the special lines of Hardware and Pocket Cutlery with which their name has been long identified as leading manufacturers. One of these is a pamphlet, of full catalogue size, 10 1-2x8 inches, 50 pages, printed on good paper and thoroughly illustrated. This is called the "Hardware Edition," and includes

such goods in the regular line of Hardware as Wrought Iron Goods, Bright Wire Goods, Door Bolts, Corkscrews, Hammers, Screw Driver Bits and Bull Punches and Rings, Cattle Leaders, Box Hooks and Chisels, etc., etc., goods that no Hardware assortment is complete without. These are invariably illustrated with cuts that are in many instances full size, making it a very pleasing catalogue to order from. The other is a cloth bound catalogue, consisting of 106 pages, and is intended for distribution among those who desire to have the Pocket Cutlery, of which the Humason & Beckley Mfg. Co. make a very large and extended line, in the same volume with the Hardware goods mentioned above. One page is devoted to the number of styles of blades which they furnish in their Pocket Knives, and also an illustration of the blade in process of being forged from the bar to the finished article, which is quite instructive. These goods have been on the market a great many years, and as is well known to most Hardwaremen in the United States, have established a reputation for quality that makes the present extensive catalogue a very wise publication on the part of the manufacturers. The goods manufactured now number nearly 700 patterns, and the illustrations given show full-size cuts, giving an exact representation of the article, reference being made to the several styles in which that same pattern is furnished to the trade. It is printed on excellent paper, and cuts are in every case excellent wood cuts, no half-tone work, giving them an appearance that should be productive of intelligent ordering. Altogether it is a very desirable catalogue, and should increase the sales of their many important lines.

#### Sargent & Co.'s Catalogue of Screen Hardware for 1901.

Sargent & Co., New Haven, Conn., and 149 Leonard Street, New York, as is customary at this season of the year, are placing before the trade their catalogue of Screen Hardware for the approaching season, which is a pamphlet catalogue of 36 pages equal in size to their regular large catalogue, and embodying in its contents everything that would be considered requisite for the screen door, which has, in this country particularly, become a necessity rather than a luxury. In this group of articles are noticeable: Door Springs of varied forms and styles, Spring Hinges in large variety; Screen Door Catches, an assortment covering a great many pages, including those designed for narrow stiles as well as those more important in size and furnished for more elaborate outfits, including night-work in some instances. A fine line of mortise Screen Door Latches is also included; Window Screen Corner Brackets, Window Spring Bolts, Pulls or Sash Lifts, Door Pulls, Gate Hooks and Eyes, and Bolts in all the necessary variety to make a screen door perfectly safe either by night or by day.

#### The Necessity of a Law Regulating Sales of Stocks in Bulk.

The situation confronting the credit man of to-day is of an entirely different character from that of a decade ago. In the earlier days of credit granting, the principal thing to be considered was the party's honesty and his prospects of success or failure as the credit man viewed them. The matter of resources even was not so much an item as now, although, of course, taken into account along with other things. It is a matter of congratulation that the credit man of to-day shows so small a percentage of losses as he does on the average in handling a large volume of heterogeneous accounts. The risk taken to-day in granting credits is much aggravated by the persistent dishonesty of a certain class of unscrupulous dealers, who have by years of experience learned to be somewhat familiar not only with the laws, but with the manner in which they may safely defy them. The increasing evil of sales to auctioneers and other methods of disposing of stocks of merchandise in bulk by the dishonest debtor brings

him face to face with conditions which make it an impossibility for him to safely conduct the granting of credit on any regular routine. In many instances he is, in a sense, as one betting on a horse race; he is, in a large sense of the word, gambling on the chances of receiving payment for merchandise delivered. There is no credit man who can fathom the intentions of a presumably honest debtor, who in the still of the night or during the closing hours of holidays disposes of his stock in bulk and goes into hiding.

The laws of New York State as they stand, we are told, are such that there is no necessity for improving them in this direction. We are told by attorneys that there is plenty of legislation already on the statute books, and, further, that legislation which will prohibit the disposal of a debtor's merchandise by him in bulk cannot be enacted and placed on the statutes, being unconstitutional. But surely there must be some way in which to prevent this continued victimizing of dealers. The purchase by auctioneers or others of merchandise without first having thorough knowledge that the party undertaking to dispose of it has a right to do so, is radically wrong, and they should be held responsible for the liabilities against the stock purchased in this way, for when disposed of in this manner it is, in a moral sense at least, nothing more than stolen property, and the honest claimant should have recourse to law, whereby he might be able to take his own where found, the same as in a pawnbroker's, or hold the party in possession responsible.

The credit man, being a fairly good judge of human nature, and knowing something of his customers' affairs, is enabled usually to have a fair idea as to an honest man's chances of success and ability to pay; but the man who is dishonest can, if he sees fit, and by this system, victimize any house he chooses. Therefore we are only safe in granting credits to known honest dealers, men of character and good habits, who have never to our knowledge been guilty of any dishonest action. Ordinarily, the man who is dishonest in one thing will be dishonest in another, and having known of any dishonest transaction in which he was concerned, it is safer to place him outside the ban of credit.

THOS. M. BROWN.

#### New York Credit Men's Association.

The bi-monthly meeting and dinner of the New York Credit Men's Association was held Thursday evening, February 14th, at the Wool Club. Over 150 members participated. There were delegations from Philadelphia, Baltimore, Boston. President Field, of the National Association, was expected, but was confined to his house by severe illness. Ex-President Cannon and President Ainsley, of Boston, and President Ritter, of Philadelphia, came over to see how New York did it. Lignante's mandolin quartette gave a novel effect to the dinner.

Mr. A. H. Watson, President of the Association, presided at the meeting, and, after a short address of welcome, introduced Mr. Wm. A. Prendergast, Secretary of the National Association of Credit Men, who addressed the Association in part as follows:

In an article appearing in the *North American Review* a short time ago, by Mr. O. P. Austin, Chief of the Bureau of Statistics, it is stated that steam, electricity, invention, finance and peace are the five great attributive forces and influences which have tended to the development in volume and value of the commerce of the world during the past century.

That this diagnosis is correct, of that there is no doubt, for those who are familiar with the present conditions can realize that the use of steam and electricity as Nature's conserving and developing agencies have tended wonderfully and materially to this great progress and prosperity that has characterized this country in the past hundred years, and more especially in its latter part.

We hear much in these times of what is called commercialism, and the only interpretation we can draw from the uses to which that term is applied are, that those who make such uses of it believe they see in our present tremendous

commercial ability the forces it brings into play in the disposition evidenced by our people to reach forth and grasp the commercial honor and supremacy. It is charged that affairs and worldliness of our people are becoming or will become the predominating qualities that will cause this so-called commercialism. I think it safe to say that these forebodings are well justified by facts, for there never was a time, such as the present, when the people of this country, and the same is no doubt true of the people of all other nations, were affected and influenced by charitable thought and impulse as they are affected to-day. It is only through ignorance that the safety of the State can be impaired.

The greatest nations of to-day are those who lead the van of commerce, the greatest in point of international prestige and power to solve the resources of the attainment and prosperity of their people.

The presiding officer then introduced Mr. John R. Ainsley, President of the Boston Credit Men's Association, who said: "I bring with me greetings of the Boston branch, and while we cannot compete with you in membership, we believe that we can modestly claim that we are second to none in our enthusiasm and desire to educate credit men and improve credit matters. The intimacy established has been the production of mutual benefit. We are standing shoulder to shoulder for mutual protection and co-operation." In this connection the speaker recited a case which recently happened in Boston, and which gave the credit men interested a vast deal of satisfaction, referring at length to the Meretzky case, where the sentence of six years at hard labor was imposed for fraudulent transactions against our members.

The presiding officer then introduced Mr. Jas. H. Ritter, President of the Philadelphia Credit Men's Association, who said:

The National Association is fortunate in having a man like Mr. Field for its National Executive. I know his disappointment is great to-night that he cannot be here. The membership in our association is constantly growing." The speaker then eulogized Abraham Lincoln, and continuing stated: "We have not been able as yet to pass through the Legislature a bill for the regulation of sales of stock in bulk, but we hope to accomplish it. We have done some work in protecting the interest of creditors, and we succeeded so well in one case that we have a libel suit against us for fifty thousand dollars. We have no fear, however, of that libel suit, and work is going on steadily. We talk of millions to-day where our fathers talked of thousands, and very recently the word billion has been called into use in the realms of finance. I wish, as credit men, we could do something to bring about the return toward simplicity of life and freedom from ostentation which was so largely demonstrated in Abraham Lincoln's character, which will enable us to voice the truth of the words of that good book, 'A man's life consisteth not in the abundance of things which he possesseth.'" The speaker related several interesting anecdotes.

The presiding officer then introduced Mr. Evans, who said:

"I recognize that this association is a power for good. It has accomplished a great deal of good and is now accomplishing a great deal more by the result of cumulative work. Our work for the past four years is beginning to bear fruit. We have just introduced before the Legislature again our bill for the proper protection of creditors in case of sale of stock or stocks in bulk. No doubt you are confronted in New York with the same evil that meets us in Philadelphia in this respect. We have no redress whatever and want to make that kind of a thing impossible. The bankruptcy law is all right as far as it goes, but when a feller sells out his stock in bulk at a small price and defrauds his creditors, and you cannot find any assets, what are you going to do?"

"This association has accomplished a great deal of good in a quiet way by improving the mercantile agencies. If it was not for this association they would go along in their same sleepy fashion, so to-day their reports are worth more to you than ever before."

The presiding officer then introduced Mr. Boocock, who said:

"I am an enthusiast in regard to credit men's associations, and I am a believer in organization, not only of commercialism, but also in every other phase of life. If anything is to be accomplished at all, it must be largely through the power of organization. The mercantile agencies cannot be the power they are without a splendid organization. The credit men cannot be the power that they should be without the influence of organization. The minute we equip the credit men with the ideas they are possessed of, and back it up with organization, we begin to accomplish something in the

realm of credit. An individual counts for just as much as he personally represents. An organization counts for the amalgamation and combination. Therefore the Credit Men's Association is a thing absolute and essential, and important to the well-being of the commercial world." The speaker then referred briefly to the contemplated fund of ten thousand dollars for the protection of credit men in the prosecution of fraudulent failures.

President Watson also referred to this fund, saying that it was not meeting with the success that it ought to, and urged upon the members the necessity of giving it the consideration that it deserves.

### Gem Cutlery Co.'s Display Case.

In our issue of January 25th we incidentally referred to a new system of marketing the Gem Razors through the Hardware trade by the presentation of a display case, which we illustrate herewith, to the dealer who purchased a small stock of goods needed to make a fair assortment. The amount of goods necessary to be purchased under the offer should include the following: Half dozen "New Gem"

Razors, two cases No. 1, one case No. 2, one case No. 3, one wood-handle stropping machine and strop. The order can be filled by any jobbing house or direct from the Gem Cutlery Co., 34 Reade Street, New York.

### "Never Rust."

A very attractive advertisement will be noticed in our columns headed "Never Rust." This has reference to an article manufactured by the Compound Specialty Co., for whom Geo. Borgfeldt & Co., 48 W. 4th Street, New York, are sole agents. They are anxious to introduce this article, which has special reference to everything connected with the Hardware trade, through that particular industry, and are willing to send a sample box upon request to any of our readers. "Never Rust," which is the name of the article, is designed to protect machinery and metal of all kinds against all possible deterioration. With all Hardware and other metal goods, which are subject to rust, an article of this character is indispensable to both manufacturers and shippers, and as it contains no acid, is compounded so that it never gets hard, is quite easy to apply, and can be removed with equal facility, it is worthy of their consideration. It is put up by the manufacturers in 50-pound cans, or packed in bulk by the barrel, of about 325 pounds, at an extremely moderate price that will permit of a ready sale, and pay the dealer handling it a satisfactory profit. They will be glad to enter into correspondence with any of our subscribers to whom this article would seem the proper thing to introduce, and they would undoubtedly find it a salable article to handle.

For 10 or 15 years the Italian Government has built no new locomotives or rolling stock. Recently no fewer than twelve trains stopped, broken down, in one day. The cause of the Government neglect is the system by which it owns the rolling stock and lends the use of it to private companies.

## CONSULAR COMMERCIAL COMMENTS.

### British Industrial Depression.

#### THE METAL TRADES.

Since January 1, 1900, the metal trades in this country have experienced a remarkable decline. To describe the difference in the condition of these trades at the beginning and at the end of last year would be to contrast enormous activity and practical stagnation. The decline was not a feature of the entire year—indeed, prices reached the highest point in April—but chiefly of the last six months, the reaction being specially marked in December. The course of prices is instructive, although it does not tell the whole story.

American and German competition became sharply manifest early last summer, but not until autumn did the offers of American iron and steel at reduced prices come upon the market with crushing effect. What made the difficulty worse for British producers was that Germany, having bought largely from America in the Spring and Summer, became alarmed and resold here at reduced figures and also placed finished iron and steel on this market in competition with American manufacturers. The result now seen is a collapse of the metal trades in Scotland and the north of England. In the Motherwell district, the dullness was felt severely in November, when there was a reduction of 5 per cent in iron-workers' wages and hundreds of men were suspended. Some manufacturers in the Barrow and Middlesborough districts, and also in Sheffield and Manchester, are reported to be restricting their output. In the north of England and in Scotland, about one-third of the furnaces have already been damped down. Two important firms in the iron trade at Birmingham failed last week.

By not a few observers the outlook is regarded as gloomy. The *Edinburgh Evening News* goes so far as to say editorially:

"The iron and steel trades have gone from us. When the fictitious prosperity, caused by the expenditure of our own Government and that of European nations on armaments ceases, half of the men employed in these industries will be turned into the streets. The outlook is appalling. What suffering will have to be endured before the workers realize that there is nothing left for them but emigration. It is useless to pretend that this generation of workmen can ever hope to contend successfully with the Americans under present conditions. What are these conditions? They have cheaper coal and iron ore, improved tools, innumerable labor-saving machines, and above all, the strenuous efforts of the workmen to increase the output. How is it to be expected that our workmen, trained to regard restriction of output as their sheet anchor, can suddenly be made to understand that it is a fatal heresy, and that their only salvation is an increased output at diminished cost?"

In view of the depression of the metal industries, both the daily press and the trade papers are "taking stock" of existing conditions, trying to make clear the causes and the extent of present troubles, and seeking to discover and point out what must be done to bring about a change for the better. It is interesting to see that the press in general blames manufacturers for not adopting labor-saving machinery in all branches of production where it can be introduced, and blames workmen for their undisguised hostility to all labor-saving devices. In this line, the *Edinburgh Evening Dispatch* says:

"The question of foreign competition in the metal trades is the most serious industrial problem before the country in the new century, and it is so far satisfactory to find that it is engaging much attention. To show how serious it is, we need only quote a few figures. In 1889 the pig-iron production of the United Kingdom amounted to 8,322,824 tons, as against 7,603,642 in the United States. Since that time the States have shot ahead and in 1899 their production was 13,-

620,703, against 9,000,000 in the United Kingdom. In steel production the contrast is much greater. In 1890 the United Kingdom produced 3,679,043 tons of steel and the States 4,277,071; in 1899 the respective figures were 5,000,000 and 10,640,000, the States thus producing more than double the quantity produced in the United Kingdom. American exports are increasing at an even greater ratio. In 1890 the States exported iron and steel to the value of \$25,542,000; last year the value was \$105,690,000.\* Their exports to Great Britain now include pig iron, steel billets, steel rails, steel plates, structural steel, wire rods, wire nails, cast-iron pipes, besides machines of all kinds. In face of facts like these it will no longer be possible for English engineers to continue the old method of 'one man, one machine,' unless, indeed, they are willing to acquiesce in the gradual extinction of their industry."

#### TECHNICAL EDUCATION.

Another engineering deficiency, according to most writers, is the lack of practical instruction in the industrial arts. It is the accepted opinion here that in the matter of technical education, Great Britain is far behind the United States and Germany. On this subject a correspondent of the *Glasgow Herald* gives the Scottish public the following information:

"Again, the relation of the man to the master is important. In America it is one of mutual advantage. If a man has shown that he can learn well and work well, he gets every encouragement; he is not as a rule bound down to a fixed wage that any average workman can easily earn, but is paid for what he can do, and facilities are given him to gain further experience. The expense of his technical education is often borne by his employer. The success of this process of mutual advantage is one of the chief reasons why America is the home of invention and typical land of progress. The leading engineering firms always train their men with the utmost care. They require, first of all, that the would-be apprentice shall be not less than eighteen years of age, and that he shall produce evidence of having had a sound general education, and thereafter they undertake to teach him the whole science of his chosen craft, at machine, at bench, and in every variety of tool work throughout all the different shops.

"No effort seems to be spared to make the conditions of the work acceptable to the workmen. Men and youths are specially told off to carry machine parts from one place to another, and there are laborers who are constantly engaged in keeping the shops clean and free from litter. Labor-saving machinery and automatic machinery are everywhere in evidence, and the general use of these, more especially of automatic machines, is of very great importance. So long as engineers in Great Britain are under the necessity of working one man one machine they have no chance against their American brethren. At the works of the Sturtevant Engineering Company, for example, one man works six lathes, and at the works of the Yost Typewriter Machine Company one man superintends eight automatic machines. At the works of Pratt & Whitney, at Hartford, a man may be seen working at one time a planing machine, a drilling machine and a shaping machine; another man minding two cutting-off machines; another working five special lathes fitted with stop; and men will willingly work ten turret-head automatic machines at one time. At the Hartford Screw Nail Works one man will superintend as many as eighteen machines.

"There is yet another reason why the Americans are at present ahead of us. The educational institutions in America are of two kinds: First, there are the large schools, colleges and universities, like our own, to which the youth goes before entering on his life's work; and second, there are schools and colleges at which the ordinary workman may study all the arts and sciences bearing on his particular craft, often without paying any fee. In the State of Minnesota, for example, the whole course of education from school to university is free to all. There are throughout the country so many institutions founded by 'captains of in-

Note by the Bureau of Foreign Commerce.—In the fiscal year ended June 30, 1900, our exports of iron and steel were valued at \$121,858,344.

dustry' for the advancement of technology that almost every workman can find close at hand some such place where he receives all necessary aid for his advancement in the technical knowledge required for his special work.

"The liberality of rich American citizens in the foundation and endowment of such institutions is a potent factor in the educational development of the nation, and even the most progressive of European countries cannot show such provision for the advancement of learning, especially in its application to the industrial arts. Nor is this generosity merely posthumous; it is often accompanied by a living personal interest and control. As examples of it we may particularly mention the Pratt Institute, Brooklyn; the Drexel Institute, Philadelphia; the Armour and Lewis institutes, Chicago; Webb's Academy for Shipbuilders, New York; the splendid buildings and equipment of the mechanical, physical and chemical departments of the McGill University, Montreal; the Leland Stanford Junior University, California; and the new University of Chicago. The total value of the property held by such colleges and universities amounts to the enormous sum of £57,727,434, and their total income is nearly £5,000,000." RUFUS FLEMING.

Edinburgh, January 10, 1901.

### Herrick's Improved Screw Case.

The F. A. Herrick Co., Jackson, Mich., are manufacturing a large number of useful specialties that are required in the proper equipment of a Hardware store at the present time. Nearly every one of these specialties has a unique value of its own. We present herewith one of the latest that they have constructed, which is the Improved Screw Case No. 4. It is constructed in a remarkably substantial manner for the purpose intended. The wood work is of oak, enclosed with galvanized wire cloth. The illustration herewith shows the case partly open, exposing the several bins required for the various sizes of screws, and in the four sections of the case there are 424 of these bins. It is remarked that two gross of each size of screws up to 1 1/2 inch can be put into each bin. These bins, or compartments, are made of tin, with the bottoms rounded in order to facilitate the subtraction therefrom of the screws they may contain. Attached to the fronts of the bins are cardboard strips. These are left blank so the dealers can mark the size upon

HERRICK'S IMPROVED SCREW CASE.

them which they desire to carry in stock. The swinging sections of the case slide on iron shoes, which are attached to the bottom of the stationary part, and permitting the operation to be performed with ease. The case provides accommodations for a well-assorted stock, not only of Flat Head Bright and Brass Screws, but also Round Head Blue, Bronze Metal and Nickel Plated Screws, and thus fills a very desirable place in the equipment of a modern Hardware store. When in position it occupies 23x28 inches of coun-

ter room, and is but 39 inches high. The manufacturers state that the case holds a large assortment of screws, and the convenience with which the bins can be marked to suit the kinds and sizes carried in stock is an important feature. Then again in a very few moments the salesman can have before him the full line of screws open for his selection. The bins are readily kept clean by using a hand bellows occasionally to blow the dust out through the wire cloth with which the case is surrounded. When packed ready to ship the case weighs but 140 pounds. It needs but a glance at the illustration to convey very firm conviction of its general utility.

### Dangler's New Gasoline Range.

The Dangler Stove & Mfg. Co., Cleveland, Ohio, whose announcement appears on another page, have long been recognized as pioneers in the manufacture of Gasoline Stoves.

DANGLER'S NEW GASOLINE RANGE

They have recently placed upon the market an entirely new model of range called "The Pearl," an illustration of which we give herewith. It combines in its construction the latest improved features of the up-to-date, natural gas and vapor stove, and is designed especially for the use of gasoline. It is provided with the "Gen" burner, lift-out tank, and swinging shelf; is a powerful baker, and extremely ornamental in its general appearance. It should meet with a large sale. The Dangler Stove & Mfg. Co. has been established since 1880, during which year the entire output of vapor stoves in the United States amounted to 1,000. In 1881 it grew into an instant popularity that increased the output fivefold, and has continued in a similar ratio with each succeeding year, until during 1900, when the Dangler Co., and the eight other firms largely engaged in manufacturing these goods, produced upward of 400,000 vapor stoves.

With regard to the objectionable abbreviation "Jap," the Japanese newspaper *Yorodzu Choho* says: "To us the word 'Jap' always sounds like an insult. Whenever we see it used in American papers, we are tempted to return the insult in the fashion a witty Japanese did to an impolite American. The American said to him: 'Which nose are you, Japanese or Chinese?' Without making any reply to the question, the Japanese said curtly: 'Which kee are you, monkey or Yankee?'"—*Pall Mall Gazette*.

Doctor—You need more exercise.

Indisposed—Why, I'm steadily engaged in painting houses, now.

Doctor—Working by the day, I expect.

Indisposed—Yes.

Doctor—Well, you'd better work by the piece for a while.—*Exchange*.

### New England Hardware Dealers' Association.

The eighth annual meeting of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, Mass., Wednesday evening, February 13th, President Burditt in the chair. The minutes of the last meeting were read and approved. This was followed by the annual report of Secretary Farless. The report was an extremely interesting one to the members, as it detailed the workings of the association for the year past, giving all the points of interest that were passed upon by the members, and recording the facts that made the past year an eminently successful one. At the conclusion of the reading of the report of the secretary, Treasurer Sanders followed with his report, which gave every evidence of the financial affairs of the association being in excellent condition. These reports were received, accepted and placed on file.

D. Fletcher Barber, of the Nominating Committee, presented the following list of officers for the ensuing year. On motion of E. J. Neale, they were elected by the secretary casting a single ballot:

- President,  
Geo. W. Burditt, Cambridgeport, Mass.
- Vice-President,  
S. D. Balkam, Jamaica Plain, Mass.
- Second Vice-President,  
M. A. Chandler, Boston, Mass.
- Third Vice-President,  
E. C. W. Bliss, Boston, Mass.
- Secretary,  
Jas. A. Farless, Boston, Mass.
- Treasurer,  
Henry M. Sanders, Boston, Mass.
- DIRECTORS:  
D. Fletcher Barber, Boston, Mass.  
J. B. Hunter, Boston, Mass.  
H. L. Sawyer, South Framingham, Mass.  
John M. Fiske, Natick, Mass.  
E. F. Turner, Boston, Mass.  
John F. Robinson, Hudson, Mass.  
John Duncan, Boston, Mass.

On motion of E. J. Neale, it was voted that the committee of five appointed April 25, 1900, which had in their charge the resolution relating to the manufacturers selling direct to the consumer, should be given full power to agree upon any terms that would be satisfactory to all interested.

Samuel A. Bigelow, of the Bigelow & Dowse Co., Boston, was then presented by the president, and he delivered an interesting address on the outlook of the Hardware trade for the coming season. We make a few extracts from this address, which was listened to with earnest attention by all present.

We have been taught to judge the future from the past. Who believes this is a good maxim to follow to-day? The many changes have made it impossible. The merchant who does not keep up with the times gets left in the race. We were told at a late dinner of the New England Iron & Hardware Association how business was done in the early and middle part of the past century. How it was dishonorable to seek to take away a neighbor's customer. How necessary and reasonable it was to ask and get a good profit on all sales. How usual and how pleasant it was to have a good and satisfactory credit balance to our profit and loss account at the end of each year. How the Hardware dealer then was prominent and respected in church, in society and in the business community.

Have the later generations improved on the teachings and examples of their predecessors? I venture to say they have not. Two years ago the Hardware trade was in a worse condition morally, physically and financially than ever before.

THIS CHANGE FOR THE WORSE  
has been going on for many years. I cannot say that the first two conditions have changed much to-day, but the latter must have improved on account of the rise in values brought about by gigantic combinations and consolidations, but not by any changes in our manner of selling. The application and hard labor demanded of employees in the past is not possible to-day. The days when clerks commenced at

the foot of the ladder and did menial work with a small salary, and earned promotion only by merit, are things of the past. Notwithstanding, it instilled in them a knowledge of the business they could get in no other way.

\* \* \*

Too many houses are dependent upon men who have  
TOO LIMITED KNOWLEDGE OF THE BUSINESS  
and who aim to make a record in volume of sales, without regard to the profits of the same. This class of help does more to demoralize profits than any other. I do not think any of us knowingly will encourage such men, but I do think if we made a careful investigation we would in a degree remedy this evil.

After the conclusion of Mr. Bigelow's remarks, a number of members were called upon by the president to speak upon the subject, among which were Messrs. Balkam, Barber, Neale, Hunter, Tarbox, Richardson, Nichols and Pierce. The discussion excited considerable interest from the fact of such general participation, and made the proceedings of the meeting possess more than the usual interest.

### Inter-State Retail Hardware Dealers' Association.

The Inter-State Retail Hardware Dealers' Association will hold their annual meeting on March 6th at the Sherman House, Chicago. The date will enable the delegates to take advantage of the Spring meeting called by the National Association of Merchants and Travelers, who have their convention about that time, as tickets may be purchased by the delegates on the certificate plan good for the period between March 2d to 16th. It is intended that the several States affiliated with the Inter-State Association shall be represented by two delegates who have been appointed at each State convention just previous to the Interstate meeting. The hope is also advanced that some of the new States falling into line will also send delegates to complete their affiliation. The sessions of this annual meeting will be entirely executive, and delegates alone will be permitted to take part in the proceedings.

### Louisville Retail Hardware and Stove Dealers' Association.

At a meeting of the Louisville Retail Hardware and Stove Dealers' Association, held at the Odd Fellows' Hall, February 8th, the following officers were elected: President, Joseph Knapp; first vice-president, Frank Geher; second vice-president, William Hinckle; secretary, Samuel B. Korb; treasurer, Joseph C. Kirchdoerfer. Ex-President Paul Wagner was unable to serve another year, on account of the amount of labor attached to his present position as secretary of the State Association. It was decided at this meeting that the Association attend, in a body, the convention of the State Association, held in Lexington on February 12th and 13th.

### N. & G. Taylor Co.'s Tinplate Works.

N. & G. Taylor Co., Tinplate Manufacturers, have just erected, at their Tinplate Works in Philadelphia, a large and commodious machine shop complete in every way with the most modern machinery, turning lathes, drills, shapers, forges, emery wheels, etc. They have also lately added two tinning stacks, making now twenty-five in all. Their tin house is acknowledged to be, in its equipment, the finest in the world. They are running to their full capacity, and report a most excellent business in all their departments. They also have given out the contract for an additional building for their assorting and warehouse department, which will give them much greater facilities for prompt handling and shipping goods. The recent large additions to their rolling mills at Cumberland, Md., necessitated the above improvements.

•

No single fact in science has ever discredited a fact in religion.

## WISCONSIN RETAIL HDWE. ASSOCIATION.

The Wisconsin Retail Hardware Association held their fifth annual meeting at Milwaukee on the 6th and 7th inst. As was the case at previous conventions, the headquarters of the association were established at the Republican House, which had been greatly improved since the last convention by the addition of an extension, containing a large and eligible room amply sufficient for the use of the convention, making unnecessary the walk previously had to another hall outside of the hotel proper.

The opening session of the convention was called to order Wednesday afternoon at 2 o'clock. All the officers of the association were on hand with the exception of Treasurer A. F. Schlegelmilch, of Eau Claire, who expressed in a letter his inability to attend. Nearly 150 delegates were present. President A. H. Sheldon, of Janesville, then delivered his annual address, from which we make the following extracts:

"One year ago we were on a very uncertain base of operation. Prices for goods in our line were at their extreme limit in height, and no one bought more than to supply his daily needs and each one was anxious as to what the future would bring us. This continued until the Gates manipulation of stock occurred, and then the \$1 drop in nails came, and following this all steel and iron products in sympathy fell to nearly old prices. The year 1900 was noted for a falling market, as was the year 1899 a rising one. But we are to-day on a much safer basis than one year ago and the prospects brighter by far.

"The high prices of 1899 deterred the majority from carrying out their plans for building, and in many locations scarcely any new buildings were constructed, but gradually since the decline we begin to see a change and I prophesy that 1901 will show us a 'hummer' for trade. The past year has also been a presidential year, which always more or less interferes with regular trade, but that is now over, and we can rejoice that we shall have rest from politics for another four years, and know pretty surely what a dollar is worth.

\* \* \* \* \*

"The Executive Committee have done their work well and have ever been ready to do all they could for the good of the association. Your secretary, of course, has been the main spoke in the wheel—in fact, nearly the whole wheel; I cannot say too much for his indefatigable energy in keeping in line the whole work, for the year has, in many respects, been one of disappointments and failures over which we had no control. His report will show that financially we are in first-class shape; also, he will explain what was done at the Inter-State Association meeting and the results."

The secretary stated a box would be placed in position in which questions from the members might be deposited during the session, which, under the head of "Question Box Topics" would afterward furnish material for discussion.

The following appointment of committees was then made by the president:

Transportation—C. A. Peck, Berlin.

Resolutions—L. Findeisen, Green Bay; O. P. Schlafer, Appleton.

Grievances—John Hughes, Fond du Lac; D. G. James, Richland Center.

Reception—Jacob Kornelly, Milwaukee; Robert H. Suetinger, Two Rivers; W. N. Shandren, Kenosha.

Legislation—Jno. Summers, D. G. James, Richland Center.

Auditing—F. J. McPherson, of Oshkosh; Mr. English, of Baraboo.

Communications were read from Mayor David S. Rose, of Milwaukee, and also from the Citizens' Business League, inviting the association to meet in Milwaukee again next year. It was also stated for the benefit of the delegates present that the local jobbers and manufacturers had provided entertainment for the members, which took the form of tickets for theatrical performances on both Wednesday and Thursday evenings. A letter was read, which had been received

from the Chicago Hardware Dealers' Association, that they had appointed a committee to attend the annual meeting of the Wisconsin Hardware Association, not alone for the purpose of receiving such information as might be obtainable, but also for participating in a discussion having reference to department store and catalogue house competition. The National Enameling & Stamping Co. extended an invitation to the convention to visit their works in Milwaukee on Friday morning. The same was accepted with thanks.

The secretary, C. A. Peck, then read his annual report, which was an exhaustive one, having especial reference to the executive character of his work and the extensive nature of it, justifying the high praise given, by the president in his address.

The reading of the report was listened to with great interest by the delegates present, and was followed by the treasurer's report, which was read by the secretary. The president then introduced Thomas McCracken, of Minneapolis, secretary of the Minnesota Retail Hardware Association, and he made an address to the convention, from which we make a few extracts to indicate the interest of the subject:

I am glad to meet with the Wisconsin Association, and I am glad to see that you interest yourself to come to your annual meeting. I think if there is any place a member should go it is to the annual meetings. There are questions of all kinds come up that you cannot understand from a reading of the report. The Question Box is undeniably one of the finest features of your association. If there is anything that has troubled you in your business regarding your association or regarding department stores or catalogue houses, or any one of the thousand and one things that trouble you during the year, put it down in the form of a question, and put it in the Question Box. That will come up to-morrow morning.

Our association up in Minnesota has the same features that you have here. We have had considerable trouble the last year with department stores, and while Minnesota has always been very radical and among the first to go on record against the department stores and catalogue houses—I guess her constitution and by-laws are the most radical of any association ever formed—at the commencement of this year we found we were met by a demand or suggestion that the department store trade in the large trade centers be excluded from the unfavorable list.

\* \* \*

The department store trade, as looked upon by our association, does not interfere with the retail Hardware trade generally through the country; it is purely local—almost entirely so.

This whole country is going just as fast as it possibly can go on to a cash basis. There is no good reason why Hardware cannot be sold for cash. I think every Hardware dealer should have a catalogue of these dealers, and say to his customers, "We will sell you at the same price, but you must pay the cost of boxing and other expenses in addition that you would have to pay if you bought from the department store or catalogue house."

\* \* \*

We have a very large local association in Minneapolis—some 150 to 200 members. They gave us their consent, and they said they did not care a particle about the large department store trade. I don't know what view you will take of this, but I thought I would tell you of it. We have a membership in Minnesota of about 425. I think we have taken in more members since we took that step than we did in proportion previous to it. It is something for you to think over. A member of a large firm told me that if they were given their choice of the retail trade of the State of Illinois or that of the department stores, they would take the department store trade. They said that the department store trade would take all the goods they manufactured.

Some discussion followed the remarks made by Mr. McCracken, which was participated in by several of the delegates present, among them Andrew Noll, of Chilton; L. M.

Nash, of Grand Rapids; Otto Schlafer, of Appleton, and R. H. Suettinger, of Two Rivers, giving their experiences in conducting business on a cash basis, which was a subject extremely interesting to the delegates. Secretary Peck, as well as other members, contributed their views to the discussion, which was an interesting one.

#### THURSDAY MORNING SESSION.

The president appointed the following committee on nominations of officers: James Montgomery, Wausau; John Hughes, Fond du Lac; D. G. James, Richland Center; Andrew Noll, Chilton; C. B. Wagner, Burlington; A. D. Race, De Pere; L. Findeisen, Green Bay, and F. M. Finch, White-water.

The convention adopted a change in the by-laws which provided that two members of the executive committee should hold over each year. The president then welcomed the delegation from the Chicago Hardware Dealers' Association, which consisted of D. McLaughlin, W. B. Costello, Geo. A. Engelhardt and F. F. Porter, with a brief address, and the response to the same was made by Mr. McLaughlin. On recommendation of the executive committee it was adopted that the offices of secretary and treasurer should be combined, and that the person filling the combined office would be required to give a bond.

The executive committee also asked for more time to consider the subject of acting in union with Minnesota, North Dakota and Iowa relative to action against such manufacturers and jobbers engaged in selling department stores. They requested the Association to empower the committee to act, and this the convention, on motion, granted. The usual vote of thanks was reported by the Committee on Resolutions, and the same was unanimously adopted by a rising vote. On report of the Auditing Committee it was stated they had examined the accounts of the secretary and treasurer and found them correct.

The president called on the Chicago delegation for a statement of their views on the department store and catalogue house competition, and Mr. McLaughlin responded for the delegation, and in his remarks he dwelt particularly on the competition of the department stores in the city of Chicago. He stated that Chicago has at present no less than 25 department stores, some of which are of very large size, having 500 employees. The principal stores of this character are found along State Street, and the impression seems to have become deeply rooted among the people, especially the ladies, that State Street is the only street in the city on which to buy anything. In Chicago there are more than 400 retail Hardware stores, and these stores are finding very serious difficulty in maintaining their footing and are obliged to adopt every method possible to continue to hold on to the trade. Mr. McLaughlin said that his own association found it desirable to get together and purchase goods through a committee acting for the united members, thus enabling them to buy in large quantities from manufacturers and get the lowest prices. He said that in this way they could compete on certain lines with department stores. He invited the members of the association to attend the meeting of the Illinois Association at Galesburg on the 19th.

He was followed by similar remarks from Messrs. Engelhardt, Costello and Porter, which were listened to with every indication of interest from the members of the convention.

The Question Box was placed in charge of a committee consisting of L. M. Nash, of Grand Rapids; Fred Gassman, of Milwaukee, and George P. Dana, of Fond du Lac, who were empowered to select such subjects as were desirable for discussion for the interest of the Association.

A very interesting address on the subject of "Advertising" was read by Fred Peck, of Berlin, who is a son of Secretary Peck. It is a little too long for our columns on this occasion, but we hope to make use of it in a future issue, as

there are many original ideas in it worthy of the reader's attention.

The Question Box was taken up, and among the subjects discussed were the following:

What is the best way to sell a Cook Stove to a man if you have doubts as to his credit?

How can you prevent creosote from forming in a chimney?

What is the surest method to secure the entry of goods delivered either for cash or for book account?

Is this organization to accumulate money? If not, why should it not reduce the fees paid by members?

Is it not time that we organize a National Retail Association?

How can goods be so marked that in case they are stolen they can be identified?

What has been the experience of retailers in closing early?

What is the best Shingle Nail, Three Penny Cut or Three Penny Wire? Which will last the longest?

Mr. McCracken, of Minneapolis, on being called upon again, read an interesting address referring to the present movement among the Hardware trade, a movement that, he argued, had its mission in association, its keystone in organization, and its ultimatum in the federation of the Hardware trade. He expressed himself as being very much pleased with the wonderful growth of the Wisconsin Association, and, altogether, held the attention of the assemblage throughout his address, in which reference was also made to the subject in which he is known to take an abiding interest, that of the Retail Hardware Dealers' Mutual Insurance Co., of Minnesota, referring at length to the methods and advantages offered the trade by an organization of this character. The committee returned a vote of thanks to Mr. McCracken for his address, after which adjournment was had.

#### THURSDAY AFTERNOON SESSION.

The Committee on Nominations made the following report:

President,

John Hessel, Antigo.

Vice-President,

Otto Schlafer, Appleton.

Secretary,

C. A. Peck, Berlin.

Treasurer,

George Leverenz, New Holstein.

Executive Committee.

Henry Droegkamp, Milwaukee; Arthur Heins, Elkhart Lake; E. H. Ramm, New London; James Wilkie, Fond du Lac.

The secretary, by unanimous vote, was directed to cast one ballot for the entire list of officers, and they were declared duly elected.

The discussion of the contents of the Question Box was continued with a number of other questions contributed by the members. When Irving A. Sibley, of South Bend, Ind., was called upon to give reasons why the Wisconsin Association should join the Inter-State Retail Hardware Dealers' Association, he explained the objects so thoroughly that a committee, consisting of John Hughes, James Montgomery and C. A. Peck, was appointed to consider the question, and make a prompt report. They retired, considered the question, and recommended that Otto Schlafer and L. M. Nash be appointed to attend the next meeting of the Inter-State Association, with power to join that Association if they deemed advisable. A. H. Sheldon, of Janesville, then read an extended paper on "Trusts," at the conclusion of which a communication was read from the Kelly Axe Mfg. Co., in which they promised not to sell to department stores and catalogue houses, and for this recognition of the views of the convention a vote of thanks was given them. The convention, within a very short time, adjourned sine die.

A large number of manufacturers were represented at the convention by either members of the firm or company or their traveling representatives. Quite a number of them made a fine display of samples, taking advantage of the opportunity afforded of seeing the entire Hardware trade of the State, and impressing them with the extent of their desirable assortments. Among these manufacturers may be mentioned: The Stowell Mfg. & Foundry Co., of South Milwaukee; Great Western Mfg. Co., of Laporte, Ind.; Washington Cutlery Co., of Milwaukee; Wilcox Mfg. Co., Aurora, Ill.; Art Stove Co., Detroit, Mich.; Toledo Register Co., of Toledo, Ohio; Wheeling Corrugating Co., of Wheeling, W. Va.; Berry Bros., Detroit, Mich.; Lawrence Bros., Sterling, Ill.; Morley Brothers, Saginaw, Mich.; Charles Morrill, Broadway Chambers, New York; J. D. Warren Mfg. Co., Chicago, Ill.; E. C. Atkins & Co., Indianapolis, Ind.; Reading Hardware Co., Reading, Pa.; Coldwell Lawn Mower Co., Newburgh, N. Y.; Allerton-Clarke Co., Chicago, Ill.; George H. Bishop & Co., Cincinnati, Ohio, and many others. The local jobbers were also represented by their traveling men; large numbers of whom were present. Altogether, it was the most important convention the Wisconsin association have ever held, and gives an admirable evidence of the interest which the dealers take in matters of this character, ever willing to appreciate, and to limit the unfair competition with which the Hardware trade is constantly threatened.

### Automatic Strip Metal Straightening and Cutting Machine.

The requirements of coopers and manufacturers using strip metal straightened and cut in lengths have now been met by the Straightening Machine, illustrated herewith and manufactured by the F. B. Shuster Co., New Haven, Conn.

AUTOMATIC STRIP METAL STRAIGHTENING AND CUTTING MACHINE.

It straightens and cuts the material in lengths of 36 inches and shorter, at the rate of 200 feet per minute, and, if desired, the machine can be built to cut 20 feet and shorter lengths. It will be noticed that in the construction of the machine a shaft about as long as it is intended to cut the metal is attached to a fulcrum and cutting-off lever, and rotates with each movement of the lever. This shaft takes its bearings on standards fastened to the pipe shown on the face of the machine, and which is supported on the floor by a bracket on the end thereof. Above the shaft, and held in arms fastened on the shaft, is a guide bar grooved, or channelled, to allow the metal to feed into it. To hold the metal in the guide bar is an apron held in arms fastened to the shaft above the guide bar, and shown with springs thereon, said springs giving pressure to hold the retaining bar against the guide bar. When the cutting off takes place, the lever moves forward on its axis, cutting the material, and, at the same time, by reason of projections on the arms holding the guide bar, acting in contact with the arms holding the apron, opens said guide bar and throws the metal into the catch arms on the bracket holding the mechanism and fastened to the back. In this guide bar is a wire, on the end of which is a piece of metal fitting the channel of the bar. This is used as a gauge against which the metal will strike. The gauge being connected at its upper end by a wire to the clutch on the cam shaft, when the straightened metal strikes the gauge, as it passes through the groove

in the bar from the cutting-off knives, it throws the clutch in, and the cutting-off lever works instantly. The gauge is held in place by short pieces of wire looped under the rods and the ends passing through holes in the guide bar and then twisted together. These wires are cut and others put in as the gauge may be moved for a longer or a shorter cut. The adjustment of the straightening rolls is obtained by the hand wheel on top, and may be varied while the machine is running. The feed rolls should be brought against the stock sufficiently hard to prevent any slipping that might occur through the straightening rolls. This machine is built in various sizes, to handle material varying from 1-2 inch to 4 inches in width, and in thickness for 1-4 inch and under. The F. B. Shuster Co. also build a larger machine, constructed especially for straightening and cutting to lengths sheet metal of 12 inches in width and narrower. This machine is used by strip stock manufacturers for cutting up material which is used by the manufacturers of sheet metal goods.

### Recent Trade Publications.

MCKENNA BROS. BRASS CO., LTD., Pittsburgh, Pa., have recently issued their Tenth Annual Catalogue of Saloon Supplies, of which they have been manufacturers for almost forty-five years. Their catalogue covers about everything needed in this line of metal construction, and in the fittings necessary for the proper equipment of an establishment of this kind, many of the pages in the catalogue being devoted to illustrations of the same. It conveys a perfect idea of the amount of labor-saving appliances that are now necessary for the proper running of a saloon of importance. Its contents embrace Ice Boxes, Coolers and Stands, Beer Pumps in a great variety of styles, a large variety of Faucets needed for special purposes, together with all the plain styles that have been on the market for a number of years. Not the least important of the contents of this catalogue are a number of pages devoted to recipes for various concoctions, in the dispensing of which a saloon may become famous.

BROWN & WALES, 69-83 Purchase Street, Boston, Mass., have recently issued a pamphlet catalogue of over 225 pages, fully illustrating and describing the Heavy Hardware of which this concern have been large distributors for many years. Selling from seven mills all sizes and grades and deliveries of iron and steel, they claim to be the largest dealers in their special line in New England, and the contents of this catalogue would certainly indicate their claim is well founded, as they embody all the large variety of this class of goods of Hardware in the New England circuit. This catalogue should be in the hands of every Hardwareman in that territory, not only for the benefit of knowing where these goods may be readily obtained, but also for the large amount of information it contains of a special character in connection with this class of goods.

WILLOUGHBY FORK & MFG. CO., Willoughby, Ohio. Twelve-page pamphlet catalogue, printed on excellent coated paper in two colors, in which is given a full description, fully illustrated, of the line of Heavy steel goods manufactured by this concern, this being a specially illustrated catalogue covering this class of goods, which includes coal, coke and farm forks, together with hoes and rakes. A very attractive catalogue. Included in the description are the dimensions of every fork, list prices are attached, and mention is made in every instance as to the mode of manufacture in this style. "Every fork is made from one piece of best crucible steel, no welds;" "measure width of forks across centre, not across the points of the tine," all of which conveys information desired by the purchaser in every instance.

The manufacture and sale of dolls in Europe exceed 26,000,000 a year. One firm in Paris turns out 2,000 dolls a day, and many other houses make even larger numbers.—Ex.

## IOWA RETAIL HARDWARE DEALERS' ASSN.

The third annual convention of the Iowa Retail Hardware Dealers' Association was held at Dubuque on February 13, 14 and 15. The opening session was held on Wednesday morning in the large hall of the Bank and Insurance Building. At this session, which was informal, work for the convention was put in shape under the direction of the president, H. A. Cole, of Council Bluffs. The time given to this necessary preparation enabled the secretary, C. W. Brelsford, of Villisca, to enroll new members, receive dues, and keep an eye upon the register to see that the names of all the arriving delegates were placed thereon. As is usually the case, a number of names of the delegates present failed to get on the register.

At the Wednesday afternoon session, Mayor C. H. Berg, of Dubuque, welcomed the Association to the city in a very pleasant address. J. H. Shields, president of the local Business Men's League, also joined in the welcome extended by the Mayor and gave a very interesting brief historical sketch of Dubuque. President Cole made an eloquent response to the Mayor's address on behalf of the Association, in which he gave some of the reasons why they desired to have their convention held in this important city of the State. He called on J. W. Conchar, of the Schreiber & Conchar Mfg. Co., to indicate the importance of the city by giving the names of Dubuque manufacturers engaged in the manufacture of goods universally handled by the Hardware trade. Mr. Conchar surprised many of those present by the long list of names which he succeeded in giving.

Secretary Brelsford then read his own report, and also that of Treasurer McIntire, which gave evidence that on February 1, 1900, the Association had 305 members, and now showing a gain of 128 during the year, they had 432 on the roll, and this number did not include a number of honorary members. President Cole then read his annual address, from which we make a few extracts:

It is a privilege to address you at this, our third annual meeting. The dealers who attend this convention, held as it is in the extreme corner of the State, are to be commended for their unselfish devotion to the welfare of their fellows and our calling. No dealer can mingle with such without getting great benefit. I have never yet attended one of our retail conventions that I did not carry home with me many ideas that I could turn into dollars and cents during the following year. In looking over the past year and its results, we can undoubtedly, each one, look back on the busiest year or the past decade, not perhaps in volume of business, but made so by the fact that our shelves were loaded with high cost goods, and the certainty of a declining market staring us in the face. Our hustle came in to reduce stock before the drop. The warm Fall, too, extending clear beyond the selling season for our heating stoves, required redoubled effort to effect a cleaning up of stock in this line. Altogether, the dealer who can point to living expenses paid and a small surplus over January 1, 1900, can congratulate himself on being a wide awake and successful merchant.

\* \* \* \*

I want to state here, as a preliminary to what may follow, that the annual dues of each State association should be \$25 per year at least. There is not a Hardwareman in Iowa with a clear working capital of \$1500 who could not afford to pay \$25 per year, and \$50 if need be, for the privilege of joining our retail association. I will make the statement stronger by saying that not one of us but ought to be willing to pay this amount every year for the welfare of our fellow retail dealers if we knew to a certainty that not a dollar of it would come back to us as an individual. We are open hearted in our families, we are generous with our neighbors, we help maintain our public institutions, we gladly contribute to the support of our churches. Is there any reason why, when we are confronted with a proposition to contribute to an institution that is organized purely and solely

for the purpose of removing the thousand and one evils to which our life calling is subjected—is there any reason, I say, for us to hold back and say, "Will I get my money back with interest?" Do you know that in the National Jobbers' Association each and every member contributes a \$25 fee and \$75 annual dues to maintain their organization, giving them \$15,000 annual income?

\* \* \* \*

I want to call attention to an abuse that may bring on me some sharp criticism. I make it, nevertheless, because I know I am right, and because I want this fact to be discussed, and its truth crystallized in the method of procedure of every State association in the country. It is the indiscreet and wrongful use of the boycott. Both manufacturers and jobbers can be made to feel our displeasure without damning them, or boycotting them in an offensive manner. We are organized with the idea of standing by our friends, and by so doing, punishing our former friends who are now offending us. We must use our club of withdrawn patronage so positively, and yet so courteously, that our old time friends will yearn for the re-establishment of former pleasant relations, without being able to say that they have been treated unjustly, or have been abused, and without our having been discourteous or offensive, or having aroused the passionate relation of the parties we are punishing. Don't boycott the man you don't want to patronize. I even say, don't quit buying goods of him entirely. He may control specialties you need. His traveling salesman is your friend, and can give you valuable information on every question asked; but if it has been your custom to give this house an annual trade of \$3000, and you find their methods are a menace to our welfare, simply cut your purchases down to about \$300, instead of \$3000.

Remember above all that their representative is still the same old friend. Treat him kindly. Look over his catalogue every time he comes. Get all the pointers you can, but see to it that, instead of a liberal bill, you confine yourself to a few of his specialties, and that your purchases are but very meager. Let the salesman know that you regard him as kindly as ever. Don't transform the business transgression into a personal animosity, either against the salesman or the proprietor. Remember the old adage, "One man can lead the horse to water, but ten men can't make him drink." The above plan, instead of clubbing the horse, to make him drink, simply opens the bung hole, lets the water all out, and treats him nicely, until he gets good and thirsty and whinnies for his water.

The address was filled with interest, and was listened to with every attention. At the conclusion of the President's address, the convention went into executive session to consider the best method to meet the competition of catalogue houses, President Cole reporting what had already been done by the Inter-State Association in this direction, and strongly urging affiliation with that organization as being an important subject for consideration.

### WEDNESDAY EVENING SESSION.

The Wednesday evening session was devoted to the discussion of questions from the "Question Box," previous to which E. P. Messer, of Sheldon, read a paper on "Catalogue House Competition," giving his personal experience in the efforts made to combat their selling goods in his vicinity. His remarks were to the point, and brought forth similar expressions from other members, showing that the best results may be looked for in this opposition to catalogue house competition when all the local tradesmen are united. Among the questions from the "Question Box" on which discussion was had, were the following:

- Does a standing advertisement pay?
- Has any one used trading stamps?
- How can we make a tin shop profitable?
- How do you keep track of inquiries or prospective customers for Stoves or other goods?
- How do you order stove repairs and prevent accumulations?

How do you clean out hard stock after inventory?

How do you figure out a profit on a bill of Hardware for a contract?

Is it better to figure cost on each item of Builders' Hardware, or on the whole transaction in a lump?

Is single or double entry the best method for keeping books for retail dealers, and what is the best ledger?

These all met with considerable attention, and an interesting discussion was the result, the remarks of the delegates being based almost invariably on personal experiences, showing varying methods to accomplish the same results, and to that extent held the attention of those present to a remarkable degree.

#### THURSDAY MORNING SESSION.

The Thursday morning session was devoted almost entirely to the reading of papers on various subjects that had been prepared by the delegates for the interest of the members of the association. Among these, H. E. Tredway, of the A. Tredway & Sons Hardware Co., Dubuque, read a paper on "The Mutual Relation of Retailer and Jobber," from which we make a few extracts:

The jobber has three causes for his existence, none of them so great as the one for the retailer, but each of much moment in commercial economy.

1. The retailer seems willing to allow the jobber a living for the convenience of buying many of his goods at one time and in one place.

2. The average manufacturer is willing to concede the jobber a lower price for quantity purchases.

3. The railroads are willing to make the jobber lower rates on large quantities of freight in one shipment than they can or do make on small quantities in many shipments.

Primarily, as I before stated, in my business, either that of a retailer or jobber, there is but one vital point, net profit. If that is obtainable all else is secondary; but to the really successful business man there is the further consideration of increasing that net profit to a point where it affords more than a mere interest on the capital he invests and wages for the labor he puts in. Therefore, the wide awake dealer, and jobber as well, searches for the best methods of handling his business affairs, that the most favorable results may be recorded at the end of the year's business.

\* \* \* \*

A necessity being, therefore, proven for the existence of the jobber, for the convenience and profit of the retail dealer, a second question is brought up: Should any goods be bought of manufacturers? Can they be purchased to the retailer's ultimate profit? I say they cannot, and can bring forward some strong arguments to prove it. I admit first that sometimes you can and do buy certain articles a little cheaper by buying direct; I admit that you may occasionally in this way underbuy and thereafter, unfortunately, undersell your competitor; but as this reduces his price and profit, and as the shoe is as likely to be on the other foot, it simply reduces the percentage of profit for both you and your neighbor in the long run. Generally, however, you pay just about as much for these articles as if bought from the jobber, but in your judgment (and we jobbers always concede the judgment of the retailers good) the goods are a little more desirable for your trade either because they are intrinsically better articles or because you have the exclusive sale of them; but, on the whole, you will generally admit that when the excess freight is paid the advantage even in apparent cost or value is not great, and the influential point to you is the exclusiveness of the goods. An excellent point, too, and one which no dealer or jobber can dispute.

\* \* \* \*

#### HANDICAPS OF THE CATALOGUE HOUSE.

1. The merchandise cannot be in the consumer's hands at once.

2. The enormous percentage which the transportation cost between the catalogue house and the consumer will ordinarily bear to the value of the material purchased.

3. The tremendous advertising and catalogue expense.

4. House expenses of handling must be three to five times as great as a straight out jobber encounters.

5. The undue percentage which postage and remittance charges bear to the amount of the purchase.

Against the catalogue house should be arrayed, then:

1. The established and reputable manufacturer, because if he sells them, no matter at what price, the regular retail figure must be cut and not only cut, but published broadcast, and the market for that manufacturer's goods injured by the reaction.

2. The retailer is against him, because his business is undermined and injured.

3. The jobber is against him, because if the retailer could possibly be superseded by the establishment of catalogue houses in all the larger cities and towns and all consumers be thus satisfactorily and speedily supplied from such stores, we jobbers (Hardware jobbers, anyhow) might just as well quit and find some other vocation now as any other time.

A. T. Nelson, of Wilton Junction, added his quota in a paper on "Retail Business vs. Banking," a subject that he had undoubtedly given considerable thought to, as may be judged from a few extracts we give herewith:

Now I may touch a vital spot in the heart of some of our members, but, pardon me, I do not reflect on any one. Just a gentle slap at you all. Montgomery Ward & Co.! Bugbear! White Elephant! I am not in harmony with lines upon which so many of the associations are operating. They are spending too much time whining about the woes and ills that have beset them from department stores, and not enough time upon the ways of successfully combating these interests. I am afraid to get rid of these houses entirely, lest we become a trust ourselves.

In the first place, who are Montgomery Ward & Co., Sears, Roebuck & Co.? Perfect gentlemen, business men and financiers, so far as I am able to learn, out in the world for trade. There is nothing dishonest about it, nor underhanded in it. We don't own any trade, and the worst drawback to the business house that carries a large stock, employs help, pays taxes and all this, is the little store box merchant who does his own draying in a wheelbarrow, lives above his store, slides down the banister at every click of the latch and knocks off a plum every now and then while you and your clerks are throwing stones at Montgomery Ward & Co.

The cross road merchant that gets the number of a Stove you have sold and sells a neighbor one like it, using your sale to show up the goods, then asks \$1 over cost, the customer taking the Stove from the station as shipper, without blackening—these are the fellows that bite. Nothing dishonest about it. How often the case, when besieged with dogs, while you are battling with the mastiff, the little cur slips in and carries off a branch of your trousers!

It would be just as reasonable for Montgomery Ward & Co. to appeal to Congress to prohibit us local Hardware dealers from nipping at their trade as for us to try to force them off of the market by law. At the same time we are paying for their advertising by sifting their names broadcast among the country buyers, who will naturally think that we are being pinched and the department store is really a good place to buy, after all.

G. L. Miles, of Grinnell, furnished a well-written paper on "Side Lines," which we hope to print in full in an early issue of *Hardware*, being unable to place it in our columns on account of its length.

W. A. McIntire, of Ottumwa, held the attention of the delegates present by reading a paper on "Some Elements of Success," which certainly proved to be a subject demanding close attention on the part of the delegates, who thoroughly enjoyed it.

At the conclusion of the reading of the papers mentioned, President Cole stated that while in Detroit recently he had called upon Geo. W. Hubbard, of Flint, Mich., president of the Michigan Hardware Association, and he had taken great pleasure in the visit, finding Mr. Hubbard progressive and up-to-date, and while there received a number of suggestions on the several lines of thought presented in the papers to the reading of which the attention of the delegates had been given. He then appointed as Committee on Nomination of Officers, H. Vincent, of Fort Dodge; Thomas Larsen, of Eldora, and L. H. Kurtz, of Des Moines.

#### THURSDAY AFTERNOON SESSION.

At the Thursday afternoon session, Mr. Miles reported an amendment to the Constitution recommended by the Executive Committee, empowering the committee to select the place for the annual meeting. An amendment to the By-Laws was also recommended, raising the membership fee from \$3 to \$5. This was unanimously adopted. The Executive Committee as Auditing Committee reported that the accounts of the officers had been examined and found correct. On motion of A. B. Carhart, of Manchester, a rising

vote of thanks was given to the manufacturers, jobbers and retail merchants of Dubuque for their bounteous hospitality.

The Committee on Nominations then presented their report as follows:

President, W. A. McIntyre, of Ottumwa.

Vice-President, E. G. Penrose, of Tama.

The committee further recommended that the selection of the Executive Committee be made by permitting the members from each Congressional district to name one member of the committee. This report was adopted and the Secretary was instructed to cast a single ballot for the nominations for President and Vice-President, which was done.

President McIntyre on taking the chair returned thanks for the honor conferred upon him, and made a brief but vigorous address in which reference was made to the practical benefits derived by himself from his connection with the association, and he stated that he relied upon the members to give him their earnest and heartfelt support and trusted that all the delegates would make every personal effort to make the next annual meeting the best they had ever held of the Iowa Association.

The names of those selected to serve on the Executive Committee were then announced as follows: Jacob Seither, Keokuk; A. C. Heymen, Miles; Louis Lindenberg, Dubuque; T. S. Narum, Waukon; L. H. Kurtz, Des Moines; M. W. Keating, Afton; H. A. Cole, Council Bluffs; H. Vincent, Fort Dodge; W. H. Miller, Cherokee.

A vote of thanks was given to the retiring officers on motion of E. P. Messer, of Sheldon. The Executive Committee then selected the following for the Grievance Committee: E. P. Messer, Sheldon; S. R. Miles, Mason City; C. M. Doxsie, Algona; George Lister, Manchester, and Frank Kupper, of Burlington. The convention then adjourned sine die.

A number of manufacturing concerns were represented at this convention either by members of the company or their principal travelers, many of whom made fine exhibits in their parlors at the hotels, among which may be mentioned: The Reading Hardware Co., who were represented by W. H. Bennett and A. H. Ferguson; the Wilcox Mfg. Co., of Aurora, Ill.; Malleable Steel Range Mfg. Co., South Bend, Ind.; J. P. Lindemann & Sons, of Milwaukee, Wis.; J. D. Warren Mfg. Co., Chicago, Ill., who displayed a section of their improved shelving, fitted up with samples, so as to make an accurate illustration of their perfect system; the Toledo Register Co., Toledo, Ohio; the Brand Stove Co., Milwaukee, Wis.; Stowell Mfg. & Foundry Co., South Milwaukee, Wis.; E. C. Atkins & Co., Indianapolis, Ind., and the Gem Cutlery Co., New York. Hibbard, Spencer, Bartlett & Co., Chicago, Ill., made a display of a large number of their lines, using an outside office in Dubuque for the display, which gave them much greater opportunity for the purpose than was possible at the hotel.

### Weapons Cost a Fortune.

It is said that in the bombardment of Alexandria, between 7 A. M. and 4:30 P. M., the British fleet in a somewhat vigorous fashion deposited 3165 shells upon Egyptian soil and about 500 Egyptians were killed. This was undoubtedly good shooting in view of the fact that it took the Germans when besieging Mezieres in 1870 at the rate of three and one-half shells a minute, 193,000 large projectiles to kill 300 people—that is to say, 643 shells a head—and that the Boers in the earlier stage of the present war dumped 2680 shells into Ladysmith and killed only eight persons.

In the Crimean war the total number of combatants was 1,460,500 and they fired 89,000,000 shots, with the result that 51,945 soldiers were killed in battle and 66,397 died from their wounds; therefore, to all intents and purposes, 118,342 bullets found a billet and 88,881,658 were wasted.

In the Franco-German war, where the weapons used were of a superior quality, especially as regards precision, the

victorious host of Germans fired off 30,000,000 small arm cartridges and 363,000 rounds of artillery, with the result that 77,000 French troops were killed outright or died from their wounds. The wastage, therefore, on the German side amounted to 30,286,000 shot and shell and that on the side of the French would amount to quite as much. The ordinary man will now have an inkling where money goes in war time.

It is unfortunate, in view of the fact that after the battle of Modder River the trenches in some places were knee-deep in cartridge cases, that cartridges are not very expensive, costing the royal laboratory, in the case of .303-inch cordite cartridges with bullet for small arms, about \$20 a thousand to make—a price somewhat suggestive of stock-taking sales and alarming sacrifices. In this engagement one battalion of grenadiers fired 52,000 cartridges (say \$1040 worth) and a battalion of the Coldstreams 126,000; wholesale value, \$2,520.

In 1898 the royal laboratory made, among many other things, 68,979,606 of these cartridges, which, if placed end to end, would extend from Woolwich half way to the Cape, in addition to 1,049,712 other cordite cartridges, intended for the Webley pistol and costing nearly \$12 a thousand to manufacture.

Cordite, by the way, which comes in handy as an explosive in so many ways, costs from 33 cents a pound—not much, perhaps, by the pound, but the price mounts up when 945,560 pounds are manufactured in the year, as at Waltham abbey.

Gunpowder varies in price according to quality in a marvelous manner. One quality of which little is manufactured at Waltham costs nearly \$2 a hundred pounds, while picric is quoted at about \$95 a hundred pounds; but powder at 15 cents a pound is generally used. Gun cotton in two and one-half pound slabs, measuring 6 1-8x6 1-8x1 3-4 inches, costs 30 cents a pound, and when by its aid "long toms" are disabled it is cheap at the price.

With regard to other weapons .303-inch Maxims are quoted at about \$425, without extras, by the royal small arms factory at Enfield, while a handy Gardner-Gatling chamber gun runs to about \$322 when taking a quantity. The 63,712 Lee-Enfield rifles turned out at the same factory cost \$13.60 each; 88,853 sword bayonets, \$1.70 each. Lances cost \$6 each, without their flags, which run to 17 cents each, and cavalry swords entailed an expenditure of over \$4.

One interesting item in respect to the panoply of war refers to the cost of the cuirass. The backs are priced at \$12.25, the fronts at \$14.25 each; but in addition to these there are rivets for the shoulder straps at 13 cents a hundred, shoulder straps at 10 shillings 3 3-4 pence each, and various studs and washers to be bought ere the Life Guardsman receives his gorgeous steel overcoat, which he leaves behind him when his "transport is on the tide."—*Chicago Chronicle*.

WALTER B. STEVENS & SON, 114 Chambers Street, New York, and 412 Commerce Street, Philadelphia, Pa. Pamphlet catalogue of 64 pages, devoted to Dog Furnishings of every description, and including Dog Collars in large variety, Cat Collars, fancy Bell or Pug Collars, Pug Harness, a large variety of small bells for various purposes in connection with this line of business; Dog Leaders, small Padlocks, Muzzles, Whistles, etc. Included in the contents are Sheaths and Belts and Sailors' Palms. Altogether, it covers the largest variety of these goods that has been brought to our attention, and should be in the hands of every Hardwareman handling this class of goods.

Fair Visitor—So you have really decided not to sell your house?

Fair Host—Yes. You see, we placed the matter in the hands of a real estate agent. After reading his lovely advertisement of our property neither John nor myself could think of parting with such a wonderful and perfect home.—*Tit-Bits*.

### Kentucky Retail Hardware and Stove Dealers' Association.

The Kentucky Retail Hardware and Stove Dealers' Association had its first annual meeting in the Grand Jury room of the Court House, Lexington, on February 12th and 13th. The meeting was well attended, as nearly every member of the association took pleasure in being present. President Geo. P. Dehler, Jr., of Louisville, called the meeting to order. During the first session, among other preliminary business, a number of new members were added to the roll making a total membership of 45. As the association had not as yet completed the first six months of their organization, this presents an extremely encouraging view of its importance. Its object is, of course, to further the general interest of its members and more particularly to protect its members from the manufacturers who sell direct to the consumer.

In the afternoon session regular routine business prevailed, during which President Dehler delivered his annual address, from which we make a few extracts:

No doubt all of you assembled here feel the necessity of a State association for the retail Hardware and Stove dealer. It is only by associating together that we can accomplish anything against the many wrongs perpetrated against us from day to day. No single retailer, no number of retailers in any one city, not even the strongest State association, can hope to remedy the evils staring us in the face to-day. But I do believe that by a co-operation of States almost all of our grievances can be adjusted to our mutual benefit. In what manner this can be accomplished, and by what methods, is a question which will need careful consideration, and that is why we are here. That each and every member of this association will derive some benefit from having come to this meeting is in my mind an assured fact. Our exchange of ideas and views on the different subjects to be brought before us cannot help but be beneficial to some of us.

One or the other of you perhaps think you have more than your share of trouble in your business. To you I would say, Hear the complaints of your brother Hardwaremen, and be the happier after.

\* \* \* \*

Any one State association by a strong co-operative combination can handle most of the regular, legitimate Hardware and Stove jobbers; but when it comes to dealing with the catalogue houses and department stores, who buy from the manufacturer direct, we must take refuge in the co-operation of the various States. And it will take more than a few.

This fact alone should induce every retail Hardware and Stove dealer to join his State association, as only by so doing can he become a member of the Inter-State Association. Can you imagine the result of 5000 retail merchants refusing to market a certain article manufactured?

Can you picture in your mind 5000 retail dealers refusing to purchase any of their wares from any one jobber, because he persisted in retailing goods himself?

These things can and will be done, if you say they shall be done. The time for action is at hand and it behooves us, one and all, to buckle our armor of independence a notch tighter, face the dangers confronting us and do battle against our adversaries as one man.

The address proved exceedingly interesting to the members present. This was followed by the annual report of Secretary Paul Wagner, who presented the advantages of the association, and reported in detail upon the correspondence which he had had with dealers of the State since the October meeting, which gave a good idea to the delegates how great an amount of labor is connected with this position.

The Wednesday morning session convened at 10 o'clock, and proved to be one in the proceedings of which the members were well entertained. The association was addressed by W. P. Lewis, of New Albany, Ind., a member of the Indiana Retail Hardware Association, a special invitation having been extended to him. After making a brief address he was followed by Samuel Korb, Secretary of the Louisville Retail Hardware and Stove Dealers' Association, who read an interesting paper having reference to the advantages of association, and the desirability of dealers acting in con-

cert to effect needed reforms. We give an extract from his address, which was listened to attentively:

Go to your competitor, give him the hand of good fellowship, and explain to him that his interests are identical with yours, and that you need this help and that he needs yours in order to eradicate many evils with which you and other retail dealers have to contend.

Such a conversation will make him your friend, and even though you do not succeed in making him a member you will have accomplished a great deal otherwise. If he refuses, do not give up too easily, but go at him again; you will finally land him. If necessary, offer to refund his initiation fee to him if he becomes satisfied that he made a mistake in joining. Your association, I am sure, will back you up in the offer.

This Association is formed expressly for the purpose of protecting the retail dealer against the manufacturer or jobber who sells to that class of trade called consumers, and whose trade should be controlled by the retail dealer.

Some of the retail dealers may believe that they have to contend with greater evils, such as catalogue houses, etc. This may be so in some instances, and I believe that in due time, through the influence of the combined State associations, the harm done to the regular retail dealer in Hardware, Stoves, etc., by catalogue houses and similar institutions, will be greatly lessened if not entirely eradicated. But for the present I shall keep my guns trained on the retailing manufacturer or jobber, and shall pour hot shot after hot shot into him until either he or I am put out of the business.

A number of short addresses and discussions followed the remarks of Mr. Korb, which were participated in by a number of the members, which added to the general interest. In the afternoon session which followed, the Executive Committee appointed a merchant in each Congressional district for the purpose of assisting the Secretary in securing new members. The hope was expressed that by following this plan the membership may be increased to 100 by the next annual meeting. The following gentlemen were appointed on this committee:

First District, U. S. Shacklett, Fulton.  
Second District, A. Steitler, Jr., Owensboro.  
Fourth District, J. L. Malin, Vine Grove.  
Fifth District, Wm. Dehler, Louisville.  
Sixth District, W. T. Chilton, Campbellsburg.  
Seventh District, G. H. Watts, Georgetown.  
Eighth District, J. W. Mahan, Lawrenceburg.  
Ninth District, J. S. Ogden, Ashland.  
Tenth and Eleventh Districts, Charles D. Winn, Paris.  
Lexington District, Mr. Van Deren, of Van Deren Hardware Co.

It was also decided that the association should join the Inter-State Association without delay, and Paul Wagner was elected a delegate to represent the Kentucky State Association at the next meeting of the Inter-State Association on March 6th, at Chicago.

By unanimous agreement it was decided that all officers who had served during the past five months should hold over until the next annual meeting, which will be held at Louisville the second week in February, 1902.

The officers of the association are: George P. Dehler, Jr., of Louisville, President; J. S. Ogden, Ashland, First Vice-President; Charles D. Winn, Paris, Second Vice-President; Paul Wagner, Louisville Secretary; William Dehler, Louisville, Assistant Secretary; Henry Heick, Louisville, Treasurer.

The firms represented at this meeting are: W. T. Chilton & Co., Campbellsburg; Winn & Lowry, Paris; W. P. Lancaster and George B. Minary, Versailles; Johnson & Mehan, Lawrenceburg; Hehler Bros., Korb Hardware Co., J. H. Murphy, Charles W. Shott, J. C. Kirchdorfer, George Dehler, Jr., Albrecht & Heick, Paul Wagner and W. C. Lewis, all of Louisville; G. H. Watts, Georgetown; P. C. Sower, Frankfort; J. T. Vance, Vanderen Hardware Co., Smith, Watkins & Co., F. A. Hornsey, L. P. Milward, all of Lexington; J. L. Minary and J. L. Gray, of Pine Grove.

Injure not another's reputation or business.

### National Sportsmen's Association.

The Seventh Annual Show of the National Sportsmen's Association will open in Madison Square Garden, New York, Saturday, March 2d, and continue for a period of two weeks. All of the old exhibitors and many new ones of sportsmen's arms and equipment, have taken space. D'Aqui's Military Band will be on hand afternoon and evening, and a very elaborate display of decorations and electric lights will add to the attractiveness of the scene this year, surpassing in that respect any of the past shows of the Association.

#### GENERAL ARRANGEMENT.

The main floor of the amphitheatre will be reserved for exhibits of game birds, animals and fishes, to be exhibited in a series of small game parks, enclosed by wire mesh, instead of in one large park, as heretofore; for exhibits of power launches, pleasure boats, canoes, ducking boats and other small craft; for reproductions of sportsmen's camps, notably such as will be made by the Maine Guides, the Adirondack Guides, the Junior Branch of the National Sportsmen's Association and other organizations of like character; also, displays of mounted specimens, game heads, antlers, etc.

#### SCENIC FEATURES.

The entire interior of the Garden has been so planned as to resemble, as close as possible, one vast sportsmen's preserve. To this end, rockeries, rustic work, pine and cedar trees, to the number of several hundred, a drop curtain extending across the entire eastern end of the Garden, and an artificial lake, will be employed, all of the wood and iron work of the building, so far as practicable, to be concealed by decorations of pine, spruce and hemlock boughs.

#### ARTIFICIAL LAKE.

Instead of the six-foot tank of water used for aquatic sports last year, the management will construct an artificial lake, with indented shores, the waters narrowing toward the center of the lake, where they will be spanned by a big causeway or "natural bridge" of rock. Beyond this, the lake will increase in width until, from a scenic point of view, it blends with the painted waters of the big drop. On each side of the curtain will be constructed, of materials best known to the scenic artist, mountain crags, cliffs and peaks, so designed as to give a startling touch of realism to the entire scene. Near the western end of the lake will be constructed a small island, upon which a band of Ojibway Indians will, each afternoon and evening, and in full costume, give an exhibition of their tribal dances and religious rites. On the shore of the lake, a colony of half a dozen beavers will be furnished ample material for the construction of their dam, while otter, muskrat and other amphibious, fur-bearing animals will be seen constructing their homes and disporting themselves in the water. Following their exhibitions, the Indians will invite such visitors as care to avail themselves of the opportunity, for a canoe ride upon the waters of the lake.

#### GUIDES' EXHIBITS.

The exhibit of the Maine and Adirondack Guides this year will be an extensive one. The Maine Guides, having allied themselves in the enterprise with the railway companies and with many leading hotels of their section, will occupy the entire south side of the arena, with an exhibit that will be thoroughly representative of the game resources and scenic beauties of the Pine Tree State. The Adirondack Guides, having learned of these intentions, are putting forth every effort to rival, if not eclipse, the Maine exhibit, and will come down from the north woods with a display of log cabins, lean-tos, materials for rustic and woodland effects and a collection of fur-bearing animals native to their section, that will far surpass any exhibit these enterprising woodsmen have ever before made at a sportsmen's show.

Honorary President E. E. Kendall, of the association, in speaking of the exhibit now being prepared, says: "We are going to show the people of New York more of the Adiron-

dacks than they have ever seen outside of the Adirondacks themselves. Many of the campers and tourists who come here annually first learned of the charms of our country through the guides' exhibits at the Sportsmen's Show, and we thoroughly appreciate its value as an educational institution. The association has given up its time and money to make these exhibits interesting from year to year, and now the business men and hotel men of our town, and adjoining ones, realizing the direct benefits accruing from such exhibits, have, this year, contributed toward a fund large enough to send down an exhibit that will be more extensive and better than any we have ever made."

#### GAME BIRD AND ANNUAL EXHIBIT.

Verner de Guise will again have charge of the game-bird exhibit, and will make it even more complete than last year. The exhibit of pheasants will be a large one—ring-neck, golden, silver—together with especially handsome specimens of German and Indian birds of this species. A flock of wild turkeys, grouse, Virginia and California quail, prairie chicken and pretty nearly every variety of wild duck known to hunters along the Atlantic seaboard.

Among the game animals will be seen a bull and cow moose (two remarkably fine specimens), elk, deer, caribou, mountain sheep, antelope and bison, as well as bears, walrus, foxes, lions, lynx, panthers, cats, foxes and other of the carnivorous game animals.

#### REVOLVER AND TRAP SHOOTING.

The revolver range will be conducted by the Colt Fire Arms Co. this year, and the association championship promises to bring together the best shots in the country.

The trap-shooting tournament on the roof will furnish a rare exhibition of target smashing this year, with Rolla Herkes, Jack Fanning, W. R. Crosby, Fred Gilbert and other experts of like calibre as contestants.

### Southern Hardware Jobbers' Association.

At a meeting of the executive committee of the Southern Hardware Jobbers' Association, which will take place in Asheville, N. C., March 6th and 7th, for the purpose of transacting such business as may come before it, and decide where to hold the annual meeting, it is the intention of the Hardware jobbers of Chattanooga to attend with a view to making a strong effort to capture the Convention, which is to be held next June. The cities which have invited the Association are: Asheville, Cleveland, Chattanooga and New Orleans. The Chattanooga dealers who are members of the Association have taken a great interest in the matter, and their invitation to the Convention to select that city will be supplemented by an urgent invitation from the Chamber of Commerce, and they hope to have one also from the City Council, the desire being to make it a gala occasion that will make Chattanooga forever remembered for its hospitality. Naturally, the desire of the officers of the Association is to hold the meeting in the most central place that can be chosen in the interests of its delegates, and the Chattanooga dealers are confident their location fills the bill in every respect, as well as offering the most interesting place for the meeting, which usually takes place in the hot part of the Summer, for if a good, cool breeze can't be found on Lookout Mountain, certainly no other part of the South has anything more refreshing to offer. There is every reason to believe that Chattanooga stands a remarkably good chance of being selected, everything else being equal, as such ambitious endeavors on the part of the dealers deserve recognition.

Mike (opening his envelope)—Faith, that's the stingiest man I ever worked for.

Pat—Phwat's the matter wid ye; didn't ye git as much as ye ixpicted?

Mike—Yis, but I was countin' on gittin' more than I ixpicted.—*Philadelphia Press*.

## RECENT TRADE PUBLICATIONS.

AMERICAN SCREW Co., Providence, R. I. Pamphlet catalogue dated January, 1901, consisting of 30 pages, well printed on good paper, characteristically illustrated, and in addition to the current price lists on the goods manufactured by this company, the pamphlet contains illustrations and miscellaneous information relative to all their regular products. Independent of the contents of this pamphlet the company manufacture a great variety of special articles of a kindred character, prices on which will be given on application. The price lists given in the catalogue are all subject to the discounts named in the discount sheet which accompanies it. The company state, in connection with this catalogue, that they have a telegraphic code prepared especially with reference to their own products, which are not satisfactorily covered by any of the general codes now in use, and this they will be pleased to furnish gratuitously to the trade on application.

WRIGHT SHOVEL Co., Anderson, Ind. Four-page leaflet, printed in colors, calling attention to the large line of Solid Shank Crucible Steel Goods in the way of Shovels and Spades, Post, Drain and Ditching Spades, and Moulders' Shovels manufactured by this company. This leaflet is attractively gotten up.

JOSEPH DIXON CRUCIBLE Co., Jersey City, N. J., have recently issued what might be called a booklet catalogue of 44 pages, entitled "Graphite as a Lubricant," and as is usual with this well-known company, the contents of the pamphlet are exhaustive in their description of the varied uses to which graphite may be applied, and also in the variety of endorsements of a commendatory character of this article as furnished by the Joseph Dixon Crucible Co.

LANDERS, FRARY & CLARK, New Britain, Conn., and 82 Chambers Street, New York. Pamphlet catalogue of 44 pages, comprising their line of Plumbers' Brass Goods, in the manufacture of which they have been prominent for a great many years. This catalogue includes everything requisite for plumbers' wants in Stop and Waste Cocks in large variety, Compression Plain and Hose Bibbs, Compression Stops, with and without Stuffing Box; Self-Closing Plain Bibbs with Telegraph Handles; Wash-Tray Bibbs, ordinary Plain and Hose Bibbs, Brass Racking, Globe, Liquor and Kerosene Oil Cocks; Compression Lock Cocks, Safety Faucets, Boiler Cocks and Bottling Cocks in large variety. Included in the contents are Brass Liquor, Beer and Ale Cocks of all the various patterns known to the trade, and also Refrigerator and Water Cooler Cocks in large variety. A very desirable book, well worth sending for.

RUSSELL & ERWIN MFG. Co., New Britain, Conn., and 43 Chambers Street, New York, have recently issued a pamphlet catalogue of 16 pages, covering their new line of Glass Door Knobs with Bronze Metal Shanks and Roses, and also with combined Rose and Escutcheon. This is an important catalogue, not so much from its size as from the fact that it shows a line of goods which the Colonial revival in architecture has brought into use, the knobs being made of the best quality of flint glass, clear and brilliant, and the cuttings skillfully and carefully executed. In connection with this line of goods is also shown Plate and Drop Escutcheons suitable for use with Glass Knobs, simply given as a suggestion, because any of the fine Bronze Roses and Escutcheons combined made by the company can be employed if necessary.

IOWA FARMING TOOL Co., Fort Madison, Iowa. Hand-some folding leaflet, printed in two colors, on extra coated paper, calling attention to the Victor Garden Cultivator, Garden Tool Sets and the Crescent Scuffle Hoes; also, the square Scuffle Hoe and the Kretsinger Cut-Easy Hoe, with the manufacture of which this company has been long identified.

HARRISON BROS. & Co., Inc., Philadelphia, Chicago and New York, have recently issued for distribution through their patrons a pamphlet of 50 pages, denominated "Specifications for the Painter." This is designed as a practical hand book for architects and house painters, and others in the building trade, with the hope that it will supply them in condensed form with information regarding paints, varnishes, white lead, colors and similar specialties—information which is often sought, but rarely at hand when needed. This is a very useful publication for the purpose, hints being given throughout on a number of points of interest to the trade to which it more especially applies, and will be found extremely desirable by those to whom the sale of such goods possesses the proper interest. A description is given of how to produce all the various tints, in regard to the quality of colors that are combined to make up each particular tint required. Special mention is made, of course, of the products of this old and well-known company, and attention is called to the fact that ready-mixed paints bearing the brand of "Harrison" can be relied upon to produce perfection of finish, which is the aim and ambition of all painters who desire successful achievement.

KNAPP & SPENCER Co., Sioux City, Iowa, have recently issued, for the benefit of their special trade, a very handy little pamphlet of 36 pages, covering their line of Bicycle Sundries. This embodies in its contents all the leading articles that would be desirable in this especial line of goods for the retail dealer, and they are presented in a form that, by the aid of graphic illustrations, provides a pamphlet worthy of any Hardware dealer's frequent reference.

FANNER MFG. Co., Brookside Park, Cleveland, Ohio, have recently issued their 1901 catalogue of Hardware specialties of which they are large manufacturers, they having been incorporated in 1894. Many of their Stove Hardware Specialties are marketed under the name of the Arctic Stove Trimings, and by that name are well known throughout the Hardware trade. The catalogue in question covers this line completely. Among its contents will be found handles for Potts' Irons, Family Ice Tongs, Ice Picks and Shaver, Can Openers, Little Giant Gas Stoves, Arctic Stove Shovels, Pokers and Lid Lifters in large variety; also Screw Drivers and Box Openers. Included in its contents is a line of iron Hammers, of which they are large manufacturers, Family Glue Pots, Sad Iron Stands, etc., etc. They are also manufacturers of Hot-Air Registers, Faces and Borders, which are illustrated in this catalogue, together with a line of Toy Stoves and Ranges, which have become extremely popular.

MASSEY VISE Co., 30-32 South Canal Street, Chicago, Ill. Pamphlet catalogue of 12 pages, covering their line of Massey Vises, giving full description of weights, sizes and claims for superiority of this well-known line of mechanical appliances, which includes Massey's Clincher Vise, Quick-Adjusting Screw Vise, Perfect Pipe and Lightning Grip Vise; also the Planer and Milling machine Chucks which are specialties of their production.

## NEW GOODS AND SPECIALTIES.

### "Hurst" Patent Spraying Pump.

H. L. Hurst Mfg. Co., Canton, Ohio, have been exclusively engaged for a number of years in the manufacture of spraying pumps and spraying chemicals. They have recently put upon the market their new improved "Hurst" Patent Spraying Pump with automatic mixer, double strainer etc., the advertisement referring to which will be found on page —. We illustrate the several features of this article herewith, arranged in a manner that is self-explanatory. This pump has proved exceedingly popular with the farmers, demonstrated by the largely increased orders given the dealers. The "Hurst" is undoubtedly a leader in the line of sprayers recognized by the trade. It is claimed to possess great merit for high spraying, and is noted for the many and varied uses to which it may be applied. The fact that this company have been making this class of goods for over twelve years, confining their products to pumps and spraying mixtures, is an indication that their products may be relied

"HURST" PATENT SPRAYING PUMP.

upon, their large and extensive business having been built up by liberal treatment of the dealers who have acted as their agents. The "Hurst" specially prepared spraying mixture, made also by this enterprising company, serves every purpose of spraying, and is beneficial in increasing the crop produced in both quantity and quality. Any dealer who has not already secured the agency for this special article, by making early application may secure a show-window display card, and the company will advertise the goods for him.

### Automatic Rope Attachment.

Newton Mfg. Co., Erie, Pa., are placing on the market the Automatic Rope Attachment an illustration of which we give in the course of this article. It is made of malleable iron, galvanized, and may be used with any kind of cord, and will be found to last a very long time. It is especially suitable for fastening clothes lines, as it can be quickly attached to post, fence or building, the base remaining permanently attached, while the pulley may at any time be easily removed. It is automatic in its action, it being only necessary to pull the line tight, the grip holding every inch of the slack. The grip is so constructed that it will not have a tendency to wear or cut the rope. For the purpose of slackening the line it is only necessary to raise the "dog" at the top, and the pulley moves freely. To remove the line it is not necessary to run the entire length through the pul-

ley. It may be removed from the lower hook and passed back of the pulley, when it is at once disengaged. The attachment is so constructed, however, that the line will be held in any position, whether the rope be tight or loose. For hanging hammocks it is regarded as being an extremely safe and most durable fastener, no hooks being necessary. The hammock can be raised or lowered almost instantly, the attachments swinging with the hammock, and, therefore, avoid wear on the rope. For awnings it is an improvement, as it does away with the old-fashioned cleat, as the rope is fastened securely the moment the person raising the awning stops pulling. For use on board yachts, in handling sails, also for outing purposes for securing tents, this attachment is claimed to be extremely useful; also, to the farmer in many different ways, which will readily occur to anyone who has used a similar appliance of more difficult construction. The attachments are packed for shipment in paste-board cartons, one in each, together with the necessary

AUTOMATIC ROPE ATTACHMENT.

screws and printed directions for its use. In order to assist in sales being made intelligently, the manufacturers furnish to the retailer a finely finished counter model with each order of a quarter of a gross or more. This will prove of great assistance in making sales by calling the attention of customers to the new attachment. This model consists of two posts securely fastened to a hard-wood base, with an attachment fastened to one post, and a strong piece of cotton rope to the other. It is a perfect working model, and together with the window cords and other advertising matter, also furnished gratuitously, should add very materially to the ease with which sales may be accomplished.

### Buckeye Churn.

The Buckeye Churn Co., Sidney, Ohio, have been identified with this line of specialties for a number of years, and have achieved the success that comes with the recognition of merit. There has always been a demand for a churn whose principle of concussion is identical with the creamery one for the dairy farm and the home butter factory. This demand is created by the great improvement caused in the butter market by creamery granular butter and by the fact

that dairymen are apt to peruse everything in the shape of higher literature on their particular product that is obtainable in all dairy and farming periodicals. We give an illustration of the Buckeye Churn herewith, in which the cut shows the action of the cream in the same when in operation. The cream strikes the end and breaks into suds with the rebound, describing a figure 8. The reaction materially assists in the motive power. The churn is so constructed

BUCKEYE CHURN

that by throwing the churn forward and back the barrel is thrown on an inclined plane alternately from one end to the other, and dashing by its own weight into spray, as the sea against the rocks, and the rebound or reaction, with the mechanical fact that the fulcrum at the bottom of the rockers changes from one to the other in accordance with the change of weight, balances the weight in its motion, and thereby saves a great portion of the labor of other churns, for it is conceded not to be as hard work to throw the churn forward and back as it is to lift a dash or turn a crank, which is always a dead lift. The churn is claimed not to heat by exercise, and the butter may be worked in ice or cold spring water in the churn. Application to the manufacturers will secure considerable literature in regard to the making of butter, and the superior manner in which the Buckeye Churn can assist in accomplishing this fact.

#### Acme Basement Window Hardware.

Caldwell Mfg. Co., Rochester, N. Y., are manufacturing a few specialties which they are marketing under the name

No. 10 ACME CATCH, Per doz.  
Japanned, with screws, . . . \$0.90

FIG. 1.

of the Acme Basement Window Hardware, which we illustrate in the course of this article. In Fig. 1 is shown the Acme Automatic Basement Window Catch, which is designed to take the place of hook and eye for holding cellar windows open. As will be noticed from the illustration, when the sash is pushed up against it, it is firmly held, while a quick pull releases it at once. It is a strong, sure catch, which saves the ordinary difficult reaching up necessary to hook the

sash with the appliance previously in use. Fig. 2 shows the Acme Basement Window Fastener, the use of which is demonstrated in the cut. This, while simple in its method of operation and method of construction, is a strong and secure lock, made to press the sash tightly into the frame, take up the slack, prevent all rattling, while at the same time excluding the cold air, and also the snow which invariably drifts through when sashes are loosely fitted. This

FIG. 2.

can be used equally as well on attic and dormer windows that are hinged to swing, and will be found a great convenience in the usual assortment of house Hardware. Fig. 3 illustrates the method of putting up the Acme Basement Window sets, for distribution by the trade, which would prove a great time-saver for busy clerks and carpenters, each box containing all the Hardware necessary for one basement window. They are put up in sets numbered as follows: No. 12, for sash hinged at side, including one pair of wrought butts, one Acme Fastener, and the necessary japanned screws to make a sightly job; Set No. 13, similarly constituted, for sash hinged at top, and Set No. 15 for the same, but which includes both the Acme Fastener and the Acme Catch. These are desirable additions to the stock of builders' Hardware, and are well worth the attention of the Hardware

FIG. 3.

dealer who has not already been made familiar with their merit.

#### Eagle Water Still.

The Health and Comfort Supply Mfg. Co., 430-434 Elm Street, Cincinnati, Ohio, have invented, manufactured and placed upon the market, at quite a nominal cost, an apparatus for distilling water and producing with the least possible trouble perfectly pure water for all the purposes for which it may be required by the family. This is marketed under the name of the Eagle Water Still, and it enables every family to easily supply itself with distilled water, pure and limpid as crystal, at no expense, no extra trouble and without any special experience, for the apparatus, it is claimed, may be managed by a child. Attention is called to the fact that river water even as unattractive in appear-

ance as the Ohio River, by the aid of this apparatus is converted into a water of crystal purity, revitalized and sterilized, and made by the process delicious and palatable to the taste. In Fig. 1 is shown the outward appearance of the Eagle Water Still, while in Fig 2 is given a sectional view of the same, indicating the methods of its operation. It is made of heavy copper, in three parts, in order that it may easily be cleaned when necessary. It is entirely automatic in its action, and needs no extra fuel in its operation. Distills five to seven gallons of perfectly pure water in eight

FIG. 1.

FIG. 2.

hours, and, compared with any similar distilling apparatus, is claimed to be far the best for family use, having been adopted and endorsed by physicians of good standing, and under such auspices meeting with a rapid sale wherever introduced. The Health and Comfort Supply Mfg. Co., recognizing the advantages of dealing direct with retailers, are prepared to offer a liberal discount to the trade, and ample protection to the dealers handling the still. They will be pleased to open correspondence with parties who are willing to represent them, and will agree to do everything possible to advance the interests of the parties handling the same.

#### The St. Louis Air Rifle.

St. Louis Air Rifle Co., St. Louis, Mo., are the manufacturers of the St. Louis Air Rifle, of which we give an illustration. It may be regarded as an innovation in this line of specialties, as it is a real air rifle, entirely different from the spring guns usually sold under that name which have been a long time on the market. It is provided with air chamber, into which the air is compressed by means of an air pump. When the trigger is pulled a valve is opened, which releases the air, the gun being discharged with a total absence of the usual vibration or recoil. There are no springs whatever, the rifle being constructed with an especial view of attaining simplicity and strength in all its parts. The metal portions are all made of brass and are handsomely nicked. The pump extends from the muzzle to the trigger, and the long stroke obtained makes it very easy to charge the gun. One stroke will charge it to shoot as hard as the spring guns, while the force may be increased as much as desired, sufficient strength being required to charge it heavily to

THE ST. LOUIS AIR RIFLE.

render it safe in the hands of a child. Five or six strokes will send a bullet through a half-inch board, or throw it over 100 yards. The air chamber is located in the rear, and is claimed to be capable of sustaining all the pressure that may be applied. The bullet having a travel of the entire length of the barrel, great force and accuracy are assured. The adjustable peep sight, the simple valve and the perfect trigger, together with a rigid frame and a neat appearance, are salable advantages. It is stated to be the lightest gun on the market, a case of one dozen weighing only 22 pounds. As no cast iron is used in its construction, it is absolutely un-

breakable, and it is said to be so free from complicated devices that a boy might replace any part ever likely to wear out. This new rifle produced by the company is a great improvement over the first model that was placed upon the market. They are numbered 2 and 3, shoot BB and 000 shot respectively, are listed at \$18 and \$21, and it is the desire of the manufacturers to market their entire product through the wholesale trade, doing their best to protect the jobber in every possible way.

#### Patee Motor Cycle.

The Patee Bicycle Co., Indianapolis, Ind., are manufacturing and placing on the market the Patee Motor Cycle, which possesses a number of improvements over similar articles now commanding the attention of the Hardware and bicycle trade. The company call attention to the fact that the location of the motor in their machines is such that the rider may keep his feet on the pedals at all times, or place them on the coaster at his option, without finding an overheated engine between his legs, as is the case where the motor is built into the crank box or in the front part of the frame toward the head. The object in locating the motor, they claim, in the frame behind the crank shaft, enables them to remove the unpleasant heat from the proximity of the feet, and what little steam, heat and smell the motor makes by this course of construction will invariably go be-

PATEE MOTOR CYCLE.

hind the rider instead of blowing into his face, as it would undoubtedly were the motor located in any position in the front part of the frame. In addition to these points, the weight of the motor being carried below the centre of the wheel has the advantage of making the machine run much more steadily than it does where it is carried high on the frame. The motor riding within five and a half inches from the ground, as it does on this machine, has a tendency to steady the machine to such an extent that the rider can make a quick dodge to avoid collision on the street much more readily than he could with the ordinary bicycle. The construction of the Patee Motor Cycle is heavy and strong throughout, the frame being made of 1 1/4-inch tubing of 16 and 20 gauge, with heavy forks, stays and front fork, front fork crown being heavy drop forged tandem crown, well reinforced. The wheels are 26 inches in diameter, with heavy spokes and possessing two-inch tires. It is intended that the machine in every detail of construction should be substantially and perfectly made. The Patee Bicycle Co. state they are having thousands of inquiries from the trade in regard to their machine, and already a great many orders have been placed by some of the largest dealers who have been prepossessed by what they heard of its merits, although they had never seen a model or cut of the machine, placing their orders entirely on the reputation of the company for turning out desirable goods at the right price.

### "Champion" Refrigerators.

Cooper & McKee, 113-121 Gwinnett Street and 146-154 Middleton Street, Brooklyn, N. Y., are placing upon the market a largely increased line of refrigerators, a business with which they have been identified since 1880, having one

FIG. 1.

of the most improved plants for the manufacture of the line of goods referred to, of any concern in the United States. They manufacture a large variety, including the cheaper grades as well as the superior line of goods that are marketed under the name of the "New Columbia." Their several lines are known as "Domestic," "Household," "Champion" and "Columbia." We illustrate herewith a medium grade of hard-wood refrigerators marketed under the name of the "Champion," on which they have a large sale, which, owing to their construction with solid ice chamber and less expense of carvings and trimmings, the manufacturers are enabled

FIG. 2.

to sell at a lower price than the "New Columbias," considering them fully as efficient for refrigerating purposes. They are made of ash with a golden oak finish, charcoal sheathing filled, flush bottom, single cover, with extra heavy doors; brass trimmings, brass lever locks, galvanized iron lining, ice rack and shelves, furnished with a removable waste pipe, and finished with coach varnish. They are fitted with automatic syphon, have ball-bearing wood-wheel casters, and sliding shelves, making them a very desirable refrigerator for the general trade, and furnished at an extremely moderate price by comparison. We also present an illustration of their or-

dinary Ice Chest, which is largely used for domestic purposes, being about the lowest priced refrigerator marketed. These are made of pine, painted imitation oak, are double boxed, charcoal sheathing filled, galvanized iron lining and shelves, and have ball-bearing wood-wheel casters. They are made in eight different sizes, running from 25 to 51 inches in length.

### Consolidation of File Interests.

The Nicholson File Co., of Providence, R. I., are pursuing a general policy of expansion which was inaugurated by them when they acquired by purchase the extensive works of the New American File Co., Pawtucket, R. I., and the Western File Works, at Beaver Falls, Pa., which was followed by the addition to their circuit of factories of the Eagle File Co.'s plant at Middletown, N. Y., and the McClellan File Works, at Saginaw, Mich. Their latest acquisition is the purchase of the Arcade File Works, Anderson, Ind., the largest plant outside of their own in the country, having in their employ 400 hands and possessing facilities for production in perfect condition. This large addition makes the Nicholson File Co.'s the most important position in the file industry of the world. They are also negotiating for the purchase of the plants of the Kearney & Foot Co., at Paterson, N. J., and Kent, Ohio. The completion of this deal is awaited with interest by the Hardware trade of the United States, as the combination of such prolific resources in the hands of one company, while not giving it a monopoly of this industry, as many large concerns are still in the field, promises, however, a gross production of nearly 10,000 dozen files and rasps a day, and will give employment to nearly 2500 hands.

"Jack, you ought to straighten up your writing table."

"Lemme alone, Julia; if I were to straighten up this table I couldn't find a thing on it until it got all mussed up again."

—Ex.

## REVIEW OF THE MARKETS.

**Wire Nails:** There is a very good demand from all quarters for Wire Nails, the recent change in prices not affecting it to any perceptible extent other than urging delivery. The slowing up on prompt shipments by the mills indicates to some buyers a possible slight advance to still further strengthen the market. Quotations based on the advance are as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots	\$2.30
" less than carload lots	2.35
To retailers in carload lots	2.40
" less than carload lots	2.50

New York prices are not affected seriously by the slight change, and are quoted as follows:

To retailers, carload lots on dock	\$2.53
Small lots at store	\$2.55 to 2.60

**Cut Nails:** Prices are well maintained on this staple line, the demand being a steady even if not a heavy one. A brisker movement is anticipated by March, if no further change in price is contemplated. Quotations consequently are as follows, f. o. b. Pittsburgh, plus freight, terms 60 days, or 2 per cent. off in 10 days:

Carload lots	\$2.00
To jobbers in less than carload lots	2.05
To retailers in less than carload lots	2.15

New York quotations are as follows:

To jobbers in carload lots on dock	\$2.15
" less than carload lots on dock	2.20
To retailers in less than carload lots on dock	2.30
Small lots from store	\$2.25 to 2.30

**Barb Wire:** The large demand governing the Barb Wire market at the present time creates a fear that an additional change in price may be anticipated. Shipments are not invariably prompt, and nails are urged to make earlier deliveries than were contemplated. Quotations for domestic trade are as follows, f. o. b. Pittsburgh, net cash 60 days, or 2 per cent. discount for cash in 10 days:

To jobbers in carload lots, Painted	\$2.60
" Galvanized	2.90
" less than carload lots, Painted	2.65
" Galvanized	2.95
To retailers in carload lots, Painted	2.70
" Galvanized	3.00
" less than carload lots, Painted	2.80
" Galvanized	3.10

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** At the present quotations which seem to be more than satisfactory, judging by the steady demand, Plain Wire holds its own in good shape, and the promise of a much heavier trade in the immediate future may safely be looked for. Quotations are now stated as follows, f. o. b. Pittsburgh, terms 60 days, or 2 per cent. off for cash in 10 days:

		Base sizes.	
		Plain.	Galv.
To jobbers in carload lots	\$2.25	\$2.65	
" less than carload lots	2.30	2.70	
To retailers in carload lots	2.35	2.75	
" less than carload lots	2.45	2.85	

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the advances indicated in the following table:

		Plain Fence Wire Advances (Catch Weights).	
		Nos.	Galvanized.
6 to 9	Base		\$0.40 extra.
10	\$0.05 advance over base		.40
11	.10		.40
12 and 12½	.15		.40
13	.25		.40
14	.25		.40
15	.45		.75
16	.55		.75
17	.70		1.00
18	.85		1.00

For even weight bundles, 50 pounds or over, 5 cents per bundle advance on above.

**Screws:** Taking advantage of the extremely low quotations recently promulgated, large orders have been booked

on this staple line, indicating a stronger market under the circumstances than has prevailed in a long time. The natural result is with so many orders already booked for future delivery, some concessions formerly obtainable by largest buyers are not now within reach, and the market is reported very firm.

**E. C. Atkins & Co., Indianapolis, Ind.** An advance in the list prices of the Moss-Back-Cross-Cut-Saw manufactured by this company was recently announced, and we give the new prices herewith, discounts remaining the same as heretofore:

		Lance, Diamond, Tuttle Tooth with Diamond Point, not Perforated,				Perforated.			
4	4½	5	5½	6	6½	7	7½	8	
\$2.64	\$2.97	\$3.30	\$3.63	\$3.96	\$4.39	\$4.62	\$4.95	\$5.28	foot each.
4	4½	5	5½	6	6½	7	7½	8	
\$2.80	\$3.15	\$3.50	\$3.85	\$4.20	\$4.55	\$4.90	\$5.25	\$5.60	foot each.

**Files:** The recent consolidation of File interests by the purchase of the Arcade File Works, Anderson, Ind., by the Nicholson File Co., Providence, R. I., has greatly strengthened the market quotations on this important line, and the removal of aggressive competition by the combining of such leading plants will exert beneficially on the interests not only of export trade but also the domestic demand. No change in regular quotations has been noted as yet, but some extreme "specials" have been withdrawn from competition.

**Cordage:** There is only a moderate demand reported for Manila rope, the market being held steadily at prices named below, and advancing conditions are anticipated. Sisal is still strong at the quotations given, with strong probability of an early advance.

	Pounds, Cents
Manila, 7-16 inch and larger	9½
¾ inch	10¼
¾ inch and 5-16	10¾
Sisal, 7-16 inch and larger	7½
¾ inch	8
¾ inch and 5-16 inch	8½
Lath Yarn, Medium and Coarse	7
Jute Rope No. 1	6½
No. 2	5½

**Binder Twine:** The prevailing prices of the raw material has made the Binder Twine market a waiting one, with no urgency for large sales or anticipations of extensive purchases. The market for both descriptions of hemp is very firm, and the following quotations represent the present market. General quotations are as follows for small lots of Twine, with a rebate of 1-4 cent per pound for carload lots, f. o. b. Eastern factory:

White Sisal, 500 feet per pound	7¼c.
Standard, 500 feet per pound	7½c.
Manila, 600 feet per pound	9c.
Pure Manila, 650 feet per pound	10¼c.

**Linseed Oil:** The Dean Linseed Oil Co., under date of January 30th, 1901, quote as follows:

In lots of less than 5 barrels	68 cents per gallon.
In lots of 5 barrels or more	67 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Bolled Linseed Oil, 2 cents per gallon higher than Raw.  
Calcutta Oil, 85 cents per gallon.

### THE PHILADELPHIA TRADE.

During the past few days we have had belated Winter weather which, temporarily, has had a somewhat retarding effect on trade. The cold, however, is very welcome, as we recognize the fact it will enable the retailers to work off many of their Winter goods, such as horse blankets, skates, sleds, snow shovels and kindred goods, thereby giving them not only the means, but the inclination to buy Spring goods as soon as we have suitable weather.

The advance sale of Spring goods has already been

# NICHOLSON.

**SOLD ALL OVER THE WORLD.**

*Supplied to 24 Foreign Governments.*

**FAMOUS FOR TEMPER  
AND CUT.**

**NICHOLSON FILE CO., Providence, R. I., U. S. A.**

heavy—unusually so—and indications point toward a good demand throughout the coming Spring.

There are now some prospects of a scarcity in some lines, and low quotations on screws, wire cloth, wire poultry netting and some other goods have been withdrawn, and a much firmer tone is evident in the market, as the prices on some of these lines are recognized as being below cost, and such as cannot be maintained by the manufacturers without serious loss, and certainly the bright prospects of trade will not justify any manufacturer in running his business at a loss.

Outside of these leading items, there have been but few changes in prices and as soon as Spring opens a good volume of trade is confidently expected. **BIDDLE HARDWARE CO.**

## THE BALTIMORE TRADE.

Business is slowly improving and will soon, if favorable weather continues, open its leaves and assume the beautiful full-grown rose, to the delight of the expectant jobber.

An occasional lull is beneficial, being quieting to the nerves, a period for strengthening matters, and of time for reflection; it also gives a fellow an opportunity to look up investments for the large profits he is annually making in the Hardware business. A few might ask where the profits referred to come in, but if the inquirer will only wait long enough and have patience he might realize them.

The effect upon trade of the recent consolidation of the steel interests is evidenced by the volume of orders now being placed with factories in this line, based on a natural inference that prices will go higher.

Poultry netting, nails, barbed wire and steel goods are the principal articles moving at present, although window and door screen orders are being almost daily received, but mostly for later shipment.

Collections are coming in more freely, and by keeping in close touch with our slow men we are favored.

**H. W. WEBB & SONS.**

## THE PITTSBURGH TRADE.

February is one of the quiet months, and this year is no exception; yet the volume of business moving is very good, ahead of last year, when we had much higher values to help up the amount. All the indications point to a large Spring trade. The industries are prospering all through this section, and the merchant gets his share of it. Building improvements will be quite general this year, although material and labor are high and it costs about 25 per cent more to build now than three or four years ago. The difference is that now the people have the money. Then they did not have either money or any inducement to build.

The great consolidation of steel interests has been the absorbing topic lately, and at this writing it seems likely to go through. The general feeling here is that it will not be for the best interests of Pittsburgh and that its ultimate success is problematical. It looks as though there may be

serious times ahead, say within the next ten years, when these overloaded and overwatered concerns will have to stand the storm of low prices and adverse public opinion. Meanwhile smaller craft will do well to keep a sharp lookout ahead, and trim their sails to the varying winds.

**LOGAN-GREGG HARDWARE CO.**

## THE CLEVELAND TRADE.

It is reported that Mr. Carnegie is to retire from business. This is to be regretted. Mr. Carnegie has no peer in mechanical arts, and this is a unique distinction that immortalizes him, but he is more wonderful in appreciating that mechanical arts is the body only of beauty, and has for years been contributing to provide fine arts, which is its soul. History furnishes nothing comparable to this, in business ability or public spirit.

Mankind is honored by belonging to the race that produced him, and a nation is honored by his citizenship. If use is the true measure of greatness, Mr. Carnegie stands pre-eminently alone in our generation in his attempt "to make the crowd beautiful," and this position is not likely to be disputed or questioned.

He retires from business with the regret of millions, as they feel that his place must remain vacant for generations.

Legislation to prevent combinations seems to produce them; the genius engaged in business seems to be more alert than that in legislation. Perhaps uncertainty as to the effect of combinations causes hesitation; in any event they are becoming more and more entrenched behind franchises with wide water ditches in front to enable them to stand a long siege, and as usual the public are too late to prevent mobilization. If they turn out to be "a blessing in disguise," lazy legislation will prove the same. Optimism versus agnosticism may be well in such conditions.

Trade is good enough to exercise the faculties and keep off moroseness. We can use the philosophy of the Irishman who said he had always noticed if he lived through January he lived all the year and the year 1901 seems safe.

**THE LOCKWOOD-TAYLOR HARDWARE CO.**

## THE COLUMBUS TRADE.

We are having very marked symptoms of Spring already, notwithstanding the ground-hog said we would have several more weeks of Winter. It is not fair to doubt his judgment for a while, as there is time enough for considerable Winter yet. A robin, blue bird and red bird were holding a convention in the north part of our city last week, but the writer could not quite make out what they were talking about, but there is no doubt but that it was the weather. They were the delegates sent ahead to find out whether the tribe should migrate now or wait a while. I could understand part of the robin's remarks. He said there was no use taking chances of freezing up North when it was very comfortable South, and there was also a chance of starving here. He said the

worms were all too deep down for him to get, and cherries would not be ripe for a long while and he was going South right away. The blue bird thought those were his sentiments. The red bird thought snow was fine and he rather liked it and it made his ears red. He would keep an eye out for stray apple cores and stale doughnuts, and if they wanted to go they could, but he would chance it, as it made his flying machine tired to travel so far. I may not have understood them rightly, but as near as he could make out the conversation was as quoted. If Prof. Garner can interpret monkey language, I think any monkey—hold on, that don't sound right—I mean anybody should understand bird language.

Retail dealers are having their quiet time now and can get ready for the Spring trade, which will be exceptionally good, from present indications. Binder twine has been selling readily, as the prospect for a large wheat crop is good. Wire and nails are selling readily even with the recent advance. You can have screws put to you now at almost any price, but there will be some complaints about quality and shipments from some parties quoting the extreme prices. It is rather strange that some dealers will turn down a certain make of goods that has sold for years and known to be first-class in every particular, and buy an unknown brand or one that has never been in good standing with the trade, for a little difference of 5 or 7 1-2 per cent. If they sell standard makes they have no trouble, but invariably when they buy a cheaper make they have a hard battle all the season and very often have to sacrifice on price to get rid of it. Good goods always sell readily and bring a profit price, while poor goods are hard to sell at any price. This is especially true of Hardware. It looks very much like an advance on a number of articles on account of the Steel Combination. That combination is so strong that it is dangerous, and no one can't tell what they will do, but it will no doubt be a plenty.

THE SMITH BROS. HARDWARE CO.

#### THE SAGINAW TRADE.

Trade conditions in our section of the country are about the same as at last writing. The prospects for Spring trade are exceedingly good. We have been having some Winter weather, plenty of snow, and the sleighing is fine. While this is holding back some Spring business, the farmers are taking advantage of the good roads, and in that way it will be a benefit.

There seems to be more likelihood of labor troubles in this vicinity, and we are afraid it is going to interfere with trade in building and kindred lines this Spring. The backwardness of the season will probably congest business during March and April.

MORLEY BROTHERS.

#### THE CHICAGO TRADE.

Business with us is flourishing, and everything points to a very promising Spring trade. Our "future" order book is filling up fast, and the demand for seasonable Spring and Summer goods is remarkable. The market also appears to be growing steadier, and quite a number of manufacturers of steel products have, of late, been talking advances very strongly. Unless something very unusual should come up in the near future (which we do not anticipate or look for at the present) we will have a very good and healthy business the next few months to come. WELLS & NELLEGAR CO.

#### THE MINNEAPOLIS TRADE.

With us this is a dull time of year. Immediately after the holidays we got out as much dead stock as we could, had frame works made to set on our counters in which we placed odds and ends, slow selling articles and others that had been neglected. In this way have succeeded in disposing of quite a quantity of such goods. We had a forced sale of house furnishing goods, particularly those things that we were overstocked on, and kept this up as long as we felt it was any use. We think, however, we shall continue this plan of working off goods that are in any way undesirable. We

**JAP-A-LAC**

**JAP-A-LAC** is the hardest, smoothest, most elastic, brilliant and durable varnish on the market for floors and interior woodwork. Made in the following colors, which will stain and varnish by one application: Oak, Walnut, Mahogany, Cherry or Orange, Malachite Green, Ox Blood Red, Brilliant Black, Dead Black, Natural or Light, Ivory or White, Yellow, Spruce, Drab.

Architects should specify it. Painters should use it. Dealers should insist on it. Our Magazine advertising is creating a demand for JAP-A-LAC. Dealers should write for our money making proposition.

THE  
**GLIDDEN  
VARNISH CO.,**  
Cleveland,  
Ohio.

wish we had a place for a regular bargain counter as a permanent fixture.

Next week the Minnesota Retail Hardware Dealers' Association meets here, we understand with prospect of very good attendance. We learn of many manufacturers that will be represented here at that time. The meeting ought to accomplish a great deal in the way of exchange of ideas and helping to adjust some of the difficulties that are bothering the trade, but we fear the department stores and catalogue houses are with us to stay and that perhaps as much could be accomplished by intelligent well directed efforts at home in the way of meeting their prices under the same conditions, viz. spot cash with freight added. Certainly if this policy was pursued all over it certainly could not help winning out in the end. At the same time there will always be people who would be ready and willing to send away from home for goods without investigating what they might be able to accomplish at home, and as a rule the parties that send away to the supply houses for their goods are the ones that don't pay cash to the local merchant at home.

Weather conditions here this Winter have been excellent, not very cold, very little snow, still plenty in the woods for the loggers, in fact just ideal logging weather. Much outside work has been going on through the Winter with excellent prospects for a large amount of work as soon as Spring weather comes on. In fact it is anticipated there will be the best building season we have ever had. At the present time there is no indication of any serious labor troubles, as there were some fears of it a few weeks ago. We think the settling of the Chicago troubles has put matters here in very much better shape.

A new heavy Hardware and carriage woodwork house is to commence operations shortly and there have been rumors for a number of months that certain parties were to start a general jobbing Hardware business here, but the plans do not seem to be generally known. There undoubtedly is business enough that goes to Chicago from the territory tributary to the Twin Cities to justify the establishment of these two houses, and there is beyond question an excellent opening here for a strictly first-class jobbing dry goods concern.

We think the year just closed, while the volume of business has been satisfactory on the whole, has been quite a disappointment as far as profits are concerned. The writer has talked with a number of Hardwaremen located at different points and all have about the same story to tell. The shrinkage in values of stock has wiped out the profits for 1900, but taking the two years together show a very good average margin. If prices can only stand about on an even basis there ought not to be much difficulty in a good concern well located and looking closely after their business, to make a fair margin of profit. We think that there is every indication that this year will be a profitable one.

### The Evolution of Wire Fencing.

Probably no better illustration of the sudden changes in the demand for staple articles can be had than the present dropping off in the sales of barb wire, and the extraordinary increasing sales of woven or wire fencing of various kinds throughout the United States and Canada.

Most Hardware merchants will remember the introduction of wire nails some few years back, their rapid gain in sales on cut nails and of their finally being able to take the lead over their antagonist, which lead they still hold, and from present indications will undoubtedly continue doing so. The same rivalry cannot help being noticeable by merchants to-day between barb wire and woven-wire fencing, and the fact that barb wire must sooner or later take a back seat is already anticipated by the old manufacturers of this community, all of whom are now reducing their capacity of barb wire and increasing that of woven-wire fencing.

While there may be a demand for barb wire in limited quantities for several years to come,—particularly in the Western States or in new countries just being developed,—yet there is no denying the fact that it has become decidedly unpopular among the farming community, and is now rapidly giving place to wire fencing, which is not only more humane, but very much more efficient.

As we drive over the country it is indeed surprising to see the small amount of wire fencing of every description that is in actual use as compared with old-time split rail, stump, or other device used for fencing purposes by our forefathers before the introduction of barb wire, and we cannot help but conclude that the coming few years will be an era of new fencing, and that wire fencing of some description will replace these old-time landmarks.

It would seem that the question of fencing is one of great moment to the American farmer, and should be carefully thought out by him before making final arrangements for his requirements. It costs considerable money to fence the average farm to-day, not to speak of the worry caused by cattle breaking through, repairs, etc., so that durability and efficiency, in other words, the life of the fence, how long

it would last and give service as a fence, should be carefully inquired into before making purchases of this kind.

Most of us will remember the first style of woven-wire fencing put on the market,—“The Diamond Mesh Fence,” made entirely of small-sized wires, and while we occasionally see some of it now being erected, yet it has almost entirely disappeared from the market. It was not a lasting fence,—the wires were too light and would soon give way to ordinary abuse.

Next in order was “The Square Mesh Fence.” It was an improvement over the old diamond mesh because it at least contained some large-sized wires,—those for the horizontals, but the size of its verticals remained about the same as those contained in the other style, which gradually but surely condemned it as a durable article.

A wire fence, if subjected to no other abuse than exposure to the elements, will in time wear out from corrosion and rust, and it would seem reasonable to suppose that the finer size wires would be the first to give way.

If the above statement is correct, and we believe it unquestionably is, it would seem the height of folly to build a fence using large size wires for the horizontals and a wire much smaller in size for the verticals. Why not save money and use small wires for both? The horizontals are practically useless as a fence after your verticals rust or break out.

Of course, we understand that the manufacturers of this kind of fencing claim the strain of a fence to be entirely on the horizontal wires, for which reason they state it is not necessary to have wires as large in size and as strong for the uprights, but we do not believe the actual experience of farmers who have tried their goods will corroborate these statements. We have all seen miles of fencing where the small tie wires used for the uprights were hanging in broken threads, while the lateral wires apparently were still in a good state of preservation.

The Frost Wire Fence Co. were the first to introduce wire fencing, with not only large-size Coiled Spring Wires for the horizontals, but in addition, extra large-size spring stay wires for the uprights. They believed that in order to secure a durable and efficient fence,—one which would give years of wear and good service,—each wire should be as large as the other, and that all should be of sufficient weight and strength so as to protect stock and crops for many years to come without the necessity of constantly patching the fence up or replacing same with a new one. They use the Hard Coiled Spring Wire (which has double the strength of soft wire of the same gauge) for the horizontal wires, and the Hard Bessemer Steel Wire for the verticals. The coiled wire used perfectly provides for expansion and contraction

incident to changes of seasons, insuring the fence always taut between posts, and having none of that "baggy" appearance so often seen in woven soft wire fences. This is accomplished by the coiled wire without the aid of springs, ratchets, or any other tension devices.

This company also manufactures and sells galvanized coiled spring wire in bundle to the Hardware trade, in addition to their own style of fencing. On this commodity the trade has greatly increased during the past few years from the Hardware trade, especially those who handle fence-builders' supplies, and who furnish hand machine men, those who make a business of building fences in the field, as the use of this coiled spring wire enables them to construct any style of fencing desired.

Probably the best evidence of the quality of fencing and fencing material produced by this company is the fact of their sales more than doubling with each succeeding year, as a result of which they have been compelled to seek larger quarters than their present location affords them, and have

recently purchased a large tract of land located on the Pennsylvania Railroad, Cleveland, Ohio, where they intend erecting, the coming Summer, a factory of sufficient size to more easily take care of their rapidly growing trade.

Whale fishing is not extinct in the United States, but it is said to be gradually and slowly becoming so. From 1850 to 1875 the annual product of the American whale fisheries fell from 100,000 barrels of sperm oil to 42,000, of whale oil from 300,000 to 35,000 and of whalebone from 5,000,000 pounds to 400,000.

Data prepared by the Bureau of Statistics of the Treasury Department show that exports from the United States to Cuba, Porto Rico and the Philippine, Hawaiian and Samoan islands will aggregate more than \$50,000,000 this year, against \$41,000,000 in 1899, \$19,000,000 in 1898 and \$17,000,000 in 1897.

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Albuquerque, N. M.—The Donahue Hardware Co. have filed incorporation papers. The incorporators are M. H. Donahue, W. E. Pratt, A. B. McMillen; the capital stock, \$25,000.

Bridgeport, Conn.—M. E. Kelly.

Columbiana, O.—H. A. Keller has his new Hardware in stock ready for the Spring.

Darlington, S. C.—A new Hardware firm, Wilson & James, will soon begin business here. Some of their goods have already arrived. They will occupy the store on the east side of the public square formerly occupied by Edwards & Co.

Detroit, Mich.—Joseph A. Marks and Oren Scotten have formed a limited partnership to be known as Joseph A. Marks & Co., for the purpose of dealing in Hardware and sporting goods. Oren Scotten has contributed \$12,000 towards the common stock.

Elkhart, Ind.—William Theis, Jr., who recently moved here from Cleveland, Ohio, is preparing to open a Hardware store in the Nieman Block at 805 South Main Street. Mr. Theis is now purchasing his stock and will open about March 1.

Freeport, Ill.—C. L. Richards.

Gallipolis, Ohio.—Womeldorf & Thomas have their new Hardware store opened with a stock of well selected goods.

Hayt's Corners, N. Y.—The Thomas property, including the business block at Hayt's Corners, has been sold to Hilbert & Mosher, of Romulus, who will open soon a general store, carrying a large stock of Hardware and groceries, with a meat market.

Jackson, Miss.—The Jackson Hardware Co. has been incorporated. Capital stock, \$10,000.

Kingston, N. Y.—Platt N. Paine, of Milberton, Dutchess County, is going into the Hardware business in Kingston. He has leased a store formerly occupied by Marcuse & Middagh, corner of Wall and John Streets.

Longmont, Colo.—The J. B. Thompson Hardware Co. has been incorporated; capital, \$10,000; directors, J. B. Thompson, S. W. Cole, Ralph A. Kitley.

Milford, Mass.—William E. Staples and John M. Norris, salesman and head plumber at Clark Ellis & Sons' for many years, have formed a copartnership and will soon open a new Hardware and plumbing store on Exchange Street in the old quarters of Shea & O'Neil, which are now undergoing extensive alterations and repairs.

Moline, Ill.—A. E. Froyd & Co. is the title of a new Hardware firm which will commence business in the neighborhood of Fifteenth Street on the first of April next.

Runnels, Ia.—Articles of incorporation of the Runnels Hardware Co. have been filed for record. The incorporators are T. A. Erskine, P. W. Brown, R. C. Park and J. B. Stewart. The authorized capital stock is \$10,000. The company will engage in the retail Hardware and implement business in Runnels.

Stamford, Tex.—The Ed M. Hart Hardware Co. has been incorporated. Capital stock, \$20,000. Incorporated by Mrs. Julia C. Hart, A. Duggan and Arthur P. Duggan.

Swan Pond, W. Va.—Daniel H. Fulk is going to open a Hardware and agricultural implement store in Shepherdstown in the Spring.

Viriden, Mo.—Articles of incorporation have been filed in the Circuit Clerk's office of the T. F. Hopkins Co., which will carry on a retail business in Hardware, furniture, stoves. The capital stock of the company is \$15,000. The incorporators are Theo. F. Hopkins, William E. Alderson and William A. Wallace.

Williamstown, Mass.—Perry A. Smedley is making preparations to open a Hardware store in the Gale block on Spring Street.

### Changes and Improvements.

Athens, Mich.—H. C. Miller of Athens has sold his stock of Hardware to H. C. Hayman of Fabius.

Bode, Ia.—Peter Williams & Son have sold their stock of Hardware to John and Peter Schreiber, possession to be given on March 1.

Burlington, Vt.—F. H. Foss, of Vergennes, has sold his Hardware business to the Strong Hardware Co., of Burlington, who will run the store as branch to their Burlington business.

Canestee, N. Y.—The Hardware firm of Burrell & Carroll has dissolved partnership and a new firm been formed, consisting of G. C. and William Burrell.

Carthage, N. Y.—A new Hardware firm has been formed by John E. Strickland taking into partnership his son, Seth M. Strickland. The firm name will be J. E. Strickland & Son.

Clinton, Me.—C. C. Hayes has bought out Manley Morrison's Hardware business and has moved the stock into his store on Main Street.

Easton, Md.—Edward Larmour Rich and Harry Clark have purchased the Hardware business of E. T. Nicols.

Elberton, Ga.—The Elberton Hardware Co. has bought the stock of the Bewley Hardware Co. This deal makes the Elberton Hardware Co. one of the largest establishments of the kind in this section of the State.

Fairmont, W. Va.—The stock of Hardware and plumbing outfit of Alex Beaubout has passed into the hands of Hood & Clelland, who have been in the Hardware business here for some time.

### Business Embarrassments.

PHILADELPHIA, PA., March 12, 1900

GENTLEMEN:—The continued use of the Miller  
step ladders in our Decorating Department and the  
reports of many of our wholesale customers who  
have purchased them from us, prompts us to state  
that they are thoroughly satisfactory and all that  
you, as manufacturers, claim for them.

Very truly yours,

KAYSER & ALLMAN.

**Waterford, N. Y.**—The Eddy Valve Co. has been incorporated to manufacture iron and brass castings. Capital, \$50,000. Directors: Thomas A. Knickerbocker and John Knickerbocker, Troy; Howard C. Rogers, Lansingburg.

**Wilmington, Del.**—The National Mfg. & Supply Co. has been incorporated. Manufacturing machinery, etc. Capital, \$500,000. Incorporators: C. A. Lagen, of Philadelphia, Pa.; W. C. Jackson, of Wilmington, Del.; C. L. Ward, of Brandywine Hundred, Del.

**Wilmington, Del.**—The Reynolds Nailless Horseshoe Co., has been incorporated. Capital, \$500,000.

**Los Angeles, Cal.**—Los Angeles Well Tool Works has been incorporated. Directors: R. M. Close, G. T. Berry of Los Angeles, T. Spellacy of Bakersfield; S. C. Peck of Pasadena, and I. C. Taber of Toledo, O. Capital stock, \$50,000.

**New York, N. Y.**—The Sound Beach Tool Co. has been incorporated. Capital, \$12,000, and directors: D. A. Nunan and C. W. Coleman, of New York City, and W. G. Adams, of Sound Beach, Conn.

**Niles, O.**—Papers have been sent to the Secretary of State to incorporate the Independent Novelty Co. The incorporators are Messrs. Fred Stillwagon, James A. Kilpatrick, William Herbert and W. H. Smiley, of Niles, and B. F. Thomas, of Youngstown. The capital stock will be \$10,000. It will manufacture curtain poles, combination stepladders and other novelties.

**Norfolk, Va.**—The Norfolk Cutlery Co. has been chartered. Capital, \$50,000. The company will manufacture cutlery at Lambert's Point.

**Oakland, Cal.**—Articles of incorporation of the Eastman Mfg. Co. have been filed. The purpose of the company is to manufacture and deal in Hardware. The capital stock is \$30,000.

**Paterson, N. J.**—New Century Mfg. Co. has been organized to manufacture patented Hardware articles and other novelties, to acquire patents, etc. Authorized capital, \$10,000; amount paid in, \$5,000. Stockholders: F. C. Montage, New York

City; Warren N. Conant, Paterson; George P. Conant, Passaic; James B. Newton, Paterson; Alfred Gartner, Paterson; Thos. F. O'Grady, Paterson. Principal office, 152 Market Street.

**Reading, Pa.**—The Reading Specialty Co. is an industry recently organized by Luther A. Rhode and Jacob A. Wummer, who are engaged in the manufacture of novelties for the trade. Their factory and office are located at 343 North Eighth Street.

**Richmond, Ind.**—E. G. Hibbard and Samuel W. Gaar have established a shovel mill with H. A. Urban, of Newcastle, manager.

**Springfield, O.**—Stockholders in the Green Mfg. Co., recently organized for the manufacture of lawn sweepers, street sweepers and lawn tools, have elected the following board of directors: J. J. Hoppes, E. C. Greene, H. C. Pauley, J. N. Pauley and Mrs. Julia F. Barrett. Officers were elected as follows: President, J. J. Hoppes; vice-president, H. C. Pauley; secretary and general manager, E. C. Greene; treasurer, Mrs. Julia F. Barrett.

**Stamford, Conn.**—The Noack Mfg. Co. has filed articles of association. It will engage in the manufacture of locks, keys and Hardware. The capital stock is \$25,000.

**Woodbury, Conn.**—A new industry has been started in this place. Benjamin Richards, of Winsted, has bought and remodeled the Capewell shops and has begun the manufacture of brass novelties.

**Newark, N. J.**—The Federal Mica Co., with a capital of \$300,000, has filed articles of incorporation. The company will acquire mines, mining rights and land in New Hampshire, New Jersey and other States. William Grange, of Philadelphia, is one of the incorporators.

**Troy, N. Y.**—Articles of copartnership between David White, formerly of the firm of Bolton & White, stoves, furnaces, etc., 100 Congress Street, and William S. Shipley, have been filed with the county clerk. The Central Mfg. Co. of Albany has sold all its patent rights in new and improved machinery, roasting pans and other devices to White & Shipley, and they will at once start manufacturing here.

**South Bethlehem, Pa.**—E. C. Huntley, treasurer of the American Steel and Tool Co., of Chicago, who is the inventor of a new file and rasp, has rented a portion of the old Allam mills at South Bethlehem, and expects to be able to start operations in a short time. The new company will be known as the Union File and Rasp Works, and will employ 150 men. Mr. Huntley and Mr. Bittner, of Slatington, a member of the firm, will go to Philadelphia to purchase the necessary machinery.

**Southington, Conn.**—Articles of association of the Acme Mfg. Co. have been filed with the Secretary of State. The corporation is organized to manufacture

tools and Hardware. The capital stock is \$1000. The directors are John A. Hurley, George E. Wood and Eliza Wood.

### Changes and Improvements.

**Fulton, N. Y.**—G. L. Wells has purchased the interest of L. T. Miller in the Miller & Tooley Knife Works, and hereafter the firm name will be Tooley & Wells.

**New Haven, Conn.**—Ochs & Son have just completed a carriage Hardware factory on upper State Street. It is of wood and three stories in height with flat roof 40 feet by 30. The cost of the building will be about \$3,000.

**Richmond, Ind.**—E. G. Hibberd and Samuel W. Gaar have purchased the plant in this city formerly occupied by the Fulton Steam Boiler Works, and will convert it into a handle factory. Fifty men will be employed.

**Providence, R. I.**—On Putnam Street, near Butler Avenue, ground has been broken for a factory building which will be occupied when completed by the manufacturers of the Chase wood rim pulley, at present at 7 Eddy Street, with a factory at the corner of Pine and Eddy Streets. The new factory will be a one-story building, about 70x90 feet, giving in the neighborhood of 6,000 square feet of floor space, and will be lighted by big windows.

**Pittsburgh, Pa.**—James McKay & Co., chain manufacturers of this city, will soon commence the erection of a large plant on the Guthrie property, just across the P., C. & Y. Railroad from McKees Rocks. All the machinery will be of the latest improved pattern. The works will start with 100 fires, with provision for 250 more if needed. About 250 men will be employed. The new plant will manufacture large chains which are used on ocean vessels. The company expects to have the new works completed next Fall, and the present establishment on Liberty Street will then be abandoned.

### Miscellaneous.

**Hartford, Conn.**—The Capewell Horse Nail Co. have held its annual meeting and elected the following officers and directors: President, John E. Gillette, of New York; vice-president, G. J. Capewell; treasurer and general manager, A. W. C. Williams; secretary and assistant treasurer, G. C. F. Williams; directors, John E. Gillette, New York; G. J. Capewell, Hartford; E. C. Lewis, Waterbury; J. M. Allen, J. H. White, A. W. C. Williams, G. C. F. Williams, all of Hartford.

Greene, Ia.—D. R. Easton succeeds C. E. Shook.

Greensburg, Pa.—The Love & Sunshine Co. has sold its powder manufacturing plant in St. Clair township to the Cambria Powder Co., of Johnstown, for \$85,200.

Howard, Kan.—Dobyns & Lewis; S. D. Lewis retired.

Ilion, N. Y.—P. A. Stubblebein has disposed of his stock of bicycles and sporting goods to J. H. Harning.

Kansas City, Mo.—The Sellers Cycle Co. succeeds the J. E. Sellers Cycle and Supply Co.

Leominster, Mass.—J. T. Burns has sold out.

Mapleton, Ia.—Carhart & Carhart succeed Carhart Bros.

Medford, Mass.—Charles H. Brown will remove to 464 Main Street.

Middletown, N. Y.—Worcester & Crans are removing their sporting goods store and repair shop from 13 James Street to the store, 33 West Main Street, vacated by Egbert Crans.

Morristown, Tenn.—J. L. Wood & Co. succeed J. L. Wood.

Northville, Mich.—Carpenter & Huff succeed Carpenter, Yorkes & Harmon.

Oelwein, Ia.—Ridler & Bennett succeed Hardy & Ridler.

Ogden, Utah.—Have begun breaking ground for the erection of a building 22x80 feet as an extension to the Browning gun shops. This building, when completed, will give shop room 22x150 feet.

The present building has been outgrown, besides the closing of the Salt Lake branch has brought all the work to the Ogden house, making it absolutely necessary to have more room.

Omaha, Neb.—Boss & Merstein have discontinued business.

Ottawa, Ill.—Max Schulz succeeds Olds & Co.

Otterbein, Ind.—Hawkins & Hawkins succeed Hawkins & Ward.

Owosso, Mich.—Duard Blair succeeds Miles Wiggins.

Rome, N. Y.—The Rome Bicycle Mfg. Co., Albert Krebs, proprietor, is preparing to remove from the present location in the Hale Building, 523-525 W. Dominick Street, to the Evans Building at 210 W. Dominick. Here the company will occupy the rear part for manufacturing bicycles and supplies, while one-half of the front part will be used as a salesroom for a full line of sundries.

Swanton, Vt.—Mayhew & Wild will remove to the new block on Lake street.

Syracuse, N. Y.—The W. A. Doubleday Co., wholesale and retail dealers in bicycles and sundries, has purchased the Frontenac bicycle business. The Frontenac Co., of which George M. Barnes and Austin M. Dickinson were prominent members, decided at the close of the bicycle season of 1900 to retire from the bicycle trade and the business was offered for sale. The Hardware department of the Frontenac works was sold to Phoenix parties and the factory has been extensively remodeled and equipped for the Stearns Steam Carriage Co. There will be a Frontenac wheel this year under the control of the W. A. Doubleday Co.

Tacoma, Wash.—J. J. Mulholland has removed to 908 Tacoma Avenue.

Ticonderoga, N. Y.—E. F. Macauley has removed to opposite the postoffice.

Toledo, O.—The Union Supply Co., J. G. Swindeman, manager, have closed a contract of much importance to the bicycle trade. Mr. Swindeman has just returned from Buffalo, where he made arrangements whereby his company will be the exclusive agents of the Pierce high grade wheels in this city and surrounding towns in Ohio, Indiana and Michigan.

Toledo, O.—A. Thompson, formerly superintendent of the A. B. C.'s auto-

mobile plant in Toledo, has resigned and joined J. A. Carter, in the latter's new Geneva (Ohio) Automobile & Mfg. Co.

Trenton, N. J.—The American Saddlery Co., the stock of which is owned almost exclusively by the American Bicycle Co., has filed papers changing its name to the Automobile Cycle Parts Co., and increasing its capital from \$1,800,000 to \$5,000,000.

Trenton, N. J.—Toman's North Broad Street bicycle store is being enlarged by an addition to the rear.

Utica, N. Y.—Joseph F. Coupe succeeds the Utica Cycle Co.

Vassar, Mich.—J. E. Buck & Son have purchased the bicycle business of R. W. Cross & Co.

Waco, Tex.—N. M. Gay succeeds J. Steere and will add a repair shop.

Washington, Ia.—A. J. Rankin succeeds Berdo & Rankin.

Williamsport, Pa.—Tomlinson & Co. have removed to 105 East Third Street.

Wilmot, S. D.—L. S. Hauzen has discontinued.

Worcester, Mass.—The Reed & Curtis Machine Screw Co. have taken license under the E. E. Ziegler patent, and state that it grants them the sole right to make and sell that coaster-brake in this country. They will market the device as the No. 2 E. Z. coaster-brake.

### Recent Fires.

New York, N. Y.—The sporting goods store of Louis Levy at 4 Barclay Street has been damaged by fire. Loss, \$500.

Richwood, Ohio.—F. L. Moffitt's bicycle shop has been completely destroyed. Fully insured.

### Recent Embarrassments.

Chicago, Ill.—A final order of discharge in bankruptcy has been granted by Judge Kohlsaat to Mr. Louis H. Manson, a bicycle dealer in the Masonic Temple.

Chicago, Ill.—The March-Davis Cycle Co., which has been engaged in the bicycle manufacturing business for several years past, has been placed in the hands of a receiver. Mr. F. S. Hebard was appointed by Judge Kohlsaat to take charge of the assets of the company, and for the faithful performance of his trust was required to give bonds in the sum of \$40,000.

Newark, N. J.—Vice-Chancellor Emery in Chancery Court has signed a decree confirming the sale of the effects of the Stockton Mfg. Co., makers of bicycle parts, at 53 to 57 New Jersey Railroad Avenue, by Receiver Frederick F. Guild. The firm was placed in the hands of a receiver on Oct. 1 of last year, and the sale by Mr. Gould to the purchaser, Mr. George Holt, took place on Jan. 23.

## Columbian 1000-Shot Air Rifle.

Patented  
Oct.  
24, 1893.

CHAMPION  
MODEL.

This Air Rifle possesses advantages over all the Air Rifles now  
on the market. The materials used in its construction are  
the best. The appearance and workmanship is far ahead of  
any other Air Rifle made. It has an adjustable sight it shoots stronger  
and more accurate, less liable than any other to get out of order, all  
parts are interchangeable. We think we have the right to claim this as  
the "Champion" of all Air Rifles. List, per doz., Enameled, \$30.00; Full Nickel, \$42.00.

 JACKSON, MICH.

## PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

North Eleventh and Berry Streets,

Brooklyn, New York, U. S. A.

Catalogue on Application.

## SPECIAL PAINT OFFER

WHICH POSITIVELY CLOSES MARCH 1st.

For the purpose of introducing the EMPIRE PREPARED PAINT to the trade, where not at present for sale, we have decided to make the following special offer:

We will send any dealer 50 gals. of EMPIRE PREPARED PAINT, selected from our special color cards of the latest and popular shades, for \$45.00. The goods are all put up in patent strip covercans and pails in assorted size packages as follows: 1 gal., 1/2 gal., 1/4 gal., 1/8 gal., and neatly labeled. Terms 60 days from date of shipment, or the usual 2 per cent. off if paid in ten days.

We fully guarantee these goods to be far superior to any on the market, and with this special offer we will send you a full supply of color cards, large slat sign for displaying colors, and also a glass sign; making the most complete advertising outfit on the market.

Bear in mind this sacrifice price is made to introduce the goods where not already for sale and positively expires on March 1st. If you are interested, we would be glad to hear from you and would take pleasure in furnishing color cards or any other information which you may desire.

**THE WM. CONNORS PAINT MFG. CO.,**  
**TROY, N. Y.**

Jobbing Plant: 108-110 West 11th St.  
Main Office: 348 Broadway, New York.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

## HARDWARE SALESMEN

are requested to write us for prices on good selling Hardware Specialties. The Rapid Air Rifle is one of our good sellers. We have others. Dealers may find it interesting if they will write for prices on good selling articles. The Air Rifle retails at \$1.25. We'll send any good dealer a sample by pre-paid express at the dozen price. We rarely do this without getting a return order for from one dozen to a gross. We've got some good territory open for salesmen who can do business our way.

# CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chatillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us

has our name as makers plainly on the dial, thus:

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

**FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.**

# A Twentieth Century Production

NAMED

## "THE" MOUSE TRAP.

"THE" TRAP IS "AT THE TOP"  
BECAUSE

As compared with all other traps, it is SUPERIOR.  
It is ALL METAL and will never warp nor split like wood  
block traps.  
It can be washed and kept clean.  
"THE" Trap will never spring of its own accord, but will  
*always spring for a mouse.*  
*It is easy to set. It has the safest set and quickest trigger*  
*ever produced.*

BAIT BOX, SEE ?

The manner of baiting "THE" Trap  
is *superior*, crumbs of bait being put in  
the *bait box* either before or after it is  
set, and "THE" Trap can then be put in  
a less accessible place, frequented by mice.

The bait cannot be touched by mice  
without springing "THE" Trap.

IT IS MADE TO CATCH MICE, AND IT CATCHES.

Write us for Prices.

# Agency of the Doran Lighting System

USED FOR INTERIOR AND STREET LIGHTING.

Remember the **FIRST** in the Field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. **DON'T** confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by ALL who have seen it the **BEST** thing they ever saw.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago

## A Few of its Good Points :

- 1250 Candle Power.
- No fount to fill and break mantles.
- No shadow below, light all around.
- Turned up and down instantly with a chain.
- Simplicity. (It will surprise you.)
- Practically Noiseless.
- Handsome, looks exactly like the best electric arc lamp.
- Last, but not least, the cheapest system on the market, both in first cost and in operation, which is 1-6 of any other light of its power.

EVERY LAMP SOLD SELLS ANOTHER.

## ACORN BRASS WORKS...CHICAGO

19 H JEFFERSON STREET.

Special Notice:—All infringements on this patent will be prosecuted to the full extent of the law. *Exclusive territory will be granted.*

**THE** steel clad champions of long ago were the Hardware Dealers' best friends.

To-day the steel clad **CHAMPIONS** are the dealer's best friends, because every **RANGE** sold means a satisfied customer who will come again, since **Champion Ranges** do all the work of any high grade range with  $\frac{1}{3}$  less fuel. The double flue hot blast does it. It is the nearest approach to perfect combustion yet known. Our catalogue explains it all. Ask for it.

## The Eclipse Cleanable.

(Made in Burlington, Vermont.)

The only removable ice chamber refrigerator that introduces cold dry air at the bottom of provision room, getting it under and between the food and forcing the warm, moisture-laden atmosphere upwards and away to the ice, the great condenser and purifier. This is positive circulation.

It is original and has no imitator or competitor. It is a success, and the dealer who wishes to build up a permanent trade in refrigerators can do it with the *Eclipse Cleanable*.

The people like it. It does good work economically, and is attractive in appearance. Made in plain and ornamental finishes. Every one sold is a standing advertisement.

We want your trade. Let us send you a couple of samples and we will get it. We have the utmost confidence in what we are offering you. There is money in it for you and ourselves. Our interests are mutual.

1901 CATALOGUE NOW READY.

**Eclipse Refrigerator Works, . . Burlington, Vermont.**

# McCray Refrigerators

*Fine Tile Lined  
and Odorless  
Wood Lined*

*Also a full line of stock sizes  
ready for immediate shipment.*

*Also Refrigerators of all kinds*

**Built to Order**

*For Residences, Hotels, Clubs, Restaurants,  
Groceries, Meat Markets, Hospitals, Public  
Institutions, Etc., Etc.*

Style Nos. 210 and 220, for Residences.

Style No. 260 for Residences.

**BRANCH OFFICES:**  
New York—341 Broadway  
Chicago—182 W. Van Buren St.

The McCray System insures perfect circulation of pure cold air; absolutely dry; never sweats; therefore is **PERFECTLY HYGIENIC**. For economical use of ice it has no equal.

## *Zinc Lined Refrigerators are Dangerous.*

The corroding zinc and imperfect circulation of air generates poisons which are absorbed by the foods and cause diseases. Milk and butter are especially susceptible to odors and poisonous gases. Physicians, prominent men, hospitals and sanitariums endorse the **McCray Refrigerators**.

**McCRA Y REFRIGERATORS SPEAK FOR THEMSELVES.**

Catalogues and estimates furnished free upon application. Catalogues—No. 36 for Residences, No. 45 for Public Institutions, Hotels and Cold Storage Houses, No. 55 for Groceries and Meat Markets.

# HARDWARE

Kull & Bantly, Conemaugh, Pa., have formed a partnership as dealers in general Hardware, plumbing, steam and hot-water heating etc., and it is their intention to handle a complete line of Hardware. They will be pleased to hear from manufacturers and jobbers in the way of catalogues, circulars and price lists, etc.

The Mackie Steel Tube Mfg. Co., Hammond, Ind., have recently started a new department in their factory fully equipped with all the latest improved machinery adapted especially for the manufacture of high grade steel tubing for the stove and range trade. They also have a large and well equipped nickel-plating room, and can furnish the tubing nickel-plated or in the black, as may be desired.

The annual meeting of the Hardware Club of New York will take place at the club rooms on Saturday, March 16th, at 12 M. for the purpose of electing five governors to succeed the following, whose terms of office will have expired, and for the transaction of any other business that may be brought before the meeting: Alfred D. Clinch, James D. Foot, George J. Loughton, Mortimer C. Ogden, Webster R. Walkley.

The business that has been so long established by Thomas Slaight, in Newark, N. J., for the manufacture of patent padlocks for railroads, switches, freight cars, etc., has been sold to a new company, who will continue business under the name of the Thomas Slaight Lock & Mfg. Co. This is an old-established concern that has been in business since 1849, and the present change it is intended shall bring it once more to the front in which aggressive methods will result, and make a large expansion of business possible.

We are pleased to learn that the Stanley Rule & Level Co., New Britain, Conn., and 107 Chambers Street, New York, have a new catalogue of their extensive productions under way. They have been identified with a line of high-grade Carpenters' Tools for nearly a half century, and we understand it is their intention at an early date to add to this assortment a line of Chucks, which have been a staple article with a number of other concerns. This is a new departure which we hope will prove of interest to the trade.

Geo. F. Covell, who has for many years been identified with the rubber trade, has severed his former trade connections and has associated himself with the Voorhees Rubber Mfg. Co. of Jersey City, N. J. Mr. Covell is particularly well acquainted with the trade in the South, where he has a very large number of friends and business acquaintances. He is a good salesman, a first class correspondent and a very successful business man. His long experience with the trade has made him very popular, and he will doubtless secure many good orders for the Voorhees Co. among his old customers.

Chicago Solar Light Co., manufacturers of the "Nulite" Arc Lamps, who were recently located at 56 Fifth Avenue, Chicago, have been compelled to remove their office to 81 Fifth Avenue, in the same building in which their factory is located, in order to be more completely in touch with their facilities and better able to handle their constantly increasing trade. In the new location they will have their offices on the ground floor, making them more accessible to the

general public, and in addition to which they are able to add a large salesroom wherein the large line of lamps now manufactured by them may be shown to the best advantage.

Superintendent Charles W. Sponsel, of the Capewell Horse Nail Co., Hartford, Conn., with which he has been so favorably connected for six years, was agreeably surprised at a recent date by being presented by the employes of the company, almost 450 in number, with a handsome gold ring bearing the emblem of the thirty-second degree as Mason, which indicates the grade to which Mr. Sponsel has already been elevated. On the breast of the double eagle is a large diamond, and the ring is suitably inscribed. He begins his duties as superintendent of the Eddy Electric Co., at Windsor, and this was an expression of good will from his former associates.

An incident occurred at Dubuque, at the Iowa State Hardware Convention, which was most fortunate for the J. D. Warren Mfg. Co., of Chicago, as directly opposite the convention hall was a Hardware store, which they had fitted up six years ago, which the Convention visited in a body, enabling them to see how well and perfect their work showed up after that number of years' wear, proving to them that although costing more at the beginning, yet by being thoroughly and well made, it is far cheaper in the long run. This feature, the outfit of Walter B. Baumgartner, brought out magnificently, and must have favorably impressed many doubting prospective buyers.

The Madden File Co., Middletown, N. Y., were organized in September last with the following officers: President, F. M. Madden, who was formerly secretary and treasurer of the Eagle File Co.; secretary and treasurer, David Kutner, formerly identified with the American Swiss File & Tool Co., and general manager, William Shannon, the former superintendent of the Eagle File Co. They inaugurated their plant by the purchase of the Hogan Boiler Co. of that city, to which has since been added a brick addition 160 feet long by forty feet wide, to be used as a forging and grinding department, and they have also installed a large amount of the latest improved file manufacturing machinery. The entire plant is in complete operation, and is turning out a superior grade of files and horse rasps.

The eighth annual banquet of the New England Iron and Hardware Association will be held at Young's Hotel, Boston, Tuesday, March 19th. The committee of arrangements, consisting of John T. Boyd, Chairman; H. M. Waite and Allen J. Chase, makes the announcement that Hon. Charles E. Littlefield, of Maine, and Hon. William Alden Smith, of Michigan, both members of Congress, have promised to be in attendance and deliver addresses. While these will be the principal speakers of the meeting, it is anticipated there will be a few others whose names will be announced at a later date. Charles Clark Adams will officiate as toastmaster, for which he is well qualified, and Daggett's Orchestra will be relied upon to enliven the evening with music of an instrumental character. This Association has now on its roll upward of a hundred members, and each succeeding meeting teems with greater interest. They are always looked forward to by the members as a feast of sociability and of the good things that are apt to promote it.

## Editorial Trade Review.

March opens with a vim which implies that an excellent demand for goods may readily be anticipated. Stocks are by no means in excess on any special lines. Large and growing assortments form the rule. So many varied articles are now forming the advanced, up-to-date stock of a Hardware dealer that prosperous conditions create in every trade centre a field of activity worthy of encouragement. Firmness characterizes the condition of the market on all the leading goods; the elements of weakness which made a few low quotations possible two months ago have disappeared, and disappointment over unplaced orders has to be borne with equanimity, when it is recognized that purchases at retail are made without the bargaining disposition resulting from limited cash resources and lack of work. It has rarely been seen as now how the consumer is so free a purchaser, whether a mechanic or a farmer, while employment is plentiful and the prospect for crops is good.

Builders' Hardware is looking up in every part of the country. The large amount of money seeking safe investment naturally turns toward real estate transactions and the building of homes. Improvements are projected on every hand, a better class of houses being contemplated by the well-employed than would have been considered a few years ago. Low prices are prevailing throughout this branch of the industry, but a steady demand as in other lines would soon rectify errors of cost and average up profits on the cheaper grades on which the greatest competition usually centres. Large stocks of Builders' Hardware is far from being the rule at leading factories, and a stiffening demand would meet with inability to ship promptly, which should influence early purchases of standard supplies.

As the season progresses the market for Hardware

finds a tendency toward advanced prices, which is daily becoming more and more manifest. This is strengthened materially by the fact that a positive lack of surplus stock is evident in the leading mills and factories of staples, and the prospect for prompt deliveries is creating a feeling of uncertainty in trade circles, where full orders for Spring are not already provided for. Even the manufacturers of Hardware staples have been embarrassed for prompt shipments of their raw material, in which a scarcity has been the prevailing feature under the progressive demands made upon all sources of supply during the past few months. It is the part of wisdom, one would think, to complete arrangements for supply before the season has advanced too far, as the advent of labor disturbances in connection with the leading products of our industry would bring about advances in quotations that might prove detrimental to the prosperous anticipations universally held by the trade.

It would seem to one not in our line of business as though the Hardware trade were far in advance, with their progressive methods of accomplishing results in a business way. The numerous conventions, which are so largely attended and which are so successful in combining the interests of the trade in every State; the many thoughtful papers read by active members, who seriously consider the various problems as they arrive—all these are influences that bring closer together the retail dealer, jobber and manufacturer, and make successful achievement a possibility. The various committees appointed for future work at these annual conventions devote a good deal of time to the accomplishment of results for the general good, and make radical differences in quotations impossible as affecting the several divisions of the industry. Reforms are entertained in questions of settlement or delivery of goods, and questions such as sales made to department stores and catalogue houses of standard specialties, that are used as baits by the aid of which sales are increased on other lines of greater importance, are more easily deliberated in the presence of the leading dealers and representatives of such manufacturers as fail to properly protect legitimate dealers in a duly organized industry like that of Hardware. There may have been some excuse for looseness in making sales to such distributors when a few years ago the times were not abundantly prosperous, and cash sales were among the exceptional transactions. At that time the department stores and catalogue houses obtained more readily the supplies which enabled them to encroach upon the preserves of the regular dealer. But in these more fortuitous times it would seem as though some standard of business morality could be established which would prevent the unwise and unfair competition on staple lines and standard articles that form the foundation of profitable sales through the hands of legitimate Hardware dealers, the pioneers in this far-reaching industry, who with hard work blaze a path for business which later is followed by an unprincipled competition with irregular methods.

## Exhibits in Nicaragua.

A. D. Straus, Consul General for Nicaragua, 18 Broadway, New York, has received information from the Nicaraguan Minister at Washington of the establishment of a "National Museum of Nicaragua," devoted to the development of industry, commerce and science, with a section devoted to foreign commerce and industry.

In order to establish better commercial relations between Europe, America and Nicaragua, a large hall has been pro-

vided in Managua, the capital of Nicaragua, for the public display of the products of foreign lands.

The director of this museum invites the Nicaraguan Consuls in Europe and America to solicit from the manufacturers and producers within their consulates samples (not too large) of goods and articles of their manufacture, only such as will be of interest and of commercial value to that country being desired.

Articles of this description are to be exhibited at all times free of cost, and it is anticipated that a permanent exhibition of this kind will inure to the benefit both of exhibitors and visitors. Where a manufacturer's products are bulky, such as machinery, heavy farming or mining implements, etc., it is requested that only small working models or a set of representative photographs be submitted.

Mr. Straus extends an invitation to the merchants and manufacturers of New York to send him samples suitable for the purpose, such as are suggested by the director of this Central American Museum. He requests, also, that all exhibits be accompanied by a lucid description or by instructions how to operate them, their advantages, their technical or commercial names, together with catalogues, price lists, terms, commissions allowed to agents, and especially the style of packing for export. This latter point is of great importance to the Nicaraguans, as the custom duties of that country are based on the gross weights. All consignments should be packed as lightly as is consistent with safety.

### The Good Salesman.

Artemus Ward, in his journal for advertisers, *Fame*, outlines the make-up of a good solicitor which may well be applied to salesmen, and we therefore quote, substituting the word salesman:

It takes a very capable man to make a good salesman. One who knows how to shut his mouth as well as how to open it when necessary. One who understands how to keep his mind on the matter in hand even when the really interested party wavers. A man whose perseverance is perfectly balanced by politeness, tact and understanding; a man whose selfish side is strong but controlled by intelligence. A man who having learned to control himself is capable of influencing others—such a man will make a good salesman.

Don't tell everybody that you have a large fund of experience in the study of human nature. The very telling of it proves that you are mistaken. Do not talk of your magnetic powers, your almost hypnotic capacity. Ten to one you have not got it, but if you have, do keep it out of sight; it will serve you better so. Do not wind yourself up like a clock with some set speech. Be natural; be yourself. Copy no one, but study high and successful models.

One wins by one method, another by the very opposite. Most of them work as industriously as their line permits. It was a good salesman who placed but one order in eighteen months—but he sold suspension bridges. It is a very general mistake to suppose that unless tempted by a commission salesman will not work actively. After years of hard experience in this line I want no men on commission; the irregular income and the irregular life which grow out of a commission do not produce the best results.

After all, a salesman is a man, an active one; beset by many temptations; troubled by many drawbacks; leading too often an irregular life in point of brains, if not of habits; too prone to think little of his calling; too apt to touch heaven when he has an order, and the nether regions when he is "turned down."

The truth serves the salesman best. He should pursue the truth as to the buyer's interest and advantage, but to do so he must himself have at least a speaking acquaintance with truth. He should fortify himself with facts, with tact, with business hints—and let the drinks and cigars go! He should be polite to every one—it pays. One thoughtless or over-smart salesman was rude to my bookkeeper, and as, like most men, I keep books in my head; his balance long stood on the debit side. But with all their faults they are a bright lot, and I love them. So here's to the salesman—may he call again!

### LEGAL CORRESPONDENCE.

Conducted by William Marston Seabury, Attorney and Counsellor at Law, No. 43 Cedar Street, New York.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

**QUESTION:** About two years ago I made a contract with a certain company in this city for a piano. The contract provided that I was to pay \$25 down, and the balance of \$250 in monthly instalments of \$10 each, until the entire purchase price was paid. I was to have the possession of the piano, but the company was to retain the title to it until it was paid for in full, when they were to give me a bill of sale. But if I failed to make the monthly payments, then the company could retake possession of the piano, and I was to forfeit whatever sums I had paid. I paid the instalments for six months, and then gave up the piano. The company still have possession of it, but have brought suit against me for the entire balance unpaid. Have I any defence?

**REPLY:** The contract which you entered into is a very usual one at the present time. Under an ordinary contract of sale, where the buyer has failed to pay, and the vendor has recovered possession of the property, he (the vendor) may have one of several remedies. He may hold the property as his own, and sue the vendee for a breach of contract. The damages would be the difference between the contract price and the market price, or he may hold the property for the vendee, sell it on his account and sue for the difference, if any, between the price he receives and the contract price, or retain it and sue for the entire balance remaining unpaid, but the latter remedies are based upon the assumption that the title to the property has passed to the vendee. We are of the opinion, however, that inasmuch as the contract in this case expressly provides that the title shall not pass, that the vendor cannot pursue these remedies in the absence of any statutory provision. There is a statute which provides that under such a contract as this, and where the vendor has recovered possession of the property, he may, upon thirty days' notice to the vendee, sell the property at public sale, and sue for any difference remaining. We cannot construe this statute to permit the remedy sued for in this case, and we are further of the opinion that the neglect to take advantage of this statutory provision and the acts of the company have resulted in the waiver of this remedy.

**QUESTION:** A few years ago I lent a sum of money to a man, who gave me as security a mortgage on some property which he said he owned. Some time afterwards I discovered that at the time he made this mortgage he was not the owner of the property, but had purchased it a month or so later. He failed to pay me the debt, and I threatened to foreclose the mortgage. He claims that I cannot do this, as it is invalid on account of the fact that he had no interest in the property at the time it was made.

**REPLY:** Whether or not you have any lien on the property described in your mortgage depends entirely upon what kind of a mortgage it is. If it contains a covenant of warranty, your mortgagor will be estopped in an action of foreclosure from setting up the defense of his lack of title when he executed the mortgage, and your action would succeed. But if it does not contain such a covenant, it is worthless, as he merely mortgaged the interest he had, which was none at all, and there is no covenant by which he will be estopped from pleading this defense.

In India, China, Japan and adjacent countries are about 400,000,000 people, strong, active and long lived, who eat no meat. The Turkish porter on a daily ration of rice and dates will jog along with bent back under a load that would crush a Western man. Darwin tells us that the Andean natives do a day's work of 400 foot tons, nearly twice the work of an ordinary laborer, on a diet of bananas.

### The Bommer Ball Bearing Floor Hinge.

Bommer Brothers, 257-271 Classon Avenue, Brooklyn, N. Y., have recently brought out a new floor hinge showing important improvements in this class of hinge. The illustration we give shows the construction (parts being broken away for this purpose). The top plate shown in the foreground is made of steel, and a steel tension wrench is furnished with each set. The tension of the Bommer Ball Bearing Floor Hinge being adjustable, only four sizes are necessary to cover the entire range of doors; this feature is of practical advantage to dealers, eliminating useless sizes and enabling them to carry a full assortment, on a smaller investment. The Ball Bearing being raised on centre post nearly to floor level, gives a well balanced easy movement,

and, being covered by hollow spindle, the ball bearing is thoroughly protected from water, dirt and grit. The top bearing plate is broad, so that the screws get a good hold in flooring. Only the best oil-tempered springs are used; all parts are interchangeable and carefully proportioned. The cylindrical shape of the Bommer Ball Bearing Floor Hinge makes it easy to let into the floor, and brings the centre of the pivot as near as possible to the casing. The finish is in every respect up to the high standard set by these well-known manufacturers of this special class of goods. Where hinges of this class are desired, above points are worthy of careful consideration by architects and builders and the up-to-date Hardware houses through whom they draw their supplies.

### 1901 Dayton Bicycles.

The modern bicycle offers a notable example of the marvelous progress in the mechanical world during the closing years of the nineteenth century. Among the best known makes the Dayton bicycle has long been noted for its phenomenal success, which has been even more pronounced during the season of 1900. The Dayton line for 1901 is very complete, and represents the highest attainments in modern construction. The new line includes four regular models, covering a wide range and calculated to meet all requirements.

Model 52, the Special Light Roadster.—List \$50. A light, graceful road wheel for riders seeking the best mount obtainable, and who look with critical eyes on the fine points of design and construction. The frame is built of 1 1-8 inch

seamless tubing, with outside joints and forged steel connections.

Model 53, Special Track Racer.—List \$50. An entirely new track wheel, built especially throughout for the lightest possible weight. The frame is of one-inch tubing, outside joints, forged steel connections, and weight of the wheel complete, with lightest track equipments, under 20 pounds.

Model 50, Dayton Roadster.—List \$40. A substantial, reliable and durable road wheel, having the well-known Dayton finish, strength, graceful design, speed and easy-running qualities. The frame of this model is of 1 1-4 inch seamless tubing, with flush joints.

Model 51, Ladies' Dayton.—List \$40. A light, graceful

and elegant ladies' wheel. The frame has a double curve and is made of 1 1-8 inch and 1-inch tubing.

1901 Dayton Tandems are built to order in four models. The most approved makes of hub coasters and brakes are supplied on all Dayton single wheels for 1901.

In continuance of the Dayton practice of supplying the most desirable new features in bicycle construction, the pneu-

matic cushion frame is also furnished on Models 50, 51 or 52 at the usual extra cost.

Space forbids an extended description of the detailed construction of the 1901 Dayton. All interested are invited to write the Davis Sewing Machine Company, Dayton, Ohio, for complete 1901 catalogue. Dealers in unoccupied territory will do well to communicate with the manufacturers of the Dayton, without delay.

## MINNESOTA RETAIL HARDWARE ASSN.

The fifth annual convention of the Minnesota Retail Hardware Association was held at Century Hall, Minneapolis, Wednesday, Thursday and Friday, February 27th, 28th and March 1st.

### WEDNESDAY AFTERNOON SESSION.

The opening session was scheduled to meet at 2 P. M., but it was nearly 3 before the president, J. E. O'Brien, called the meeting to order. The first thing on the programme was the calling of the roll, seventy-five delegates being present. It was anticipated that the mayor of the city, A. A. Ames, would be present to welcome the convention, but he was unable to take part in the proceedings on account of illness. Secretary McCracken announced this fact to the convention in the following letter:

It is with deep regret that I extend the greetings of the City of Minneapolis by letter instead of in person, to the fifth annual meeting of the Minnesota Retail Hardware Association. Ill health prevents me from welcoming you to the city and extending its freedom and hospitality in a manner befitting the importance of your organization, and the magnitude of your convention; but, nevertheless, I will in this manner express my best wishes for a successful and pleasant stay in our midst, and assure you that the keys of the Metropolis of the Northwest are in your keeping.

Such organizations as yours are of great benefit to any community and of incalculable value to the business interests represented, and it is with pleasure that I learned some time since of your visit to Minneapolis. I trust your stay will prove more pleasant than your anticipation, and that this meeting will be followed by many more, each one adding to the prestige and influence of your organization.

The reading of the letter was responded to by President O'Brien in a few appropriate remarks, in which he said "The greeting we have just received from the mayor comes as a greeting from many. I know that we all feel regret that the mayor is unable to be present, and I hereby extend to him, on behalf of the Association, our heartfelt wishes. The Mayor of Minneapolis is so popular that we hear his praises sung 300 miles away. This association is built on sentiments such as the mayor himself typifies."

President O'Brien next called on C. F. Ladner, of St. Cloud, who is regarded as the father of the Association, and he made a few remarks.

He was followed by A. T. Stebbins, of Rochester, who made a brief reference to "Progression as the order of the day." The President then said: "I have just received the following telegram from the Ohio Hardware Association, who are now in session in Cincinnati:

"Greetings and best wishes of the Ohio Hardware Association. O. M. Scott, President; George M. Gray, Secretary." The following response was sent:

"Minnesota Hardware Association, assembled 400 strong, cordially acknowledge greeting and extend the right hand of fellowship and good will to our brothers in the famous Buckeye State. James E. O'Brien, President."

The next thing in order was the announcement of committees. On motion of M. De Mott, of St. Paul, that a committee of seven be appointed on Resolutions and Grievances, this was adopted, and the committee were appointed as follows: M. De Mott, St. Paul; O. F. Olson, Brandon; Charles F. Ladner, St. Cloud; A. T. Stebbins, Rochester; J. H. Smith, Minneapolis; George W. Wells, Duluth; Julius Schmidt, Wabasha.

On motion of C. F. Pierce, of Duluth, that a committee of seven be appointed as a nominating committee, it was adopted, and the following were appointed: C. F. Stremel, Minneapolis; George D. Parmelee, Rochester; J. E. O'Brien, Crookston; B. H. How, Sauk Centre; T. F. Vanesek, New Prague; W. E. Nutter, St. Peter, and M. De Mott, St. Paul.

This was followed by the reading by Secretary McCracken of his annual report, from which we make a few extracts:

### SECRETARY'S REPORT.

The trust which one year ago you reposed in the officers and executive committee of your organization has been carefully guarded, conscientiously administered and faithfully discharged by them, and on this natal day of our association, so precious in their eyes, they return you their official record of the year, bearing as it does the impress of their honest convictions, their unbiased judgment and their concurrent action.

With the passing of the year, so, too, has passed another landmark in our association work, the result of which we trust has been to strengthen us as an organization, to enlarge our views along the lines of the greatest good to the greatest number, enabling us to embody in the action of this convention now assembled, such changes if any, as may be deemed necessary to further its future harmonious relation with those affiliating with us, as well as to retain the approval and confidence of our entire membership.

\* \* \*

All associations like unto ours are as yet in the formative period of their existence, and in furthering the principles they would conserve, and in establishing the policy to be pursued, we should be willing to accept and be governed by practical results obtained, rather than theoretical views we may have anticipated.

\* \* \*

The protective feature of our work, intended to benefit our membership, should be well looked after, and yet in the adoption of ways and means, however, plausible, we cannot afford to run counter to well established business usages, uniformly governing mercantile transactions, if we would have them effective.

Protection is always practical and will be equitable and just, if in seeking it for ourselves we remember the golden rule, to "do unto others as we would have them do unto us"—departing from this it simply becomes protection which does not protect—and such protection is in no wise commendable, but weakens the loyalty of members to our association.

The same was accepted and placed on file.

George D. Parmelee, of Rochester, then read his annual report, giving a detailed account of his transactions through the year, and showing that a balance at present in the treasurer's hands was \$86.05.

On motion of A. T. Stebbins, of Rochester, the reports of the secretary and treasurer were referred to the executive committee, which was afterwards reconsidered, and an auditing committee of three was appointed, consisting of G. M. Evenson, St. Peter; A. T. Stebbins, Rochester, and E. K. Evans, Princeton, to audit the secretary and treasurer's reports.

The session then went into executive session. After a short recess the convention was called to order at 4 o'clock by Vice-President T. H. Caley, who took the chair. The Question Box was then opened, and several questions taken from it, upon which the usual discussion ensued, which was participated in by a large number of the delegates, who presented illustrations indicating their views from their own experiences. At the conclusion of the discussion having reference to the Question Box, President O'Brien stated that the Minneapolis Elks had invited the visiting Hardwaremen to meet with them in their lodge rooms in the convention at 9.30 P. M. He also called attention to the banquet to be held at the Nicollet Hotel on Thursday evening. The meeting then adjourned at 5 P. M. to meet at 9 A. M. Thursday.

### THURSDAY MORNING SESSION.

The delegates were late in arriving at Century Hall, and it was 9.45 before President O'Brien called the convention to order. He emphasized the necessity of registering on the part of the dealers that the register might show a complete

list of those in attendance. He stated that the first thing in order was the election of four members of the executive committees, whose term of office would last three years, one of whom should be president of the Association.

The Committee on Nominations then made their report as follows on nomination for president, viz.: W. H. Tomlinson, of Le Sueur. Mr. Tomlinson's name was greeted with applause by the Association, and he was unanimously elected. President O'Brien said: "It affords me great pleasure to introduce my successor. He will add strength to the Association. He is the strongest name that could be presented to the Association for this office. We now have at our head a man who has been a success in his private affairs. He will do right, and see that the Association will do what is right." President Tomlinson then took the chair, and said: "It is a great and unexpected honor which the members of this Association have bestowed on me. I am a plain, everyday Hardwareman, and I will do my best to serve you. I started in the Hardware business just thirty years ago tomorrow, so you can all see that I am a stayer."

The Nominating Committee reported that they had selected for the office of vice-president H. S. Cleveland, of Minneapolis. Mr. Cleveland was elected by acclamation. The following names were then presented by the nominating committee for place on the executive committee: W. H. Tomlinson, Le Sueur; F. H. Hunt, Red Lake Falls; Benjamin F. Kernkamp, St. Paul; Julius Schmidt, Wabasha. The committee also recommended that the executive committee should re-appoint Thomas McCracken, of Minneapolis, as secretary, and should appoint G. M. Evenson, of St. Peter, as treasurer. The report was accepted.

The Committee on Resolutions here asked for an extension of time.

President A. C. Hatch, of the Retail Hardware Dealers Mutual Fire Insurance Co., was scheduled to make at this time a talk on Fire Insurance, but as he was unable to be present Secretary McCracken, who is well known to be full of the subject, was called upon to make a statement of this method of insurance. We make a few extracts from his address, as follows:

#### INSURANCE.

One of the practical results of our Association Work is the Retail Hardware Dealers' Mutual Fire Insurance Co. of Minnesota. We are the only company confining its business exclusively to Hardware dealers, and will write insurance upon your stock or upon building containing same if you own the building. The smallest amount we write is for \$500, and the largest amount \$3,000. Our articles of corporation prohibit us from incurring any liability greater than \$3,000 in any town on two risks exposed to one fire. The result, therefore, is in our risks being well scattered and not subject to excessive loss from disastrous conflagrations.

We issue the Minnesota standard policy, and every holder thereof, by virtue of his policy, becomes a member of our company, and has a voice and vote in its management. Why should you not place your insurance in a company where you place your vote?

\* \* \*

Mutual insurance is the oldest as well as the best and most economical in the world. You obtain it at a less percentage of cost, as compared to losses incurred, than by any other known plan. Community of interest insures proportionate care and protection against loss—and in strengthening the moral hazard of our risks, we incur less liability and far greater security to each policy holder and to the company.

He was followed by F. L. Hampton, of Ada, for a number of years connected with the Northwestern Lumbermen's Insurance Co., who read an interesting paper, from which we take a few illustrations:

In the first place, the interests of every dealer in Hardware and farm implements are practically identical, and the interests of every dealer in these several states, with the exception possibly of Nebraska and Montana, are identical and can be served to a much greater degree by the one strong Association, with one set of well paid, able officers, than by the half-dozen struggling State Hardware Associations and the half-dozen struggling Farm Implement Associations.

To me the only advantage the separate State Associations offer is sentiment, founded entirely upon wind. Sentiment I have found is a mighty poor foundation in business and will prove to be a mighty poor foundation to build up business associations. The advantages of the one association idea will be found, first, in the large membership, overflowing treasury, and well paid capable officers. From these all else will come. Our officers will be able to give their entire time to Association work correcting and fighting abuses, instead of scratching for funds to pay their salaries and expenses. This feature is most important. Look at the present situation. With the several States having a membership of from two to four hundred, what can you expect? Your Secretary, the only paid official. No money to pay your President or directors a salary, or expenses of calling directors' meetings. No money to correct abuses, and the work necessary to satisfy a critical membership and fight outside aggressive foes. You can get together once a year, pat each other on the shoulder and have a good time, but you are accomplishing but very little. The one Association would compel a membership of almost every Hardware and implement dealer in the several states. This would come, because it would be to the fundamental interest of every one to be a member. The insurance feature would become so popular and profitable that it alone will more than repay the expense of paying dues and attending the annual meetings.

On motion, the paper of Mr. Hampton was referred to the Committee on Resolutions. This was followed by W. F. Baillie, of Barnesville, who read an instructive paper on the

#### GARNISHEE LAW,

from which we make a few extracts from his address, as follows:

As the law now stands the wage earner is exempt to the extent of \$25, but conditioned upon his drawing his pay monthly; whereas, if he draws his pay weekly, so long as it does not amount to more than \$25 per week, he is still exempt. As a result there are many men who owe small bills and are earning from \$2 to \$3 per day, and drawing their salary at the end of each week who are taking advantage of the law. Such are good, honest men in the eyes of the law, owing, perhaps, \$24.75 to more than one business man and drawing \$18 per week, because the law does not allow the merchant any recourse so long as they do not draw any more than the stipulated amount, \$25. These men are doing just as we frame the laws for them. For does not the present law say to the man who is paid by the week, "you can be dishonest for the sum of \$25 and I will protect you, and preserve all your earnings to that amount, and until you can earn over \$4 per day we shall see that you are not required to pay your little bills."

\* \* \*

#### TENDENCY OF PRESENT LAW IS TO FOSTER DEAD-BEATS.

I believe that the present law has the tendency to foster dead-beats and to make men dishonest. It may appear that in protecting the laborer to keep \$25 per month that we are working for the benefit of the poor man. There never was a time, neither will there come a time, when the average retailer will take advantage of the laborer to press him down, but in times of his own adversity as well as prosperity, has the retailer been willing to stretch forth the hand of charity and help the poor man along. If there were no such law to be found on the statute books as an exemption from garnishment I believe we would be far better off in the business world. Then would the honest laborer and the retail merchant stand side by side working for the betterment of mankind and the uplifting of the poor. When we can wipe all such laws from the statute books and show men that the only way is to pay for what they get, then the man is helped to aid himself.

\* \* \*

While it is a pleasant thing to know you can make a man pay, is it not greater satisfaction to feel that you can trust a man and that he will pay because the law does not ask him if he wants to be dishonest for any amount?

At its conclusion, the paper of Mr. Baillie was referred to the Committee on Resolutions.

The secretary then read a letter from the Inter-State Retail Hardware Dealers' Association, calling attention to a meeting that would be held March 6th in Chicago, requesting the Minnesota Association to send two delegates.

President Tomlinson then called on Irving A. Sibley, of South Bend, Ind., who is a member of the executive com-

mittee of the Inter-State Association, who made a brief address in favor of the affiliation of the Minnesota Hardware Association with the other Associations in Inter-State work. He said there were many important matters which could not be as well handled by the separate State Associations as by an organization composed of a number of States, and dwelt upon other advantages that would be had from this closer affiliation. The question of affiliation was referred to the executive committee with power to act. The meeting adjourned at 11.45 to reconvene at 2 P. M.

#### THURSDAY AFTERNOON SESSION.

The Thursday afternoon session of the Association was called to order by President Tomlinson at 2.35. Representatives of the various jobbing houses who were present were called on to make remarks, the first to be heard from being E. A. Moye, of the Marshall-Wells Hardware Co., of Duluth, who made a brief speech.

Mr. McGuire, of the St. Paul Hardware Co., followed with a few remarks having reference to the advantages of local organization, upon which he dwelt from personal experience, and concluded as follows:

Gentlemen, when you return home you should form local organizations and have an agreement with your competitors. Let me show you an instance where this will work to your advantage. A man comes in day after day to make small purchases. After a month he asks for five, ten or fifteen dollars' credit, and you give it to him. He may come back and pay this, then you may never see him again. In the latter case he is working this same dodge at some other store. We all need assistance, whether we are conducting a large business or a small business. Helping one another creates a good feeling, and where there is a good local association the business is elevated and there is a more friendly feeling. You should go home and organize these associations and keep them up. You prominent men in the trade should give time freely to those not as well known in the trade as you are. It does you good and the trade in general good.

R. A. Kirk, of Farwell, Ozmun, Kirk & Co., St. Paul, was next called on by President Tomlinson, and his appearance before the convention was greeted with considerable applause, Mr. Kirk being one of the most popular men in the State. We make a few extracts from his address, which was an exceedingly interesting one, and listened to attentively:

To-day the greatest difficulties in the path of the Hardware trade is the catalogue house and the department store. The department store does not affect all alike; a large number of country districts are not suffering from this evil. But there is no question of the magnitude of this evil in the city, and it is reaching out into the country more and more. No one knows how long this will affect business.

#### PROBLEM SHOULD BE MET.

The wholesaler prospers as the retailer prospers. He cannot live without him. If the wholesaler could not get retail trade he would be impaled on one of the two horns of a dilemma. He would have either to go out of business or would be compelled to start a catalogue house. Each one would be distasteful. Neither the wholesaler or the retailer will be eliminated. The adaption of our business to circumstances is a hard problem. The Association and the wholesalers should consider this problem and meet it so far as the department store is concerned. It is folly to undertake to shut off supplies from the department stores. This point has not yet been reached. If this cannot be done there are other

\* \* \*

This great evil will be largely removed by preventing, advertising and selling goods at cut prices. It is not utopian to consider this matter, as manufacturers cannot afford to ignore the jobber and the retailer. The bulk of our manufacturing interests will not consider conditions that will drive them from the wholesaler. It is not by compulsion, but by the friendly presentation of the case by these organizations of jobbers and retailers that I believe manufacturers will be brought to co-operate in mitigating this evil, so that it will not be a prominent factor in trade. I know of my personal knowledge that efforts have been made in this direction. You have in this work the co-operation of the National Hardware Association; the efforts of this Association from its beginning back in the early nineties has been this

way. I do not think, and do not feel the National Hardware Association that we have done all that we should in this matter. The attention of the National Hardware Association has been drawn this way. Missionary work has been done in this matter, and such work as has been done has proven satisfactory.

Take the subject of catalogue houses. This is the greatest evil to our country friends. No jobber who appeals to the retail trade has any right to furnish goods to supply houses. (Applause.) This can be put to the manufacturers so that if they do not eradicate they can mitigate this evil. Even in the question of advertising prices the man who furnishes the goods has something to say. If the catalogue house can be placed in a position in which it cannot advertise cut prices there will be a reformation. To have a reformation means co-operative work. If wholesaler and retailer do not work together we cannot succeed. Heartly co-operation is necessary. The question is, is the game worth the candle? There should be but one answer. I express my opinion and the opinion of others when I say that this will succeed.

#### THE CRYING EVIL OF THE DAY.

I have felt like saying that I consider this the crying evil of the day in trade. I think every one of you thinks this the most serious menace, but there is no necessity of being discouraged. This evil can be grappled with. I have seen many evils mitigated or abolished. I am not advocating this with any malicious hostility toward catalogue houses and department stores. The department store in its general plan is here to stay. But the evils inherent in it should be removed, and I believe they can be removed. Take standard goods known by the consumers and sold under their trade name. A condition can be brought about so that these goods will not be sold at cut prices. The manufacturer of a special line can decide that his goods cannot be sold at ruinous prices. He finds that when his goods are sold to department stores, he finds that he is not selling any more of these goods than when sold to the legitimate trade, and he would rather sell his goods to small consumers than to a few men who can turn them aside a few years from now.

He was followed by D. B. Lyon, of Janney, Semple, Hill & Co., who stated that his firm was thoroughly in accord and would stand shoulder to shoulder with the Minneapolis Hardware Dealers' Association.

On motion of G. M. Evenson, of St. Peter, the convention went into executive session, during which Mr. Ladner, of St. Cloud, read the report of the Committee on Resolutions and Grievances, which concluded with the following resolution, which was adopted unanimously:

*Resolved*, That the Minnesota Retail Hardware Association do hereby express our high appreciation of the valuable services that our esteemed president, J. E. O'Brien, has put forth in our behalf during the past two years. That the ability he has manifested, the uniform courtesy extended to every member of the Association, and the untiring labors exercised in our behalf has won for him our gratitude and heartfelt thanks, and we further appreciate the work of the retiring members of the Executive Committee in assisting the president in the performance of his duties.

On motion it was suggested that the chair appoint a committee of five to confer with other State Associations to enable conference to be held during the year with associations of other Northwestern States when necessary. The motion was amended by empowering the Executive Committee to act in such cases, and was then carried.

A number of suggestions were brought forward by the delegates, which were discussed in a harmonious manner.

T. H. Caley, of Princeton, in the course of a few remarks, said that the Association needed much more money so that it could carry on its work properly, and other members, speaking with this idea in view, spoke in favor of paying higher dues. A motion was made to change the dues from \$3 to \$5, but Mr. O'Brien gave reasons, in a few brief remarks, why it was not necessary just now to raise a large fund, and opposed an increase of dues at present. The meeting adjourned at 6.00 P. M.

(Concluded on page 53.)

### Champion Germ Proof Water Filter.

The Champion Safety Lock Co., of Cleveland, Ohio, to supply the constantly increasing demand for water filters for household use, have added another filter to their large line, which consists of filters for use in households, hotels, restaurants, hospitals, on bars; and also in the manufacture of drugs, chemicals, and by bottlers. The drawback to the use and sale of faucet filters has been the necessity of removing them from the faucet to obtain unfiltered water.

FIG. 1.

The Champion No. 10 Germ Proof Water Filter overcomes this objection by the outlet for unfiltered water at the bottom, as shown in the accompanying illustration. This outlet also permits the water which has been standing in the filter and become warm to be drawn off, and thus cool filtered water is immediately obtained. By the use of a very simple attachment, the filter can be used on a plain faucet, Fig. 2. The chain holds the filter securely and a rubber disc makes a tight joint. The filtering medium is Champion Tripoli Natural Stone Tube, having over 30 square inches of filtering surface, giving it a large filtering capacity. The filter

FIG. 2.

is very easily cleaned by unscrewing the thumb-nut and removing the stone, then brushing off the accumulated filth which has been extracted from the water. This filter is made of iron, thoroughly tinned, and is handsomely finished in Aluminum Enamel, giving it a clean, bright appearance. A large number of Hardware and housefurnishing dealers have added water filters to their stock, and they report a very satisfactory increase in sales, and now consider that the handling of filters is a profitable adjunct to their business. Catalogue of full line of water filters will be sent on application to the manufacturers.

### Lloyds: Of Insurance Fame.

Most of the members of Lloyds carry on business as brokers or underwriters on their own responsibility. As a corporation Lloyds assumes no financial liability for the failure of any of its members or subscribers. But it admits to membership only men of reputation and means, who must deposit a pecuniary guarantee in order to become an underwriting and non-underwriting member, an annual subscriber or an associate. An underwriting member must deposit with the Committee of Lloyds £5000 or £6000, on which he receives interest and which may be returned to him three years after he ceases to be an underwriting member. He pays an entrance fee of £4000 and an annual subscription of 20 guineas. An annual subscriber pays no entrance fee, but an annual subscription of 7 guineas; an associate member pays 5 guineas.

There were, in 1771, only seventy-nine subscribers to Lloyds. There are now nearly 1000. The subscribers in the olden time, as now, did not confine themselves to marine insurance. They were willing to take a risk on almost anything. There is still preserved at Lloyds a policy on the life of Napoleon Bonaparte for one month at a premium of 3 guineas per cent. Bank deposits are insured in Lloyds; also race horses and the lives of threatened monarchs. An odd case was the covering of a risk on a glass bed packed in twenty cases for a certain sultan. Lloyds insured the Prince of Wales jubilee stamps, guaranteeing that the issue would be successful. The voice of a prima donna has been insured. A tradesman in a London street, who has an impression that a monument may fall on his shop, has taken out a policy at the nominal premium of 2 shillings and 6 pence per cent. Gate money for cricket and football matches, animals of all sorts ashore and afloat are subjects for insurance; policies against twins is a favorite form of insurance. A well-known underwriter is said to be always ready to lay 1000 to 1 against twins. Lloyds issues insurance against burglary. Elephants are insured regularly. The life of the great Jumbo, who came to New York on a Monarch Line steamship, was insured in Lloyds for the voyage to New York. He was not insured when the life was knocked out of him by a locomotive on an American railroad, whose tracks he was crossing. A celebrated singer recently took out an insurance in Lloyds on the life of Queen Victoria. She paid a big premium on account of the age of the Queen. The reason the singer did this was not because she cared anything more than most folks for the Queen, but because her contract to sing would have been abrogated by the Queen's death, which would have plunged England into mourning and prevented the singer's appearance in opera.

There is a philanthropic side to the corporation of Lloyds. Whenever they hear through any of their vast army of agents of any deed of heroism on the deep they immediately communicate with the hero or heroine and commemorate the deed by striking off a medal which is presented to the one who has earned it. The Committee of Lloyds has a standing advertisement in *Lloyds Weekly Shipping Index*, requesting all captains who may call at British ports to communicate any information concerning any wreck or vessel in distress, or, making a long passage, to Lloyds agent at the first port of call. The value of such intelligence is great and it may be sufficient to remind captains how often such news may be the means of conveying to the wives and families of officers and crews the assurance of the safety of their husbands or fathers.

At an office on the ground floor of the Royal Exchange Lloyds answers, free of charge, all sorts of inquiries from the wives, other relatives or the sweethearts of sailors anxious about the cruise of poor Jack, or desirous of finding out where his ship may be. There is a list kept by which the whereabouts of any British vessel may be found in a twinkling. An important book is the "Captains' Register," containing the biography of more than 30,000 commanders in

the merchant service of Great Britain. Another volume not high in favor with the underwriters is called the "Black Book," in which missing and wrecked ships are recorded. Lloyds publishes what is practically a list of all the merchant vessels of the world measuring 100 tons or more. It is called "Lloyds Register of British and Foreign Shipping," and it tells all about every sea-going craft worth mentioning, giving her tonnage, dimensions and the name of her captain and owner.

When the big American Line steamship *St. Paul* ran aground in a dense fog on the Jersey beach near the lower end of Long Branch, before daylight on January 25, 1896, Capt. Clark, Lloyds agent in New York, got word of it at 4 o'clock in the morning; he cabled instantly to London, and Lloyds was in possession of the news at 8.30 A. M. The *St. Paul* had been indulging in a spurt of speed with the swift Cunarder *Campania*, which in moderate weather is nearly a knot faster than the American ship; she got far out of her course, missing the Fire Island light, and drove up on the sands of the Jersey coast. She was held in the embrace of the shelving beach for ten days. The *Campania* was also reported to have touched bottom by an observant life saver patrolling the beach. Her commander and her agents declared that this was not so, but she undoubtedly came within view of the folks along shore. In the cargo of the *St. Paul* were one and a quarter million in gold consigned to a firm in New York.

It was essential that this should be landed. Arrangements were made with the Merritt-Chapman Wrecking Company to have the stranded liner hauled off. She and her cargo, including the gold, were heavily insured. After it was found that it was going to be very difficult to float the big ship, the consignees of the gold, who needed it in their business, appealed to Capt. Clark as Lloyds agent to have it landed. It remained aboard the vessel three days; the fact of it being there rendered the underwriters liable for a heavier tax in the event of the vessel being floated. Naturally, the American Line did not make any strenuous efforts to have the bullion discharged, and just as naturally Lloyds were anxious to get it off as quickly as possible; for in the event of a storm arising and causing the destruction of the ship the gold would have added so much more to the loss of the underwriters. Capt. Clark chartered a steamer and offered to take charge of the gold and land it. Thereupon the Captain obtained a promise that the gold would be landed immediately. Thus the underwriters were relieved of the further risk and expense of floating the stranded ship. The gold was transferred to the lighter Haggerty down a sagging chute-suggestive stretch of canvas in bags, kegs and boxes. Twelve men armed with revolvers guarded the treasure as it was transferred from a pier to a truck and taken to a vault in Wall Street. The award of \$166,000 for salvage service in the case of the *St. Paul* was the largest ever obtained in an admiralty court. The *St. Paul* was aground ten days. It was said that she had not a plate bent or a rivet started. —S. A. Wood, in *Ainslee's*.

### Important Changes.

The following announcements which we have received indicate the important change recently made in the File Industry:

## Paint Prospects

This season is the paint dealer's opportunity. There will be more paint sold than ever before.

Our constant gains in S. W. P. sales show us this. We never before had so many new agents on our books nor so many gallons of paint ordered from us. Past years have shown big gains, but the percentages this year far exceed all others for the same period.

S. W. P. dealers all over the continent anticipate a big year in good paint. They are preparing to take advantage of the opportunity the good times offer.

It is not too late for you to get in line. We can make prompt shipments. We can give you advertising helps that will bring the trade your way. We can help you personally and put more spirit and "go" into the paint business than your locality ever saw before.

Office of Allerton-Clarke Co., 97 Chambers Street, New York.

Our connection with the Arcade File Works as the Selling Agents for its products having ceased, we extend to all our customers who have favored us with their file trade, our thanks for their patronage, and our best wishes for their future success.

The well-known reputation of the Nicholson File Co. furnishes sufficient guaranty that all business placed in their hands will receive prompt and business-like attention, and we trust that all who have handled Arcade Files will continue to do so, feeling assured that their file interests could not be in better hands.

ALLERTON-CLARKE CO.,

March 5th, 1901.

Per C. C. CLARKE.

Office of Nicholson File Co., Providence, R. I., U. S. A.

We herewith announce that we have purchased the Arcade File Works, of Anderson, Indiana, and shall continue the manufacture of this brand of files at the works of the Company.

The product of this factory has heretofore been handled by the Allerton-Clarke Co., at their New York and Chicago stores, but under the present ownership, this arrangement will not be continued.

All orders, and inquiries for prices, and all correspondence in connection with the business of the Arcade File Works should be addressed to the Nicholson File Co., at Providence, R. I.

We shall endeavor to merit the continued patronage of all who have handled Arcade files, by our prompt, careful and courteous attention to whatever inquiries may be addressed us, and to all business placed in our hands.

NICHOLSON FILE CO.,

The final test of religion is not religiousness, but love.

## NEW GOODS AND SPECIALTIES.

### American Corn and Fodder Shock Compressor.

J. B. Hughes, Greensburg, Ind., is placing on the market through the Hardware and Implement trade, the American Corn and Fodder Shock Compressor, illustrated by the cut herewith. The Compressor is claimed to be the strongest, simplest and most durable fodder pulley that has been brought to the attention of the trade. It has a plain and simple frame, not liable to break nor get out of order, and as is shown in the cut, is slightly curved to conform to

AMERICAN CORN AND FODDER SHOCK COMPRESSOR.

the shape of the shock, which keeps it in position when in use. The Compressor, having a large pulley with absolutely no friction anywhere, enables the shocks to be drawn very tight. The most important part of any compressor is claimed to be the ratchet, or clutch, which in the "American" is guaranteed not to cut or wear the rope in the least, and yet will take instant hold with security of every inch drawn. It is seven inches long, 1 x 1 1/2 inches wide, has a two-inch pulley, and when wrapped for mailing weighs one pound. It can be utilized in a number of other ways, such as carrying bundles of hay, straw or fodder, and be found very useful and handy. For a simple contrivance it is meeting with large sale, and should receive the attention of the Hardware trade.

### Brohard Door Holder.

The Brohard Co., Hutchinson and Columbia Avenues, Philadelphia, Pa., are manufacturing the Brohard Door Holder shown in the accompanying illustration, which is made of the very best malleable iron and solid bronze metal, and is claimed will not injure the floor nor tear the carpets, as the end that strikes the floor is covered with pure rubber for the express purpose of increasing the holding power of

BROHARD DOOR HOLDER.

this device. The Door Holder can be readily adjusted by any one, as it is simply fastened to the door by two wood screws, and in its operation it is extremely simple. Being attached to the door only, there is no unnecessary obstruction on the floor to catch ladies' dresses, or for any one to stumble over, which in most of the old styles of door holders was one of the objectionable features. The advantage of a device of this kind attached to a door is that it prevents unnecessary slamming, lessens liability of breaking glass, and obviates the necessity of having a wedge or

other device to perform the operation in a less successful manner. It is placed on the market finished in all the various styles to match the other Hardware of the house, from the ordinary iron japanned to the finest antique copper; or they can be furnished in any style of finish desired if a sample of the Hardware is sent by which to match it. The Door Holder is made rights and lefts, and can be placed on either side of door.

### International Automatic Sprinkler.

The International Sprinkler Co., controlled and managed by Merchant & Co., Inc., Philadelphia, Pa., have made a great success of the International Automatic Sprinkler, which is a device equally useful for private dwellings, factories, stores, office buildings or hotels. In the cellars the Sprinklers are placed over the furnace or ash pit, and in the kitchen over the range. These seem to be by investigation the greatest points of danger from which ordinary fires emanate regularly. The device is shown in the accompanying illustration, which is the "International" Head, and comprises a link composed of two thin metal sheets soldered together, which melt apart at 165 degrees. A cap shown

INTERNATIONAL AUTOMATIC SPRINKLER.

below is held in place by two levers, which in turn are held by the link of solder above referred to, which is shown on the side as the connecting link of the two levers. The top portion of the cut shows the distributor. Upon the occurrence of fire the solder link melts apart, the cap falls off, and water is forcibly expelled against the head, and from there is sprayed all over the floor and ceiling, putting the fire out automatically in the very beginning, and by the agency of the fire itself. The main offices and works of the company are at Philadelphia. They have a Southern office at Atlanta, Ga., but an application to either office for full particulars will provide the inquirer with the prices, insurance approvals, list of installments and recommendations from customers who have already made use of this greatest modern improvement.

### Bradley Steel Shelf Bracket.

Among the many improved shelf brackets which solicit the attention of the Hardware trade, there are few that possess all the merit underlying the Bradley Steel Wire Shelf Bracket, of which we give an illustration, and which is manufactured by the Atlas Mfg. Co., New Haven, Conn., and is gradually working its way throughout the entire Hardware trade, having been on the market some little time. It is much lighter than the ordinary bracket of similar importance, and is less brittle from the nature of its material, while the manufacturers claim it is stronger in consequence of its construction. The best quality of steel and wire is rendered necessary by its peculiar conformation. The bands in the

wire are severe. The U-shaped brace with the two heads at right angles is formed from a single piece of steel, and, as will be noticed, by its peculiar construction, it must be good steel that would stand the necessary drawing into shape. It will also be noticed the distribution of metal is economical,

PAT. APR. 5, 1892.  
NOV. 9, 1892.  
APR. 4, 1893.  
BRADLEY STEEL SHELF BRACKET.

and this in connection with the quality used will explain why the bracket is claimed to support a weight much greater than its competitors even though its weight is so much less. The goods are well japanned, packed close, and their reduced weight make a saving in freight possible, as well as other advantages. The manufacturers will be pleased to furnish further information in regard to its merits upon application.

**Perfection Steel Crimped Wire Fence.**

The Dwiggin Co., Anderson, Ind., are the manufacturers of the Perfection Hard Steel Crimped Wire Fence shown in the illustration given herewith. This is made with zigzag brace wires, which give elasticity to the fence, and make it almost impossible for any animal to break through. The top bar is made of No. 7 wire; intermediate bars of No. 11 wire. The bottom bar is of No. 9 wire, while the stay wires, which are 12 inches apart, are made of No. 13 wire.

PERFECTION STEEL CRIMPED WIRE FENCE.

It is made in five styles—7, 8, 9, 10 and 11 bars, from 23 to 49 inches high.

**Chambers' Bolt and Rivet Clippers.**

Chambers Bros. Co., Philadelphia, Pa., are the manufacturers of the Bolt and Rivet Clippers, of which we give an illustration in the course of this article. These are now made from entirely new patterns, and are greatly improved over the product as it existed when first placed on the market. They are much stronger, with larger wearing sur-

faces, and more easily sharpened. They consist of a little device about the size of a pair of Smith's Tongs No. 1, for cutting off the ends of bolts and rivets on carriages, wagons, harness, etc. It is so constructed that it is claimed to cut off all the bolts on a carriage in less than one-tenth the time two men could do it in the old way, and at the same time leaving the end of the bolt so the nut in many cases can be run off and on with the fingers alone, thus proving that in the operation the thread is uninjured. They will be found useful to carriage makers, wheelwrights and blacksmiths, or manufacturers of plows, machinery, etc. Hardware dealers handling an article of this great utility need do but little more than draw the mechanic's attention to

CHAMBERS' BOLT AND RIVET CLIPPERS.

it to make good sales. Harness makers have been impressed with their utility for the purpose of cutting off the ends of all mountings. This useful appliance is made in three sizes—No. 1 for 3-8 inch bolt or less; No. 2 for 1-2 inch, and No. 3 for 5-8 inch, to which a new size has been recently added, called the "Special No. 4," to cut 3-4 inch. It cuts a 3-4 inch bolt or stay, 1-8 inch above the surface of the work through which it projects, thus always leaving 1-8 inch for riveting purposes. The Regular No. 4 is made to cut flush with the work, the same as all the other sizes.

**Apex Lawn Roller.**

John W. Douglass, 61 Beekman Street, New York, whose advertisement will be found on page 60, is the manufacturer of the Apex Lawn Roller, an illustration of which we give herewith. The cut gives an illustration of the No. 4 size of this new pattern Hand Lawn Roller. It is superior to most articles of the kind now on the market,

APEX LAWN ROLLER.

possessing many improvements. The faces of the sections are ground smooth. The edges of the sections are made true, so that they fit closely together, and yet are able to revolve on the axle independently. Counterpoise weights are attached to the axle, by which means the handle is always in an upright position when not in use, just as is shown in the cut. The handle is of wrought iron, well braced, and quite substantial, as is essential for the operation the machine has to undergo. The Apex Roller is made

in 13 sizes, running in weight from 150 to 650 pounds, and will be found admirably adapted for the purpose for which it is intended.

#### The "Stay In" Flue Stopper.

Stuber & Kuck, Peoria, Ill., are the manufacturers of the "Stay In" Flue Stopper, which we illustrate herewith. For a simple contrivance of this kind, it has been improved to

THE "STAY IN" FLUE STOPPER.

a great extent. As will be seen in the cut herewith, the elliptical-shaped irons on the tin disc are brought together in the centre by turning the screw to the right. By this means the points or outer ends of the bridge are pushed outward until they come in contact with the sides of the flue hole. At the same time the stopper is drawn firmly against the wall, making a perfectly tight job. Owing to the construction of the bridge, the greater amount of pressure brought to bear on the Stopper or disc the more firmly it adheres to the flue, and yet the Stop can at any moment be readily loosened by simply turning the screw to the left, when necessary to take it out or put it in place. The hole in the bridge is threaded, and serves as a nut for the bolt. Hence there are no nuts nor small parts to get lost or misplaced. The advantages possessed by this Flue Stopper will be readily observed when comparing it with one of the old style, which almost without exception are provided with a thin flat hoop attached to the inner face of the disc with no device for fastening it in the flue hole, while the one under review effectively stops the hole and keeps it stopped. They are made in three sizes—5, 6 and 7 inch; are brass finished with a decorated centre, and weigh 50 pounds to the gross.

#### Admiral Combination Lamp.

The Admiral Bicycle Lamp Co., Inc., Columbus, Ohio, have been placing on the market during the past year a Com-

ADMIRAL COMBINATION LAMP.—FIG. 1.

bination Lamp, which burns oil or gas with equal freedom. It has proven to be decidedly popular, and the demand that has been created in consequence has outgrown the capacity of the factory, the plant having been greatly enlarged since the introduction of this Lamp, fully doubling the original capacity. In the construction of this Lamp it is extremely simple, and at the same time novel enough to create comment. Out of five parts two complete lamps are made up. Three of these parts, viz., the top, the body and the chimney,

are used for both lamps. The two remaining parts form a gas generator and an oil cup. The combination idea is thus worked out by an interchange of these two reservoirs, one of which is shown in Fig. 2. The carbide chamber is surrounded by a water reservoir. Water is fed through a cone seat valve at the base of the carbide chamber, and it is claimed the gas lamp will not freeze when in use in the

ADMIRAL COMBINATION LAMP.—FIG. 2.

coldest of weather, as its method of construction keeps the lamp cooler in Summer and warmer in Winter. In either form the lamp has a very neat and attractive appearance, and when the skillful work on it is taken into account, the success with which it has been received does not seem so surprising.

#### "Home Comfort" Lawn or Porch Swing.

M. C. Henley, Richmond, Ind., is the manufacturer of the "Home Comfort" Low Down Lawn or Porch Swing, an illustration of which is given herewith. It has been very successfully introduced through the Hardware trade, filling a demand for an article of this description that would be not only light but strong, durable in its construction, compact in form and easily handled by the trade. All these requirements seem to be fulfilled in the construction of the "Home Comfort." The backs of the swings may be adjusted to any desired position, with one thrown back and foot-rest raised, and with the addition of robe and cushion it possesses all the requisites of making a most comfortable swinging couch. These swings have an adjustable foot-rest that may be placed at a proper height to suit children of any age, and in its construction it is so perfectly balanced that it is possible for the smallest child to operate it successfully. Being quite ornamental in appearance, it has become a very popular addition to the lawn or porch. As a swing, it has a swinging motion of over 2 1-2 feet, and as the side supports extend only to the seats there is nothing

"HOME COMFORT" LAWN OR PORCH SWING.

to obstruct the view or produce dizziness. It is claimed to perform its part as a swing in the most agreeable manner.

## N. DAKOTA RETAIL HDWE. ASSOCIATION.

The fourth annual meeting of the North Dakota Retail Hardware Association was held in the United States Court Room, Grand Forks, Wednesday and Thursday, February 20 and 21. Of all the conventions that this Association has held since its inception, this was the largest, most enthusiastic and thoroughly enjoyable. Scarcely a town of any importance in the State but what was represented by one or more delegates.

The meeting was called to order by the president, H. T. Helgesen, of Milton, who briefly expressed his pleasure at the large attendance of dealers from all over the State, and also the number of representatives of the jobbers and manufacturers who had gathered to do justice to the opportunity.

It was anticipated that Mayor Dinnie would be present to welcome the delegates, but he was unable to do so, and the address of welcome was delivered by Geo. A. Bangs, who made a brief speech of welcome, extending the thanks of the citizens of Grand Forks to those present, and expressing the wish that everything would be found agreeable to their comfort, so that their stay in the town would be an exceedingly pleasant one. President Helgesen made a fitting response, and the reading of the roll call followed, which indicated that 87 members were in attendance. The following committees were then appointed by the President:

### COMMITTEES.

Press—O. T. Ellestad, Grand Forks, N. D.; John E. Nuss.

Transportation—Hubert Harrington, Fargo; C. N. Barnes, Grand Forks.

Nominations—S. D. Bostwick, Bathgate; H. B. Allen, Jamestown; J. F. Jaberg, Sanborn.

Resolutions—W. H. Pinkerton, Lakota; H. S. Diesem, La Moure; W. A. Fox, Ardoch.

M. G. Evenson, of Valley City, had prepared an interesting paper on "Credits," which, in consequence of his unavoidable absence from the meeting, was read by W. H. Pinkerton, of Lakota, and from which we make a few extracts, as follows:

### IMPORTANCE OF THE CREDIT DEPARTMENT.

How important a part of a business the credit department is can be seen when one enters a jobbing house to ask for credit. Are we not first taken to the credit man, who wishes to know your past and present standing? Before you can get credit you must satisfy this department of your being worthy of it, and upon the credit man being satisfied of your worth a limited credit is given. If you cannot thus satisfy the credit man credit is refused; the jobber of to-day is not so anxious to sell goods that he will send them out if he feels that credit given will not be appreciated and bills paid.

\* \* \*

All merchants should look upon their business with as much pride as they do upon their own family, whose reputation they wish to remain a standard. But this cannot be done by selling to any and every one who asks credit. Learn to say no to a credit seeker, the same as you would to your child, when he asks to associate with one whom you know will hurt your child's future. The success of a business depends largely upon your ability to say no, and placing your goods in the hands of people that you know will pay for what they get.

\* \* \*

The greatest success is business success, and to succeed one must not abuse credits given by allowing the goods so gotten to go out without having the standing of a customer. The all important factor in successful business is to know to whom to extend credit, and this depends upon the many sales, which keep turning the stock, with customers who have the ability and honesty to pay for what is sold them.

\* \* \*

Don't be afraid to question a doubtful creditor. If he refuses to give you your asked for information kindly refuse

him credit. Often in the Spring of the year customers come in to arrange for a credit through the Summer; then, Mr. Merchant, is your time to act. You can dictate terms upon which credit should be given, and if you fail to get good ones the fault is all your own. The credit given should carry with it no obligation of renewal at maturity, as too frequently these obligations are looked to by the customer.

\* \* \*

Don't be afraid to tell a customer that he can have a credit to the amount of so many dollars and no more. Give him to understand that when his limit is used up he can have no more credit, and I assure you your trouble at collection time will be limited to a very few.

The reading of the paper was listened to with a great deal of attention by the delegates present, who emphasized the several points taken, by their applause, and at its conclusion a discussion followed, which was participated in by several of the delegates, among whom were: J. F. Jaberg, W. W. Jamieson, W. H. Pinkerton and Messrs. Hill and Kloster. After the discussion, the convention adjourned until afternoon.

### WEDNESDAY AFTERNOON SESSION.

At the opening of the afternoon session President Helgesen delivered his annual address, from which we make a few extracts:

This is an era of organization and co-operation in which capital, co-operation and brains are the three things that bring success to their possessors. The century that has just rolled away has carried with it as it were an old world that will live henceforth only in history.

The new century brings us into a new world in which there are new forces, new methods, new ideas, chief among which is co-operation and concentration of wealth and of effort. There is more capital among the local dealers than there is in the modern bitter organized opposition, and I believe just as much brains. The question then is, Can we form as perfect an organization, and one capable of a co-operation that will swell our united efforts into a force great enough to stem the tide that is now threatening us; or in other words, are we capable of such an organization as will successfully meet the new conditions?

\* \* \*

If every dealer in the land fully appreciated the influence on his business by these modern methods and changed conditions, and would put his shoulder to the wheel and give his loyal support and influence to a national retail Hardware dealers' association, the evils that have crept into our business in the past few years could be remedied in a few months. That a large majority of the wide awake dealers of the West fully understand the danger that is confronting them, and that they do not mean to die from inertia, is evidenced by the steady growth of the various State associations and by the successful formation of an Inter-State Association last Winter. The Inter-State Association, though less than a year old, has already dealt successfully with questions that could not have been handled by any State association, and has laid plans for the future that will be far reaching and effective.

This association is but the forerunner of the National Association, toward which we are all working, and I would recommend that our State association continue its membership in the Inter-State Association, and thereby add whatever strength and influence we possess toward establishing on a firm foundation a retail Hardware association with a broader field of action and greater powers and possibilities than can be obtained by any State association.

This was followed by the Secretary, C. N. Barnes, of Grand Forks, who presented his annual report. Among other good things he said:

My correspondence the past year has been very much greater than in previous years, due to several causes, but largely to the fact that we have prepared a souvenir programme for this meeting, which involved obtaining advertisements, etc. Also securing a sufficient quantity of papers to be read at the meeting has necessitated a large outlay of time and postage, but I trust when our financial statement is presented you will feel such an outlay was warranted.

\* \* \*

It is very discouraging to your officers to have them spend

time and money trying to further this work, and have so much of the correspondence go without attention. I have tried faithfully for the past year to obtain an accurate list of all exclusive Hardware dealers in the State. Correspondence being the only means I had in obtaining this information, I have sent our members four different lists for their correction, and it has been an exceptional case where an answer has been made. How can we succeed if better attention is not given to correspondence when replies are desired?

\* \* \* \*

While we are together to consider means and methods for the betterment of our business, I would be pleased to have a discussion as to the advisability of forming county or local organizations. It has occurred to me many times that it would bring the dealers much closer together and permit them to adjust matters with less difficulty if such organizations existed. It is true our constitution provides for something of this character, but as yet it has never been put in general practice.

The Secretary's report was followed by the reading by H. S. Diesem, of La Moure, of a paper prepared by him referring to

#### THE RELATIONSHIP AND EFFECT OF DEPARTMENT STORES UPON THE TRADE.

This we give herewith in full, as the subject is one of general discussion at all the conventions that are being held at the present time:

Department stores have not come down through centuries as a part of the commercial system of history; they are a factor brought into existence by trade evolution within the last quarter of a century.

Until recently, comparatively, commerce was carried on by a system of trade and barter; in short, reciprocity was the rule among tradesmen. But, as our financial policy has changed, and by wise and safe currency legislation our per capita circulation has been increased, all this has passed and money has become the standard by which all commercial products are measured.

Plenty of money and a dense population are two essentials to the success of a department store. Hence, it sprang into existence in the manufacturing and commercial cities, where both the above named factors existed. Upon close examination of goods and prices offered by these department stores or catalogue houses, and in studying the patrons of them, we find the reasons why the most liberal purchasers and best judges of goods do not patronize them to any great extent. To make these low prices and yet afford a margin of profit, these houses are often forced (if not a regular habit) to purchase the second grade of goods as to weight, color, quality and raw material, and of imperfect manufacture, while giving to patrons as reasons for low prices: aggregation of capital, purchase direct from factory, purchase of entire output of a certain line, or that it was made especially for them; the latter being nearest correct—the goods being made in quality to suit the price.

The idea of a department store is an attractive one; it sounds big, and so, in many of our prosperous towns of 600 to 2000 inhabitants we find firms aping the city department stores even to imitating style of name such as "Bee Hive," "The Golden Rule," "The Fair," or "City or County Supply House." It is these aping department stores that menace the retail Hardware trade.

Usually these stores make a feeble attempt to keep all the lines of goods used in their locality, striving to do the business that should be given to a half dozen or more firms representing the different lines.

Where the effort is made to handle so many lines the assortment is, and must be, limited as to quantity, quality and style, so you will find in these stores some of the lowest grades of goods made in the various lines, made to correspond to the prices obtained—cheap, cheap! If a customer is well informed as to quality of goods and knows what he wants, he usually finds it with the firm which handles that line exclusively.

North Dakota being exclusively an agricultural country, these stores exchange their wares for the produce of the farmer, and do not pay any cash for such produce, thus forcing the farmer to satisfy, largely, all his needs at these stores, where one usually finds a small corner stocked with kitchen wares and the staples in Hardware used on the farm, very often the cheapest made in the line and sold at low prices, thus using the Hardware corner to advertise them-

selves as a cheap store. Then, relying on some other lines on which the customer cannot keep so well posted, they will there recoup themselves on their lack and loss of profit in their Hardware department. Such stores are enemies, and a menace to the Hardware trade.

The Hardware store has but one line in which to deal, and to keep a constant trade, insure satisfaction to his patrons, and preserve his own honor, the dealer, having only the one line, must have it—the best!

The best cannot be obtained with little money, and at the start the expenditure is much heavier to the exclusive Hardware dealer; with the department or general merchant the Hardware corner is only a secondary consideration, and he devotes very little time or money to it, except as an advertising medium. The regular dealer must carry on his shelves a large assortment of expensive goods, and many little things necessary to the business which are slow sale; the interest on the investment being an item of expense avoided by the general merchant, as he only invests in staples, and the cheapest at that. With him the cheaper grades will sell in exchange for farm produce and the purchaser has no option.

Then, too, many patrons judge goods only by general resemblance and do not distinguish the difference in quality by seeing articles on opposite sides of the street, or seeing them in different stores. Often a specific brand of goods, known to be handled by the Hardware dealer, is selected by these piratical merchants, bought and put on the market at cost, and the patron's attention called to the price and comparison made with that which the Hardware dealer asks, simply to impress the patron that his store is the best at which to trade. Often goods similar in looks but widely different in quality are made to play the same role.

In trading of produce for goods the patron may desire a half dozen articles in Hardware. He is able to get all at the general store with the exception of one or two—possibly only trifling things, but necessary. He then comes to the legitimate dealer in the line for them. Thus the Hardware dealer gets but a very small per cent. of this trade and simply supplies what is lacking in the store where he traded his produce. The place of "substitute" is one not often sought and is not pleasant. Those of you who have never sold Hardware in competition with two or three dry goods annexes do not know the "real thing."

Competition with the jobber. Now who is to blame for this competition? The accomplice is as blamable as the chief actor. Thus the wholesale Hardware dealer is sometimes our competitor. He sends out his salesmen with instructions to sell to the retail Hardware dealer, if possible; if not, to the general merchant, in towns which have legitimate Hardware dealers. They do so. And indirectly and unwittingly destroy their own trade. I have known them to sell to Hardware dealers and then go and sell the same goods to the general stores. This is freebooting in trade.

Now if we, as a retail association, cannot remedy this, what are we here for? In union there is strength, and if the power is properly applied much may be accomplished. If the component parts of this association work in harmony, whenever opportunity presents itself, some of the barnacles of the Hardware trade can be removed, and much of this illegitimate and unfair competition may be stamped out. The remedy lies with the association.

A discussion of considerable length was participated in by the members after the reading of Mr. Diesem's paper, and the delegates were joined also by the visiting jobbers and representatives of the several manufacturing companies who were present. All desired to assist in the free discussion of everything connected with this important matter. Among those who participated in the debate may be mentioned the following: R. A. Kirk, of Farwell, Ozmun, Kirk & Co., St. Paul, Minn., made the principal address, and was followed by Chas. Wells, National Lead Co.; Jos. Henry, C. W. Hackett Hardware Co., St. Paul; A. J. Smith, C. W. Hackett Hardware Co.; E. H. Stranahan, Janney, Semple, Hill & Co., Minneapolis; F. F. Bolton, Marshall-Wells Hardware Co., Duluth; H. S. Wakefield, Minnesota Linseed Oil Co., Minneapolis; V. R. Benham, Northwestern Star Oil Co., Minneapolis; Frank Wolfe, Steam Fitters' and Plumbers' Supply Co., Minneapolis; A. D. Baughman, Janney, Semple, Hill & Co., Minneapolis; L. M. Turnbull, Cribben-Sexton Co., Chicago; Chas. Bell, C. W. Hackett Hardware Co., St. Paul; J. H. Heightman, Marshall-Wells Hardware Co., Duluth; T. J. Duffy, Jr., Black & Germer, Erie, Pa.; W. P.

Hartman, E. C. Atkins & Co., Indianapolis, Ind.; C. J. Joesting, Joesting & Schilling, St. Paul; S. H. Stewart, Sherwin-Williams Co., Cleveland; Allen Kirkpatrick, Patterson-Sargeant Co., Cleveland; A. E. Kent, Rathbone, Sard & Co., Aurora, Ill.

J. F. Jaberg, of Sanborn, then read a paper on

#### STORE CHARACTER,

from which we make several extracts, which proved an interesting one to the members present:

No doubt many of you may differ with me and say a store has no "character," but, for the sake of argument, let us assume that a store has character, the same as its proprietor and clerks have. It is something upon which the personality of the proprietor and salesmen have great influence and effect. You will remember Christ said, "By their fruits ye shall know them." Hence proprietors and clerks are usually judged by their store. You all know what a pleasure it is to go into a store and at once feel as you cross the threshold that pleasant sensation which we call feeling "at home." You also know what it is to go into a store and immediately realize from the reception you receive at the hands of the proprietor or clerks that you are an intruder, and must at once make your wants known and get out again.

#### WHERE THE CUSTOMER WILL BUY.

All stores usually partake of one or the other of these two "general characters." Hence it need hardly be said that the store in which a customer feels most "at home" is where he will do his buying. Now the store in which one feels most at home is not a dingy and uninviting place, where the last invoice of goods to arrive has only been partly unpacked, with boxes and box covers on the floor and counters, and straw and sawdust scattered over everything, nor where the accumulation of dust and dirt has gathered for weeks, minus, of course, the little which has been daily removed from the top with the broom.

#### OBJECTIONABLE CHARACTERISTICS.

Neither is it the store where goods are kept in an untidy fashion, without any systematic attempt at display. Nor is it when idle men and boys are encouraged to loaf or spend their leisure hour for a social smoke or to talk politics, or perhaps to debate subjects which would call forth language which might become very embarrassing should a customer, especially a lady, happen in. Again, it is not the store where proprietor and clerks are indifferent to their duties or seemingly unwilling to take the trouble to display and show their goods to the best advantage, or who continually endeavor to persuade their customer that he or she does not know what they want. Above all, it is not the store where proprietor or manager does not continually keep a watchful eye on his store and salesmen, sees that everything is kept clean, neat and tidy, and where he himself is not always on hand during business hours to give pleasant personal attention to his customers.

#### WHERE THE CUSTOMER FEELS AT HOME.

The store in which customers feel most at home is rather where you greet them pleasantly and cordially as they come in, and when you have ascertained their wants show them the goods called for, fully explaining to them the size and quality of the article.

\* \* \* \*

We cannot all have fine stores with the latest, finest and most expensive fixtures, such as counters, shelving, sample boxes and fine plate glass show windows in which to make displays; but we can all keep our stores clean and tidy and our goods arranged in as attractive a manner as circumstances will permit. Every article should be in its proper place where we can lay our hands on it at a moment's notice, and at all times know whether we have such and such articles in stock when called for.

\* \* \* \*

When our stores acquire a reputation for pleasant and honest dealings we will find it worth more to us than any other assets, and will bring us annually new customers and many sales which would otherwise find their way elsewhere.

A paper was then read by E. C. Pratt, of the *Hardware Trade* of Minneapolis, on "Originality in Business." The members gave close attention to the reading of this important paper, as it proved to be one of the most interesting of those presented to them. We hope to give this special prominence

at a later date as it gives every evidence of careful preparation and of earnest sympathy with the subject.

#### THURSDAY MORNING SESSION.

After convening, among the first business brought forward for the consideration of the delegates was the reading of the report from President Miller having reference to the work of the past year of the Inter-State Association. The report was received with interest, and the members were well pleased with the work accomplished, feeling confident that great good would prove to be the important results of the future. It was unanimously decided that the North Dakota Association should continue a member of the Inter-State Association, and President Helgesen was selected to represent the Association at the next Inter-State meeting in Chicago, C. N. Barnes being selected to serve as alternate.

#### TREASURER'S REPORT.

Treasurer H. N. Joy being prevented from being present by illness, his report was read by the Secretary, and the purport of it was that the Association was in the most superb financial condition since its organization.

#### ELECTION OF OFFICERS.

The Committee on Nominations made the following report, which was unanimously accepted:

President,  
H. T. Helgesen, Milton.  
Vice-President,  
H. N. Joy, Hamilton.  
Treasurer,  
W. H. Pinkerton, Lakota.  
Secretary,  
C. N. Barnes, Grand Forks.  
Executive Committee:

H. Harrington, Fargo, three years.  
W. W. Jamieson, Wahpeton, three years.

#### QUESTION BOX.

The "Question Box" was the next important thing on the programme, and as usual a number of questions were taken up and discussed from the collection usually formed under these auspices. This was followed by W. A. Fox, of Ardoch, who read an interesting paper on "Co-Operation." We give herewith several extracts:

"In unity there is strength." No man is mighty enough to stand alone. Some there are who may consider themselves the keystone of the structure, but from this, some time or other, the supporting columns will be removed. Practical co-operation is what a man in business requires at all times, and a short review of the proposition may be convincing.

The producer of raw material is limited to the market afforded him by the manufacturer, who in turn seeks to place his goods with the actual consumer, through the medium of the jobber or retailer. Thus we find first one and then the other depends upon his brother in business further along the line toward the goal of final consumption. We, as retailers, are directly in touch with the two great and important factors in the distribution of goods, viz: The manufacturer or the jobber, and the consumer. Our relation to the former is practically the same as the relation of the latter to ourselves. There should be a well defined code of integrity existing between all parties concerned, but joined by \* \* \* \*.

\* \* \* \*

The traveling salesman is quite an important factor in sustaining pleasant and co-operative relations between his house and its customers. He is directly in touch with the latter, knows their wants almost from day to day, and, usually a good judge of human nature and things in general, can tell at a glance whether the business is being conducted along profitable lines. He knows from the appearance of the store and condition of the stock whether the proprietor is progressive, up to date in his methods and worthy of confidence in financial matters pertaining to his employer.

\* \* \* \*

Business men everywhere, but more especially in the smaller towns, can and should be of mutual assistance to one another in many ways. Let every one speak well of his neighbor, even though he be a competitor. If he is not right people will discover the fact without you being the informant.

Keep your town before the public. You cannot transact business with people unless they come to town. When they do come use them right and they will come again. Be public spirited, even though it may cost a dollar occasionally; you cannot expect something for nothing all the time.

The usual resolutions embodying the thanks of the convention for the hospitality extended to the officers and members of the Association by the citizens of Grand Forks, and for the presence with them of the traveling representatives of the many manufacturers and jobbing houses with whom they do business were adopted unanimously.

The place for holding the next annual meeting was brought up for the consideration of the convention, and it was after discussion referred to the judgment of the Executive Committee, which seems to be the popular method of handling this matter with most of the conventions this year.

Brief addresses of a general character by the members present followed, after which the meeting adjourned *sine die*.

The hospitable programme arranged by the citizens of Grand Forks included as a special feature a banquet given to the delegates on Wednesday evening at the K. P. Hall. Invitations had been issued to all the members, and an exceedingly interesting programme was rendered, which was participated in by the members present with considerable fervor and enjoyment. An elaborate menu was served, and in response to the call of the toastmaster a number of impromptu speeches were delivered by those present. It was after midnight before the affair came to a close, and the guests turned their faces homeward with their hearts full of thankfulness for the generous hospitality and appreciative kindness shown by the citizens of Grand Forks in everything connected with the convention.

### Hardware In Ancient Rome.

Although it is generally acknowledged that Rome had before the Christian era a higher state of civilization than that possessed by the majority of cities of the nineteenth century, it is strange to note the familiar likeness between the common objects of everyday life in the remote period referred to and the times in which we live, remarks a writer in *Hardwareman*. There is a link connecting the prosaic present and the remote heroic past, even in the common articles of husbandry and domestic life. Some of the Hardware used by the ancient Roman may be cited as a case in point, and, as our references are taken from the works of the Roman satirists—Juvenal, Persius, Lucilius, Horace and the rest of the immortals of that age—no exception can be taken to the reliable source of our information.

It would make too large a demand upon our space to give chapter and verse for each reference we quote from the works of the Roman satirists to the Hardware commonly in use in their time, but the curious reader may find them all in Bohn's Classical Library volume on the subject, edited by Evans and Giffard.

We read of the "nimble knife" for carving purposes; the "knife of the bandit," which was doubtless of some special make; and one Roman matron, declaiming the absence of a single ounce of ivory in her house, laments that "the very handles of her knives are of bone."

Another product interesting to Sheffield was in strong evidence among the citizens of ancient Rome. One hero extols the razor under which his beard grew exuberant sounded, or, as Hodgson paraphrases the line:

"Who reaped my manly chin's resounding field."

The term "a long razor's edge" would seem to imply that razors were larger implements than those in modern use. But where were these ancient razors made? If not in Rome itself probably in Damascus, famous for its steel works and its famous swords, bearing the inscription:

"Never drawn without the utmost need,  
Never sheathed without the utmost honor."

A reference in Juvenal to ploughs, this old world imple-

ment of husbandry, has additional interest, from the fact that it discloses the origin of a political phrase very popular a few years ago:

"Ploughing the sands."

The quotation from Juvenal is: "Yet still we ply our task, and draw furrows in the profitless dust, and keep turning up the seashore with a sterile plough."

The *culina* or portable kitchen of the Romans was a double-celled chafing dish, with a fire below to keep the "dole" warm. This culinary implement is still in common use among the Italian peasants. Fifty years ago the production of "chafing dishes" was an important branch of manufacture in Willenhall. But with the modern developments in grates and stoves, the chafing dish is no longer a prime necessity. The gridiron has largely superseded it in cottage homes, and gas stoves and "cookers" have worked, and are still working, a greater revolution in the kitchens of the better class houses, a fact to which the up-to-date iron foundries of Birmingham or elsewhere can bear abundant witness.

With all its ancient splendor and magnificence, we do not read that Imperial Rome knew the luxuries of electric lighting, or even of incandescent gas. Nor were its oil lamps free from odors the reverse of sweet. A teacher was warned not to lose his whole reward for having smelt as many lamps as there were boys standing around him. Among the lower class of the Jews of Rome, when Herod's day was celebrated, "the lamps arranged on the greasy window sill disgorged their unctuous smoke."

Where were made the axes of ancient Rome? They were not forged on the anvil of any true son of Vulcan, or sharpened on the stone which ground the swords of Damascus and Toledo. Else why such references as these?—"A bungling senseless axe"; "the blunted axe"; "the sluggard axe," with many others, all indicating that the axe of the period was not noted for the sharpness of its edge.

There would appear to have been in ancient Rome an institution answering to our modern safe deposit companies, for we learn that while the public treasure was kept in the temple of Saturn, private individuals had their money in strong boxes, deposited in the "Forum Augusti." The nearest approach to the modern iron safe would seem to be

"—— the brass-bound chest  
In watchful Castor's temple."

Whether of the "tower" or the "barrel" kind we do not know, but the old Romans certainly had their door bolts. Lucilius, whose "fragments" only are preserved, says of a lover, seeking a forcible entrance to his lady's bower: "You might not be able to shake out the door peg with your hand, or even force out the bar with a wedge."

Juvenal praises the primæval smiths who upon the anvil "hammered out nought save rakes and tools, and wearied out with mattocks and ploughshares, knew not the art of manufacturing swords."

The bronze statue of Great Sejanus was smashed to atoms and the fragments converted into ignoble use, for out of them were fashioned "pitchers, basons, frying-pans and platters." Badham paraphrases the incident in the lines:

"And from the stride of these colossal legs  
You buy the useful pans that fry your eggs."

Shakespeare may have had this in mind when in "Hamlet" he exclaims:

"To what base uses we may return, Horatio."

Among other references are the needle (of Tyrian make), the bucket, the buckle, the steelyard, the sieve, hob-nails and dumbbells, all of which, with many more Hardware products, were as common in the days of the Cæsars as they are in the happier times of Queen Victoria.

"Yes, they tried to live on bread and cheese and kisses."

"Didn't it work?"

"No; she made the bread and George furnished the Roquefort, and after that nobody wanted any kisses."—*Ex.*

## INDIANA RETAIL HDWE. ASSOCIATION.

The second annual convention of the Indiana Retail Hardware Dealers' Association was held at the Grand Hotel, Indianapolis, on Tuesday and Wednesday, February 19 and 20. It was an exceedingly successful affair, and was very largely attended, nearly 200 delegates being present.

### TUESDAY AFTERNOON SESSION.

Instead of convening at 10 o'clock in the morning, as was anticipated, it was an hour or more after noon before the convention responded to the roll call. The address of welcome was delivered by Assistant City Attorney Bell, who represented Mayor Taggart, as His Honor was traveling in Mexico. W. H. Weed, of Vincennes, president of the Association, made an appropriate response.

An executive session was held for an hour, and the convention proper as far as outsiders were concerned opened late in the afternoon.

After the minutes of the last convention were read and approved, the President appointed the following committees:

### COMMITTEE ON CREDENTIALS.

I. A. Sibley, South Bend.  
H. T. Trueblood, Washington.  
C. B. Frame, North Manchester.

### COMMITTEE ON RESOLUTIONS.

W. P. Lewis, New Albany.  
E. M. Bush, Evansville.  
W. A. Shipley, Lafayette.

### THE PRESS.

A. H. Birkett, Gosport.  
M. L. Lewis, Marion.  
Jas. L. Fulton, Portland.

### PRESIDENT WEED'S ADDRESS.

This was followed by the delivery of the annual address by President Weed, which was a very capable one. He said in part:

We have organized this association with the hope of remedying such evils, and it is the opinion of at least many jobbers, and they have given out such impressions to their salesmen, that we will not succeed because of the lack of concerted action. Have you given this matter your serious thought? Are you prepared to drop the friendship of and withdraw patronage from a jobber and his traveler, whose relations have always been pleasant with you? Gentlemen, this is where concerted action will win; without it we lose. The most trying part of each individual is to be firm enough to cast aside his old friend and stand by his association. I presume many of you wonder why this or that grievance has not been aired, and no doubt one of the very best reasons is that we fear there will be a lack of this necessary concerted action.

\* \* \* \*

I have had a grievance since the very beginning of this organization, but have delayed action, for it is better to be abused than to fail in what we undertake. No doubt many of our brother dealers, who have not yet joined us think this a spasmodic wave going over the country, which will soon die; but I cannot agree with them. I believe it is the foundation stone of better relations to be brought about with the jobbers and manufacturers. Right is might and will prevail.

### SECRETARY COREY'S REPORT.

This was followed by the reading of the secretary's report, which was as usual an extremely important one, covering the amount of work which falls to the secretary's lot during the year, which was fully explained for the benefit of the members present. As it referred principally to executive business, we are limited in the extracts we make from the same.

I found several complaints, but not as many as expected.

In one town dealers would complain because jobbers visited blacksmiths; in the next the dealers would not even carry a stock of iron, horseshoes or supplies of any kind, and said they did not want this trade at all. Some dealers objected to jobbers visiting the factories; others thought it could not be prevented and said they went after and secured what they wanted in this line, but were sometimes compelled to sell without profit. The jobbers who give the most trouble in this line are those who do a wholesale and retail business, selling very little to retail dealers. The business of the small department and racket stores seems on the decline, but all acknowledge the catalogue houses were cutting off a certain amount of trade, and strongly objected to their manner of using standard specialties of our line as baits and their unprincipled methods employed in going after business.

\* \* \* \*

It seems the general opinion among dealers that manufacturers should give us some protection, either in specifying a price they shall catalogue goods at that will afford us a margin, sell them at same price they do us or not sell them at all. The manufacturer or jobber that will not co-operate with us on this line is not a friend and not entitled to the good will and patronage of the trade. This question has been pretty thoroughly canvassed in conventions and trade papers, but no action has ever been taken that has affected the general conditions.

\* \* \* \*

Our future will depend upon two things—harmony and strength. A large loyal membership will insure the latter, but without harmony in our business relations and a certain amount of confidence in our competitors we fail to receive the full amount of benefit that our organization promises.

Another thing I would urge upon our members. That they keep more in touch with our association work. If anything occurs that you think will be of interest, write the secretary about it. Give him the benefit of ideas that may strike you as important. Don't expect the officers to notice everything and do all the work. Be alive. If each member present will do this, watch in their several localities, report promptly and often, the benefits and usefulness of our association will be increased many fold.

The President then appointed a committee, consisting of W. H. Eluere, T. M. Layne and C. F. Boonshot, to audit the reports of the Secretary and Treasurer.

J. W. Shidler, of South Bend, then read the following paper entitled

### "CATALOGUE HOUSE COMPETITION."

speaking in part as follows:

If, 30 years ago, 150 of the best Hardwaremen of this great State had congregated at the metropolis, it would not have been to listen to the discussion of the perplexing questions which confront us to-day.

The wider distribution of the newspaper and other mediums of advertising have informed the people of the existence of the catalogue house. The increased facilities for transportation, whereby every rural district is brought more closely in touch with the cities, together with the reduced expense of transportation and postage, have made possible the success of the catalogue house, and with the proposed Pettigrew Parcels Post bill a law, catalogue house competition will be more keenly felt.

It is not the amount of goods sold in our respective territories which antagonizes the dealer so much as the methods used in securing business. Their catalogues distributed over the country naming prices at or below cost on certain brands that we have made standard by constant advertising and pushing leads the average citizen to consider our prices exorbitant, not knowing of the many staples we are selling at or below actual cost wholly for his accommodation.

\* \* \* \*

The writer had occasion to compete with one of the largest catalogue houses in Chicago on a blacksmith's outfit. We invited the prospective purchaser to bring his list of goods and catalogue and allow us to make him a price before sending away. He did so, and in going over the list we were able to substitute a number of articles which cost less, but

being able to show the goods, they were satisfactory, and we made the sale, the bill amounting to \$152, giving us a profit of \$16. We realize that this was not enough profit for the kind of goods, but we also had in mind his business in the future, which has proved very satisfactory and profitable. Not only have we retained him as a constant customer, but through his influence have secured as customers several other patrons of catalogue houses.

\* \* \* \*

Let us take advantage of every opportunity to become familiar with the catalogue house methods of doing business, and when visiting the cities remain a day longer and spend the time in looking through their stocks, noting the grades of goods for a comparison with our own stocks, also the quantities, in order to satisfy ourselves as to the lines on which they make their profits. This will enable us to talk more intelligently to our customers regarding the quality of goods and make our arguments much more convincing, having seen the competitor's lines.

He was followed by J. P. Kelly, of the Kelly Axe Mfg. Co., of Alexandria, who was introduced by the President in order to make a short address giving the assurance to the dealers present of the hearty co-operation with all their aims and views participated in by the company he represents.

#### WEDNESDAY MORNING SESSION.

E. W. Clark, of E. C. Atkins & Co., Indianapolis, read an address on

"THE ALLIED INTERESTS OF MANUFACTURERS AND DEALERS," which was listened to attentively by the delegates, and proved to be extremely interesting. Among other things he said:

Civilization has indeed wrought wonderful changes, but in nothing has its influence been shown more than in our magnificent system of commerce and business. Manufacturers and dealers are both necessary in our present state of high development, as they are an integral element of our vast social system.

The manufacturer seeks the hidden treasures of the earth and with brains, ingenuity and labor changes the useless to the useful. He digs down into the soil, extracting that which nature has so bountifully provided for us, and by endless processes of labor, with the assistance of machinery, makes articles that are necessary for our comfort. Every article finished by a factory means employment of labor. The crude material must be obtained by work and knowledge. It must be transported by some method, so that from the raw material to the finished product an endless variety of work is employed that escapes our observation. The men thus employed must be fed, clothed, etc., and other laborers must supply their necessities and luxuries, so that the beneficial results of factories are far reaching.

#### MANUFACTURER DEPENDENT ON DEALER.

Admitting this, he is, however, only one part of our vast commercial organization. His wares must be sold to the user, and you are as necessary for his prosperity as he is to you. Without you he would be like the ancients, selling his wares in limited quantities. He needs you as much as he requires the transportation companies or, I might say, even more. He could not explain the merits of his goods to every consumer in this great land of ours. You do this for him and are naturally his great ally.

\* \* \* \*

I wish to reiterate all that I said at your last meeting by stating that we will continue to refuse to sell department stores and catalogue houses and will at all times protect you as far as we can. We feel that your prosperity is so closely woven into our own that our efforts will always be directed to promoting better conditions in our trade relations. We know you will fully appreciate whatever we do in this direction, as you should and do patronize those manufacturers who strive to make your business profitable.

He was followed by W. P. Lewis, of New Albany, who delivered a paper on the subject of

#### "OUR ASSOCIATION,"

which was a carefully prepared address, outlining the programme originally laid out by the Association, under which the co-operation of the dealers was solicited, and showing what success the efforts of the members had achieved. Mr. Lewis vigorously condemned the practice of jobbers selling small orders to individuals. It is intended his paper shall be furnished in pamphlet form, and placed in the hands of every

Hardware dealer in Indiana. Among some of the ideas with which it was studded, we give the following:

We never shall rest till every eligible Hardwareman in the State becomes a member of this association. We should divide the State Congressionally. The president and Executive Committee should appoint a chairman for each district. This chairman should know every Hardwareman in his district, and to this chairman every item and circumstance should be reported. In this way we could garrison the State from the lake to the river. We can keep in touch with every current and eddy of trade. This district chairman should keep accurate records of all his correspondence and the replies thereto. If he fails to terminate satisfactorily any given case the same should at once be referred to the State Secretary. Annually this chairman should report to our convention.

We stand in the open door of a new century. The wonderful development of material forces during the nineteenth stagger the mind. The suggestions of improvement during the twentieth collapse the imagination. But our advancement is gravely faulty unless corresponding betterment is shown in commercial ethics. The declaration that might makes right as a theory has few indorsements, but as an expression of man's relation to his fellows in practical life it has many exemplars. If then there are those who with careless disregard ignore rational and friendly requests, we belie our manhood if we do less than stand ready to meet might with might, friendliness with friendliness, peace with peace. We indulge the hope that the century will still be young when, through the influence of our State and national organization, that happy condition shall appear in which man's humanity to man shall make countless thousands glad.

The president then appointed a committee to recommend candidates for president, vice-president and secretary. The committee consisted of E. M. Bush, of Evansville; C. B. Frame, of North Manchester; C. A. Ellis, of Carlisle, J. C. Shanklin, of Frankfort and J. C. Comstock, of Thorntown.

#### MUTUAL FIRE INSURANCE.

A discussion was then taken up having reference to fire insurance and the advisability of the members of the Association organizing a Mutual Insurance Co. It was stated by Secretary Corey that this matter had been deemed of sufficient importance to be taken up by several other associations, and has proven a great success. It was ascertained by a vote of those present that the number of members who had sustained losses by fire was 24; losses in the last five years, \$13; losses in excess of \$1,000, 6; losses in excess of \$2,000, 4. The Secretary also remarked that in Minnesota the lumbermen had an insurance organization, a very successful one, and he thought the Hardwaremen ought to succeed better, as their stock was conceded to be much more desirable as a risk, and was generally located in the best buildings in the locality. A general discussion followed on this subject, which was concluded by a motion being made and carried that the matter be referred to a committee to report later upon the advisability of the scheme. It was also, on motion, adopted that the committee look into the insurance question, and be empowered to employ legal counsel at the expense of the Association, it having been understood that it was difficult to establish an insurance organization in the State of Indiana, as it was believed to be necessary to have \$100,000 in premiums on deposit before a charter could be had. Mr. Sibley sagely remarked that it seemed to him to be a question in his mind whether the members were not trying to accomplish with the insurance agent just what the jobber was trying to accomplish with the Hardware dealer.

#### WEDNESDAY AFTERNOON SESSION

After the treasurer's report had been read, Mr. Bush moved that the secretary of the Association be allowed a salary of \$150 a year, and that the Association pay his traveling expenses when he is on the road soliciting new members, subject to the approval of the executive committee. This motion was carried.

Fred. H. Cozzens, secretary of the Inter-State Association, then addressed the convention in a very able speech on the catalogue house question.

## ELECTION OF OFFICERS.

The committee on nominations presented the following names for election to office: President, W. P. Lewis, New Albany; vice-president, James L. Fulton, Portland; secretary and treasurer, M. L. Corey, Argos. All of these gentlemen were duly elected by acclamation.

Mr. Lewis, the newly-elected president, made a brief address thanking the Association for the high honor conferred upon him, and assuring them of his highest ambition being to make the work entirely successful in its character, for which purpose he asked the co-operation of all the members present, feeling confident that he should need their entire support.

I. A. Sibley, of South Bend, and W. P. Lewis, of New Albany, were elected delegates to the meeting of the Inter-State Association, held in Chicago on March 6th, and W. H. Weed, of Vincennes, and M. L. Corey, of Argos, were elected alternates.

W. H. Weed the retiring president, made a speech thanking the Association, and offering his best wishes for all the delegates as well as to his successor.

An invitation was extended to a number of those present who desired to subscribe for honorary membership in the Inter-State Association, the funds raised in this manner being appropriated toward the expense of that Association, as their revenue at present was insufficient. Several of the members present subscribed \$5 each.

It was voted upon and agreed that the next meeting of the Association be held in Indianapolis, and the rules were suspended so that the date of the next meeting may be left to the executive committee.

The auditing committee then made the report that having examined the report of the secretary and treasurer, the accounts were found correct. It was on motion agreed that all unfinished business be left to the executive committee with full power to act. The meeting then adjourned.

The Executive Committee, consisting of Messrs. Weed, Bush, Sibley, Lewis and Corey, convened in extra session on Thursday morning, at which it was decided that the treasurer should give a bond of \$1,000. It was also resolved that in the future the Association as a body will not accept entertainment from any association where any expense is attached. The secretary was instructed to tender a vote of thanks to the jobbers and manufacturers of Indianapolis for the hospitable entertainment provided on Tuesday evening. A resolution was passed making it essential that manufacturers who desire the support of the retail dealer should have some distinguishing mark upon their product whereby their goods can be traced. A number of other business matters were brought before the committee, which were calculated to be acted upon at a later date, after which the committee adjourned subject to the call of the president.

Among those in attendance at the convention were:

C. E. Swain, representing Chandler & Taylor; G. W. Coonse, of Comstock & Coonse; W. F. Singer, of Fairbanks, Morse & Co.; Geo. Alig and W. W. Clayton, of the Home Stove Co.; P. M. Hildebrand, C. Wayne and A. W. Rose, of the Indianapolis Hardware Co.; I. S. Gordon and E. A. Hendrickson, of the Indianapolis Saddlery Co.; W. J. Brown, of the Indianapolis Stove Co.; Jas. P. Kelly, of the Kelly Axe Mfg. Co.; T. B. Laycock, of T. B. Laycock Mfg. Co.; J. T. Layman and S. C. Carey, of Layman & Carey Co.; Ewald Over and D. M. Parry, of the Parry Mfg. Co.; R. L. Dorsey, of Tucker & Dorsey Mfg. Co.; A. W. Cobb, of Udell Works; C. Van Camp, A. E. Caldwell, Riley Hunt, H. Lockmiller, R. Van Camp, Joseph Beck, E. H. Albright, Geo. Drury, W. B. Somes, S. G. Van Camp, W. F. Fugate, Jas. T. Anderson, H. C. Thompson and T. A. Horan, of Van Camp Hardware & Iron Co.; George Vonnegut of Vonnegut Hardware Co.; C. W. Mayer, of Crucible Steel Co., and many others.

E. C. Atkins & Co., of Indianapolis, distributed handsome

badges to each member; also a souvenir in the shape of a miniature Cross Cut from which suspended a four-leaf clover with the addresses of their four branches engraved thereon. This firm were represented by H. C. Atkins, S. C. Gardner, E. W. Clark and F. Wells.

## THE BANQUET.

On Tuesday evening the members of the Association were tendered a banquet by the manufacturers and jobbers of the city, which took place at the Columbia Club. The hall is a commodious one, and was decorated with a great deal of taste, and the entire affair was one of the most enjoyable functions of the kind that the Association had ever experienced. Among the Indianapolis houses which united in the invitation to the visiting merchants were the following:

American Buncher Company, E. C. Atkins & Co., Aultman, Miller & Co., W. B. Barry Saw & Supply Co., A. Burdsal Co., Capital Paper Co., Central Rubber & Supply Co., Chandler & Taylor, Comstock & Coonse, H. T. Conde Implement Co., John Deere & Co., Deering Harvester Co., Fairbanks, Morse & Co., Hide, Leather & Belting Co., Holliday & Wyon, W. J. Holliday & Co., Hollweg & Reese, Home Stove Co., Indianapolis Hardware Co., Indianapolis Saddlery Co., Indianapolis Stove Co., Janesville Machine Co., Kelly Axe Mfg. Co., A. Kiefer Drug Co., Knight & Jillson Co., T. B. Laycock Mfg. Co., Layman & Carey Co., McCormick Harvesting Machine Co., Charles Mayer & Co., Milwaukee Harvester Co., Ewald Over, Parry Mfg. Co., Chas. D. Pearson & Co., Daniel Stewart Co., Tanner & Sullivan, Taylor & Smith, Tucker & Dorsey Mfg. Co. Udell Works, Union Selling Co., Van Camp Hardware & Iron Co., Vonnegut Hardware Co. and Warder, Bushnell & Glessner Co.

Hon. John B. Cockrum acted as toastmaster, and responses were made to the following toasts: "Indianapolis as a Jobbing Centre," I. S. Gordon; "Indiana as a Manufacturing State," D. M. Parry; "Our Friends the Dealers," Senator James T. Layman; "Our Friends the Jobbers," W. H. Weed; "Our Association," I. A. Sibley; "Our State," Hon. John L. Griffiths.

## Bulldog Collars.

The Union Hardware Co., Torrington, Conn. (Tower & Lyon, New York), have added to their already excellent assortment, a new line of Collars especially designed for Bulldogs. They are made of heavy leather and combine strength with handsome appearance. In their new Cata-

logue, now ready for delivery, this Company calls particular attention to the method of fastening on the buckle and Dee Ring, the same being entirely new and a great improvement over old styles of fastening. These Collars are made in various widths and lengths, and with several designs of studding.

Friendship is the nearest thing we know to what religion is.

A dishonest gardener received notice of discharge, and after trying in vain to vindicate himself, he said mournfully to his employer: "Ah, sir, you will miss me before I be gone half an hour."

"I sha'n't mind that," answered the employer, cheerfully, "if I don't miss anything else."—*Exchange*.

## MO. RETAIL STOVE AND HDWE. DEALERS' ASS'N

The third annual meeting of the Missouri Retail Stove and Hardware Dealers' Association met in the club rooms of the New Coates House, Kansas City, on Tuesday, Wednesday and Thursday, February 19, 20 and 21.

### TUESDAY MORNING SESSION.

President P. E. Harney called the meeting to order at 11 o'clock, and after extending a welcome to the delegates, proceeded to read his annual address.

### PRESIDENT HARNEY'S ADDRESS.

He spoke in part as follows:

The membership has not increased as I would have liked to have seen it, which to a large extent may be accounted for from the fact that there having been good crops, and a general period of fair business, dealers have been so busy that the association work has not received the attention it should. When business drops back to a normal condition there will be more interest manifested, and dealers will find it more necessary to protect themselves by and through the association than they have in the two years just past.

It is my opinion that the greatest benefits to our association will come through an interstate or national organization, which will be large and powerful enough to take up and handle our grievances—such grievances as the trade always has—and adjust them more satisfactorily than they could be adjusted by any local or even State association.

### LOCAL ORGANIZATIONS.

But I would further state to this convention that in order to have a strong Inter-State Association it is first necessary that there should be strong local and State organizations, because interstate and national organizations depend upon the local and State organizations for their strength.

I would further urge upon all the members of this association local organization in all cities or in each county. While I recognize the fact that there can be no such thing as fixing prices, it would give us an opportunity to meet from time to time the fellow across the street and find out what a good fellow he is; that he is not near so bad as we thought he was, and find many times we can save one or the other many dollars.

I would suggest that you all try this and see if you will not be greatly benefited by being good friends, although you be competitors. We have tried it a little down our way, and we find it so satisfactory that I would be very much pleased to have you try it. In fact, I believe that if you all tried it once, for just one year, you would be so well satisfied that you would keep it up always.

He was followed by the secretary-treasurer, E. Thomas, of Trenton, who read his report, which gave in detail the business attended to by the secretary during the interim between conventions. The report was listened to with great interest by the members, and was filled with information.

Fred. H. Cozzens, of Detroit, secretary of the Michigan Hardware Association and secretary of the Inter-State Association, was present, and addressed the convention, giving the experience of his home organization in their endeavors to build up a membership, which was listened to attentively.

The reports of committees were laid over to be read and considered in executive session.

F. P. Haus and Fred. A. Spielman, both of St. Louis, were appointed as assistant secretaries to take in the dues of members and otherwise assist the secretary in the transaction of his multifarious official duties. The convention then adjourned until the afternoon.

### TUESDAY AFTERNOON SESSION.

The afternoon session was called to order at 2:10. Louis Hering, Jr., of Blackburn, was appointed sergeant-at-arms. Fred H. Cozzens read a paper on "How can membership in a Hardware Dealers' Association be made so popular that

dealers will desire to become members?" from which we make the following extracts:

It is a fact which is lamentably true that a great many merchants have little interest in anything beyond their own store doors. This, I think, is more generally true of the merchants of the larger cities than of the smaller ones, for the demands upon the time of a city merchant are usually greater than those of a merchant in a less populous district, and the country merchant has therefore more time for reading, reflection and a study of the conditions which surround him than his city brother. Further than that, as a rule, competition is not as keen in the country among merchants as it is in the larger places. Because of these things it is generally easier to interest merchants away from great centers of population than it is in those centers themselves.

\* \* \* \*

I think it will be generally admitted by those who have had any great experience in association work that the social and educational privileges of the organization are alone worth many times their cost. To be able to meet with 50, 75, 100 or more of men in the same line of business once a year, to hear papers read, and the discussions which follow on topics of every-day practical interest, to receive and to impart information in regard to the conduct of your affairs which others may have been years in accumulating, and generally to have fraternal fellowship with your brother merchants, is alone a valuable privilege which must be enjoyed to be understood.

There are, however, many business men who do not appreciate the social benefits of an organization, nor the benefits which arise from an interchange of ideas with those of similar trade elsewhere, and to these some practical dollars-and-cents answer must be given if they are to be interested.

\* \* \* \*

One of the most important benefits which arises from co-operative effort along Hardware association lines is the healthful restraint which the mere existence of such an organization has upon the jobber and the manufacturer who is inclined to ignore the regular dealer when he sees an order a little larger than the ordinary, and who sells direct to the consumer, in consequence, and that restraint, of course, means just as many more dollars profit each year to the retailer.

\* \* \* \*

It is well to bear in mind, however, that all demands must be just and reasonable if it is going to succeed permanently. This is an age of organization. The laboring man has been the first to realize the truth of this, and the great network of labor organizations, which are so prominently identified with our large cities, is a striking demonstration of the truth of this statement. Individually the wage-earner has been in a fair way to be crushed out in his struggle for shorter hours and better pay. Collectively and through his trade organization, acting in conjunction with the federations of labor in the various parts of the States, the comparatively insignificant factor of a single workingman has become a power which dares enter the lists with some of the greatest aggregations of capital in the United States, and which frequently holds its own successfully with them.

On motion of Secretary Thomas, a vote of thanks was given Mr. Cozzens for his interesting paper, and a discussion followed, taking up a number of suggestions made by Mr. Cozzens in his address. A motion authorizing the employment of a State solicitor was referred to the Executive Committee for their consideration and report.

Announcement being made that both H. A. Cole, of Council Bluffs, Iowa, and H. G. Koenig, of St. Louis, who had been placed upon the programme to deliver addresses, would be prevented from being present, it was deemed advisable that the convention should last two days instead of three. On motion of A. F. Geschwinder, of St. Louis, the president was empowered to appoint three committees consisting of four members each, including one representative of Kansas City on each committee, to call upon the retail dealers of Kansas City at once, and solicit them to join the association.

The following were named as members of these committees, who were instructed to start at 8:30 Wednesday morning in their labors as special solicitors:

Committee No. 1—A. F. Geschwinder, August Steinmyer and F. A. Kansteiner, all of St. Louis, and M. A. Wingert, of Kansas City.

Committee No. 2—Ed. A. Demeter, of Macon; J. M. Kenyon, Jr., of Maitland; Al. Dudfield, of Lathrop, and H. J. Brunner of Kansas City.

Committee No. 3—Geo. R. Plowman, E. L. Wachter and F. P. House, all of St. Louis, and E. Stoltzing, of Kansas City.

George R. Plowman, of St. Louis, then read an admirable address on

**"THE BENEFIT OF LOCAL ORGANIZATION,"**

which we give entire:

There cannot be a doubt after a thought or two on the subject as to the many benefits of organization for any purpose. The mere definition of the word signifies so much. It is the act or process of forming instruments of action or suitable disposition of parts that are to act together in a compound body.

The advantages of such an arrangement applied to a body of individuals engaged in one line of business or undertaking for the accomplishment of a certain object, and I take it for granted that every Hardware dealer is in business first to better his social and financial condition and that of his dependents, and, if he is unselfish enough, secondly to accumulate a sufficiency to enable him to better the condition of his weaker brother when he has earned the necessary means and leisure. One of the first principles of organization is to enable him to more rapidly secure that necessary than he can by his individual efforts. The advantages of organization as compared with individual efforts are beyond comparison.

**GREAT BENEFIT OF RETAIL ORGANIZATION.**

The retail Hardware dealers as an organization are benefited in a much greater degree than some other organizations, because their interests are identical. Their experience and training are learned at the same schools, and, therefore, when either looked at from a selfish or unselfish point of view, it must be apparent to any individual of ordinary intelligence that if there is a grievance organization will eradicate it, and it is the only way in which results are accomplished and satisfaction assured.

**POSSIBILITIES OF ORGANIZED EFFORT.**

It is really only in the last few years that the possibilities of organized efforts (especially in the business world) have been realized. We see indications of it on every side, and the magnitude of some undertakings gives us great doubts as to their successful issue, but where such efforts have been made in a legitimate manner, no matter how large they seem, their success is assured, and our doubts become eliminated as we grasp the benefits of organization and become familiar with its workings.

The pioneer who left the last settlement a few years ago to find a home in this Western country—perhaps he came direct from the tyranny of some foreign Government and felt that he would like to be far from man and only at home with nature, and sought a home in the solitudes of the prairies, where there was no choice as to location but the question of wood and water; but when he had enough leisure he longed for others to come from that social organization of which he was a part, so that he could have enjoyments and accomplish things that it was impossible to do individually.

**THE BENEFITS OF A LOCAL ORGANIZATION**

to the individual are more of a personal nature. His relations are closer to other members, and the space is of a definite character. Their meetings are oftener, and some things of a local nature are more familiar to them than to the larger or grand organization. The local gatherings are more frequent, and the amount of information and social pleasure desired is beyond the imagination of those who are not members of such a local organization.

There is nothing worth having secured without effort, and to succeed requires the effort of each instrument of action, and there must be action in any organization, local or general. Then each one who works for the general benefit educates, benefits and informs himself, and time and combined efforts will beyond a doubt eliminate our present difficulties and the business of future conventions will be purely of a social character, and all the troubles of the retail Hardware dealers will be a thing of the past.

After the reading of Mr. Plowman's paper, Secretary Thomas read a communication from Z. T. Miller, of the Inter-State Association, having reference to the association's work, in which he reported the amount of work done by that body during the past year. He stated, however, the work was restricted somewhat by the limited financial resources of the association, which he hoped would be considerably increased by the addition of other States to membership, and by the increased growth of the State organizations now constituting its complement of members. The reading of the letter was listened to with great interest by the delegates present, it being a subject in which they were greatly interested.

On motion of J. W. Poland, it was ordered spread on the minutes.

The secretary then read a letter from the Bridge & Beach Mfg. Co., of St. Louis, which favorably commented upon a bill recently introduced in the Kansas Legislature, which made necessary a license of \$500 a year for lightning-rod agents or steel range peddlers, but which law was intended to cover irregular dealers of all sorts. Money secured from its operation was designed to be added to the general fund of the county in which the agent operated. If the peddler only desired to operate one week in a county, he would still be compelled to pay the \$500 license, and under the law he must get a new license in each county. This, it was claimed, would prohibit the operation of peddlers in this State, which had been the cause of great annoyance to regular and responsible dealers. The letter asked the Missouri Retail Hardware Dealers' Association to use their endeavors in having a similar law enacted in that State. This letter was considered of considerable importance, and was referred to the Executive Committee to be reported upon at a subsequent session.

A discussion followed upon the subject, "Should a retail dealer who is not a member of a local organization when there is one be a member of a State organization?" The discussion of this question was freely participated in by a number of the delegates. In the course of it, the fact was brought out that in Missouri only two cities have local organization, viz.: St. Louis and St. Joseph. Consequently, no definite conclusion was reached. The meeting adjourned at 5:20 to meet Wednesday morning.

**WEDNESDAY MORNING SESSION.**

The meeting was called to order at 10:30 by President Harney. The first thing on the programme was the reading of the minutes of the Tuesday afternoon session, which were approved.

The report of the Executive Committee, acting as Auditing Committee, was then received, in which they stated the books of the secretary-treasurer had been examined and found correct. The report was approved. The Executive Committee further reported that it had been decided that a State solicitor should be employed, being deemed of vital importance, and they recommended that the new Executive Committee be empowered to make whatever arrangements should be necessary to accomplish this end. Mr. Pauly, of St. Louis, spoke at some length upon this recommendation of the committee, and on motion it was approved. In the course of his remarks, he urged every member to endeavor in the coming year to secure at least one member in addition to what might be done by an organizer. Vice-President B. F. Naylor, of Marshall, said in this connection: "If we expect this organization to grow, we must put forth individual efforts. I think in ten minutes a man should be able to induce his competitors to join the association. We should all put forward more and better efforts."

The subject of Mutual Insurance was brought up as usual, but it was not deemed advisable to go into the matter until a larger membership had been secured for the association.

J. M. Kenyon, of Maitland, thought when the association

had 300 members they could safely take the matter up, as he commended the plan of insurance very highly, stating that his insurance had not cost him one-half of that charged by the regular insurance companies.

Following this, James A. Massa, of Kansas City, read an interesting paper on

"THE RELATION OF THE RETAILER TO THE JOBBER,"  
from which we make a few extracts:

From the nature of his business the retailer is dependent on the jobber, and this is so because of the element of economy which must be reckoned with. Frequent recurring wants for small parcels of goods make up a great portion of the retailer's business, and to procure them quickly and cheaply requires that the nearest merchant having the goods in stock and the low prices be called upon to supply the want. These frequent needs for small parcels of goods necessitate the existence of an adequate stock within reach of the small trader, and whosoever can supply his wants quickly and cheaply will be to him a jobber. I therefore maintain that the jobber is, and will continue to be, a necessity as long as men trade together.

\* \* \* \*

The poor we have with us always. The small dealer must not be lost sight of in the reckoning. I have no faith in the prophecies so often uttered that a few years hence there will be no small traders. I believe the small trader will continue to exist and do business while time lasts, because he is a necessity to the people. We may, therefore, conclude that the jobber is the natural source from which the retailer should get his goods, because the jobber has facilities for gathering commodities from everywhere at a much less cost than the retailer himself can do it.

\* \* \* \*

The borrower is servant to the lender. When we are so unfortunate as to fall into debt it is absolutely necessary that we should be transparently honest about our financial condition, if our creditor asks a statement of it, as any evasion excites distrust, a very unfortunate thing for a debtor. An honest effort to get out of debt will, in most cases, meet with help from the jobber, who will then prove to be our best friend. There are scores of good men among the jobbers. Many of us are sensitive when we are urged to pay our debts. But I regard it as a wholesome tonic when we take it in the right spirit, which is to get up and get some money to apply on that perhaps overdue account.

Mr. Massa's paper was listened to by the members with considerable interest, and, on motion of J. W. Poland, was ordered spread upon the minutes.

The committee appointed at the last convention to attend the conference of State Associations, consisting of Messrs. Poland and Kansteiner, reported that they had attended the conference, that the Association of Inter-State Hardware Dealers had been formed, and that the support of the Missouri Association had been pledged to that organization.

A resolution signed by J. M. Kenyon, M. C. Post, H. T. Shoop and G. A. Pauly was read, ratifying the action of the committee, and instructing the officers of the Missouri Association to co-operate in every possible way with the officers of the Inter-State Association. On motion of Mr. Hering, the report of the committee was received, and the resolutions unanimously adopted.

#### WEDNESDAY AFTERNOON SESSION.

The convention held an executive session in order to consider the report of the Committee on Grievances, the proceedings of which were not calculated for public information. The doors were then thrown open later for the continuation of the regular proceedings. Mr. Poland held the attention of the convention, while he made a strong appeal in favor of making an effort to secure the enactment of a law in Missouri, which would impose a tax of at least \$500 on peddlers. The matter was referred to the Executive Committee for their consideration and report.

It was then in order to hear the reports of the committees who had been appointed to visit the Kansas City dealers. Mr. Haus, for his committee, reported that they had called on ten dealers and secured eight of them as members of the association. Mr. Plowman, for his committee, reported as

having called on eight and secured six. Mr. Demeter reported that his committee, although calling on five, had only secured one. The statement was also made by the committees that the Kansas City dealers, from the interest excited by the calls of the special committees, had a movement on foot to form a local retail dealers' association.

The election of officers was the next thing upon the programme, and the convention proceeded to elect officers for the ensuing year. The result of the balloting showed that B. F. Naylor, of Marshall, had secured a majority of the votes, and he was declared elected president. Geo. R. Plowman, of St. Louis, being the only nominee for vice-president, was declared unanimously elected. M. A. Wingert, of Kansas City, and J. W. Poland, of Carrollton, were the only nominees for membership on the Executive Committee, and were declared elected, two members of the Executive Committee holding over from the previous year, viz.: H. L. Hixson, of Hannibal, and F. A. Kansteiner, of St. Louis. The Advisory Committee was elected without contest, as follows:

P. E. Harney, of Joplin; E. Stoeltzing, of Kansas City; J. M. Kenyon, of Maitland; W. T. Shoop, of Richmond, and G. A. Pauly, of St. Louis.

The newly-elected president, Mr. Naylor, was escorted to the chair, and thanked the association for the honor conferred upon him in a few appropriate remarks. He stated that he especially desired the hearty support of the members for the benefit of the association, and hoped that they would all do their best during the coming year to advance its interests. A vote of thanks was given the retiring president, on motion of Mr. Kansteiner, to which Mr. Harney made a graceful response. On motion of Mr. Plowman a vote of thanks was given to F. P. Haus, who had distinguished himself in many ways during the past year, and also during the previous day in Kansas City in his successful endeavors to secure new members.

It was on motion decided that the incoming secretary should be the sole delegate to the Inter-State Association meeting. J. W. Poland was unanimously elected alternate delegate.

There were three cities offered the association for their next annual convention—St. Louis, St. Joseph and Sedalia—but it was decided that the association should hold its convention at St. Louis, the date being left to the Executive Committee. It is in contemplation that the Executive Committee will name a date that will be less likely to interfere with conventions held in other States.

F. Neudorff, of St. Joseph, brought to the attention of the members a law that was passed by the Missouri Legislature some two years ago, which did not seem to be generally understood. The law provides that when anything is purchased on time payments secured by chattel mortgage, a dealer must refund three-quarters of all the money paid in order to secure possession of the article sold.

A vote of thanks was given the *Iron Age* for having furnished copies of the proceedings of the last convention.

A report was made by the Executive Committee in which they stated it had been decided to separate the offices of secretary and treasurer, and that they had elected F. Neudorff, of St. Joseph, secretary, and W. H. Halyard, of Joplin, treasurer. They further reported they had selected the following members to serve as a Committee on Grievances for the ensuing year: J. H. Best, of Palmyra; L. D. Groom, Richland, and W. T. Shoop, Richmond. They also reported they had deferred action relative to the employment of a State organizer, and the matter would be considered at a subsequent meeting. The report of the Executive Committee was received and approved, and the convention then adjourned *sine die*.

Among the important visitors who honored the convention with their presence may be mentioned the following:

J. G. Beegle, Rochester Stamping Co. and Robeson Cutlery Co., Rochester, N. Y.

Fred. H. Cozzens, secretary Inter-State Association, Detroit, Mich.

W. P. Rogers, Kansas City File Works Co., Kansas City.

A. L. Danforth, Staver Carriage Co., Chicago.

T. J. Noone, C. Sidney Shepard & Co., Kansas City.

J. H. Dickbrader, Berger Mfg. Co., St. Louis.

A. W. Wagner, Stowell Mfg. & Fdy. Co., Chicago.

E. J. Fox, Bridge & Beach Mfg. Co., St. Louis.

G. W. Gladding, E. C. Atkins & Co., Indianapolis, Ind.

C. H. Greene, Schill Bros. Co., Crestline Ohio, and the Gem City Stove Co., Dayton, Ohio.

F. P. Haus, the Charter Oak Stove & Range Co., St. Louis.

Sidney P. Johnston, the *American Artisan*, Chicago.

C. M. Key, Rathbone, Sard & Co., Aurora, Ill.

W. V. Lewis, Lewis Supply Co., Kansas City.

H. J. Ruhling, Geo. W. Trout & Co., Chicago.

G. W. Blakesley, Rock Island Stove Co., Rock Island, Ill.

W. N. Sawyer, Estate of P. D. Beckwith, Dowagiac, Mich.

Fred. A. Spielman, Buck's Stove & Range Co., St. Louis.

W. C. Wing, Belleville Stove Works, Belleville, Ill.

W. Allbritain, Hampton Mfg. Co., Kansas City.

Chas. H. Burton, *Stoves and Hardware Reporter*, St. Louis.

Geo. W. Cope, the *Iron Age*, Chicago.

### Commercial Cold Process of Galvanizing.

U. S. Electro Galvanizing Co., 348 Broadway, New York, are the inventors of a patented cold process of galvanizing which has successfully revolutionized the former methods of obtaining perfect results in the mechanical branch of an important industry. The manufacturers, who have made countless tests in their investigation of the utility of this process, have expressed themselves as fully satisfied that the thin, smooth, uniform and absolutely adherent coating of pure zinc deposited on an article by this process is a better protection against rust than the needlessly thick, uneven, partially adherent covering of mixed metal applied by the old-fashioned hot process so long in vogue. The company refer to the fact that all surfaces treated by their process of galvanizing retain their original character; graduations on scales and other instruments are as clearly marked as before their being coated; screw-holes and perforations in artistic work are not clogged up with useless metal. The free action of all movable parts is retained; the elasticity and temper of articles treated are not in any way impaired, as has been proven by tests as well as actual work on corset steels, wire, springs, etc. The company issue licenses to individuals or firms for "shop rights," "jobbing work" or sub-companies, for factories, cities, States or sections. They do this on a royalty basis, the rate of royalty and method of payment being regulated by the kind and quantity of the work to be turned out daily, and the preference of licensees. They base royalty upon tonnage, or fix it at so much per day for each gallon of solution. When desired, experts are furnished to put a plant in operation, and instruct employees in its management, so that no experts are needed permanently to operate small plants, any intelligent operator being able to acquire the necessary knowledge and experience during a brief period of instruction from one of the company's experts.

### Baron's B. B. Water Filter.

The A. L. Baron Mfg. Co., 2-4 Howard Street, New York, are the manufacturers of "Baron's B. B. Water Filter," which is a very attractive article of its kind, handsomely nickel-plated, and is designed to fit any plain or hose faucet. The filtering material is composed of quartz and charcoal in order to perform the filtering process in the most thorough manner. It is constructed in a way that permits of its being

unscrewed readily in order to cleanse the quartz and charcoal, and replace it whenever it is found desirable. It is constructed of two pieces of spun metal, as will be noticed in Fig. 1, which unscrew. It is provided in its mechanism with a perforated disc and operated upon by a thumb-screw, a simple turn to the left removing the filtering material, as will be seen in Fig. 2. It is claimed that the flow of water is not perceptibly decreased by the use of the filter, which is one of the ordinary objections to a popular appliance of

FIG. 1.

FIG. 2.

this kind. All parts are made interchangeable, so that repairs, if required at any time, are readily obtained. It presents a very substantial appearance, and is calculated to become a popular specialty, worthy the attention of the Hardware dealer.

### Iwan's Improved Serrated Hay Knife.

Iwan Bros., Streator, Ill., are the manufacturers of the Improved Serrated Hay Knife with Waving Edge, an illustration of which we give herewith. Their attractive advertisement will be found on page 67. In the distribution of this superior article in the way of a hay knife they are meeting with great success. It is claimed that the knife will cut hay or straw from fifty to one hundred per cent. easier than any other similar article brought to the attention of the Hardware trade. In its construction it is a feature that the knife feeds itself, and doesn't have to be crowded in operation. This hay knife is made in two styles, with malleable iron grips or wooden grips. The illustration given herewith shows the handles with malleable iron grips in two positions, the reversed ones making the handles six inches shorter, which enables the operator to cut while in a kneeling position. It also makes it a suitable article for men under the average height. The knife that is made with wooden grips is provided with similar handles, and in either knife the handles can be adjusted to any angle and the grips stand out from the knife so as to clear the operator's hands from

the stack, at the same time giving more leverage. They are supplied to the trade packed one dozen in a box, and unless otherwise specified iron handles are invariably sent on all orders received.

What we are stretches past what we do, beyond what we possess.

They were once more talking about trusts.

"I heard another definition of a trust the other day, said Mr. Northside to Mr. Shadyside.

"What was it?"

"A trust is a body of men entirely surrounded by water.—*Pittsburgh Chronicle-Telegraph.*

## ILLINOIS RETAIL HDWE. DEALERS' ASSN.

The third annual meeting of the Illinois Retail Hardware Dealers' Association was held at Galesburg, on Tuesday and Wednesday, February 19 and 20. The Masonic lodge rooms were selected for the place of holding the business sessions of the convention.

### TUESDAY MORNING SESSION.

The following officers of the association were present when the President called the convention to order at 10:45:

President Z. T. Miller, Bloomington; Vice-President Geo. A. Engelhardt, Chicago; Secretary, Lewis M. Reeves, Peoria, and Treasurer F. F. Porter, Chicago. Other members of the Executive Committee present: D. McLaughlin of Chicago, and Charles Mauer, of East St. Louis. Grievance Committee: Fred Kurtz, of Chicago; H. N. Murphy, of Galesburg; H. G. Cormick of Centralia; J. A. Hunter, of Peoria, and F. E. Bonney, of Paxton.

H. N. Murphy, of Galesburg, representing the local dealers, introduced Mayor Fletcher Carney, who, as the chief executive officer of the city, welcomed the convention to its hospitalities in a brief address. An appropriate response was made in behalf of the association by R. H. Griffith, of Rushville.

About 110 delegates were present and answered at roll call. President Miller then delivered his annual address, from which we make the following extracts:

### PRESIDENT'S ADDRESS.

The past two years, fraught with the dangers of constant and sudden changes of values and the uncertainty of effects resulting from commercial combinations and extreme concentration of capital, have been an unusually laborious season for the average Hardware dealer who endeavors to keep posted and intelligently direct his affairs. However, the results of abundant crops throughout the Central West and the active operation of political affairs have made the period so prosperous that the effects of false economics have not been as seriously felt as at various times in the past, and may, to a certain extent, affect interest in association work. These conditions, however, are not likely to continue beyond a reasonable period, and while we may hope that the reaction, which is as natural to follow such times as the sun is to rise, may be far distant, we should not lose sight of the importance of being the better prepared to meet it when it does come.

### NECESSITY FOR A NATIONAL ASSOCIATION.

As a State association, we command a greater power in the correction of local commercial and political matters than does the individual, and should use our every effort in correcting these evils. But when we come to deal with commercial or political affairs of national extent we stand as helpless as does the individual in local and State affairs, and we discover that proper efficiency of organization must be consummated through a more extensive or national association.

Immediately after our last meeting delegates of the various State associations met in Chicago for the purpose of considering and, if deemed advisable, organizing a National Hardware Dealers' Association.

The benefits to be derived from such an institution being very apparent, the delegates unanimously decided to launch the association under the name "Interstate," and to all intent and purposes the "Interstate" is the National Retail Hardware Dealers' Association in everything but name.

### CONCERNING TRUSTS AND COMBINES.

From whatsoever standpoint we view the present commercial conditions of the country, we discover that individual interests are being strengthened and fortified against the effects of false ethics by closer and far-reaching association of these interests. Whether the power of these combinations will be wielded for better or worse depends very largely upon the equal organization of counteracting forces to hold in check any tendency they might develop toward establishing

a worse commercial condition than that which we have experienced in the past, and presents one of the strongest arguments for like association in every branch of commerce and industry. Under the forces of such influences, whether wielded in a combined defense of separate interests by forced legislative curbing of unwarranted liberties, or other means at the command of proper association, it is not likely that these institutions could proceed very far in the evils which might, and undoubtedly would, under certain degrees of unwarranted indifference, become a menace to the middle and laboring classes.

Without entering any further into the numerous causes upon which trusts are sought to be justified, beyond the conditions under which the mills of Pennsylvania, Ohio, West Virginia and Indiana struggled against freight and other heavy marketing odds to compete with Illinois mills upon Illinois territory and in retaliation the Illinois mills stumping these States for the purpose of maintaining their output, all industries North, South, East and West encroaching in like manner upon one another's territory and suffering the evils such unbridled competition involves, there would be sufficient justification for abolishing such conditions and more intelligently directing and restraining the product of these industries within their legitimate contingent territory.

After the conclusion of the address of the president, which was listened to with interest by the members present, Secretary Reeves then delivered his annual report, in which he spoke in part as follows, details being given incidentally of the net results of his labors connected with the addition of new members, quite a number of whom reported at this convention:

### SECRETARY'S REPORT.

The close of the second year of this association finds it in a comparatively prosperous condition, both financially and in point of numbers. The past year has been one of business to the Hardware dealer. Times have been good, trade better, and the prospects for the coming year the best for many years. Merchants throughout the country have had little time to think of much else than their business, and practically no time to devote to anything other than that directly connected with it. Trade conditions have been good and are gradually improving, and the members of this association evidently are enjoying more than their share, judging solely that there has not been one grievance reported to your secretary since we last met.

My business has made it impossible for me to devote to association work the time I would have liked, but I have aimed to give it every attention possible and to bring together at this meeting as many of the retail Hardware dealers of Illinois as could be induced to come by letter. I wish to thank you all for your assistance during my term of office, and hope that you will co-operate with the new officers, and when again we convene we may see our work further progressed and a membership many times larger than at the present writing.

Treasurer Porter then read his report, which showed he had a small balance in favor of the association still in his hands. On motion, the reports of the officers were accepted, and that of the treasurer was referred to the Auditing Committee. The president then appointed the following committees:

AUDITING COMMITTEE: H. N. Murphy, Galesburg; Dennis McLaughlin, Chicago; C. H. Williams, Streator.

NOMINATING COMMITTEE: Fred Kurtz, Chicago; J. A. Hunter, Peoria; F. E. Bonney, Paxton; Chas. Mauer, East St. Louis; W. D. Costello, Chicago.

COMMITTEE ON RESOLUTIONS: G. R. Lott, Chicago; H. G. Cormick, Centralia; R. N. Shaw, Galesburg; D. McLaughlin, Chicago; R. H. Griffith, Rushville.

An invitation was read from Dr. E. V. D. Morris, of the Galesburg Sanitarium, who offered the members the free use of the swimming-pool during their stay in the city. A cordial letter of welcome was also received from the Retail

Merchants' Association of Galesburg. The thanks of the convention were returned.

#### TUESDAY AFTERNOON SESSION.

The convention was called to order by President Miller at 2 p. m. The president having been called upon to make a statement of the affairs of the Inter-State Association, he stated that, owing to the great fire at Bloomington, which had destroyed his store, he had not been able to give as much time to the Inter-State Association as he had desired. All of the records of their first meeting, together with considerable correspondence, had been destroyed in the fire. He read a copy of a letter which he had sent to every one of the State associations, which thoroughly covered the work the Inter-State Association proposed to do.

Mr. Cormick, of Centralia, addressed the convention on the desirability of having some legislation in the matter of the peddlers' license law. He gave it as his belief that every foreign business institution should be obliged to contribute to the revenues of the State by paying for a license for doing business within its limits. He was, in fact, heartily in favor of a law that would make necessary a license of not less than \$300 for each county. He was supported in his desire for this legislation by Mr. Griffith, of Rushville, who made a good, strong speech, giving illustrations of the methods of these peddlers; but F. E. Bonney, of Paxton, who also spoke on the subject, said that it would be a difficult matter to frame the desired law, so that justice would be subserved to other lines of business. Mr. Porter, of Chicago, expressed himself as being in favor of a law against people misrepresenting goods.

Dennis McLaughlin, of Chicago, was called upon to address the convention on "The Influence of Department Stores," on which line of business he made a vigorous attack. He said the business of small merchants was being ruined, and the payment of such low wages as obtained in the department stores was demoralizing in every sense of the word. He believed it was right that radical steps should be taken to remedy this trouble.

On motion of Mr. Gormley, of Chicago, it was adopted that a committee of five be appointed to report to the convention at the Wednesday afternoon session some plan of operation that might be inaugurated during the coming year to reach the department-store and catalogue-house question. The president appointed the following committee: Messrs. Cormick, Griffith, Gormley, Engelhardt and Siecke. On motion of Mr. Griffith, the action of the committee appointed to assist in forming a State association was approved. Another motion by Mr. Gormley was adopted, that the expenses of the delegates to the Inter-State convention be paid by the association; that representatives be authorized to heartily endorse whatever efforts are made or plans formed to raise money for the financial interests of the Inter-State Association, and that the Executive Committee be authorized to assess this association to the amount of \$2 per capita, or as much as might be deemed necessary for this purpose.

#### TUESDAY EVENING SESSION.

The association was called to order by the president at 8:15. Geo. A. Scherer, of Peoria, a representative in the Legislature from that district, was called upon to address the convention on the subject of the proposed change in the garnishment law at present in force. Mr. Scherer spoke at considerable length in favor of the present law as it stands on the statute books. He said it had been framed after careful deliberation and study by the representative who had it in charge, and he could prove by the records of the justices of the peace of the State of Illinois that not as many garnishments had been issued during the present law of \$8 exemption, as had been issued in any given time under the \$50 law. He stated the law had worked most satisfactorily, both to the debtor as well as the creditor; that it had a tendency to make men more honest and willing to pay their debts,

and he knew of no good reason why it should be repealed.

The president stated that the programme for the evening was intended to give the jobbers and manufacturers an opportunity to present their views. He called on Mr. Cormick, of Centralia, to explain what the grievances are generally.

Mr. Cormick detailed some of the difficulties under which he labored in handling many articles in competition with catalogue houses. He stated that Eastern manufacturers and jobbers were inclined to sell to the department stores and catalogue houses, in spite of the protest of the individual dealers.

Dennis McLaughlin, of Chicago, said he would like to hear from some of the manufacturers and jobbers on this subject, and he called for remarks from Julian W. Perkins, of E. C. Atkins & Co., the saw manufacturers. Mr. Perkins was only too glad of an opportunity of explaining the position his house had taken toward the class of trade complained of, and delivered an excellent address, from which we make a few extracts:

Catalogue houses and department stores are the largest buyers on the market—much larger in certain lines even than jobbing houses. Representatives of other manufacturers have told me personally that where a Chicago jobbing concern would order one gross, catalogue houses and department stores in the same city would order ten gross or more, or even in carload quantity.

Now, then, considering these things, the volume of goods they handle, also the variety, both of which add to their immense strength and power, how can the legitimate Hardware trade protect themselves against these mammoth institutions and avoid being crushed out of existence?

\* \* \* \*

Our company recognize in commerce four legitimate agencies, or factors: First, the consumer, who uses the goods, and who, you will please notice, will invariably purchase where he can buy the cheapest; second, the retail dealer, who carries a small stock of goods and furnishes the consumer; third, the jobber, who carries a large and complete stock, canvasses the retailer and supplies his wants; fourth, the manufacturer, such as our company. There must be perfect harmony between all four if we wish success—harmony of thought, purpose and action. Our success as manufacturers has been largely due to the harmony and friendship of the legitimate retail and jobbing Hardware trade. We recognize and appreciate this. They have always been true friends, whose friendship we hope always to reciprocate.

\* \* \* \*

Outside institutions, such as catalogue houses and department stores, do not belong to the legitimate trade, either retail or jobbing; they are not in harmony with you; they are fighting and endeavoring to exterminate you. You must protect yourselves and fight back.

\* \* \* \*

You are strongly organized. Your many State retail organizations, your Inter-State Association, your National Jobbing Association, must all get together in unity and harmony, and go to each and every manufacturer and jobber in this country and make them declare themselves, either that they will sell or they will not sell these catalogue houses and department stores. Force it to an issue with them. Make them declare themselves, and then act as an organization, State, Inter-State and National, act upon their declaration. This is your salvation.

W. H. Bennett, the Western representative of the Reading Hardware Co., being called upon, spoke as follows:

It has been a question in my mind for some time how this matter could be finally settled. The manufacturers of Hardware of this country for many years were a good deal like the retailers—they were very far apart. They had no organization until about a year ago, when they got together. They organized what they call the American Manufacturers' Association. They had their own troubles. It has been followed by the organization of the Jobbers' Association. In a talk with your president a year ago I said if these State organizations would send representatives to the Inter-State Association, which you have now formed, and they should go to the American manufacturers of Hardware and present the subject as it should be, and can be, that I did not know why there should not be some good results from it. The retail stores are being closed up in the part of Chicago in which I live. Business is being taken away from them, and

it is going to the department stores. I would like to see this matter adjusted for the benefit of the city of Chicago, and for the benefit of the business men of the city of Chicago. I have thought over the matter a great deal during the last two or three years, but I don't know how it can be solved, and the gentleman who will solve the problem for you will be your Moses.

The names of other representatives of manufacturing and jobbing firms known to be in the city were called, but they had not known of the importance of this evening session, and were generally absent from the meeting. Very naturally the president expressed considerable disappointment at not being able to hear their views on the subject.

#### WEDNESDAY MORNING SESSION.

N. W. Olson, secretary of the Retail Merchants' Association of Galesburg, read a paper on "The Credit Rating Book as an Educator." The address was listened to with interest by the delegates, as in his remarks he detailed the experience of a number of the members present. Mr. Olson, after making an earnest appeal in favor of continuing the present Illinois law of garnishment, proceeded to explain the credit rating system which has been established by the retail merchants of Galesburg. The local association furnishes its members with credit ratings on 20,000 persons residing in the four counties contiguous to Galesburg. They also publish a daily bulletin giving judicial proceedings, changes in ratings and new information received relative to parties likely to ask credit. He also explained that the same system has been adopted by the retail merchants of Springfield, Rock Island and Monmouth, and is more than likely to be introduced into other prominent cities and towns of the State.

R. R. Elliott, Estate of P. D. Beckwith, of Dowagiac, Mich., who was expected to be present at the meeting, was prevented from attending by the death of his wife a day or two previous. Resolutions of sympathy in view of his bereavement were adopted, and a copy forwarded to Mr. Elliott.

F. E. Bonney, of Paxton, then read a paper on "Personality and Human Nature as Elements of Commercial Success," from which we make the following extracts:

#### SUCCESS AND FAILURE.

It is human nature to locate the causes of success largely within ourselves and to place the blame of failure upon outside causes and influences.

One man succeeds because he has a disposition and mental make-up which makes him friends and draws him trade from all directions.

Another who lacks the personality of the first succeeds because he understands human nature in others and knows how to play upon and guide into proper channels their various peculiarities and inclinations.

One man fails because his personality is bad, though his methods may be good.

Another fails, though his personality is good, because he does not understand and appreciate the many peculiarities and tendencies of his fellows.

Many succeed and many fail without ever fully realizing or appreciating the real forces which lie at the bottom of their success or failure.

\* \* \* \*

#### IMPORTANT FACTORS IN BUSINESS SUCCESS.

I do not wish to appear to argue that personality is everything or that an acute knowledge of human nature will always accomplish desired results.

I do, however, believe that these elements are important factors in business success.

Barnum said that people like to be humbugged. They evidently liked Mr. Barnum's way of humbugging. He was careful, however, that his humbugs had no stings.

How many men have made fortunes from a knowledge of pure human curiosity? How many men have traded to their profit on human credulity and hope.

A knowledge that men can be easily made to believe what they really want to believe, has enabled many a man to enlarge his bank account.

In our fights against many evils we have, I fear, many times lost sight of some of our most effective weapons.

We sometimes abuse the catalogue house and department store man. He is doing simply what you or I would do were

we in his place, provided, of course, that he is at least fairly honest, and most of them doubtless are.

He is buying where he can do the best, selling for cash and making some money. He understands human nature. This knowledge is a part of his stock in trade and it is yielding him good returns. As long as he is honest, we should not criticize him. If he is dishonest and unfair, he should be punished, and, in any case his sins will ultimately find him out.

The man who sells the department store and the catalogue house at cut prices, and allows them to cut prices to the consuming public to a point where the honest retailer cannot compete, is the man we are after. His own selfishness has blinded his vision and overshadowed his judgment of the rights and nature of others.

\* \* \* \*

#### THE DEMANDS OF JUSTICE.

There is also a wide-spread love of absolute and exact justice among men, and the majority will always recognize this principle. Those who will not, quickly recognize self-interest.

Justice demands that thousands of retailers scattered throughout the land, and in close touch with consuming public shall have an equal chance with the department store and catalogue house to make an honest living.

There should be equality before commercial as well as before constitutional law.

If an appeal to justice fails, then let there come an appeal to selfishness.

The manufacturer and the jobber are in the market to sell goods at a profit. Who buys the most and pays the best prices, the thousands of retailers, or the hundreds of department stores and catalogue houses?

A continued and persistent appeal to justice and selfishness will settle these questions.

In pursuing these methods, nature and personality should not be lost sight of.

#### ELECTION OF OFFICERS.

The committee on nomination of officers presented their report, giving the following list:

H. G. Cormick, president, Centralia.  
William Bittel, vice-president, Peoria.  
G. R. Lott, secretary, Chicago.  
F. F. Porter, Treasurer, Chicago.

#### EXECUTIVE COMMITTEE.

Z. T. Miller, three years, Bloomington.  
W. T. Gormley, three years, Chicago.  
H. N. Murphy, two years, Galesburg.  
C. Mauer, two years, East St. Louis.  
C. Williams, one year, Streator.  
L. Babst, one year, Kankakee.

#### INTER-STATE ASSOCIATION.

##### DELEGATES.

Z. T. Miller, Bloomington.  
H. G. Cormick, Centralia.

##### ALTERNATES.

H. J. Racey, Chicago.  
F. W. Siecke, Freeport.

#### NOMINATING COMMITTEE.

F. Kurtz, Chicago.  
F. E. Bonney, Paxton.  
J. A. Hunter, Peoria.  
Charles Mauer, East St. Louis.  
W. B. Costello, Chicago.

#### LEGISLATIVE COMMITTEE.

D. McLaughlin, Chicago.  
Fred Kurtz, Chicago.  
F. E. Bonney, Paxton.  
William Bittel, Peoria.  
H. N. Murphy, Galesburg.

#### INVESTIGATING COMMITTEE.

D. McLaughlin, Chicago.  
W. H. House, East St. Louis.  
D. D. Velde, Pekin.  
George B. Swan, Mattoon.  
F. W. Siecke, Freeport.

On motion, the report was received and adopted. On motion of Mr. Bonney, the secretary was authorized to cast the

unanimous ballot of the Association for each of the officers by the committee.

Mr. Cormick, the new president, was then escorted to the chair, and delivered a speech that merited and received the enthusiastic applause of the convention. On motion of Mr. Gormley, a vote of thanks was extended to the retiring officers for the work they had accomplished during the past year. On motion of Mr. Miller, which was adopted, a committee of three was appointed to prepare a resolution for the purpose of adding another member to the Executive Committee. The president appointed as that committee Z. T. Miller, of Bloomington; W. B. Costello, of Chicago, and F. E. Bonney, of Paxton.

#### WEDNESDAY AFTERNOON SESSION.

The president called the convention to order at 2 P. M. Mr. Swan, of Mattoon, was appointed sergeant-at-arms. George A. Scherer, of Peoria, made a brief continuation of his remarks in favor of the Association giving its support to the present garnishment law. On motion of Mr. Griffith, the Association resolved to co-operate with the Retail Merchants' Association of Illinois in advancing the efforts they may make to continue the garnishment law.

The Nominating Committee then reported the following members to act as an investigating committee: D. McLaughlin, of Chicago; W. H. House, East St. Louis; D. D. Velde, Pekin; George B. Swan, of Mattoon, and F. W. Siecke, Freeport. The report of the committee was adopted, and the secretary was instructed to cast the vote of the Association for the gentlemen, who were declared duly elected.

The Auditing Committee reported that they had examined the books of the treasurer carefully, and found them correct. The report was accepted.

The committee appointed on department stores announced that it was prepared with a report, and offered the following:

#### REPORT OF COMMITTEE ON DEPARTMENT STORES.

We, the committee appointed to report upon a feasible plan of operation for the coming year, respectfully submit the following preamble and resolutions for your consideration:

*Whereas*, An unjust system of differentials is now in vogue in the Hardware trade and is an open abuse, by manufacturers and jobbers, of the commercial equity these differentials are supposed to establish.

*Resolved*, That we denounce, as unfair in principle and injurious to the trade, the practice of selling goods whose popularity is largely due to the efforts of the retail trade to illegitimate concerns, who use these advantages to demoralize legitimate trade.

*Resolved*, That our delegates to the Inter-State Association be instructed to urge upon that body the importance of striving to correct this evil as far as possible through the manufacturers' and jobbers' associations, and that the members of this Association will abide by whatever course their executive committee may deem necessary, even to discarding from our stock any line of goods the Association may see fit to order.

*Resolved*, That the Inter-State Association be requested to arrange for and encourage, whenever necessary, the manufacture of new and, if possible, improved articles of like nature, to replace these lines. And that we, the organized Hardware dealers of Illinois, will pledge our patronage to such enterprise whenever such executive committee shall, by a two-third majority, decide the article up to the standard of our requirements. Be it further

*Resolved*, That inasmuch as the name "Inter-State" fails to express the scope of that body, and is misleading in the minds of some, we instruct our delegates to urge a change of name to that of "National," in proper accordance with the purpose and intent of the Association.

On motion the report was accepted, and the committee discharged with thanks.

The Committee on Resolutions made a report, which was adopted. These resolutions embodied thanks to the dealers and citizens of Galesburg, the press, the retiring officers, and the Masonic fraternity for the use of their hall; urged all Illinois dealers to join the association, indorsed the Inter-state Association, approved the present garnishment law, extended the right hand of fellowship to the Merchants' Association of Illinois, and included the following important declaration:

That we most emphatically condemn the sale by manufacturers and jobbers to catalogue houses and department stores of their products unless they furnish the goods to them at the same price they do to the retail Hardware dealers of the State, and assure them that the time is coming when the retail Hardware dealers will refuse to buy goods of houses that favor such concerns to the detriment of the regular trade.

G. R. Lott, of Chicago, then read a paper which was entitled "Random Shots," in which he dwelt upon a number of questions which are apt to agitate the mind of the Hardware dealer, and, judging from the applause it created, the paper evidently met the views of the members present. He was followed by William Bittel, of Peoria, who read a brief paper on "Local Organization," to which the attention of the delegates present was closely given.

The Committee on Constitution and By-Laws reported amendments dividing the six members of the Executive Committee into classes making two members to serve three years each, two to serve two years, and two to serve one year; also providing for the annual election hereafter of two members to serve three years, and authorizing the Executive Committee to fix the time of holding the annual convention, and creating a legislative committee of five members to be elected annually. On motion, the recommendations of the committee were adopted, and the secretary requested to have printed copies of the constitution and by-laws amended.

The place of holding the next annual convention was taken up, the cities of Peoria and Decatur both extending an invitation. A vote was taken which resulted in the city of Decatur as the next place of meeting. This was followed by the reading of a paper by C. H. Williams, of Streator, entitled "Are We in the Race to Stay?" from which we give a few extracts:

Buying our daily requirements, with you, with me, with everybody, is not a matter of sentiment. It is only a cold-blooded proposition of getting the best value and service for our money, regardless of who it helps or injures.

\* \* \*

Nothing comes into existence and becomes an enduring factor in the commercial world unless there is a demand for it and somebody is benefited by it. The same causes produced both the large city department store and the mail-order catalogue house. What were they?

\* \* \*

The nervous resident of a great city has not the patience to study a catalogue, buy a draft and write an order, and the great department store, with its attractive leaders, offers convenience in furnishing all his requirements in one place.

I believe that the prosperous retailer of the past, who bought at high prices and sold at excessive profits, was a great factor in the creation of the catalogue house and its twin sister. The economic plan of these institutions minimizing the number of profits from producer to consumer, no credit losses, has enabled them to make great inroads in the trade of every community.

\* \* \*

Let us consider briefly the policy that we must pursue to be able to use this argument fairly and honestly.

1. **PAY CASH FOR EVERYTHING YOU BUY.** There is no banker so expensive to owe as the parties we buy goods from. Remember that 1 per cent. for 20 days is 18 per cent. per annum, and 5 per cent. for the same time is 90 per cent. per annum; yet a prominent manufacturer who sells goods 30 days net, 5 per cent. 10 days, tells me that half of his customers take the time price. Paying prompt cash would greatly increase the feasibility of syndicate buying.

2. **SELL ALL GOODS ON A CASH BASIS.** Sell on installments, if conditions make it desirable, but at a price that will admit of a liberal cash discount. But for the party who buys and says "charge it," have an established rule everywhere among retailers that if it is not paid within 30 days it shall draw interest just as if he had borrowed the money at the bank to pay for the goods. It is unfair to our banker friends to pursue any other policy and thus, while suffering meekly ourselves, deprive them of their legitimate business by offering money without interest.

3. **LOCAL ORGANIZATION AND INTELLIGENT DISCRIMINATION** in the choice of special lines should prevent ruinous competition among those in the same line of trade.

Students of social science tell us that life has always been

hard and full of perplexities. Let us accept their conclusions as so and accept them cheerfully, but with our stores and warehouses stocked with goods bought for cash at the best figure that our combined abilities can obtain and sold on a cash basis, will we not be giving Mr. Catalogue House a good share of the hardship and perplexities of business? And Mr. Department Store will have to put a high priced man in charge of his Hardware department to hold his trade in competition with Mr. Syndicate Buyer.

Think for a moment how many of the downtown department stores in the city of Chicago have failed and disappeared in the last eight years. And while a few great catalogue houses have made millions the commercial world is strewn with wrecks of dozens that failed before they could get started in the race.

On motion of Mr. Gormley, a vote of thanks was given to all the members who had read papers. The President made a brief address, calling upon the members individually to state whether the Association had been a benefit or not to them, and without exception they answered in the affirmative. On motion the convention adjourned sine die.

On Wednesday evening the delegates were tendered a banquet by the Galesburg members of the Association, which was attended by all the members of the Association present at the convention. Interspersed with the menu was considerable speech-making, C. D. Clark proving an admirable toastmaster. A number of gentlemen were called upon to speak, and the following toasts were responded to: "The Illinois Retail Hardware Dealers' Association," H. G. Cormick, the president; "Builders' Hardware," by W. H. Bennett, Chicago manager Reading Hardware Co.; "Cutlery," by H. P. Corwith, Cattaraugus Cutlery Co., Little Valley, N. Y.; "Job Lots," by C. H. Williams, Streator, Ill.; "Tacks," by R. L. Morton, Simmons Hardware Co., St. Louis; "Steel Ranges," by Howard Maffray, Chicago; "The Press," by Daniel Stern, of the American Artisan, and H. H. Roberts, of the *Iron Age*, Chicago.

#### Improved Globe Water Filter.

The Globe Water Filter Co., 71 Gold Street, New York, C. C. Cobb, Manager, are placing on the market, through the Hardware, House-Furnishing and Plumbers' trade, the Improved Globe Filter, an illustration of which we give in this article. It is manufactured from Gorham's patents, and has proved to be a popular specialty for the several trades to handle. These filters are made of heavy copper, tinned inside; the strainers are of brass and nickel-plated.

No fear of rust or corrosion of any nature need be apprehended. They are made reversible, and are consequently self-cleaning. They are filled with silica, being the finest quartz, and conceded to be the best filling material known to the inventor. No sponge or felt is used in its construction, charcoal being also avoided as a filler. Should it be desirable at any time they can be easily refilled. Every filter being warranted by the manufacturers, makes it a ready article for quick sales.

To illustrate the absolute and delicate control of electric cranes, the manager of a large iron works at Ipswich, England, during a recent engineering meeting, stated that their cranes of 25-ton capacity "could be started and stopped many times in an inch."—*Exchange*.

#### Misnamed Commodities.

Cayenne pepper is prepared, not from a pepper plant, but from a capsicum. Neither is burgundy-pitch pitch; nor does it come from Burgundy.

Jerusalem artichokes do not come from Jerusalem. The plant is not a native of the Holy Land. The Jerusalem artichoke is a sunflower, and gains its name from the French word "girasole," meaning "plant which turns toward the sun."

Turkeys do not come from Turkey. The bird is a native of America.

Camels'-hair brushes are made from the soft, bushy tail of the common squirrel.

German silver is not silver at all, but an alloy of various of the baser metals, which was invented in China, and used there for centuries. An injustice is done to Germany in calling the cheap but useful wooden cased clocks she has so long produced Dutch. The mistake arises from the German word for "German"—"Deutsch."

Cork legs are not constructed of cork, neither did they come from the city of that name. The usual material for a cork leg is weeping willow, covered with raw hide. People with or without cork legs sometimes pride themselves they are wearing porpoise-hide boots.

So-called porpoise-hide is in reality the skin of the white whale.

Prussian blue does not come to us from Prussia. It is a chemical product of which England makes her full share. Irish stew is not an Irish, but an English dish; and Turkish baths did not originate in Turkey, but in Russia.

Cleopatra's Needle has nothing to do with Cleopatra, but was set up about 1000 years before that lady was born by Thothmes III., a full record of whose wonderful exploits is preserved in the Temple of Karnak, and in the British Museum.—*Answers*.

#### Housewife and Burglar.

The burglar had entered the house as quietly as possible, but his shoes were not padded, and they made some noise. He had just reached the door of the bedroom, when he heard some one moving in the bed as if about to get up, and he paused. The sound of a woman's voice floated to his ears.

"If you don't take off your boots when you come into this house," it said, "there's going to be trouble, and a whole lot of it. Here it's been raining for three hours, and you dare to tramp over my carpets with your muddy boots on. Go downstairs and take them off!"

He went downstairs without a word, but he didn't take off his boots. Instead, he went out into the night again, and the "pal" who was watching and waiting saw a tear glisten in his eye.

"I can't rob that house," he said; "it reminds me too much of home."—*Lewiston Evening Journal*.

A new scheme for extending American trade in Europe is the issue of a handsomely illustrated magazine, printed entirely in French one month and entirely in German the next. Its title in one language is *La Revue du Commerce* and in the other *Handelsrevue*. The initial number, just out, contains articles on the Niagara power plant, the Pan-American Exposition, American railways, forge machinery, the Great West and the harvesters of this country, brief descriptions of a few prominent manufacturing cities in the United States, a survey of the textile, breadstuffs and metal markets for the preceding month, and statistics showing the kind and value of goods exported from this country during the same period. The magazine has many merits, but the chief one is that it brings to the possible buyer in Europe information about American merchandise in his own tongue. W. S. Bigelow & Co., 116 Broad Street, New York, are behind this admirable enterprise.

## OHIO HARDWARE ASSOCIATION.

The seventh annual convention of the Ohio Hardware Association met at Cincinnati on Tuesday, Wednesday and Thursday, February 26th, 27th and 28th, the business sessions being held in the Auditorium of Odd Fellows Temple.

### TUESDAY AFTERNOON SESSION.

The first session was called to order promptly at 2 o'clock on Tuesday, February 26th, Vice-President Bogardus in the chair. There were seated on the stage, at the rising of the curtain, the following officers: O. M. Scott, President, Marysville, Ohio; W. P. Bogardus, Vice-President, Mt. Vernon, Ohio; G. M. Gray, Recording Secretary, Coshocton, Ohio; H. G. Woodward, Treasurer, Sidney, Ohio.

And the following members of the Executive Committee, viz.: Geo. Guyton, Ada, Ohio; A. C. Rohrbacher, Akron, Ohio; H. P. Davidson, Cleveland, Ohio; Frank Winter, Lancaster, Ohio; Jas. B. Carson, Hamilton, Ohio; J. W. Brown, Washington C. H., Ohio; George B. Meyer, Cincinnati, Ohio.

After the convention was declared open, Vice-President Bogardus introduced His Honor, Mayor Julius Fleischmann, who addressed the convention as follows:

Mr. President and Gentlemen of the Ohio Hardware Association:

I am going to leave the city within a very little while. Before going, it behooves me to turn the city over to some one, and, in thinking the matter over, I did not know where I could do better than to come up here and turn it over to you—at least for the next few days.

You will find it a nice city, not very clean, to be sure; but I can guarantee that it is sound in every way. Its people are hospitable, and want you to enjoy yourselves while you are here. They know that you did not come here for the mere purpose of enjoying yourselves, but that your primary object is to meet one another and to discuss ways and means whereby the large interests which you represent may be benefited or improved; and we also know that when a lot of good men from the State of Ohio get together, no matter for what purpose, something is going to drop!

I did not come here to tell you all about the Hardware business, because, in truth, I know little or nothing about it. I came here to bid you a most cordial and heartfelt welcome to our city; and when you leave it I know that you will realize, if you do not now, that, although we cannot boast of quite as many people in our midst as does our sister city on the lake, we are still on the map as a commercial city in every way.

Now the mythical key to our city is yours. Do with it what you like. All I have to say is, that when you leave that you return the key to me, because I may have to use it again.

I thank you for your attention. (Applause.)

To the address of Mayor Fleischmann President O. M. Scott briefly responded in a very pleasing manner, returning the thanks of the convention for the combined efforts which had been made for its comfort and pleasure.

Vice-President Bogardus then introduced the chairman of the Cincinnati Local Committee of Arrangements, S. D. Baldwin, of the Whitman & Barnes Mfg. Co. Mr. Baldwin, on behalf of the committee of which he was chairman, addressed the convention, stating in detail the varied forms of entertainment already under way for the purpose of making the delegates contented and satisfied with their environment at all hours during their stay in the city.

The secretary then read the minutes of the last meeting, held in Cleveland, which were, on motion, approved.

Vice-President Bogardus announced the next order of business as the annual address of the president, which was read, and from which we make several extracts.

### PRESIDENT'S ADDRESS.

To be placed at the head of an organization of men such as compose the Ohio Hardware Association is a compliment of no small magnitude, and one of which any man would

have just reason to be proud. I hope that when my term of office is ended my work will have been such as to merit your moral and commercial approval to the extent that you can say: "Well done, good and faithful servant."

\* \* \*

The purpose of commercial organization will be much underrated if looked upon as mercenary only—to maintain or get better prices, or to increase the volume of business. One greater aim should be to get a better understanding of each other. I consider this as important as the exchange of business ideas.

A dealer gains much by knowing men in his line of trade. It takes him out of his own little world, makes him more tolerant, better contented with his business, and hence better equipped for its successful prosecution, and better fortified to battle with the many annoying conditions that confront him from day to day. Competitors in the same line in the same town by their connection with organizations like this may be brought closer together, and find out what a good fellow the other fellow really is. Berate human nature as we will, is it not true that the more we know people the better we like them? One man brought suit against another for infringement of a patent. During the trial they became acquainted. The plaintiff said to the defendant: "If I had known you I would not have brought suit." The defendant replied: "If I had known you I would not have infringed."

If I get nothing more out of the Ohio Hardware Association than the friendships I have made throughout the State I am well paid for the time and money it has cost. The same fruitage can be had for every member of this association.

\* \* \*

We should look upon our organization as a stock company, each member holding the same amount of stock—no one having a controlling interest, and every stockholder doing his level best to raise the power of the corporation to its highest capacity, that it may yield both a social and material dividend that will be satisfactory to all. Your officers and Executive Committee have worked with this end in view.

\* \* \*

All progress is accompanied with danger. We are like an army in time of active hostilities. There are enemies throwing themselves across our path. We cannot advance our lines till they are routed. In General Sherman's noted Atlanta campaign he displayed wonderful skill in flanking the enemy. This was dangerous. Daily we are confronted with serious conditions. To be successful, we must advance by flank or direct assault. There are no Winter quarters for the progressive Hardware merchant.

The appointment of committees being next in order, President Scott announced the following as the members selected to fill these important positions:

### COMMITTEES.

Resolutions—T. Morris, Lima, Chairman; Henry Rhea, Cleveland; L. W. Loomis, Cuyahoga Falls.

Nominations—J. J. Ewing, Lima, Chairman; G. Jaeger, Elmira; J. H. Doering, Wapakoneta; F. G. Thornton, Cleveland; A. L. Shearer, Dayton.

Question Box—Geo. Hartke, Cincinnati; Ben Coe, Coshocton; Theo. Weld, Marysville; James Cockrell, Sunbury.

Laws Relative to Hardware Trade (Holding over from last year)—W. P. Bogardus, Mt. Vernon; C. B. Burr, Columbus; W. A. Fearn, Columbus.

On Memorial to Chas. Boebinger—O. P. Schriver, Cincinnati; B. H. Knapp, Cincinnati; M. A. Griffith, Madisonville.

After the announcement of the committees, a general interchange of ideas occurred among the delegates, of special interest to them particularly, which was participated in by many of those present, and proved to be a very enjoyable symposium of ideas.

An invitation was received from the John B. Morris Foundry Co., through its secretary, George McG. Morris, to

visit their extensive plant and inspect the stock of stove repairs, which is one of their lines of production, and covers repairs for over 1,000 different stoves and ranges. Vice-President Bogardus at this point made a suggestion that was received with considerable applause, which was that every member should shake hands with every man whom he met in Cincinnati wearing the O. H. A. button.

After an informal discussion on general topics, the convention adjourned at 5.15 P. M. until 9 A. M. Wednesday.

Tuesday evening was devoted, under the auspices of the Entertainment Committee, to an exceedingly jolly "Smoker," the delegates being entertained with what was denominated a Bohemian Smoker, taking place at the Scottish Rite Cathedral, which reflected great credit upon Mr. E. H. Hargrave, Chairman of the Entertainment Committee, for originality and ingenuity. It was Bohemian in the strictest sense and proved enjoyable in the extreme. The spacious auditorium of the cathedral was filled up with about 100 small tables. As soon as a guest arrived his badge was punched. Then he was given a smoker's outfit, consisting of a cigar box containing a corncob pipe, a package of excellent tobacco and two fine cigars. He was next shown to a room where his overcoat and hat were checked and then he was ready to mingle with the throng. Each member had attached to his coat lapel a button bearing a number which corresponded to one on a printed list containing his name, so that it was unnecessary to have formal introductions. An excellent vaudeville show was furnished by Mr. Will S. Heck, all of the participants being professionals.

#### WEDNESDAY MORNING SESSION.

After the evening of solid enjoyment referred to above, many of the members were late in arriving at the Wednesday morning session, although President Scott paid no attention to this fact, and called the convention to order at 9 A. M. sharp. The first order of business as announced was the report of the Committee on Grievances, W. P. Bogardus, the chairman, presenting the report, which would naturally come under the head of executive business. President Scott referring to it said: "Gentlemen, you have heard the report of the Grievance Committee. It is a most excellent report, but doesn't give you any adequate idea of the amount of correspondence, work and manipulation that has been done to bring about such gratifying results, and my only regret is that there are not more delegates present this morning to give the report the attention it deserves."

On motion of J. F. Wright, of Worthington, the report was adopted.

Secretary George M. Gray, of Coshocton, presented his report, from which we make several selections. This report gives in detail the large amount of correspondence that fell to his lot in performing his several duties, together with the references to the various committees that were in touch with the corresponding secretary in the transaction of the business of the Association.

#### STRONGEST RETAIL HARDWARE ASSOCIATION IN THE UNION.

The Association is strong, and has become strong, not only because of the interest taken in it by our members, but because it is built on a firm foundation of conservatism in business, of friendship, honesty and honor among members. This Association means a good deal more than an organization for the purpose of recreation and a "good time." As business men we have plain and important business propositions to meet. In these times of combination and consolidation in business of the so-called trusts in manufacturing, and from whom we must buy, and the corresponding trusts in selling—that is, the rapidly developing department stores—the retail dealer meets new questions which vitally affect his very existence. On the one hand the question is suggested, Is it not better to let conservatism in business, "the live and let live" policy, guide us? On the other hand the power of the modern trust to destroy competition, to fix and change at will the prices of the goods they manufacture and we buy, and the competition of the selling trusts or department stores which can afford to sell our lines of goods

at cost as leaders for trade in their other departments, threatens the very existence of retail Hardware stores.

#### WHAT TO DO AND WHAT NOT TO DO.

to meet these questions calls for the very best business sense and talent in our membership. Our career so far has been a brilliant one, but the association has not by any means reached the end to which it aspires, nor can it do so until it enlists in its ranks all the retail Hardwaremen of the State.

To meet these questions and promote the purposes of the organization your officers as a body and your recording secretary individually have carried on an extended and extensive correspondence. A special effort has been made to reach the retail Hardware dealers of the State who are not members of the association.

On motion of W. P. Bogardus, the report was received and adopted.

The Committee on Light made a report through President Scott regarding the present situation having reference to the gasoline incandescent light. We quote below the substance of the action taken by the committee.

A circular was issued during the latter part of 1900, which is not dated, signed by Frank L. Baird, Inspector of Oils, First District of Ohio, and John R. Malloy, Inspector of Oils, Second District of Ohio, which quotes sections 398, 400 and 402, Revised Statutes of Ohio, and states that it has been reported to the Department of State Inspection of Oils that persons are using for illuminating purposes, contrary to the laws of Ohio, gasoline or other products of petroleum. The circular concludes as follows:

The foregoing provisions of the law were enacted for the protection of life and property from the dangers arising from the use of illuminating oils which do not come up to the required standard.

Gasoline is not intended for illuminating purposes, and will not meet the required legal test; and any person who sells or offers gasoline for sale for such purposes or any person who uses gasoline in lamps or other devices for illuminating purposes, except as stored in underground reservoirs, outside the building to be lighted, as provided in section 400, violates the law and is liable to the penalty prescribed in said section; and all persons are hereby notified that any violation of the foregoing sections of the Revised Statutes will be prosecuted by the officers of this Department.

On motion a committee was appointed to draft a memorial to the Legislature asking to have the objectionable features of the law relating to gasoline as an illuminant repealed.

At the request of B. Worth Ricketts, of Coshocton, who had prepared a paper on "The Rights of the Retailer," it was read by Mr. Bogardus, whose reputation as an elocutionist was recognized by the members present to the fullest extent. We make a number of extracts from this address, which was on a very interesting subject, and was listened to attentively under the pleasing auspices of a special delivery.

The spirit of domination appears to be ever present in the make-up of mankind and is laudable or to be deplored, according to its development and direction.

The pages of the past contains one long and almost uninterrupted story of the wrongs against the many by this misguided motive of the few. Some cultivate the passion for glory and renown; others for wealth and its consequent power. One modern example of that motive nobly directed—our Revolutionary fathers, who builded not for themselves but for the people. This inherent passion seems to break out at various times and sundry places, much in the manner of the many ills that flesh is heir to, and is at times more or less virulent and contagious.

\* \* \*

Well directed combinations in merchandising means the loss of business independence for many who are now fighting their battles alone. Ought we not then look to our rights, and see that they are known and respected?

The manufacturer ought not think that because he produces articles of real merit and general utility and heralds the same through the press to the public that that alone has made their reputation and his success in his line of products. There is an army of retailers between him and the consumer who must not be overlooked. They know a good thing when they see it, and they willingly, though selfishly, assist in building up that reputation by praising and posting their trade on the various points of merit of the merchandise they

handle, by warranting and standing between his customer and any possible loss, and in every honorable way strive to get them into general use and thereby smooth the way for future sales.

Surely we have done more to add to that reputation and create a demand far in excess of any that could be obtained by the most lavish use of the printer's press. This is not on account of any love on our part for the manufacturer or pride in his plant, but for the margin of profit that is in it for us.

\* \* \*

If we wish to persevere in the old and established methods and are not willing to be guided by the signs of the times, and accept and attempt some of the radical changes now in the air, then we too should take action. The time has come when those whose interests are mutual, whose commercial success depends on harmony of action, who are makers and distributors—the manufacturers and the jobbers and retailers of every line of commodity, the many against the few—should formulate a plan of action to more closely conserve our common interests, lest our present freedom of action and individuality be smothered and lost in the arms of some financial octopus, some new billion dollar trust.

\* \* \*

#### COMPLICATED LISTS AND DISCOUNTS.

We have a right to be favored a little as to lists and trade discounts. We are not all blessed with a marvelous memory; nor are most of us adepts in discounts.

The lists, for instance, on Steel Goods, seem to have been gotten up by the designers with a special view to distract us, and they have succeeded admirably in my case; but the discounts on same, to use a vulgarism, "take the bakery." Why, after a short wrestle with them one would forget whether he was afoot or on horseback. We should be given a list that is uniform—that is, manufacturers making goods of like style, sizes, etc., use one list and but one discount for each list of any line; the discount changing with the market; the lists to be changed only at long intervals when the cost of material or making of part of their products would be relatively out of proportion.

This need not occur often, as the manufacturers could safely be trusted to put their lists so high and their discounts so low the former would seldom need revision.

The reading of the paper was the means of starting a discussion on its several features, which was participated in by a number of the delegates present, including John F. Baker, W. P. Bogardus, P. D. Weld, John C. Fuhr and R. H. Grimm. It was developed from the opinions expressed by the various speakers that the manufacturers might contribute greatly to the convenience of the retailer in their methods of labeling goods, and in a number of other minor details. But there was naturally a difference of sentiment as to how the manufacturers could be best persuaded to pay more attention to such matters, particularly to the matter of giving more room on labels, whereby the cost and selling mark of the retailer might be placed thereon. It was suggested that the retailers should co-operate with the jobbers in endeavoring to have such a desirable reform brought about, as through them it was felt they could more certainly reach the manufacturer.

Mr. Bogardus, chairman of the Committee on Lien Laws, submitted the report of their committee, which was a very able one, showing in a concise manner how necessary it was that some further action should be taken by the General Assembly of Ohio for their improvement. A few of the points referred to we present herewith:

#### THE HISTORY OF LIEN LAW LEGISLATION

has more than a passing interest. The first lien law enacted in the United States was passed by the Pennsylvania Legislature in 1803, and was limited to the city of Philadelphia. The first lien law passed in Ohio was enacted January 1, 1823, and applied to Cincinnati only. On March 12, 1840, it was so enlarged and amended as to include the counties of Hamilton, Washington, Scioto, Muskingum and Knox, and so broadened as to extend the lien to all mechanics, laborers and furnishers, for the value of their labor, skill and materials.

The first general mechanics' lien law was passed March 4, 1845. In 1854 the law was amended so that any one who did work or furnished material to contractors could secure lien on any moneys in the hands of the owner not yet paid to contractor by notice to the owner. On April 20, 1899, the

law was amended, making it necessary to file a sworn itemized statement of all labor done, or materials furnished within four months after the last item was charged, and suit could be brought to enforce lien any time within six years from the filing of the statement with the county recorder. A further provision of the law made it obligatory on the part of the owner to detain payments due the contractor for labor done, or materials furnished when served with a written notice. In 1894 the law was amended so as to put the contractor, subcontractor and the material man on the same basis as to their right to acquire a lien upon the building. The amendments of 1894 have been pronounced unconstitutional, because, 1, it limits the rights of the owner of property, and makes him liable for debts that he has not contracted, and knows nothing about; and, 2, because it is contrary to public welfare.

\* \* \*

The Michigan mechanics' lien law of 1891, as amended in 1893 and 1897, is a long step in advance of anything we have had in Ohio. It has been pronounced constitutional by the courts of Michigan. It gives all subcontractors the right of a lien, if notice is served on the owner that they are furnishing the contractor labor or material. It compels the contractor, before he can draw any money on his contract, to make statement under oath to the owner of the number and name of every subcontractor or person who has done labor or furnished material, giving the amount that is due or to become due, and the owner may retain out of any money due or to become due the contractor an amount sufficient to pay all demands that are due or to become due to such subcontractors, as shown by the contractor's statement, and pay the same to them according to their respective rights, and these payments shall be considered the same as if paid to the original contractor.

The law provides further that the contractor cannot legally draw any money on his contract until he does file his statement with the owner. And if contractor fails or refuses to file statement with owner within five days after demand is made the contractor shall be liable to the owner for \$100.

The law provides further that liens are to be filed in the recorder's office, and a copy of the statement sent to the owner. If the owner is not getatable then a statement must be posted on the building. A failure to send copy to the owner invalidates the lien. Notice must be served on the owner within 30 days after the commencement of the work.

The above are but a few of the points of this excellent law. That some law giving greater protection than is now given to labor and material men is needed goes without saying.

#### MICHIGAN LAW AS A BASIS.

Your committee feel that a law drawn on the lines of the Michigan mechanics' law would stand the scrutiny of the courts and meet the approval of the general public.

Your committee would further suggest that we, as an association, join forces with the Lumberman's Association, and others, to carry through a proper lien law.

The report was signed by the entire committee, W. P. Bogardus, W. A. Fearn and C. B. Burr.

On motion of Mr. Baker the report was approved. Mr. Bogardus stated that the Supreme Court of Ohio had pronounced the Ohio law of 1894 unconstitutional, and this had been passed upon by the Federal Court. The Circuit Court of the United States had also pronounced it unconstitutional. It had not as yet been appealed to the Supreme Court of the United States.

J. P. Duffy, referring to the report just received from the committee, characterized it as the most exhaustive and complete report on the subject that had been made by the Association since its organization, and this statement was emphasized by the convention in its applause in a very substantial manner. The report was received and filed, and the committee continued for another year.

On motion of C. J. Johnson, of Barberton, the privilege of the floor was extended to George Koon, representing Henry Disston & Sons, Philadelphia, for the purpose of making a speech having reference to the important question before all conventions, of the competition emanating from department stores and catalogue houses, which was listened to with commendable interest. We make a number of extracts from the interesting remarks of Mr. Koon, which will indicate the nature of the topic, and the attention which the convention gave to the discussion:

I have heard indirectly of your talks on several different

subjects; but the one that interested me most is the one that interests you most—that is, the sale and handling of our goods by certain classes of people, who, while conceding that they do a large business, etc., are not the nicest kind of competition in the world.

I come here to-day to learn from your members what you consider the best plan and the best way for the manufacturer to handle that line of business. If there is anybody in the house that has any suggestions to make I am willing to listen to them right now, and tell you what we are ready to do. We don't lie quiet and see any of our trade—the retail Hardware trade I mean, because that is Disston's business after all—we don't stand quiet and see that trade injured in any manner whatever if we are able to step in and take care of them. Our goods, I think you will all admit, are very satisfactory goods for you to handle. They sell readily if properly handled, and are profitable goods. We don't suppose you people, any more than any body else, are going to push or sell a line of goods on which there is no profit. We have always tried to have everybody who handled Disston's goods make a profit, whether the jobber or retailer. If there is anything that has come into the business of late years that has caused the business to be so handled that you cannot make a profit, tell us how to handle it and we are with you heart and soul. I came here for suggestions. Has anybody got anything to say?

After remarks by Mr. Jewell and Mr. Wiseman, Mr. Borgardus said:

The retail Hardwaremen of the State of Ohio are up against this proposition: We have one or two competitors who are able to come into the market here and sell to our customers at a price reduced from what we can afford to sell. During the number of years that Henry Disston and others have been in business they have depended largely upon the retail trade to further their interests. It would not have done Henry Disston any good at all compared with what benefit he has received if he had undertaken to ignore the retail trade throughout the country in introducing his goods. The retail trade have taken up his goods and introduced them and brought them to the attention of their consumers and their customers. That trade has been established through the efforts of the retail trade, not only in the State of Ohio, but throughout the United States, so that there is the record for Henry Disston's goods of being first class.

Now, those goods have that record because of the work of the retail men throughout the United States. True, Mr. Disston made fine goods, or he could not have had any record; but the fact that everybody understood that those goods are standard is dependent upon the exertions of retail men.

\* \* \* \* \*

This gentleman comes here and wants us to give him a fully developed plan of what to do in the matter. We are unable to do it; at least as far as I am concerned that is the case. I want to submit the facts to him. I don't know that he understands them as we see them. Sometimes manufacturers do not understand or get down to the facts in the same way as the man behind the counter. So I am glad that he is here to-day to hear us discuss this question, and we can talk to him looking him in the eyes and give him to understand that the record and reputation all over the world of the Henry Disston Saw is due to the efforts of the retail trade throughout the country. Of course, we don't sell his.

Mr. Koon then proceeded as follows:

Our goods don't go into the hands of the catalogue houses from our hands direct. We have to get at them through other channels. Consider what that means. Henry Disston's goods are sold by every jobber in this broad land, all over the country. When we start in to adjust prices as between the jobber and the catalogue house, we will have more than a day's work. You appreciate that, all of you.

\* \* \*

I was brought up in the Saw business, and don't know anything but Saws—but I know that the prices published by catalogue houses to-day on Disston's goods are identical with the prices at which you can go into Chicago or New York and buy goods to-day. Those prices are established. Who is to blame for them? Is it the people who sell by catalogue and who are attempting to meet prices already established by somebody else in the business? If we attempt to regulate that price, that is the biggest end of our labor, and we have a great big job on our hands. You all appreciate that. Now, after the price is fixed, what is the next step? Is it right for us to continue having our goods handled by these people? We are leaving it all open to you. If you object absolutely to the catalogue house, barring the question of prices, jump up and say so, and Mr. Disston will

not let them have another cent's worth of goods. (The entire house rose.)

It would appear from the statements of Mr. Koon and the discussion following that the facts have never been fully apprehended by either side of how catalogue houses obtained Disston's Saws; and the statement made by Mr. Koon placed the whole matter in an entirely new light before the members of the association.

At the conclusion of Mr. Koon's remarks, Mr. "Jack" Smith moved that a vote of thanks be tendered Mr. Koon for his presence at the convention, and for the very satisfactory manner in which he had explained the position of Henry Disston & Sons in relation to the subject. The motion was carried unanimously.

The following telegram, which was read by Mr. Wiseman, was despatched to James E. O'Brien, President of the Minnesota Retail Hardware Association, in session at Minneapolis:

Greetings and best wishes of the Ohio Hardware Association.

O. M. SCOTT, President,

GEO. M. GRAY, Secretary.

On motion, recess was taken until 2 P. M.

#### WEDNESDAY MORNING SESSION.

The convention met pursuant to recess, President Scott in the chair. Invitations to visit the respective plants were read from the Eagle White Lead Co., the Boss Washing Machine Co., and the Anchor Buggy Co. These invitations were received and placed on file. An invitation was also received by the Association to visit the Vehicle, Harness, Implement exhibit of the Tri-State Vehicle and Implement Dealers' Association. The invitation was received and placed on file.

President Scott introduced Lewis E. Keller, of Cincinnati, who delivered a paper on the subject of "The Ohio Hardwareman," which was well appreciated by his auditors, who received it with many evidences of gratification.

C. C. Fouts, of Middletown, was then introduced by President Scott, and delivered an interesting paper on "Advertising a Retail Hardware Store," from which we take several of his most pertinent illustrations:

All dealers must advertise their business daily, either for good or bad; there is no stopping place; we recede or go forward just as surely as we do business.

The old days of doing business because we could hardly help it have passed from our country to a newer one, where pioneers are compelled to buy what they can get, as they all did here in the days gone by. Then the goods of the business man were limited to lines of necessity, rather than luxury; in fact, the necessities were limited in extent, there were fewer men in business, competition was not so sharp, and the merchant did most of his business and advertising by personal contact with his customers, who soon learned to distinguish the man of integrity, and gave him their loyal and deserved patronage. Not so to-day; the quiet man of integrity cannot rely solely on his character. This is one of the corner-stones to his business foundation, but he must also use energy, aggressiveness and advertising as well, or his competitor will use this last named qualification to his disadvantage.

#### ADVERTISING IS A NECESSITY.

Let us note some of the necessities for advertising. A few years ago department stores and catalogue houses were unknown, manufacturers and jobbers sold very little if anything direct to the consumer; now many solicit his trade, using arguments of various kinds to induce him to buy, and with the misleading cuts and flowery printed descriptions of goods, he is likely to forget his old friend, the Hardwareman, and naturally desiring to get the most for his money, he sends away for his goods. He forgets that these people pay no taxes in his county to help educate his children, build good roads and pay the bonded debt, but, with the single object in view of supposedly saving a few cents, he will throw over his home dealer for the man whose character he knows nothing about, and very often to his own disadvantage.

## TRAVELERS SHOULD RECEIVE A HEARING.

Right here I would suggest that one of the least expensive and most profitable items to be considered is our treatment of traveling and credit men. Courtesy is seldom forgotten; give our traveling friend a hearing, even though necessarily short, tell him kindly and firmly whether you can use his wares, and if he is a gentleman, which he usually is, he will take your word that you mean what you say. If he is not, the treatment should be varied to suit the case.

## VALUABLE ADVERTISING.

Our cheapest and, at the same time, valuable advertising, is furnished by credit men and commercial reports. If our bills are met promptly by payment when due, or satisfactory excuse, a favorable estimate is placed on our business character which we know not the value of at the time, but which may prove later on to be the salvation of our business.

The thanks of the convention, on motion of Mr. Coe, was tendered to Messrs. Ricketts, Keller and Fouts for the valuable papers prepared by them, as noted above.

S. D. Baldwin, chairman of the Local Committee of Arrangements, announced for the social features of the evening a theatre party for the ladies after their return from luncheon at the Avondale Athletic Club, and a visit to the Rookwood Pottery and the Art Museum; for the gentlemen, a banquet at the Armory, at which it was not anticipated that much speech-making would be indulged in, but responses to toasts would be made by Vice-President Bogardus and W. B. Melish and Howard Saxby, of Cincinnati, who had a reputation for entertaining that was universally known. Mr. Baldwin assured the convention it was no burden to the manufacturers and jobbers of Cincinnati, but on the contrary a great pleasure, to do all in their power for the entertainment of the members of the Ohio Hardware Association.

H. C. Wiseman, of Springfield, chairman of the Committee on Insurance, presented a report on the subject, in which the matter was gone into to the fullest extent, and a discussion upon the report followed, participated in by Messrs. Jewell, Fuhr, Coe and others, after which, on motion, the report was received and filed. At the suggestion of Mr. Weld a straw vote was taken as to the number of delegates present who were favorably disposed toward the organization of a mutual insurance company within the Ohio Hardware Association. The chair having asked for a rising vote in the affirmative by all those favorably disposed, there were only three votes in the negative. This was followed by an endeavor to ascertain how much insurance the delegates present would be willing to take in this new company if formed, which resulted in still further discussion, in which a number of members participated, but the tellers reported as a result of their count that a total of \$224,000 had been subscribed.

The chair then called for a report of the Committee on the Interstate Association, and John F. Baker, chairman of that committee, reported that they had not come to any definite conclusion. He found, however, that Fred H. Cozzens, secretary of the association, was in the city, and he had been invited to address the convention, so asked that action be deferred until he should arrive.

President Scott read a telegram which he had just received:

O. M. Scott, President O. H. A., Cincinnati:

The Minnesota Hardware Association assembled, 400 strong, gratefully acknowledge greeting and extend right hand of fellowship and good-will to our brothers of the famous Buckeye State. J. E. O'BRIEN, President.

Mr. Cozzens subsequently arrived, and was introduced, and presented the claims of the Inter-State Association, which he was well qualified to do. This called forth considerable discussion, which was participated in by Messrs. Duffy, Bogardus, Stone, Jaeger, Baker, Rothwell, Davidson and others. The Committee on Inter-State Association were instructed to bring in some definite recommendation. They retired at once, and subsequently brought in a report which recommended the appointment of a committee to attend the

annual meeting of the Inter-State Association to be held in Chicago; also to confer with that association as to whether their constitution could be so amended as to include only as members of the Inter-State Association the retail Hardware dealers and not traveling men who are members of the Ohio Hardware Association, and to arrange that dues should be paid by only such members. On motion, the report was adopted, and the chair was authorized to appoint a committee of two to carry out such recommendation. The convention then adjourned until 9 A. M. Thursday, February 28.

## THURSDAY MORNING SESSION.

The convention met pursuant to adjournment, Vice-President Bogardus in the chair. The morning session it was designed should be especially devoted to the discussion of questions reported by the Question Box Committee. Among these questions, which aroused more or less discussion, and to that extent were found extremely interesting by the delegates, were the following:

George Hartke, chairman of the committee, read the questions to the convention as given below, and after the reading of each question full opportunity was afforded for discussion. Questions were discussed with freedom and the greatest interest manifested.

What do you think of a member of this association who tells a customer to "get his best prices from a competitor and come to me and I will go \$1 better"?

Why not favor syndicate buying on staples?

This question provoked no discussion.

The most reliable and best way for a buyer to keep himself posted as to the proper time to buy a large class bill of Hardware, which we all know has been very hard to do for some time?

Would it be a benefit to the retail members of the Ohio State Association to have this association composed of retailers only?

What has been the nature of the cases referred to the Grievance Committee, and how disposed of?

If we cannot accomplish anything from county or town organization, how are we to be benefited by State organization?

Should we not ask the manufacturers of Hardware to try to adjust uniform labels in regard to allowing a space on same for marking the cost and selling price?

Do electric roads benefit or injure the Hardware trade in small towns?

I live in the northern part of the State; handle Hardware. I have a contract with a machine company who discharged one of their special salesmen, and asked me to let this man have the local territory for 1901. To this I consented. They made a contract with him without taking up our former contract, and he sold two corn shredders. The commission was \$100. Who is entitled to the commission—the former or latter? My contract did not expire until 1901.

Mr. Jaeger thought the man who sold the corn shredders should have the commission.

What per cent. of your credit sales do you lose?

Would it not be beneficial to the members to have the report on lien law in print and distributed to members?

Why not hold our conventions two weeks earlier, just after invoicing and before Spring trade?

Would you ever resent the insinuating sarcasm of a customer?

Several voices cried "No," and Mr. Duffy remarked (*sotto voce*) "Depends on the size."

Does it pay to keep a nice clean store?

The reply seemed to be unqualifiedly in the affirmative, but there were one or two feeble responses, "No."

This closed the discussion on the Question Box, which was followed by a general discussion of interesting questions.

A great many of the members enjoyed participating in these various questions, some of which were seriously intended, and a number of which were not.

Mr. Duffy asked as to what simple methods of bookkeeping might be recommended for retail Hardware stores. This was discussed by a number of delegates present. The trend of sentiment seemed to be that improvement was more necessary in the man than in the books, and that too many

people were afraid to use time and paper in making a proper record of small transactions, especially where the transaction was so fleeting that it is customary to put it on a slip. Many deprecated the slip system, however, and thought it better to open regular accounts, no matter how temporary the transaction might at first appear to be.

W. P. Scott, of McConnellsville, was called upon to give his experience in running a Hardware store on a strictly cash basis. He stated that his store was one of the fixed institutions in his neighborhood, as it had been kept there for many, many years—he himself having been connected with it for some twenty-five years. That up to two years ago business had been conducted on the usual credit system; at which time, after a full prior notice in the newspapers, a strictly cash system was adopted with the exception of two accounts, one with the county commissioners, and the other the Children's Home. Results had been most satisfactory, customers gained rather than lost, and so far as known, profits increased, as more business could be handled on the same capital.

A discussion of this subject proved to be an exceedingly interesting feature of the morning, and showed that a great many converts could be made to the strictly cash system if it could only be proved feasible in its operation. A difficulty suggested by many appeared to be the applying of a cash system to purchases of supplies made by contractors and manufacturing establishments. President Scott thanked the large audience for their attention at the morning session, and begged them all to be on hand in the afternoon to have a rousing meeting to close the proceedings. The convention adjourned at 11 o'clock for recess until 2 P. M.

#### THURSDAY AFTERNOON SESSION.

The convention met pursuant to recess, President Scott in the chair. The Committee on Memorial to John W. Finneran made their report, in which a memorial resolution was adopted, expressing the sympathy of the association, etc. The report was adopted.

#### THE USE OF GASOLINE.

The Committee on Memorializing the Legislature of Ohio to repeal the present acts restricting the use of gasoline as an illuminant reported the following:

Your committee to whom was referred the matter of drafting a resolution memorializing the General Assembly of Ohio to repeal sections 398, 400 and 402 R. S. of Ohio, beg to recommend the following resolution:

*Be it resolved*, That the Committee on Laws relating to Hardware trade of the Ohio Hardware Association be instructed to pray the General Assembly of Ohio to repeal sections 398, 400 and 402 R. S. of Ohio, for the reason that the same are in conflict with constitutional rights.

Your committee further report that in their opinion the gasoline incandescent light furnishes a safe, good and cheap illuminant, and that any effort to deprive us of the same is without warrant in law and an interference with our rights and happiness, and that therefore said sections ought to be repealed.

On motion, the report of the committee was received and adopted, and on motion of Mr. Bogardus, was referred to the Committee on Laws for report at the next meeting.

The Committee on Memorial to Charles Boebinger then made their report through O. P. Schriver, chairman, and adopted the customary memorial resolutions, expressing the sympathy of the association for his family.

The chair announced that the committee of two to go with the President to attend the Chicago convention of the Inter-State Association were Messrs. Duffy and Bogardus; as an alternate, George M. Gray. The convention then took up the matter of the selection of the next meeting place. It was moved by Mr. Rothwell that Columbus be named as the convention city for 1902. The motion was discussed by several of the members, and being put to vote, Columbus was selected unanimously.

J. H. Smith, of the Smith Bros. Hardware Co., of Co-

lumbus, asked that he be put on record as tendering the invitation to meet at Columbus. It was the general sentiment that without prejudice to the royal and generous entertainment given to the convention in the various large cities, that there was danger of the social and entertainment features becoming too pronounced, and that it would be better in future, while these courtesies had been deeply appreciated in the past, to have it understood that the convention city would not be expected to provide any banquet or extend more than the most inexpensive courtesies.

The committee on the usual resolutions with which conventions finish their proceedings on the final day reported through T. J. Morris, of Lima, their chairman, in which the several changes in the by-laws were recommended, and the thanks of the association were extended to all the Cincinnati Hardware dealers, manufacturers and others who had contributed to their entertainment, which was, on motion of W. P. Bogardus, adopted unanimously.

E. H. Hargrave, chairman of the Sub-Committee on Speakers and Entertainment of the Cincinnati Committee of Arrangements, having the privilege of the floor, explained that all members who desired to stay over that night would, on making the same known, be provided with a ticket to any of the theatres for the evening. He hoped that all would stay, and added that in order to make sure that nobody was forgotten, Mr. Austin would remain at the Grand Hotel until 7 P. M., so that any member of the association not then present could be informed, and obtain tickets from him. On motion of Mr. Wiseman, a vote of thanks was tendered to Mr. Hargrave and his associates, not only for the present courtesy but the many others received at his and their hands on various occasions. A rising vote being taken, everybody stood.

Mr. Hargrave said: I wish to say for myself and my associates that we are only too happy to know that you have enjoyed yourselves. We have been working pretty hard, but it has been in a sense a labor of love, and we have thoroughly enjoyed not only the work of preparation, but to a greater extent that of this week in seeing that you have had, as you say, a good time. We sincerely thank you. (Applause.)

Mr. Duffy moved that at future conventions the Ohio Hardware Association take care of its own entertainment, which motion was carried.

The Committee on Memorial to B. M. Clark, of Gettysburg, not having reported up to this time, it was voted that the report when received be considered as read and adopted.

The report of Committee on Nominations was then made, as follows:

#### ELECTION OF OFFICERS.

J. J. Ewing, of Lima, chairman, submitted the following report of Committee on Nominations:

Your Committee on Nominations beg leave to submit the following for your approval:

PRESIDENT, O. M. Scott, Marysville.

VICE-PRESIDENT, W. P. Bogardus, Mt. Vernon.

CORRESPONDING SECRETARY, George M. Gray, Coshocton.

FINANCIAL SECRETARY, W. C. Jones, Columbus.

TREASURER, H. G. Woodward, Sidney.

#### EXECUTIVE COMMITTEE.

George Guyton, Ada (one year).

Frank Winter, Lancaster (one year).

James B. Carson, Hamilton (one year).

J. W. Brown, Washington C. H. (one year).

Geo. B. Meyer, Cincinnati (two years).

Henry R. Rahe, Cleveland (two years).

A. C. Rohrbacher, Akron (two years).

A. Strome, Warsaw (two years).

#### GRIEVANCE COMMITTEE.

W. P. Bogardus, Mt. Vernon.

George B. Meyer, Cincinnati.

On motion the report was received, the rules suspended,

and Mr. Baker instructed to cast a ballot for the election of the nominees as reported.

The convention then adjourned *sine die*.

#### THE BANQUET.

The banquet that was given to the 600 guests, comprising delegates to the Ohio Convention and the manufacturers and jobbers of the city and their many friends, was one of the most important events of the kind ever held in Cincinnati, reflecting great credit upon the local entertainment committee, representing the manufacturers and dealers of the industry in the city. All the addresses were of a character to be remembered with feelings of the greatest pleasure. The music was excellent, the brilliant lighting and table decoration was far superior to the usual demonstrations of this kind, the menu was embossed on sheets of coppered steel, and the speeches that followed the coffee and cigars were of the true blue after-dinner character, very amusing, thoroughly enjoyable and exceedingly characteristic. The banquet was held in the Armory, which was handsomely decorated and illuminated in honor of the occasion. President Scott acted as toastmaster, a position for which he is admirably qualified, and he filled it to the letter. The principal speakers consisted of Col. W. B. Melish, who responded to the toast of "A Citizen of Cincinnati," and whose address was an exceedingly humorous one, calling forth laughter and applause. Vice-President Bogardus responded to the toast of "Old Horse," in which he upheld his reputation for eloquence by receiving every evidence of the appreciation of those present. To the final toast of "Hardware," Howard Saxby, of Cincinnati, made a model after-dinner speech that put the convention in the condition of wishing it was more greatly extended than it was. It was thoroughly enjoyable, and his hits were of the kind that were appreciated not only by the victims, but also by the delegates. The affair was one long to be remembered.

#### Col. J. R. Nutting in Role of an Inventor.

Col. J. R. Nutting, of Sickels, Preston & Nutting Co., Davenport, Iowa, has adopted the role of an inventor and as a result of his genius, the indications are that he will be abundantly rewarded in the way of profitable returns and as he expresses it, he has not yet decided whether to buy out the Northwestern or the Rock Island road. His invention is both a practical as well as useful one and no doubt will receive a cordial reception at the hands of all horseowners.

It consists of a Duplex horse shoe, which contemplates the ordinary hoof plate without calks and attaching to that plate a detachable plate, the under-plate to have short pins which will enter corresponding holes in the hoof-plates and by means of two or more short screws, the two plates are rigidly united.

By this means it will be possible to remove the plate which has the calks at a moment's notice, and allowing the horse to stand overnight in its stall without the necessity of bearing its weight upon the calks, which are at all times a burden upon the horse's feet.

It is also possible to insert a cushion between the two plates in order to take the jar off of the horse's feet. Col. Nutting's broad invention consists of the combination of a hoof plate and a detachable plate, with suitable means for rigidly connecting the two plates.

The invention is being patented through the services of Attorney L. G. Susemihl, of Davenport, and Col. Nutting expects to have the article manufactured and placed upon the market as soon as possible.

One of the most remarkable developments of the past year has been the increase in exports of electrical street-railway machinery and equipment. Every country in the world where electric railways are being built is buying portions of its supplies in this line from the United States.—*Exchange*.

(Proceedings of Minnesota Retail Hardware Association, continued from page 25.)

#### FRIDAY MORNING SESSION.

The discussion of the propriety of making the suggested changes in the annual dues was resumed, and remarks were made by Messrs. Watson, Gardner and Caley, but as all of them had changed their views the \$3 dues were now favored, and no action was taken. A few more questions were discussed furnished by the Question Box, and after a few remarks by President Tomlinson relative to the duties devolving on officers and members during the coming year, the convention adjourned *sine die*.

#### THE BANQUET.

One of the most interesting occasions connected with the holding of the convention was the banquet, which was given at the Nicollet Hotel on Thursday evening, the expenses of which were largely borne by the Association from their own sources of revenue. The number of those present was 240, and comprised a large representation of the members of the Association with a number of invited guests, consisting of jobbers, traveling salesmen and representatives of the trade press. Popular airs were rendered by a fine orchestra present, and an excellent menu was provided by those having the affair in charge. A. T. Stebbins, of Rochester, held the position of toastmaster, and most agreeably and felicitously did he fill the position. Among the speakers who made brief remarks when called upon was H. B. Gardner, of Minneapolis, who extended greetings to all those present in behalf of his city. James E. O'Brien, ex-president, replied to Mr. Gardner's remarks on behalf of the Association. H. M. Hill, of Janney, Semple, Hill & Co., Minneapolis, responded for the Minneapolis wholesale Hardware trade. E. A. Moye, of Duluth, did the same for the wholesale trade of his city. Irving A. Sibley, of South Bend, Ind., a prominent member of the Inter-State Association, made a very forcible address. Several of the other guests present made short speeches, among whom were Albert H. Hall, George W. Cope, of the *Iron Age*; Harry Gregg, of Minneapolis; R. A. Kirk, of St. Paul; J. F. McGuire, of St. Paul, and Charles F. Ladner, of St. Cloud. Ex-President O'Brien was presented with a fine leather-covered easy chair as a token of the esteem in which he is held by the members. Mr. De Mott, of St. Paul, made the presentation speech. Ex-President O'Brien was also the recipient of a testimonial from the traveling men, showing their appreciation of him. This consisted of a beautiful cut-glass water set, which was presented on behalf of the guild by Charles F. Conner. Altogether it was an extremely enjoyable affair, and greatly appreciated by the members who participated.

#### Women in the Professions.

According to the statistics furnished by the United States Government, the professions followed by women have largely increased in the last thirty years. In 1870 there was 1 woman architect; now there are 50; painters and sculptors have grown from 412 to 16,000; literary and scientific writers from 109 to 3161; preachers from 67 to 1522; dentists from 34 to 417; engineers from 67 to 201; journalists from 35 to 472; lawyers from 5 to 471; musicians from 5763 to 47,309; doctors from 527 to 6882; accountants from none to 43,071; copyists and secretaries from 8016 to 92,824; stenographers and typists from 7 to 50,633.—*The Congregationalist*.

The manufacture of briquettes from coal is an important industry in Belgium. During the first nine months of this year the exports of briquettes from that country amounted to 439,000 tons, an increase of 41,000 tons over the same period last year; coke exports were 823,000 tons, an increase of 74,000 tons; and coal exports 3,819,000 tons, an increase of 509,000 tons. Imports of pig iron for the nine months were 256,000 tons, a decrease of 14,000 tons.

## REVIEW OF THE MARKETS.

**Wire Nails:** The market on Wire Nails is extremely active, the demand being good. The trade is evidently anticipating that there will be an advancing movement as soon as the new aggregation of capital gets in condition to study the future. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days or 2 per cent. for cash in 10 days:

To jobbers in carload lots.....	\$2.30
less than carload lots.....	2.35
To retailers in carload lots.....	2.40
less than carload lots.....	2.50

New York prices are still held as previously quoted, with a more active movement. Quotations are as follows:

To retailers, carload lots on dock.....	\$2.53
Small lots at store.....	\$2.55 to 2.60

**Cut Nails:** A very good business is reported in this line and the tone of the market is quite firm, prices being well maintained. Large orders are not the rule, but assortments are well kept up. Quotations are as follows, f. o. b. Pittsburgh, plus freight per manufacturers' rate book, from which actual freight is to be deducted by purchaser; terms 60 days or 2 per cent. off for cash in ten days:

Carload lots .....	\$2.00
To jobbers in less than carload lots.....	2.05
To retailers in less than carload lots.....	2.15

New York quotations are as follows:

To jobbers in carload lots on dock.....	\$2.15
less than carload lots on dock.....	2.20
To retailers in less than carload lots on dock.....	2.30
Small lots from store.....	\$2.25 to 2.30

**Barb Wire:** The market for Barb Wire is an exceedingly active one. Prices are held very firm. Advancing quotations are anticipated by some of the trade and larger orders than might be made are given under the circumstances. Complaint is made that prompt deliveries are becoming difficult, although the entire facilities of the mills are being used in manufacturing. This time of the year trade is invariably brisk. Prices are as follows, f. o. b. Pittsburgh, 60 days or 2 per cent. for cash in ten days:

To jobbers in carload lots, Painted.....	\$2.60
"    "    Galvanized .....	2.90
"    less than carload lots, Painted.....	2.65
"    "    Galvanized .....	2.95
To retailers in carload lots, Painted.....	2.70
"    "    Galvanized .....	3.00
"    less than carload lots, Painted.....	2.80
"    "    Galvanized .....	3.10

Ellwood and Baker Wire is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** Plain Wire is in excellent demand forming as it does the raw material for so many lines of goods. The manufacturers are ordering freely for their specific wants. The regular demand is also unusually good, the tone of the market being an unusually strong one. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days or 2 per cent. for cash in ten days:

	Base sizes.	
	Plain.	Galv.
To jobbers in carload lots.....	\$2.25	\$2.65
less than carload lots.....	2.30	2.70
To retailers in carload lots.....	2.35	2.75
less than carload lots.....	2.45	2.85

The above prices are for the base numbers, 6 to 9. The other numbers of Plain and Galvanized Wire take the advances indicated in the following table:

Plain Fence Wire Advances (Catch Weights).			
Nos.	Base.	Galvanized.	
6 to 9.....		\$0.40 extra.	
10 .....	\$0.05 advance over base.....	.40	"
11 .....	.10	.40	"
12 and 12½ .....	.15	.40	"
13 .....	.25	.40	"
14 .....	.25	.40	"
15 .....	.45	.75	"
16 .....	.55	.75	"
17 .....	.70	1.00	"
18 .....	.85	1.00	"

For even weight bundles, 50 pounds or over, 5 cents per bundle advance on above.

**Screws:** The anticipated higher quotations that were referred to in our previous issue have arrived somewhat sooner than was supposed. The recent prices established made an extraordinary demand, the trade evidently realizing that lower quotations could not be expected with the advancing movement in raw material in so many other lines, so that the manufacturers decided to further stiffen the quotations by quoting a new line of discounts. In fact, many of the manufacturers have orders enough ahead to guarantee a full business for months to come.

**Russell & Erwin Mfg. Co.,** New Britain, Conn., and New York, announce, under date of March 4th, an advance to prices formerly ruling, as given below:

	Per cent.
Flat head iron.....	87½
Round and oval head iron.....	85
Round and oval head plano, unpolished.....	85
Fillister head iron.....	82½
Flat head brass.....	85
Round and oval head brass.....	82½
Flat head bronze metal.....	75
Round and oval head bronze metal.....	72½
Flat head nickel plated on iron.....	75
Round and oval head nickel plated on iron.....	75
Flat head nickel plated on brass.....	75
Round and oval nickel plated on brass.....	75
Flat Head Iron Screws, Blue and Black, 5 per cent. advance on net.	

We hereby withdraw and cancel all discounts and terms on Screws made prior to date of this circular. All orders subject to our ruling rates at date of shipment.

Terms Cash. No prices guaranteed.

Several other screw companies besides the Russell & Erwin Mfg. Co. have adopted the same base prices.

**Spiral Screw Drivers:** Voigt, Starr & Co., 67 Reade Street, New York, quote the following revised prices on Spiral Screw Drivers:

Jones' Reversible No. 1.....	\$3.50 per dozen net.
No. 2.....	2.00 " " "
Howard-Allard A.No. 1.....	9.00 " " "
A.No. 2.....	8.00 " " "
Electric 01.....	6.00 " " "
02.....	5.00 " " "

**Plumbers' Brass Goods:** Landers, Frary & Clark, under date of February 20th, withdrew all the quotations on Plumbers' Brass Goods. New prices will be furnished on receipt of specifications. Orders that were entered at the old prices will be filled at the prices the orders were taken at. All new orders, as well as orders in transit on that date, will be billed at the present new schedule.

**Iwan Bros.,** Streator, Ill.: The following are their latest quotations on the goods mentioned:

Iwan's Improved Post Hole Augers, 40 off.	
Split Handle Post Hole Diggers, \$3.50 per doz. net.	
Perfection Post Hole Diggers, \$9.00 per doz. net.	
Adjustable Drain Cleaners, 55 off.	
Stationary Drain Cleaners, 45 off.	
Perfection Skeleton Drain and Ditching Spade, 50 off.	
Sickle Edge Hay Knives, \$10 per doz.	
Volcano Revolving Chimney Tops, 55 off.	
Perfection Wire Conductor Pipe Hangers, 50 off.	
Improved Serrated Hay Knives, \$10.50 per doz.	
Vaughan's Post Hole Augers, 6 to 9 in., \$6.00 per doz. net.	

**Cordage:** Manila rope has advanced in price since our previous report. With the market in such strong condition, further advances are probable. Sisal also is held at higher quotations; the market is well sustained, the conditions being very firm. We quote as follows:

	Pounds, Cents.
Manilla, 7-16 inch and larger.....	10½
¾ inch .....	11
½ inch and 5-16 .....	11½
Sisal, 7-16 inch and larger.....	8
¾ inch .....	8½
½ inch and 5-16 inch.....	9
Lath Yarn, medium and coarse.....	7½
Jute Rope No. 1.....	6½
No. 2.....	5½

**Binder Twine:** The strong market on hemp referred to above on Cordage has strengthened the market on Binder Twine, and quotations are higher than previously reported.

# NICHOLSON.

**SOLD ALL OVER THE WORLD.**

*Supplied to 24 Foreign Governments.*

**FAMOUS FOR TEMPER AND CUT.**

**NICHOLSON FILE CO., Providence, R. I., U. S. A.**

We quote as representing the market: General quotations are as follows for small lots of Twine, with a rebate of 1-4 cent per pound for carload lots, f. o. b. Eastern factory:

White Sisal, 500 feet per pound.....	8c.
Standard, 600 feet per pound.....	8c.
Manilla, 600 feet per pound.....	9½c.
Pure Manilla, 650 feet per pound.....	10¾c.

**Linseed Oil:** The Dean Linseed Oil Co., under date of March 4th, 1901, quote as follows:

In lots of less than 5 barrels.....	64 cents per gallon.
In lots of 5 barrels or more.....	63 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Boiled Linseed Oil, 2 cents per gallon higher than Raw.	
Calcutta Oil, 85 cents per gallon.	

#### THE BOSTON TRADE.

The volume of business for January and February has been very satisfactory, and the conditions throughout New England have been such as to stimulate the demand for certain lines which depend in a large measure upon weather conditions.

With such goods as Axes, Saws, Chains, etc., there has been a continued call and prices on these lines have been fully maintained.

There still exists an uncertainty as regards values on some lines, and a decided weakness is noticeable on such goods as are controlled by "Gentlemen's Agreements." On other goods there is a decided firmness where the products are controlled by one or even a few manufacturers.

The recent Steel Combination has been thoroughly discussed and it is generally conceded that prices on all lines will be strengthened and maintained in a more satisfactory way than for some time past.

Collections have been very satisfactory and the indications now point to an unusually large demand for Spring and seasonable goods.

FRYE, PHIPPS & Co.

#### THE PHILADELPHIA TRADE.

Whether it is owing to the formation of the Billion Dollar Steel Trust, we do not know, but, whatever may be the cause, there has been a very decided change in the tone of the market in the last two weeks, and manufacturers are not only holding prices much firmer, and, in some instances, making advances, but in a great many cases they are so far behind on orders it is difficult to get goods promptly, and, under such circumstances, it seems well to keep orders for positive wants well ahead.

While there have been no marked changes in prices in the past few days, still, there is a firmer tone all along the line, and higher figures may reasonably be looked for any moment.

Trade presents some apparent contradictions. From some sections, we hear reports of quiet business, and of tight money, and yet the volume of trade is certainly keeping up remarkably well, and is most encouraging from the fact that, although dealers are simply buying for their absolute wants, the demands made upon them are so great they are compelled

to buy with considerable freedom, and this is true not only of staples and the seasonable goods, but on the whole general line of Hardware. Our books show regular goods are in demand, and purchases are not confined to any particular lines. This shows a healthy state of the market, and one which promises a large volume of trade as soon as Spring thoroughly opens.

Wire Cloth and Poultry Wire Netting are held at considerably higher figures, as manufacturers have, in many cases, withdrawn all quotations and jobbers have sold large portions of their quotas.

Contrary to general expectation, no change was made in the price of Wire Nails or Wire on March 1st, and whether any change will be made in this direction this month is one which cannot be told with any certainty by the public.

BIDDLE HARDWARE Co.

#### THE BALTIMORE TRADE.

Since the inauguration at Washington, which was well attended by Baltimoreans, trade has been very brisk. Many merchants, taking advantage of excursion rates, are now in the city and are buying more or less liberally. The weather, being at present quite cold, affects the sale of late Spring or Summer goods which would be moving rapidly were the temperature much higher. Prices all along the line show few recent changes and remain firm, but we would not be surprised should we find it necessary within the next sixty days to note a great many changes.

Collections are now slow and we do not anticipate much improvement until the latter part of the month.

H. W. WEBB & SONS.

#### THE NASHVILLE TRADE.

The volume of business for January and February has been very heavy, but the disposition on the part of some dealers to get rid of goods regardless of prices has made it a rather unsatisfactory business as a whole. With the strong upward tendency in iron and iron products, it is reasonable to think that jobbers will take advantage and advance their prices accordingly, and should they do so there is yet time to retrieve some of the loss, which may have been sustained by unnecessary cutting.

Mild, open weather through the month of February has caused a very heavy demand for plows and farming implements, and as the Spring comes on Builders' Hardware will have its inning.

In the agricultural districts farm work is being pushed vigorously. Farmers are realizing good prices for their products and feel that good times have come to stay for a while.

Collections are fully up to the standard with but a few asking for more time and only the average number of failures.

The majority of well-posted merchants realize that there is or will be a scarcity of goods in some lines and are anti-

pating their wants freely, and we look for good fill-in orders throughout the Spring and early Summer months.

H. G. LIPSCOMB & Co.

#### THE BIRMINGHAM TRADE.

We report that the demand for goods in our line continues good. The recent advances in some lines of heavy Hardware have had the effect of making prices of the jobbers firmer. The prospects all along the line are favorable. We have been watching the consolidation of some of the strong companies in the steel and wire business with interest and anxiety. We can see how some good may result if wise men who are not too avaricious and who have the good of our country at heart are placed in control. On the other hand, we can see how evil might result by the concentration of too much power in a very few hands. We now see the great steel companies and the transportation lines under one management, and by working the two together they can exercise the controlling power in the markets. It may be that in order to take good care of some controlling interest and to effect the desired consolidated interest that large salaries will have to be paid, which will be a heavy tax on the earnings of the company, and, further, the heavy capitalizations, based no doubt on the present or prospective earnings of the company, rather than on the cost of the plants, will be a heavy charge on the earnings. Unless the stockholders get dividends they will be dissatisfied, and to please them prices must be kept high. If we take the experience of the past for a guide, we will look for a reaction when demand will be less and prices lower, and these are the times that will try the effectiveness of such corporation. This is the way it looks to an observer at a distance, who does not know very much about it. We will wait and see, and in the meantime hope that it all means good for us rather than evil.

The demand for coal and iron throughout this district is good, and the demand for all grades of Sheet Iron is unusually large, making the same scarce and hard to get.

The Winter has been a mild one and the farmers are at work preparing for a large crop. They have gotten a good price for their chief staple, cotton, and feel encouraged to work. This gives an active demand for farm supplies.

In this locality the building trade is active. We have more large buildings being erected than for a long period; also, many residences, and all this gives active demand for builders' supplies.

MOORE & HANDLEY HARDWARE CO.

#### THE PITTSBURGH TRADE.

Up to March 2 everything hereabout was in the grip of winter—rivers and roads frozen, and with no encouragement to the country merchant to buy Spring goods.

We are now rejoicing in bright skies and mild temperature. Spring is in the air, and will show in the orders received this week.

After a severe decline in some items, such as screws, bolts, wire cloth and netting, we notice quite a stiffening in values.

Those who were not fortunate enough to get in at the low figures must now buy for immediate wants at the higher rates. Prices are still quite low in these goods, however; in fact, there are now very few goods in our line that are not as low as they should be to afford a fair manufacturer's profit.

One of the effects of the consolidation of interests noticeable to the wholesaler is the number of stores that have gone out of business, giving place to the supply stores of the combine. In the case of the Pittsburgh and the Monongahela Coal Companies, sixty-two stores have been supplanted directly, and a number of others had to retire from the competition. In the coke region some fifty stores are supplanted, but this has been a matter of several years' standing.

Collections are good, and there is a general feeling that we shall have an excellent Spring trade.

LOGAN-GREGG HARDWARE CO.

#### THE CLEVELAND TRADE.

Now that the billion dollar steel combination is completed, even Chicago cannot beat it in bigness. As it owns its own boats and can furnish its own water, it can probably float. If it does not drown its stockholders, it may the rest of us, unless Congress furnishes the people a scheme of salvation. A tariff to provide dividends on four hundred millions of water will be "high water mark" protection. A depreciated stock to be maintained at par by taxation is equal in disgrace to a depreciated currency, and quite as undesirable, and government cannot afford to nurse either. The "full dinner pail" cry will not avail as an excuse for nursing an infant after it is so robust as to become dangerous.

The people have shown commendable patriotism in upholding the tariff to assist in establishing our manufacturing interests, assuming that they would be required to pay more for goods only temporarily, but any attempt to make that a permanent condition is sure to be repudiated. When it enriches trusts at the expense of consumers, it will be patriotism to oppose it. A tariff that does not aim at free trade is not in the line of progress.

With our complications with Cuba, the Philippines and China, and the trusts, our obligations are manifold, but Uncle Sam is big enough to mother the weak until they can be weaned, and lick the disobedient.

In the face of all this, trade is surprisingly good because all but those calling themselves anti-imperialists have faith in the country's ability to settle all these problems. The anti-imperialists distrust the purpose of the country and assume that it has base motives in attempting to restore order in the Philippines and extend to them the freedom we enjoy.

As no action of the Government has indicated any purpose but to benefit them, their opinions must be the result of diseased imagination. The mass of the people are not alone in believing we have the best government established among men; even China, in her stress, appealed to our wisdom, generosity and justice. After we engaged in war that Cuba might be free, how can it be supposed that we desire to oppress the Philippines? It must come from the pleasure of fault-finding, and that requires neither wisdom nor patriotism.

These anti-imperialists need to cultivate faith in the people, which is another name for faith in republican government.

THE LOCKWOOD-TAYLOR HARDWARE CO.

#### THE COLUMBUS TRADE.

The writer attended the Ohio Hardware Convention at Cincinnati. The convention was certainly a success from all standpoints. The attendance was large and the sessions interesting and instructive. President Scott got mixed several times during discussions and motions, and would occasionally inquire, "Where am I at?" but the best parliamentarian

THREE-BAR LEATHER  
shoe-soles and top-lifts (for heels) are the best.

Write us; we'll give you points.

Baxter Schenkelberger & Co,

350 Congress street, Boston

tarian would have been puzzled at times. Mr. Scott is all right, as his re-election indicated. The whole push seemed to enjoy the smoker. I am certain the poor girl who wanted to sell the doggy would have made the sale had she offered it to the genial bachelor from Lima, or the gallant who cut the chain loose from her stocking. The smoker was a decided success; also the banquet. Cincinnati knows how to take care of a convention. Of course Columbus had to originate the "smoker" entertainment, and Toledo, Cleveland and Cincinnati, seeing how well such an entertainment was enjoyed, included it in their programme.

One of the questions in the question box was: "Has a Hardware man a right to part his hair in the middle?" It was referred to ex-President Wiseman without any discussion. Now, I want to say a word for those who can't help it. When you see a man with a lake on the top of his head and just a little border at the upper end of his neck, what is he going to do? He no doubt would prefer to part his hair on the side, but the parts are too far apart to part as they are always parted. That is getting deep, and as I have part of my hair left, I will change the subject.

The rabbits' feet distributed by E. C. Atkins & Co. through Mr. Jackson, their popular representative, were in great demand. I would caution all Hardware men against placing too much confidence in them, as there is no proof but Mr. Jackson's word that the rabbits were killed by a X-eyed coon. If they were not, they are N. G.

Columbus was selected as the next meeting place. These small towns on the outskirts will do once in a while, but for steady diet Columbus is the place. 'It is not nearly as far from the rim of the hub as it is from one side of the rim to the opposite side. Bros. Duffy, Baker, Bogardus and Gray are opposed to any more smokers. Not because they do not get as much fun out of them as any of the boys, but they think it interferes with business. They served notice on the writer that no smokers go, and that the Association will provide for their own entertainment and pay their own bills. Well, we can at least give the visitors passes through the Penitentiary. They may want to see where they are pulling up to, and it might be well to take the fellows that always want to beat their neighbors' prices—over to the asylum where they keep people with too many wheels in their heads. It might be an admonition that there are different phases of insanity. It certainly is a privilege as well as a pleasure to mingle with the Hardware dealers of Ohio, and I doubt if there is any other branch of the mercantile trade that could produce as fine a looking set of men or men with as keen business qualifications and gentlemanly bearing as the retail Hardware dealers of Ohio. It takes such men to make successful Hardware dealers, and Ohio is full of them.

I almost forgot I was to write of the conditions of trade, but conditions do not change materially from one issue of your magazine to the next, and any radical changes are soon given to the trade through the trade journals or the numerous traveling salesmen. There is lately, however, a marked difference in the nature of changes. Most of them are advances, and it looks very much like higher prices on most all staple lines. We now get notices daily from manufacturers withdrawing prices and quoting higher ones. Extreme prices on wire cloth, poultry netting, screws and a

number of lines have been withdrawn, and it would be hard to place orders even at present quotations for increased contracts, as many manufacturers have as many orders as they want or can take care of. The outlook for business is very encouraging, and a number of fine business structures are now under way in our city. In fact, more than for the past two years combined. The reports from our salesmen are encouraging from the territory they cover. Prosperity for all is our wish. THE SMITH BROS. HARDWARE CO.

#### THE DAVENPORT TRADE.

Winter arrived about six weeks later than usual, but it is here now good and plenty. The ice crop is large and like crystal in appearance, and it is being harvested with great vigor, giving employment to many. Davenport is a metropolitan city in many ways, but as yet has achieved no distinction in the way of ice trusts.

The recent high March winds have developed a new industry in which no one man seems to have an absolute monopoly, viz.: picking up hats on the ice, that have suddenly parted company with the owners thereof from the combined railway and carriage bridge owned jointly by the government and the C. R. I. & P. Railway. It would seem that the ideas of the advantage of monopolies is still in the air.

Continuing the subject of monopolies, why cannot the indefatigable organizer and promoter of our Hardware interests, the energetic, popular and handsome secretary of the National Hardware Association arrange to have the members of the Association pool their interests with the billion dollar combine? The individual plants should be taken in at a large increase in value above cost, disposing at once of competition, and a large percentage of expense accounts, and also give the consumer the benefit of this reduction in cost of doing business, just as other syndicates have hitherto promised to do. If this were accomplished why would not this change in present methods become as popular as some of the other immense organizations who have maintained that monopoly reduces the cost of manufacturing and expense of doing business and hence benefits the consumer?

SICKELS, PRESTON & NUTTING CO.

#### THE OMAHA TRADE.

The volume of February trade is somewhat disappointing. The weather was unfavorable, and to a very large extent curtailed the distribution of season goods, and a general complaint from dealers throughout the month was of unusually slow trade and collections. The outlook for Spring trade, however, was never more favorable. Everything in the line of farm produce is bringing good prices, and the country banks appear to be overflowing with deposits for

#### HERRICK'S TOOL RACK.

#### The Best Investment for a Store Fixture

That any Hardware Merchant Could Make.

F. A. HERRICK & CO., Jackson, Mich. Littleton, N. H.  
Gentlemen—Your letter of Sept. 1st asking us for our candid opinion of Herrick's Patent Agricultural Tool Rack, is received. In reply we would say we consider it the best investment for a store fixture that we ever made. We would as soon think of disposing of our show cases as our tool rack. Yours truly, SMITH & LYONS.

All we ask is a trial to prove the above statement to any hardware man.

Give it a Trial.

F. A. HERRICK CO.

JACKSON, MICH.

# STANLEY RULE & LEVEL CO.

SOLD BY ALL HARDWARE DEALERS.

which there is no demand. All indications point to an unusually active season, as from all directions comes the report that more building is contemplated than was ever before heard of, so that unless something occurs to change the present outlook, the volume of trade for the coming season will undoubtedly be larger than anything that has heretofore been experienced. RECTOR & WILHELMY Co.

### THE SAN FRANCISCO TRADE.

General trade in this city and throughout California is as good as at any time during the past good year, and there are no large failures or tight money markets to worry over. Funds continue plentiful and remarkably accessible, and some of the interior banks are reported actually overflush with coin. Continued rains are enhancing an already bright outlook for crops, and the situation, as far as California is concerned, could hardly be improved upon. The great steel interests combination is of course being talked about in local trade circles; but since this has not as yet in the least affected business, much more interested talk is heard among San Francisco Hardwaremen relating to the fact that within the past week all the milmen strikes have been declared off, and as a consequence building prospects are brightening and restored confidence in this connection is toning up things in a manner notably agreeable to the trade. Another relished topic of conversation is the State Association of retail dealers, as related in this correspondence two weeks ago, and the harmonious manner in which this State society is being encouraged and strengthened by auxiliary associations that are forming in different sections of the State. Within the last fortnight a majority of the retail Hardwaremen and implement dealers of Southern California met in the Temple Block, Los Angeles, and organized the Southern California Retail Hardware and Implement Association, and elected the following officers: George M. Cooley, San Bernardino, president; John McFadden, Santa Ana, vice-president; A. R. McCormick, Riverside, secretary; J. M. Greer, of Pasadena Hardware Company, treasurer; T. R. Dawe, Santa Barbara; E. C. Bichowsky, Pomona; Alex. Waldie, Santa Paula; C. A. Carey, Los Angeles, executive committee. The purpose of the association is announced to be not to form a combination for raising prices to con-

sumers, but to regulate existing abuse between retailers and jobbers.

Expansion is the word with Seller Bros. & Co., a twenty-year-old company of importers of stoves and ranges, blue, all white and gray enamelled wares, tinware, household and kitchen sundries. This strong concern, recently removed from 110-112-114 Battery Street to more convenient and larger quarters at 405-407 Market Street, a six-floor building, will thus have added to their business a Hardware department, with Charles Watts installed as manager. In preparation for this Mr. Watts has already resigned as manager of the Alexander-Yost Company, with which Hardware company and its predecessor, Osborn & Alexander, he was prominently connected for twenty-seven years. This veteran in the trade, with whom about every Hardware dealer on the coast is personally acquainted, will be pleased to receive catalogues of Hardware tools and specialties.

TRADES PRESS ASSOCIATION.

### Observations.

The difference between a drunkard and a dipsomaniac is merely a question of depth of purse.

To be original is to tempt attacks.

It takes a philosopher to be silent anent philosophy.

If one's thoughts were written on one's face, many would need masks.

A fool bolts his pleasure and then complains of moral indigestion.

Sharp criticism is like onions. It brings tears to the eyes, is unpleasant to many, but is healthful, cheap and stimulating.

Femininity never grows tired of trying to divine intentions from attentions.

To be friendly with a bad man damages a woman's reputation; to count a bad woman among her acquaintances ruins it.

Mistress—Does your policeman lover ever ask for a kiss, Nora?

Cook—No, indade, mum! Whin a policeman sees anything he wants he takes it without asking.—Puck.

## Something New

PUT THIS ON YOUR PIPE,

The  
Fowler  
Automatic  
Draft  
Regulator

and you will notice the fol-  
lowing about your furnace,  
stove, or boiler :

- Regular Draft at all times.
- No overheating of furnace.
- Less chimney fire danger.
- No burning out of grates.
- No escaping gases in cellar or room.
- Perfect ventilation.
- Retention of heat in furnace.
- Perfect combustion of fuel.
- Minimum of clinkers.
- Therefore, greatest economy of fuel and care in operation.

Prevention of fires burn-  
ing out on windy nights.  
A great coal and trouble  
saver.

Why? Because "The  
Fowler" Automatic Draft  
Regulator insures absolute  
and perfect regulation of  
draft under all conditions  
in any heating apparatus  
on which it is put.

Can be quickly applied  
even when heater is in use.

If you cannot procure goods of their make from your jobber we shall be pleased to supply full information on application.

**ALFRED FIELD & CO.,**

93 Chambers Street, New York.

**WHY IS THE**

PAT. 1898.

**O.K. WASHER THE BEST  
WASHING MACHINE?  
— BECAUSE —**

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced machanicans, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

Manufactured by **H. F. BRAMMER MFG. CO.,

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

Albany, N. Y.—The Empire Saw Co. has filed papers of incorporation with the secretary of state. The company is formed to manufacture saws, knives, machinery, Hardware and implements for butchers' use. The capital stock is \$10,000. The directors and stockholders are as follows: Arthur L. Joslyn, of Albany; James C. McGonagle, of Lebanon Springs, and Daniel J. Harnett, Linneus H. Burdick and Gaylord Logan, of Albany.

Chicago, Ill.—Standard Hardware Supply Co. has been incorporated; capital, \$20,000; manufacturing and dealing in hardware; incorporators, Jesse Cox, Arthur M. Cox and Charles L. Weeks.

Cleveland, O.—The D. J. Brennan Co., of Cleveland, has been incorporated with \$25,000 by D. J. Brennan, W. B. Woodbury, William C. Logan, Leander W. Cory and Salem A. Hart. They will make and deal in weather strips.

Indianapolis, Ind.—The Enterprise Foundry and Fence Co., of this city, capital, \$50,000, has been incorporated. The incorporators are G. R. Ellis, William Helfenberger, Georgianna Ellis, Matilda Helfenberger.

Jacksonville, Fla.—Several immense aluminum deposits have been discovered in central and southern Florida and a company has been organized, headed by E. C. Long, vice president of the Atlantic, Valdosta and Western Railroad; C. E. Garner, President of the Board of Trade, and other capitalists for the extensive manufacture of paint from this aluminum product. The corporation will be known as the Florida Aluminum Paint Mfg. Co. and the plant will be established in this city. The manufacture of paint from aluminum is to be from a secret formula.

Leonardsville, N. Y.—A company known as the Babcock Mfg. Co. has been incorporated for the purpose of manufacturing furnaces. It assumes an old established business and is capitalized at \$35,000.

Meriden, Conn.—The Jones Mfg. Co. have begun the manufacture of Hardware at the Miller Street shop.

Minneapolis, Minn.—The Thomas H. Reeves Co., manufacturers of saws, logging, lumbermen's and sawmill tools and supplies, have filed articles of incorporation. The capital is \$25,000. The incorporators are Thomas H. Reeves, of Minneapolis; Byron P. Baker, of St. Paul, and Margaret J. Reeves, of Minneapolis.

New Haven, Conn.—The Stevens & Sackett Co. has been organized with a capital of \$6,000, all paid in. The company is to manufacture coach and carriage lamps, trimmings, etc.

Trenton, N. J.—Automatic Hammer Co.,

of New York, has been incorporated with an authorized capitalization of \$100,000.

### Changes and Improvements.

Buffalo, N. Y.—The Niagara Machine & Tool Co., according to plans filed with the Bureau of Buildings, will erect a two-story brick addition to their plant at Jefferson and Superior Streets. The work will cost \$8,000.

Cohoes, N. Y.—A new ax factory will be erected this Spring on the site near the Waterford Bridge where the building was destroyed by fire last Spring. The contract was yesterday awarded by F. W. Peck to Andrew Archibald for a one-story brick structure 100 x 112. Work will be begun as soon as the weather will permit and the factory will be fitted out with all the latest machinery.

Crawfordsville, Ind.—The directors of the Crawfordsville Nail & Wire Co. have decided to increase the capital stock of the company from \$50,000 to \$100,000.

Daleville, Ind.—The Ideal Stove Foundry, located here four years ago, is to be removed to Upper Sandusky, O., where it will receive a bonus of \$30,000.

Des Moines, Ia.—The McCormick Mfg. Co., which manufactures lawn settees, swings, etc., is endeavoring to increase its capital stock from \$20,000 to \$35,000 in order to enlarge its present plant.

Detroit, Mich.—Architects A. C. Varney & Co. have completed plans for a brick addition 50 x 82 feet in size to the manufacturing building of the Detroit Screw Works, at the southwest corner of Riopelle and Guoin Streets.

Fallston, Pa.—Plans are being made for a large addition to the Townsend wire and nail mills.

Lancaster, O.—The Hardware Specialty Co., of Cleveland, giving employment to many people, is also about to locate here.

Owatonna, Minn.—The Washington Tool Co. has filed amended articles of incorporation with the secretary of state increasing its capital stock from \$20,000 to \$50,000.

Parkersburg, W. Va.—The plant and business of the Crown Wire Nail Co., which was recently started here by Pittsburg capital, has been sold to the Parkersburg Wire & Nail Mfg. Co., composed of Parkersburg capitalists. It will be enlarged and moved to another part of town.

Pittsburgh, Pa.—Alexander Speer & Sons have decided to erect a plow works at West Carnegie. Negotiations for a site are now in progress and plans for the building have already been prepared. The firm was formerly engaged in the foundry business, at Fifth Street and Duquesne Way. The works, including the plow making plant, were absorbed some time ago by the Pittsburgh Valve, Foundry and Machine Co.

Thompsonville, Conn.—A certificate of increase of the capital stock of the New England Machine Screw Co. from \$10,000

to \$15,000 has been filed with the Secretary of State.

Waterbury, Conn.—The Waterbury Tool Co. has increased its capital from \$11,300 to \$14,500.

Waukegan, Ill.—The Chicago Hardware Foundry at North Chicago is putting in extensive improvements to meet the demands of its growing business.

### Recent Fires.

Bridgeton, R. I.—Fire has damaged the building occupied by the Hopkins Machine Works and Bridgeton Knife Co., at Bridgeton, to the extent of several hundred dollars.

Detroit, Mich. The Phoenix Wire Works, located in the three-story brick building at 68, 70 and 72 Champlain Street, has been damaged by fire.

Marion, Ind.—The plant of the Marion Box & Handle Co. has been destroyed by fire. Loss, \$15,000, with ample insurance.

Meriden, Conn.—Fire caused by a lamp explosion did \$1,000 damage in Miller Brothers' cutlery factory on Pratt Street at 8:30 o'clock. The damage to the stock amounts to \$500. The fire was in the interior of the building entirely.

New York, N. Y.—A fire that started in the five-story building at 10 Reade Street caused \$5,000 damage. The Kampe Brothers, of the Star Safety Razor Co., occupy the third, fourth and fifth floors, and the Seybold Machine Co. the ground floor. No one was injured. The origin of the fire is not known.

No. Tonawanda, N. Y.—The large warehouse of the Buffalo Nut & Bolt Co. has been destroyed by fire. The loss on buildings and goods destroyed aggregates over \$100,000. The company, composed of Plumb, Burdick & Barnard, of Buffalo, carry a full insurance. They authorized the statement that the burned structure will be rebuilt at once.

Phoenix, N. Y.—Fire was discovered recently in the knife factory building, occupied by the Phoenix Hardware Co. as a currycomb works. Both the building and the stock of the Hardware company were covered by insurance.

Syracuse, N. Y.—There was a slight fire recently in the cutlery shop of Thomas F. Furniss on the second floor of the block No. 233 East Genesee Street.

Watsonstown, Pa.—The Watsonstown Nail Works, owned by J. Edward Godcharles & Co., has been totally destroyed by fire. The mill was in the trust and has been idle for a year or more, but they had on hand about three thousand kegs of nails which were destroyed. The mill was purchased by the Godcharles in 1895, but of late years has only been run occasionally for a month or so. The mill will not be rebuilt, at least at this place. Altogether about \$80,000 or \$90,000 worth of property was destroyed; on them is an insurance of \$20,000.

## BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Agencies, Etc.

Astoria, Ore.—Schwartz & Canfield, Main Street.

Binghamton, N. Y.—William L. Bundy, of the Bundy Time Record Co., is at the head of a firm which will soon open a factory in this city for the manufacture of a pneumatic tire to be attached to wagons, bicycles or any vehicle upon which such tires can be used.

Chicago, Ill.—Clark Griffith Co. has been incorporated; capital, \$2500; to manufacture and dealing in baseballs and sporting goods. Incorporators—William B. Moulton, Donald G. Catlin, Charles S. Burton.

Circleville, O.—Charles Titus.

East Hartford, Conn.—David Roberts, Main Street.

Erie, Pa.—Epp Bros., 1124 State Street.

Garner Mfg. Co. has been incorporated, to manufacture bicycles; capital, \$25,000. Directors—J. B. Garner, Eva Z. Attwell and W. E. Handy, New York City.

Great Barrington, Mass.—Louis Brusie will add a line of bicycles to his furnishing goods store.

Holden, Mass.—F. F. Taylor is building a repair shop.

Ivoryton, Conn.—George B. French.

Keene, N. H.—A new industry has just started in this city, using the shops of the Trinity Cycle works for the building of steamobiles. The company has been organized and the following named persons are the officers: E. P. Wells, president and manager; Frank Taylor, vice-president; Stuart W. Wells, secretary; Frank C. Faulkner, treasurer; Reynold Janney, consulting engineer; K. A. Juthe, superintendent.

Los Angeles, Cal.—Richard Zeigler, 644 South Spring Street, repairing.

Marietta, O.—Knox & Henry.

Ontario, Cal.—W. B. Beck.

Rockford, Ill.—Burr Bros., Brown Bldg., Lynn, Mass. Certificates of incorporation have been issued at the State House to the Essex Automobile & Bicycle Co., to buy, sell, repair and exchange automobiles and bicycles; capital, \$1000. Promoters—Fred B. Goodwin, Wesley D. Ham, Wallace B. Phinney.

Roseburg, Ore.—Elmer Wimberly, repairing.

Wareham, Mass.—W. G. Woodruff will open a repair shop.

Watertown, S. D.—J. H. Troeh & Sons.

Windsor Locks, Conn.—F. L. Harvey.

### Changes and Improvements.

Ansley, Neb.—M. Gaines succeeds Gaines & Hagin.

Bluffton, Ind.—John Bequet succeeds W. H. Patterson & Co.

Boone, Ia.—W. M. Wheelock succeeds Wheelock & Root.

Brook, Ind.—Lyons & Hershman succeed Rich & Lyons.

Chicago, Ill.—Fort Dearborn Cycle Mfg. Co., name changed to Fort Dearborn Mfg. Co.

Cleveland, O.—The ball and pedal company of the American Bicycle Co. has sold out to the Automobile & Cycle Parts Co. The plant is located on Perkins Avenue and Mason Street.

Columbus, O.—The Admiral Bicycle Lamp Co. of this city has signed a contract to remove its works to Marysville, Ohio, as soon as suitable buildings can be constructed for the plant. Work on the new building has been commenced. E. B. Thomas is president, Milton N. Grant secretary and treasurer, and C. C. Armstrong manager.

Concordia, Kan.—Livingood & Neilson succeeds Thomas Livingood.

Delphos, Kan.—Cassidy & Zimmerman succeed Calenden Bros.

Easton, Ind.—Rich & Clark succeeds E. T. Nicholas.

Erie, Ill.—James & McCall have dissolved.

Gardner, Mass.—Fred L. Gibson has moved his sporting goods stock from his store on Parker Street to Music Hall block on Central Street.

Grass Valley, Conn.—Bowhill & Smit have dissolved.

Greenfield, O.—D. A. La Ferve & Co. succeed La Ferve & Head.

Highland, Kan.—McCarthy & Joss succeed D. S. Gilmore.

Ilion, N. Y.—J. H. Harning succeeds F. A. Stubblebein.

Lynn, Mass.—A. F. Stillman, 18 Market square, is enlarging his store.

Mendon, O.—Maurer & Anderson succeed Maurer & Partner.

Middletown, N. Y.—Worcester and Crans, removed to 33 West Main Street.

Morrisonville, Ill.—Bissell Bros. succeed A. B. Bissell.

Mt. Vernon, S. D.—Hatch, Arland & Keller Co. succeed Colby & Diel.

Navasota, Tex.—E. L. & G. C. Ahrenbeck succeed Ahrenbeck & Errell.

North Long Branch, N. J.—B. A. Luther has purchased the bicycle business of William H. Martin, of this place.

Paris, Tenn.—J. E. Johnson succeeds Johnson & Comsel.

Pawtucket, R. I.—The firm of A. F. & F. Bray, dealers in bicycles, arms and sporting goods, is now established at 250 Main Street, having vacated the store in the Benedict House Block, which it occupied for twelve years.

Red Oak, Ia.—H. R. Christy succeeds C. A. Nelson.

Shipman, Ill.—Meatyrd Bros. succeed Irving P. Smith.

Sidney, O.—McKee & Wilson succeed Gibson & McKee.

Sidney, O.—Roy Redinbo succeeds Routson & Emerick.

Southampton, N. Y.—George D. Grundy has sold repair and sundry business to Merton L. Packard, but will still engage in the sale of bicycles.

Southington, Conn.—Frank Matthews, formerly of Planesville, but now of New Haven, has accepted a position as manager of a New London bicycle establishment. Mr. Matthews is now in the employ of a New Haven agency and will assume the duties of his new position in a few days.

Springfield, Tenn.—J. W. Bell succeeds Bell & Dowlen Supply Co.

Table Rock, Neb.—Frank Kovanda succeeds Andrew & Kovanda.

Webster City, Ia.—Charles W. Neff succeeds Simon Bros.

Woodland, Mich.—Seas Bros. succeed Carpenter Bros.

Zanesville, O.—Zanesville Cycle Co., 21 S. Fifth Street. Roy E. Bennett has purchased an interest and will assume charge.

### Recent Fires.

Bayonne, N. J.—George Livingstone, West Eighth Street, partly insured.

Buffalo, N. Y.—James McCraws, 224 Broadway, damage slight.

Canton, O.—J. B. Smith.

Clinton, Ia.—Harry L. Traub, Main Street; loss, \$100; insured.

Eldred, Pa.—The Eldred Cycle and Supply Co.

Milwaukee, Wis.—Fire was discovered in the plant of the Drake Mfg. Co., Fifteenth and St. Paul Avenue, a short time ago. Total loss; fully insured.

Quincy, Mass.—James Dunn & Co., loss \$900, insurance \$500.

Richwood, O.—F. L. Moffett, loss \$1000; insured.

Rochester, N. Y.—The Seneca Camera Co.'s plant has been destroyed by fire. Loss, \$40,000.

Shickshinny, Pa.—H. L. Hobbs.

Springfield, Mass.—Fire has gutted the sporting goods house of Morgan & Ball, who are also local agents of the American Bicycle Co. Loss, \$12,000, fully insured.

Terre Haute, Ind.—Frank Erxleben; loss \$4000; insured for \$2000.

Uniontown, Pa.—Fire destroyed the grinding mill of the Rand powder works at Fairchance, with its stock.

### Recent Embarrassments.

New York, N. Y.—Judge Brown has granted a discharge in bankruptcy to Edwin Oliver and Alexander Strauss, who composed the firm of Oliver, Strauss & Co., dealers in bicycle supplies, formerly at 23 Park row, whose liabilities were about \$100,000.

### Miscellaneous.

New Haven, Conn.—At the annual meeting of the stockholders of the Winchester Repeating Arms Co., T. G. Bennett was elected president, G. E. Hodson vice-president and treasurer, H. S. Leonard assistant treasurer, and A. I. Ward secretary. Judge Henry Stoddard was elected a director.

## "FOR YEARS."

Henry Disston & Sons, Philadelphia, Pa. [Saws, Files, etc.]: Our opinion of HARDWARE is contained in the fact of our having carried an advertisement in your paper for a period of four years.

# PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

## SPECIAL PAINT OFFER

WHICH POSITIVELY CLOSES MARCH 1st.

For the purpose of introducing the EMPIRE PREPARED PAINT to the trade, where not at present for sale, we have decided to make the following special offer:

We will send any dealer 50 gals. of EMPIRE PREPARED PAINT, selected from our special color cards of the latest and popular shades, for \$45.00. The goods are all put up in patent strip covercans and pails in assorted size packages as follows: 1 gal., 1/2 gal., 1/4 gal., 1/8 gal., and neatly labeled. Terms 60 days from date of shipment, or the usual 2 per cent. off if paid in ten days.

We fully guarantee these goods to be far superior to any on the market, and with this special offer we will send you a full supply of color cards, large slat sign for displaying colors, and also a glass sign; making the most complete advertising outfit on the market.

Bear in mind this sacrifice price is made to introduce the goods where not already for sale and positively expires on March 1st. If you are interested, we would be glad to hear from you and would take pleasure in furnishing color cards or any other information which you may desire.

THE WM. CONNORS PAINT MFG. CO.,  
TROY, N. Y.

We furnish plants of any size and description and grant shop right and other licenses on a royalty basis.

# GALVANIZING

**U. S. ELECTRO-GALVANIZING CO.**

Jobbing Plant: 108-110 West 11th St.  
Main Office: 348 Broadway, New York.

## If it is a Food Chopper Without a Lid, Don't Buy It.

A distinguishing and exclusive feature of the STAR FOOD CHOPPER is a plate hinged at the top of the hopper which, when pressed on the food to be cut, forces it upon the feed screw, thus preventing the possibility of injuring or soiling the fingers, which is liable to occur in using the other choppers.

The STAR is unquestionably the best machine of its kind ever offered to the public. It will cut without crushing raw or cooked meat, sea food, fruit, vegetables, etc., into coarse or fine pieces, according to the cutter used, of which three accompany each chopper.

It has eliminated all the objectionable features of other choppers, and has added several improvements that are distinctly its own. It is always in order, and the knives require no sharpening.

No other chopper has the many merits of the STAR. None is more simple in construction or easier to understand or clean. From start to finish in the small points as well as in the large, the STAR FOOD CHOPPER is the best.

**CHAS. D. BROWN, Agent,**

**160-162 Duane Street, New York City.**

**IN THE SPRING** every boy wants an Air Rifle—that's the **TIME** to sell them.

We've got a good one—it sells like the proverbial Hot Cakes.

We are introducing it to the **GOOD** Hardware Trade. Perhaps you'd like to see a sample. We'll express you one prepaid and charge it at the dozen price. Let us do this—you'll surely buy a stock of them. The Rapid retails for \$1.25 and is worth every cent of the price.

**SALESMEN WANTED** to sell this and other sellers as side lines.

**RAPID RIFLE COMPANY, L'td.,**

**GRAND RAPIDS, MICH.**

## "SIMPLICITY" STUDENT LAMP.

A One Hundred Candle-Power Light for Six Hours' Service One Cent. The illuminant is gasoline, stored in compartments in the lighting fixture, and on passing through a heating chamber reaches the orifice in the form of gas, which burns with a smokeless flame under a mantle heated to incandescence. The light is not affected by temperature, and will burn equally well in summer or winter. The lamp uses 75 stove gasoline, and is started by heating the burner with a small alcohol torch, supplied with each light. There is no odor like the old gasoline stove.

These lamps have been approved by the Board of Underwriters of Chicago.

Covered by eight patents in the United States and Canada. Ask for catalogue of complete line of lamps and our

JOSEPH DIXON CRUCIBLE CO., JERSEY CITY, N. J.

ONLY \$12.75. SEND NO MONEY

If you live within 500 miles of Chicago, (If farther send \$1.00) cut out and return this ad. Mention No. 671, and we will send you this HANDSOME ROLL TOP DESK by freight, C. O. D. Subject to examination. You can examine it at your nearest railroad station, and if found perfectly satisfactory and exactly as represented, the greatest value you ever saw or heard of, the equal of desks that others sell at almost double the price, then pay the railroad agent OUR SPECIAL

OFFER, \$12.75 and freight charges. The desk weighs about 180 pounds, and the freight for each 100 miles will be about 50 cents; 500 miles, about \$1.50. THIS DESK is 4 ft. 3 in. long, 3 ft. 6 in. wide, 3 ft. 8 in. high. Made of carefully selected oak, beautifully finished in antique, full finished back, extension slides, quarter sawed sycamore pigeonhole case, combination lock on drawers, spring lock with duplicate keys on curtain, 5 drawers on left side, lower partition for books, book closet on right hand side, drawers, pencil rests and card racks in interior, desk hand polished, dust proof curtains. THESE DESKS are made for us under contract by one of the largest and best desk makers in this country. Every desk is put out under the manufacturer's BINDING GUARANTEE, and our special \$12.75 price barely covers the cost of material and labor, with but our one small percentage of profit added. Address: SEARS, ROEBUCK & CO., CHICAGO, ILL.

**ALFRED FIELD & CO.,**

93 Chambers Street, New York

**WHY IS THE**

PAT. 1898.

**O.K. WASHING MACHINE?**  
**BECAUSE**

- 1.—It is the only Rotary washer that has Revolving Steel Ball Gearing, reducing the friction and thus making machine so light running and almost noiseless.
- 2.—The tub is made of Louisiana Red Cypress Lumber.
- 3.—The wheel turns right or left, pin wheel or dasher reverses automatically, turning the clothes back and forth through the hot soap-suds, and cleaning them without rubbing them to pieces.
- 4.—This washer is made by experienced mechanics, and will out-last any other washer on the market.
- 5.—The lid on tub closes tight, no escape of steam.
- 6.—Has a solid wringer box with iron brackets.

NOW IS THE TIME  
TO APPLY FOR  
THE

# Agency of the Doran Lighting System

USED FOR INTERIOR AND STREET LIGHTING.

Remember the FIRST in the Field will reap the harvest. Our improved Doran Lamp is the height of perfection in Hydro Carbon lamps. DON'T confound this with the common 100 candle power gasoline lamp. We have something entirely new, pronounced by ALL who have seen it the BEST thing they ever saw.

We are appointing agents now for every town and city in the U. S. It will be profitable to you because we have *positively* the best system of lighting ever invented. It has absolutely *no faults*. Every lamp guaranteed to be perfect and give satisfaction when received. As to our responsibility we refer to any bank or mercantile agency in Chicago.

## A Few of its Good Points:

- 1250 Candle Power.
- No fount to fill and break mantles.
- No shadow below, light all around.
- Turned up and down instantly with a chain.
- Simplicity. (It will surprise you.)
- Practically Noiseless.
- Handsome, looks exactly like the best electric arc lamp.
- Last, but not least, the cheapest system on the market, both in first cost and in operation, which is 1-6 of any other light of its power.

EVERY LAMP SOLD SELLS ANOTHER.

## The Eclipse Cleanable.

(Made in Burlington, Vermont.)

The only removable ice chamber refrigerator that introduces cold dry air at the bottom of provision room, getting it under and between the food and forcing the warm, moisture-laden atmosphere upwards and away to the ice, the great condenser and purifier. This is positive circulation.

It is original and has no imitator or competitor. It is a success, and the dealer who wishes to build up a permanent trade in refrigerators can do it with the **Eclipse Cleanable**.

The people like it. It does good work economically, and is attractive in appearance. Made in plain and ornamental finishes. Every one sold is a standing advertisement.

We want your trade. Let us send you a couple of samples and we will get it. We have the utmost confidence in what we are offering you. There is money in it for you and ourselves. Our interests are mutual.

# HARDWARE

At the annual meeting of the Albany Hardware & Iron Co., held March 4th, the following officers were re-elected: Charles H. Turner, president; James K. Dunscomb, treasurer; William B. Wackerhagen, secretary. The remaining directors are: George I. Amsdell, Peter Kinnear and Seth Wheeler.

The annual meeting of the P. & F. Corbin Co. stockholders was held at the office of the company March 13th. The following directors were elected: Philip Corbin, A. Corbin, J. B. Talcott, Charles Miller, C. H. Parsons, C. E. Wetmore and Charles Glover. The old board of officers was re-elected by the directors as follows: President, Philip Corbin; vice-president, A. Corbin; secretary, Charles E. Wetmore; treasurer, P. Corbin.

*The Hawaiian Almanac and Annual* for 1901 is the twenty-seventh issue of this handy reference work. It is a well printed pamphlet of over 200 pages, giving a great variety of information concerning the trade, finances, government, geography, agricultural, industrial and social conditions of the beautiful islands of Hawaii, together with special advice and items for the benefit of tourists. It is published by Thos. G. Thrum, Fort Street, Honolulu.

The Chicago Solar Light Co., 81 Fifth Avenue, Chicago, Ill., were recently in receipt of a letter from a Hardware firm in Michigan which read: "We like your Arc Illuminator so well we are now working nights instead of days. We have no desire to change the general order of things, but if our lamps make night brighter than day, what are we to do?" This unique testimonial is but one of many of a commendatory character frequently received by this company.

The Marshall-Wells Hardware Co., Duluth, Minn., now that they have moved into their great new store, which, with one exception, is the largest in the United States, have in contemplation the establishing of a branch house in San Francisco to subserve the interests of Oriental trade. The firm have had an agent in China and Japan for a year looking up the trade prospects in those countries, and it is firmly believed that success will crown their efforts in this important particular.

Fox Machine Co., Grand Rapids, Mich., whose attractive advertisement will be found on page 64, anticipate bringing out a new Steel Pulley within a very short time, and a new issue of their catalogue, which they have in contemplation, is held up in order to properly illustrate this new pulley. This company are claimed to be the original manufacturers of steel pulleys of this description, and as the new pulley will have a two-inch wheel the trade anticipate its addition to their line with some degree of interest. It will be known as their No. 10.

George H. Stowell, after an active career of thirty-seven years in Brown's Block, Claremont, N. H., has recently disposed of his stock of Hardware with the good-will of the business to Oscar B. Rand, Edward A. Ball and Henry O. King, who intend continuing the business on its accustomed lines. As Mr. Rand, who will be the business manager, has had thirty-five years' experience in his connection with Mr. Stowell, there can be but little doubt that the change will be blessed with more than the usual degree of success. Mr. Stowell certainly deserves a rest from his arduous labors as a veteran in the business.

At the annual meeting of the P. & F. Corbin Co., New Britain, Conn., the directors were authorized by the stockholders to take such action as they deemed best in the matter of the formation of a new company to take over that part of the business now conducted and known as the screw department. This department manufactures mainly certain parts for automobiles, in addition to wood and machine screws. This action is in the nature of an extra dividend to the stockholders, of the same order as was taken in the Corbin Cabinet Lock Co., which is a branch of the same concern. The stock in that case was given to the stockholders and now sells at from \$250 to \$300 a share.

The Keuffel & Esser Co., 127 Fulton Street, New York, the well-known manufacturers of drawing materials and surveying instruments, have added to their branch houses at 111 Madison Street, Chicago, and 708 Locust Street, St. Louis, a new establishment in San Francisco at 303 Montgomery Street (Nevada Block). This has been done on account of the steady growth of their trade on the Pacific Coast, and they believe that the dealers will welcome the convenience and advantage thus afforded them of obtaining their line of goods promptly at reasonable prices. John R. Carr, who has been acting as the selling agent of this company in San Francisco for some years, will be associated with W. E. Holcomb, their traveling representative, in charge of this branch. This should be a very successful move on the part of this progressive company.

At a meeting of the Board of Governors of the Hardware Club of New York, held on March 1st, the following gentlemen were unanimously elected to membership in the club:

Joseph Leeming, 73 Warren Street.  
Thomas L. Leeming, Jr., 73 Warren Street.  
George Cook, World Building.  
E. L. Goodsell, 10 Jay Street.  
R. Vincent Tobin, 203 Broadway.  
Abram Wyckoff, 253 Broadway.  
William C. Morrill, 277 Broadway.  
David Banks, Jr., 21 Murray Street.  
James C. Harrington, 26 Murray Street.  
George Gain, 150 Nassau Street.  
Frank J. Hutton, 206 Fulton Street.  
Frank Ames Hoyt, 73 Reade Street.  
Fred. J. Miller, 218 William Street.  
Frank H. Simmons, 110 Centre Street.  
Frederick E. Walker, 110 Centre Street.

The Eastern office of the Niles Mfg. Co., Chicago, Ill., is at 107 Chambers Street, New York, in charge of V. A. Musset, who designs carrying a stock in order to supply the trade east of Pittsburgh. The Niles Mfg. Co. report that their new style Jamb Hinges and Blanks are daily becoming more and more popular, a number of unequaled features making this fact possible. No sagging of the door, no jamb strip required, no projections on sides of door are features that assist materially. Then, again, the strength, fine appearance, etc., attract the architects, who are largely specifying them, and for inside work it enables some economy to be used, from the fact that instead of a pair of hinges one hinge and a blank make a set, thus saving about 25 per cent. of the cost. Their bronze and brass metal hinges and blanks are equipped with case-hardened steel bushings and spindles, and, like the iron ones, are made in all the various finishes.

## Editorial Trade Review.

The favorable weather we are having in the Eastern States conveys a general feeling of an early opening of navigation along the inland water routes, and of a general impetus being given to transactions involving the purchase of supplies and repairs, by the aid of which preparations the general improvement so confidently anticipated will become an established fact.

The demand on the retail dealers promises to be a heavy one, and stock preparations are being made accordingly. Orders are going forward by every mail to the favored jobbers, and the fear of advancing quotations, indicating a state of trade in which confidence in the future is a large factor, does not seemingly deter the dealer from making needed purchases, there being no delay in order that a bargain or deal may be made before decision.

Manufacturers even now find from the large number of orders already booked greater difficulty in making prompt shipments than they had apprehended, and urgent letters are daily received suggesting earlier deliveries than was at first contemplated, but which it is difficult to concede.

The improved state of trade, as order books are gradually filled by the demands of customers, forces to the background all the special discounts which earlier in the season were occasionally to be enjoyed by the purchasers of a Spring's specifications. Prices stiffen as the season advances in an uncomfortable manner for the hesitating buyer, and makes a subserviency to his former views quite impossible.

The tone of the iron and steel market, of course, is at the foundation of these rigid conditions of the present trend of trade. Heavy goods, being invariably in the forefront of a hardening market, feel the influence of the in-

creased cost of raw material first, and strengthen the entire line by constant fluctuations, invariably of an advancing character.

It is very natural that a speculative tone will occasionally become perceptible in orders given on a rising market, but the tendency, however, is confined to the supplies wanted for a single season, as few buyers would have nerve enough to lay in stock to run over August first. Travelers who are making supplementary trips to ascertain the conditions of future traffic, even before the goods are all delivered on midwinter requisitions of Spring goods, report finding business not too animated. This would indicate a desire to have the season fully open for business under the usual demand before estimating supplementary requirements, as yet undeveloped except in the realms of speculation.

The continued excellence of an export demand for the products of our mills and factories is still of a pronounced activity, and there is everything to hope for in this extension of our industrial products abroad, a suspension of which would undoubtedly excite suspicious forebodings for our future prosperity.

The publicity given by Hardware conventions and the full reports in the trade journals of the new and improved methods for transacting business have had, naturally, the effect of starting a number of new concerns in many sections of the country. The increasing supply of money everywhere noted where agricultural activity has been the mainstay makes it desirable that a larger rate of profit should be made by its use than simple interest from a banking standpoint could promise; so the tendency is toward an established, well regulated line of business, of which grade of commercial effort Hardware has ever been regarded of conservative importance. Many new stocks have been bought from the jobbers, and this has made a demand so important, frequently in the large centres, as to compel already the working at night to avoid being swamped at an early date by regular trade. Trade tools of all descriptions are reported in good demand, the continued employment of the skilled artisan making this movement gather force as the weeks go by.

## Favorable Condition of Our Exports and Imports.

Exports from the United States continue to increase, and the fiscal year 1901 seems destined not only to break all records, but perhaps touch the billion and a half-dollar line. For the 12 months ending with February the total is \$1,490,194,985, and for the 8 months of the fiscal year is \$1,015,185,374. Thus the record presented by the February statement of the Treasury Bureau of Statistics at least suggests a billion and a half record for the fiscal year 1901, since the 12 months ending with February are less than \$10,000,000 below that sum, and the 8 months of the fiscal year are \$15,000,000 above the proportion which 8 months of the 12 included in the fiscal year would be called upon to furnish of the \$1,500,000,000 total.

No eight months' period in the history of our export trade shows as large a total of exports as the 8 months ending with February, 1901. The total exports during that period are, as above indicated, \$1,015,185,374, against \$919,473,471 in the corresponding months of last year, and \$602,666,873 in 8 months of the fiscal year 1896, having thus increased more than 50 per cent in five years.

The favorable balance of trade, or excess of exports over imports, shows an even greater increase, being \$492,224,904 for the 8 months ending with February, against \$364,219,897 in the same months of the preceding fiscal year, and \$61,472,040 in 8 months of the fiscal year 1896. No eight

months' period in the history of our export trade has shown as large exports or as large an excess of exports over imports as that ending with February, 1901, and no 12 months' period ending with February shows as large exports or as large an excess of exports over imports as does the 12 months' period ending with February, 1901.

On the import side the figures are also satisfactory. The imports of February, 1901, are nearly \$5,000,000 less than those of February, 1900, and those for the 8 months ending with February are \$32,000,000 below those of the corresponding months of the preceding year, while those of the 12 months ending with February, 1901, are also slightly below the 12 months ending with February, 1900. The total imports in the 8 months ending with February were \$522,960,380, against \$555,253,574 in the 8 months of the preceding fiscal year, and \$541,194,833 in the 8 months ending with February, 1896. Thus the imports of the 8 months' period show in the five years a decrease of about \$20,000,000, while the exports show an increase of over \$400,000,000, comparing the 8 months ending with February, 1901, with the 8 months ending with February, 1896.

### Comparison of the World's Commerce.

A picture of the world's commerce in 1900 is presented in some figures just published by the Treasury Bureau of Statistics as a part of the monthly summary of commerce and finance. It shows the imports and exports of twenty of the principal countries of the world down to the latest attainable date, in many cases including the final month of the year 1900. The figures in most cases are for that portion of the fiscal year which had expired at the latest date for which the figures can be obtained, and compare the imports and exports of this latest term in question with the corresponding months of the preceding fiscal year, showing the increase or decrease of imports or exports in each case.

The figures are especially interesting in the opportunity which they offer to compare the present condition of the commerce of the various countries with that of one year ago, and to compare the growth of our own commerce with that of other countries. In the latter opportunity the figures are particularly gratifying. They show that the exports of the United States in the 7 months ending with January, 1901, increased just \$100,000,000 over the corresponding months of the preceding fiscal year, while those of the United Kingdom in the same months increased just \$50,000,000 over the corresponding months of the preceding year. Germany's increase in exports for the 12 months ending with December is \$49,000,000 over the year 1899, while France shows a decrease of \$14,000,000 in 1900, as compared with the year 1899. Argentina during the 9 months ending with September, 1900, shows an increase of \$5,000,000 in exports over the same months of the preceding year; Austria-Hungary in the calendar year 1900 shows an increase of \$10,000,000 over 1899; Belgium shows a decrease of \$12,000,000 in the calendar year 1900, compared with 1899; Canada for the 5 months ending with November shows an increase of \$4,500,000; Russia in the 10 months ending with October, an increase of \$38,000,000; British India in the 7 months ending with October, a decrease of \$15,000,000; Italy in the 11 months ending with November, 1900, a decrease of \$6,000,000.

Turning to the import side, the figures also show a satisfactory condition with reference to the United States, as compared with that of the other countries presented. In the 7 months ending with January, 1901, the imports into the United States were \$28,000,000 less than those of the same months of the preceding fiscal year, while those of the United Kingdom in that time showed an increase of \$27,000,000. Austria-Hungary shows in the full year 1900 an increase in imports of \$15,000,000; Belgium for the same period, a decrease of \$10,000,000; France in the full year 1900, a de-

crease of \$22,000,000; Germany in the same period, an increase of \$18,000,000; Italy in the 11 months ending with November, an increase of \$10,000,000; Mexico in the 4 months ending with October, an increase of \$2,000,000 over the corresponding months of the preceding year, and Spain in the 11 months ending with November, a decrease of \$5,000,000, as compared with the same months of 1899. For the 7 months ending with July, 1900, the Philippine Islands show an increase in imports of over \$2,000,000, and in exports of nearly \$6,000,000.

The tables of the Bureau of Statistics are as follows:

Countries and Periods.	Exports.	
	1899-1900.	1900-1901.
From—		
Argentina, 9 months ending September.....	\$113,501,175	\$118,230,153

\*Domestic exports only.

### The Romance of Gas.

A recent number of the *Contemporary Review* contains an exceedingly able article on "Gas Light," by an author who, in the plainest, yet most accurate of language, describes the revolution wrought in artificial illumination by the discovery of the incandescent mantle. In sober truth this story may be called a romance. For years highly successful attempts were made to improve upon the original "hole in a pipe," from which coal-gas was consumed; the fishtail, batwing, argand, and regenerative burners were invented, each being an improvement over its predecessors in the economy with which the carbon of the gas was rendered luminous. Now all these devices are superseded; the inherent illuminating power of the gas is no longer of primary importance, calorific value becomes the chief criterion, and this change has been mainly effected by the researches of one man—Dr. Carl Auer von Welsbach. Of course, Welsbach did not "invent" the incandescent system of lighting; nothing of great benefit to mankind is ever "invented"; like Topsy, it "grows." Drummond, Fahnehjelm, Clamond, were all workers in the same field; but the greatest of them all was Bunsen. Nevertheless, to Welsbach belongs the credit of devising the first incandescent burner of any real practical utility; but he was dependent upon the atmospheric flame. The mantle is to be seen in every town where coal-gas has penetrated, and it is found in most streets and most houses of the civilized cities throughout the world.

Credit for a large part of the excess of \$200,000,000 shown in all exports is, of course, due to the immensely increased value of the cotton shipments in 1900. These, it might be observed, were 14 per cent. greater in quantity and 64 per cent. heavier in value than in 1899.—*Exchange*.

## LEGAL CORRESPONDENCE.

Conducted by William Marston Seabury, Attorney and Counsellor at Law,  
No. 43 Cedar Street, New York.

Any subscriber to "HARDWARE" is privileged to ask any legal question he pleases in this Department and it will be answered free of charge. Address all communications to Editor "HARDWARE," No. 277 Broadway, New York City.

QUESTION: Two years ago I was a depositor in a Middletown, N. Y. bank, owned by a private banker. At that time I removed to Deckertown, N. J. I called at the bank to get my bank book, which was written up and given me. I had a balance due me of \$481.12. I checked this out of the bank, except \$63.81, and to be sure that was the exact amount still in this bank I again called at the bank, and was told that there was still a balance of \$63.81, which confirmed my figures. The bank knew that I was checking my money out of the bank to close the account, and I checked the \$63.81 out, thus closing the account. One year and a half after this the banker notified me that I had overdrawn my account \$50, and the reason for it was, that in charging my checks up a hundred-dollar check was, through mistake, charged at \$50. I want to know if he can by law collect this \$50 now, two years after this account was closed.

REPLY: The relation of debtor and creditor existed between you and your banker while you were a depositor in the bank in question. If when this relation ceased to exist you had overdrawn your account by \$50, you became indebted to the banker for this amount. This being a simple contract debt, action must be brought thereon both under the New York and New Jersey statute of limitations within six years from its accrual. But the question to be determined is whether or not this debt exists, or, in other words, Did you overdraw your account? If your former banker brings action against you to recover this sum, on him lies the burden of proving the overdrawing of your account by a preponderance of the evidence, which considering the fact that at the time of your closing the account not only your books but his own showed your accounts properly balanced, would seem to be an extremely difficult, if not an impossible, thing for him to do. The question of your overdrawing the account is one of fact to be determined by a jury. In this aspect of the case, you alone should determine the advisability of your paying the \$50 or going to trial, since the verdict is entirely with the jury, and no one can foretell the determination to which they may come. Upon the state of facts before us, if we felt that we had not in reality overdrawn our account, we should, were we in your place, decline to pay the sum demanded. But, as we have already indicated, this is a matter upon which no one is competent to advise you.

QUESTION: My business has been in a bad condition for some time, and I have a good many creditors. I have been thinking of going into bankruptcy to clear myself of debts, so I could start in business again without creditors. Kindly inform me whether my creditors could reach what property I have, if, before I went into bankruptcy, I made a bill of sale of all my property to a friend of mine.

REPLY: If this were done, it would be a clear attempt to defraud your creditors, and your trustee in bankruptcy could, and undoubtedly would, begin an action to set aside your bill of sale to your friend, and take your property and apply it to the payment of your creditors. We would not advise your attempting any such plan as that suggested, for, although many consider the bankruptcy law very lenient to the bankrupt, it is not so lenient when creditors are being deprived of their just rights. The result of such an action on your part would be that one or more of your creditors would object to your discharge, and if your discharge were refused, as it probably would be, they would very likely prefer to get a judgment against you rather than come in with the rest of the creditors and get their pro rata share.

QUESTION: About six weeks ago I was crossing Eighth Avenue in New York City with my son, a boy of twelve years of age, and before we could get safely across the track we were overtaken and struck by a trolley car. When the car was within twenty feet of us, I saw the motorman turn around and look back into the car, and when he turned

around again he could not stop the car in time to prevent its striking the boy and seriously injuring him. My son's leg was broken, and he was injured internally, and I fear he will never be perfectly well again. Can I sue the company?

REPLY: You have a cause of action against the railroad company for the loss of services of your son, and your son has a cause of action for personal injuries, if the same have resulted from the negligence of the railroad company or its servants. A father is entitled to the services of his minor children, and when he is deprived of these services by some injury to his child, he has a cause of action therefore. Before your son can sue, you should have yourself or some one else appointed as guardian *ad litem* for the purpose of the suit. Should you settle one of the suits, be careful that you do not release the other one. In the event of a settlement, we should advise you to submit any papers you were requested to sign to a lawyer before you sign them.

QUESTION: Some time ago I gave a mortgage of \$5000 on my house in New York. I and my wife both signed the mortgage, and another document which I understood was a bond. The mortgage will be due in about six months. I am about to sell my house, and would like to be informed if I would be liable in any way for this mortgage after the house is sold.

REPLY: If you sell your house upon which there is a mortgage this will not release you from liability—or the bond to which the mortgage is collateral. If your purchaser buys the house "subject to the mortgage" and does not "assume and agree to pay" the debt, he will not be personally liable for the debt, and if on sale the property did not bring the amount of the mortgage, a judgment for the deficiency could be entered against you. If, however, the purchaser "assumes and agrees to pay" the mortgage, the mortgagee will be able to obtain a deficiency of judgment against the purchaser as well as against yourself, if on sale the property does not bring the amount of the mortgage.

## Electrical Data.

Statistical data is always interesting, and that relating to the application of electricity at the close of the century, even if limited to a single country, is particularly so. From a recent important address before one of the English engineering societies are quoted the following facts and figures, showing the extent of the electrical industries in the United Kingdom. The three great uses of this subtle agency appear to be for telegraphic, lighting and more recently traction purposes. In addition there is a rapidly-growing number of industries relying upon electrical power, and again others dependent upon the chemical or heating powers of electrical currents, as, for instance, the manufacture of alkalies and bleaching powders, calcium carbide manufacture, the refining and reduction of metals, plating electrotyping, sewage purification, and, in a minor degree, medical and surgical treatments.

These figures are very impressive. The United Kingdom boasts of 2,584,000 miles of overhead telegraph lines and some 85,000 miles of underground conductors. They have 20,537 miles of national submarine cables and 177,989 miles privately owned. Forty-two cable ships are kept for the maintenance of these cables. The capital invested in electric lighting and power is about \$116,395,000, almost equally divided between municipal and private enterprises. The number of lamps connected to these stations is not far from 8,000,000. The telegraphs, which are under postal direction, handled 90,415,000 messages during the year.

It is estimated that the production of incandescent lamps throughout the world is about 165,000, of which number about 100,000 represent the output of the United States.—*Exchange*.

Jeweler—This ring is \$1 more than the plain one, on account of the chasing.

Farmer—See here, master, yew don't haf ter chase me. I'm giving ter pay fer what I git.—*Ex*.

## HARDWARE TRADE IN ABYSSINIA.

The ancient Empire of Abyssinia, or Ethiopia, includes the Kingdom of Tigre, with Lasta in the northeast; Amhara, with Gojam in the western centre; Shoa in the south, besides the outlying territories and dependencies of ill-defined boundaries.

Emperor Menelek II. is the present ruler of Abyssinia; he is assisted in the government of his country by a State Council. A railway is now under way of construction; it is being built by a French syndicate, and starts from Djibouti in French Somaliland; so far, about 100 miles of the route have been surveyed and 50 miles of the line laid down. There is also a telegraph and telephone line in course of construction between Adis Abbaba and Harrar. At the present time, however, nearly all goods entering Abyssinia are transported on mules, packhorses, donkeys, or camels.

The principal buyers are the Emperor and the various Rases, who, of course, possess the bulk of the wealth of the country. But the habit of buying is rapidly growing among all classes. The Abyssinians are daily becoming more disposed to convert their dollars into cloth, pots and pans, and articles of foreign manufacture which some years ago could not have been sold to them. Much money is, however, still buried.

The trade of Abyssinia is undoubtedly increasing, and with the reopening of communication with the Soudan, and of the Massowa route, this tendency may be expected to grow. The orderly government of the country under the Emperor Menelek has inspired an amount of confidence, both among natives and the white population, which formerly did not exist, and a sense of security disposes the Abyssinians to invest in wants, and even luxuries, the dollars which, under other circumstances, they would probably bury as they did in former times.

The imports of iron goods are especially increasing. The total absence of statistics makes it difficult to obtain reliable information regarding the trade of the country. The facts and figures which follow have been furnished by prominent merchants. They represent the estimate of the most trustworthy authorities for the trade of Adis Abbaba and Harrar during the dry season of 1899-1900, but they obviously can only be considered as a very rough means of showing approximately the relative amounts of the various imports.

The principal iron goods imported into Adis Abbaba were as follows: 12,000 enameled cups and 12,000 enameled bowls, chiefly of German and Austro-Hungarian origin. The chief demand is for cups and bowls which hold half a pint. The local prices for these articles vary from one to three dollars, according to size. (The monetary unit is the Maria Theresa dollar, which equals 50 cents U. S. currency.) The imports of cooking pots, chiefly of enamel ware or copper, amounted to about 2,000 pieces, the price being from one to two dollars. They are also almost entirely of German or Austro-Hungarian origin. Cheap hanging and wall lamps are also in good demand. Some 500 lamps were imported, entirely from Germany, and sold at prices ranging from five to ten dollars each. There were also imported some 4,000 baking pans, the sizes most in demand being from one foot to three feet in diameter. The average prices realized varied between one and three dollars. These pans come principally from India and Germany. The imports of files, rasps, nails, penknives, locks and keys, long and small screws, saws, and a few simple carpenters' tools may be put down at \$5,000, chiefly supplied by the United Kingdom and Germany. A considerable demand exists also for so-called "Arabic" coffee

pots, which come exclusively from Bombay, and which are sold at from one to two dollars each. Three thousand sword blades were imported from France, their average price varying from five to six dollars per blade. Curved blades are more popular than straight. There is at present no demand for scabbards, buyers preferring to manufacture them personally. As far as rifles are concerned, it may be said that the market is still overstocked. This is especially so in the case of out-of-date military rifles, such as Gras. There is, however, a demand for "Express" and Lee-Netford, which usually find a ready sale. The imports of ammunition amounted to about 2,000,000 Gras cartridges, all from France. The Emperor buys a considerable quantity of powder and lead for the local manufacture of cartridges, but no figures on the imports are available.

The imports into Harrar consisted chiefly of the same articles as those imported at Adis Abbaba. Some 45,000 enameled cooking pots, cups and bowls came from Austria-Hungary, Germany, and Belgium. The cooking pots (enamel) were sold at from one to three Maria Theresa dollars per piece, while the average price of cups and bowls was one dollar for two to four pieces, according to quality. There is also quite a lively demand at Harrar for iron plates, which the Abyssinians use for cooking bread. Some 46,000 plates were imported, chiefly from Great Britain and Belgium, and the price of these plates varied from one half to two dollars each. There were further imported 2,000 lamps, the average price of which was from one-half to two dollars; 5,000 sword blades, from France and Belgium (Liege), sold at from five to ten dollars; 65,000 rifles from France and Russia, sold at from twelve to fourteen dollars each, and miscellaneous Hardware goods valued at about \$25,000, chiefly from Germany, Great Britain, France and Belgium.

There is little doubt that by proper efforts a good share of this trade could be secured by American manufacturers. The trade in cotton goods is almost monopolized by the United States. The imports of American cotton (gray sheeting), into Adis Abbaba and Harrar last year amounted to over 500,000 pieces, valued at about 2,160,000 Maria Theresa dollars!

H. L. G.

### All-British Pacific Cable.

The new all-British Pacific cable has been definitely decided upon, and a tender of \$8,985,000 for furnishing and laying the same accepted. The cable will be 7000 miles in all. The longest link, approximately 3500 miles, will be the longest single section in the world. The route taken by this new cable from Canada to Queensland, will be via Fanning Island, Fiji and Norfolk Islands, but the exact route will be kept secret in order to enhance the difficulty of cable-cutters in war time. As a matter of fact, the cable is being laid with the idea of affording greater security to Great Britain and her colonies in times of war by insuring uninterrupted cable communication by means of a cable touching only at British ports. It will be laid largely in deep water, and is to be completed before the end of 1902.

Consul-General Turner reports from Ottawa, February 23d, 1901, that a member of the House of Commons has given notice that he will make a motion not to allow the preferential tariff of 33 1-3 per cent. on English goods unless they come to Canada by Canadian ports. If this motion prevails, adds Mr. Turner, it will quite seriously affect the steamship lines of Portland, New York and Boston.

### "Automobile" Can.

The Wilmot & Hobbs Mfg. Co., Bridgeport, Conn., have recently added to their line of oilers, the one which we illustrate in this article, which is marketed under the name

FIG. 1.

of the "Automobile" Can, see Fig. 1. In connection with the line of work suggested by the name, it should meet with a large and extended sale. The can is finished in heavy nickel plate, and is extremely neat in appearance, so that it would be a matter of pride to have so highly finished an

FIG. 2.

article in connection with the equipment of an automobile which would undoubtedly be more or less exposed in its use when driving. The spout, as shown by the illustration, when not in use, is inverted and concealed inside the can, see Fig. 2, the hermetical screw cap preserving the volatile or otherwise explosive properties of the contents, and this arrangement is not at all objectionable when gasoline, benzine or alcohol is used, as all of these commodities are so volatile that before one would have time to remove the

spout and screw it on the opposite way, the moisture would be scarcely apparent, and would render the handling under these circumstances unobjectionable, which would be essentially different in the case of oil being used. It is also claimed by the manufacturers that this can is applicable to every kind of motor carriage that is run with gasoline, for that reason that a gallon of fluid will run even the steam carriages a distance of ten miles, and as for the other classes, it would take thirty to forty miles to consume an equal quantity. Altogether, it is a desirable addition to an important line of useful appliances, and it would seem as though it were an essential part of the equipment of the twentieth century vehicle.

### Wood's Improved Can Opener.

There is shown in this connection the "Woods" Can Opener, manufactured by Frank White, 76 Park Place, New

FIG. 1

York, and which is being marketed to the trade by The Woods, Bacon Co., 127 Duane Street, New York.

The cut, Fig. 1, shows the "Woods" Can Opener, No. 100, which is a combination can opener for round and square cans. The shank is drop-forged cold-rolled steel, handsomely nickel-plated and burnished. The cutter blades are made from cutlery steel, finely tempered and blue-steel finished.

They are provided with a hot-water-proof enameled wooden handle and packed in display boxes, one dozen in a box, see Fig. 2.

The owners do not claim for their No. 100 that it is the cheapest can opener on the market, but that it is one far superior to many. They base their claim upon the following advantages which it possesses: In opening a round can it turns the edges down and cover back by one operation. It will open any size or kind of can. In opening a square can it cuts near the edge and enables the contents to be removed whole. By virtue of the leverage obtained, the work is accomplished by scarcely an effort on the part of the operator. The operation of opening cans with the "Woods"

FIG. 2.

Can Opener is such that it is impossible to lacerate the hands, thereby eliminating the danger of blood poisoning. Its simplicity renders it easy to clean. It is self-adjusting and requires no set screw or other loose parts, the loss of which often renders other can openers useless. It is constructed from first-class material and will be found a profitable article for the dealer to handle.

Use your leisure time for improvement.

## NATIONAL RETAIL HDWE. DEALERS' ASS'N

The various State associations of retail Hardware dealers which constituted the former Inter-State Retail Hardware Dealers' Association, held their second annual convention at the Sherman House, Chicago, Wednesday, Thursday and Friday, March 6th, 7th and 8th. At this meeting it was decided that the name of the Association was of too limited application to convey an idea of the actual character of the organization, and it was decided to change the name to the National Retail Hardware Dealers' Association in order to show its national aim and purposes.

The Executive Committee held a session on Tuesday evening, the 5th inst., for the purpose of outlining a programme for the convention during the three following days, the opening session of which was held on Wednesday morning. Among those present were the following delegates from the several State Associations:

ILLINOIS.—H. G. Cormick, Centralia; Z. T. Miller, Bloomington; Wm. T. Gormley, Chicago.

WISCONSIN.—L. M. Nash, Grand Rapids; O. P. Schlafer, Appleton.

OHIO.—O. M. Scott, Marysville; W. P. Bogardus, Mt. Vernon; J. P. Duffy, Greenville.

MICHIGAN.—Geo. W. Hubbard, Flint; Charles F. Bock, Battle Creek; Fred. H. Cozzens, Detroit.

IOWA.—H. A. Cole, Council Bluffs.

INDIANA.—Irving A. Sibley, South Bend; W. P. Lewis, New Albany; M. L. Corey, Argos.

MISSOURI.—Fred Neudorff, St. Joseph.

NORTH DAKOTA.—H. T. Helgesen, Milton.

On account of the illness of the delegate from Kentucky, which State should have been represented in the opening proceedings, he was prevented from being in attendance. The Kansas Association, also a member of the National organization, was unrepresented.

There were delegates in attendance from a number of State associations that had not yet become associated with the larger organization, but who had attended for the purpose of becoming fully informed on the work of the convention, their power for doing good, and a number of other like points, in order to convey a report of progress to the State associations that they represented. It was permitted these delegates to participate in the several discussions, they being invited to do so, but on anything that required a vote, not being members, they were unable to give their full participation. The proceedings of this Association were conducted exclusively in executive session, which leaves very little for a trade paper to report.

President Miller read his annual address, which carefully reviewed the labors of the Association for the past year, the signal success of which in dealing with different wholesalers was gone over in detail. In it he suggested that manufacturers desirous of preventing their goods from getting into the hands of illegitimate jobbers should agree on the enforcing of a system by which the source of supply might be traced. He also referred to the fact that there had been more or less abuse of quantity and class differentials under which many inequitable conditions confronted the dealer to his disadvantage.

The importance of a greater degree of co-operative work between jobber and dealer was also urged, and the work done in this direction was outlined in this report.

The eminently judicious suggestion was made that the President of the Association should be relieved from the necessity of passing upon all phases of Association work by dividing the work into the following cabinet heads, viz.:

Legislative, Financial, Grievance, Jobbers and Manufacturers or Arbitrative, Membership and Organization. One member of the Executive Committee should be appointed to take charge of, investigate and pass upon whatever might present itself under any one of these heads and leave the president to pass upon whatever sundry affairs might arise during the year, and as counselor, when deemed necessary after ideas were well formulated. This plan would enable an active business man to accept the presidency, as it would practically relieve him of three-fourths of the work he would be expected to supervise.

An evil that the Association will have to remedy is found in the fact that a large number of jobbers and manufacturers do not belong to any association of national character, and consequently do not consider themselves bound by any arrangements that might be entered into between these bodies, thus presenting difficulties in adopting the conclusions of these joint bodies, be they ever so wise and just.

An interesting part of the report of the president dealt with the proposed re-arranging of the dates of the several State meetings in connection with that of the National. At present the National meets after the State Association meetings of the year are over, and this year it is impossible to put before them such uniform action as the year's business experience of the National Association might dictate.

Another suggestion was in regard to two executive, or cabinet, meetings, to be held each year by the National Association; also, the proposed suggestion of the National Association making a series of dates for the various State Associations that would insure better facilities for the Association officers, as well as the jobbing and manufacturing interests to attend as large a number of these meetings as possible, with a minimum of expense, which should be taken into consideration. Mr. Miller's report was listened to with the usual amount of interest that is felt in everything that emanates from his businesslike methods.

He was followed by the secretary, Fred. H. Cozzens, who submitted his annual report, which was prefaced by a statement regarding the fire which destroyed President Miller's store in Bloomington, Ill., last June, and which had unfortunately burned up the papers and records of the Association, with the exception of a few documents the President happened to have at his home, which naturally interfered with the work of the organization for a time. He gave a number of details regarding the character of the work he had in hand throughout the year, and also conveyed by his report the idea that his position was no sinecure. He recommended the Association to issue a bulletin either monthly or quarterly, giving a full list of those in accord with the purposes of the Association, at the same time giving reports of the work being done. By following a plan of this description, the members could be kept advised of what was being accomplished by the officers. He made another recommendation, which was that the influence of the Association should be exerted with the different State organizations, following out the plan of President Miller that the State organizations might be induced to hold their annual conventions consecutively instead of simultaneously. He further recommended uniformity in the method of conducting the different State organizations. He argued by taking the best of the methods of the several States now having State associations and getting up a simple but comprehensive system of blanks and reports to be used, much more desirable and uniform results could be obtained, accompanied with much less work on the part of the officers and members. By

adopting a plan of this kind great assistance would be given the officers of such State associations that frequently have limited experience in work of this kind, and even if they had more, are still such very busy men they are unable to give sufficient time to the matters involved. The use of blanks, he argued, would also facilitate correspondence relative to complaints which may have to be referred to the National Association. A report was given of the receipts and disbursements during the year. The secretary recommended that the word National be substituted for Inter-State in the title of the Association. Considerable discussion followed on the points touched upon, and the reports of the two principal officers, and these reports were referred to the proper committees for consideration.

The president appointed the following committees:

CONSTITUTION AND BY-LAWS.—W. P. Lewis, C. F. Bock, H. G. Cormick, H. A. Cole.

COMMITTEE ON RESOLUTIONS AND NOMINATIONS.—H. G. Cormick, H. T. Helgesen, Geo. W. Hubbard, Irving A. Sibley.

#### WEDNESDAY AFTERNOON SESSION.

At this session subjects of general interest in connection with the retail Hardware trade were taken up and fully discussed. The future of the Association was the subject of remarks by several of the delegates, all of whom were enthusiastic with regard to the prospects of its growth and constantly increasing usefulness. No formal action was taken upon any particular question, as the convention were awaiting the reports of the several committees.

#### THURSDAY MORNING SESSION.

The Committee on Constitution and By-Laws recommended a number of changes, among which was the change in the name of the Association from Inter-State to National, which was adopted by a unanimous vote.

Another change which was adopted, provided for the admission as members of individual Hardware dealers from States who have as yet no organized retail Hardware Dealers' Association. This individual membership was permitted on the payment of \$5 annual dues.

The Executive Committee was directed to correspond with the several State associations in order to arrange for successive meetings, as suggested in the report of the secretary. It was also decided to hold the annual meetings of the National Association at a specified time, but previous to the meetings of the State associations.

Then followed an animated discussion in regard to the most desirable methods for State associations to increase their membership. The mutual fire insurance methods also came up for discussion, it being a line of work that seemed to appeal to every Hardware dealer, and in which they could not do otherwise than take a greater degree of interest as they became more familiar with the economical workings of the movement. A telegram was received from Secretary-Treasurer T. James Fernley, of the National Association, sending his best greetings and hoping that the deliberations of the convention would be, as usual, productive of much good.

#### THURSDAY AFTERNOON SESSION.

The principal feature was the election of officers for the ensuing year, which resulted in the selection of the following list:

##### PRESIDENT.

W. P. Lewis, New Albany, Ind.

##### VICE-PRESIDENT.

Geo. W. Hubbard, Flint, Mich.

##### EXECUTIVE COMMITTEE.

Z. T. Miller, Bloomington, Ill.

H. A. Cole, Council Bluffs, Iowa.

Fred. Neudorff, St. Joseph, Mo.

Irving A. Sibley, South Bend, Ind.

H. G. Cormick, Centralia, Ill.

The constitution and by-laws provided that the Executive Committee should select the secretary and treasurer. The

committee was requested by the convention to meet as early as possible to select these officers, in order to complete an organization. A general discussion of questions involving the good of the Association took place, after which the convention adjourned *sine die*.

#### EXECUTIVE COMMITTEE MEETING.

At the Executive Committee meeting, held on Friday morning, at which they proceeded to fill the offices of secretary and treasurer, the following resolution, which is sufficiently self-explanatory, was unanimously adopted:

*Resolved*, That, whereas, the personal demands upon the time of Secretary Fred. H. Cozzens are such that it is impossible for him to continue the work incident to the secretary's office, greatly to the regret of this committee, it will be inadvisable for him to retain that position longer; therefore be it

*Resolved*, That it is the opinion of this committee that Mr. Cozzens has performed the duties of secretary with commendable zeal and skill, and that his services have been greatly appreciated by our committee; and be it further

*Resolved*, That we do hereby tender Mr. Cozzens a hearty vote of thanks for the able assistance he has given the organization and for the character of the work performed by him.

The committee elected as secretary M. L. Corey, of Argos, Ind., and as treasurer H. T. Helgesen, of Milton, N. Dak. The committee considered a number of other matters in connection with the work of building up the Association, among which was a proposition to admit to membership associations of Hardware dealers in all cities in which such local organizations have a membership of not less than fifty. The members of the committee then adjourned, expressing their gratification with the progress that had already been made in the movement to secure effective co-operation by the different State association in the direction of national effort. They were also gratified to notice that the States represented at this convention were more numerous than at the convention of 1900, and the feeling was prevalent that 1902 would see still further growth, and that under the efficient service of the newly-elected officers the national organization will be made an important factor in the Hardware industry.

#### New Zealand in Twenty-seven Days.

Mails from Auckland, New Zealand, will shortly be delivered in London in twenty-seven days, and from Sydney, New South Wales, in thirty to thirty-one days—a reduction upon the present timing of five days. This result is made possible by the enterprise of the Oceanic Steamship Co., the first to take advantage of the United States subsidy for fast mail steamers. On November 1 three sister ships, 425 feet long, 8000 horse-power and 6000 tons burden, built by Cramps, of Philadelphia, will be put into commission between San Francisco and Sydney, touching at Honolulu, Samoa and Auckland. The vessels can be turned into armored cruisers at thirty-six hours' notice.—*Exchange*.

#### Wire Fence Trade in Mexico.

It is said that more than 15,000,000 pounds of barbed wire were imported into Mexico during 1899 and that the importation of this fencing material this year will probably reach 20,000,000 pounds. The importations of barbed wire come mostly from the United States. It is only in recent years that the construction of barbed wire fences began on the ranches and farms of Mexico, and the new fence is such an improvement over the old and cumbersome stone walls that the demand for the wire has had a remarkable increase.—*Exchange*.

"What made you so long coming?" asked the boss.

"I was long because I was short," said the workman.

"Hay?"

"I had no carfare and had to walk."—*Indianapolis Press*.

## CONSULAR COMMERCIAL COMMENTS.

### PRODUCTION OF CORKS IN RUSSIA.

Deputy Consul-General William A. Heydecker writes from St. Petersburg, February 6, 1901:

The excise department of the Ministry of Finance, which has charge of the alcohol monopoly, has of late been having trouble with the manufacturers of corks. The latter attempted to form a trust against the Government in order to compel it to accept exorbitant prices. This attempt failed; but the department determined, in order to avoid similar recurrences, to open a cork factory of its own. The results afforded by tests made on a small scale and under unfavorable circumstances have proved quite satisfactory.

The yearly consumption of the excise department is about six billions of corks; the Government intends for the present to produce two billions.

As some of the largest cork factories are situated in the United States, it is quite possible that American experience and ingenuity may have devised improved machinery for the production of corks, in which case the manufacturers of such machinery would now have a good opportunity of offering their services.

### HOW TO SELL GOODS IN GERMANY.

Consul Hughes reports from Coburg, January 21, 1901:

I have already called attention to the necessity of sending bright salesmen, with a thorough knowledge of German, if we wish to introduce American goods into this country. This is especially true of the grocery and notion lines, which, if properly introduced, would find a well-paying market. Most American concerns prefer to send their goods through the German middleman, with the result that their sales are not large and the German market is flooded with worthless and impractical imitations of first-class American goods. It is useless to simply show goods in one large city; where the display will do the most good is in the small cities and towns. As an illustration of how goods introduced in this way will sell, an agent from Charleston, S. C., came here with peanuts and popcorn. He had been told that he would do no business here, as the place was too small; but he sold out his stock in just three hours and had to telegraph for extra supplies.

### NON-INFLAMMABLE RUBBER TUBING.

Consul Hughes, of Coburg, Germany, reports that Müller & Korte, of Pankow, near Berlin, have brought out a new kind of rubber tubing, to be used in cases where damage to the rubber is to be feared either from the flame itself or by contact with hot dishes or stands. The rubber tube is sheathed with asbestos and the asbestos coated with incombustible paint, lest the fibers should peel off. The tubing remains pliable and can be cut as before. Burners with such rubber tubes may be placed on sand baths or hot stoves. The protection is, of course, not absolute; for when the heat becomes too strong the rubber inside will give way. The well known pipes with metallic spirals were originally made with the same object, but they have found other useful applications, and they differ from these new tubes by being hard and inclined to break; once leaky, they cannot be mended.

### IMITATIONS OF AMERICAN GOODS IN SWEDEN.

Consul Bergh writes from Gothenburg, January 9, 1901:

My attention has been called to the forks sold by a wholesale Hardware dealer of this city as American products. This fork, an inferior imitation of the original, is sold as an "American manure fork" at a price much lower than that for which a genuine American fork can be offered. This is only one sample of the many German imitations offered

for sale in Sweden and represented to be "best American goods." This, of course, does great harm to the American trade, as the buyer will soon discover that he has bought an article not worth the money, and will blame the American manufacturer. It causes prejudice against everything of American make. Sweden has no law compelling the mark of origin to be placed on imported goods, and it is very easy for German exporters and Swedish importers to flood the market with this kind of goods. The Swedish law says simply that foreign-made imported goods shall not be marked, stamped, or branded so as to make the purchaser believe that the goods were manufactured in Sweden.

### A NEW ALLOY IN GERMANY.

Consul Albert writes from Brunswick in regard to Magnalium, a new alloy of aluminum and magnesium, with a percentage of from 2 to 30 per cent. of the latter metal. Magnalium, it seems, is free from the bad qualities of aluminum, while it retains its light weight, firmness, and tenacity. It is especially applicable in the automobile industry, in electro-technics, aeronautics, and dentistry. It can be worked with the file, lathe, and planing machine; it is also admirable as a solder, and its pliability adapts it as a border for lenses and eyeglasses. Magnalium is absolutely weather-proof and does not rust.

### TOURISTS' POSTAL CARDS IN GERMANY.

Consul Diederich, of Bremen, under date of January 28, 1901, writes in regard to the popularity of tourists' postal cards in that country. There is no city nor hamlet, he says, no place of historical interest, but has cards embellished with some design appropriate to the locality, which offer convenient means of communication with friends at home. Last summer, according to postoffice returns, 20,808,313 cards were mailed in one week. Forty-six per cent. were tourists' cards. The postage collected daily on these cards averaged about \$15,845.33. Berlin furnished the largest quota—137,000 cards. Next followed Dresden, with 38,000; then Hamburg, Cologne, Leipzig, Breslau, Frankfurt, Hanover, Halle, Düsseldorf, Wiesbaden, and Kiel. Bremen stood thirteenth in the list, with a daily average of 8,584 postals.

### FRENCH DEMAND FOR SHIPS' FITTINGS.

Consul Brittain writes from Nantes, February 7, 1901:

Yesterday Mr. Edward Kerr, of 3 rue Gresset, Nantes, called at this office requesting information regarding the largest and most responsible firms in the United States engaged in the manufacture of ships' fittings, such as pumps, scuttles, engine-room steering telegraphs, steering apparatus, patent lavatories, water-closets, etc. There are extensive shipyards at Nantes and at St. Nazaire, west of this city, where quantities of these appliances are constantly being used, and if a determined effort is made by American manufacturers, I have reason to believe they will be able to procure substantial orders. Mr. Kerr is anxious to be placed at once in communication with the most extensive manufacturers. He has previously purchased these goods in England, but wishes to examine American products, and if satisfactory will place orders in our country.

### ICE AND REFRIGERATORS IN BRAZIL.

Consul Giromondi writes from Santos, recently:

The consumption of ice in Santos, and, indeed, in the State of Sao Paola generally, is increasing every day. This is due principally to the unceasing demand for ice in the restaurants, hotels, and other public places where drinks are served. Foreigners—chiefly Americans, Englishmen, and Germans—who are unaccustomed to a tropical climate are

loudest in the call for this commodity. No doubt, the use of ice would be far more general if companies similar to those in the United States were organized, to deliver it from house to house.

I believe also that American refrigerators would sell well in Brazil. In this State, only the best hotels have refrigerators, though they are beginning to be employed in a few saloons, where they have been found most useful and convenient. So far, however, they have not been introduced to any extent in private houses. When I say that only about one out of twenty meat dealers uses refrigerators, one may judge of the opening here for these useful articles. Properly introduced, there is no reason why they should not meet with a ready sale.

#### ICE IN FRANCE.

Consul Haynes writes from Rouen, January 1, 1901:

The French palate, so sensitive and highly educated, knows nothing of the delicacy of frozen dainties. There is an open field throughout the most of France for everything connected with the preparation of the cool drinks. Ice-cream freezers, milk shakers, soda-water fountains, and refrigerators would find a ready sale here if the people knew of the comfort to be derived from their use. The Frenchman has for generations innumerable liked his hot wine and hot rum and hot punch, but he has never thought of, or at least has never cared to try, the effect of an opposite sensation upon his palate. This city of over 150,000 people has no ice factory, though a few people keep ice in their cellars. If the French were given an opportunity to try them, they would not be long in entering the market for ice cream, ice shavers, electric fans, and kindred articles, and the American who introduced them would without doubt put a considerable amount of money in his own pocket.

#### Harnessing the St. Lawrence.

The Massena plant of the St. Lawrence Power Co. has been fitted out with electrical apparatus by the Westinghouse Electric & Mfg. Co. Machines to generate 75,000 horse power have been made in East Pittsburgh. The enormous capacity of the Massena plant is best understood by comparison with that of Niagara Falls. During the last five years, ten 5000 horse power Westinghouse generators, making a grand total of 50,000 horse power, have been installed at Niagara. The station at Massena will contain fifteen 5000 horse power generators.

The natural conditions at Massena are said to be among the most favorable in the world. The volume of water in the St. Lawrence is enormous. It undergoes a fall of fifty feet at the Long Sault Rapids. A canal has been cut through some miles of level country above the falls and it is said that sufficient water will be brought through to develop 150,000 horse power. A power house is being built on the bed rock of the Grass River. It will be 700 feet long and 150 feet wide. Turbines will be placed on horizontal shafts in sets of three each. Two turbines of each set will be sufficient to operate one of the big generators, allowing any one of the three to be cut out without interfering with the work of the other two. Each of the main generators will weigh 175 tons, stand 22 feet above their foundations, and cover a floor space of 22x18 feet. According to a correspondent of the *Pittsburgh Dispatch*, the plan for controlling the great power of the St. Lawrence is simple. One man will do it by a series of electric buttons arranged on small table. The touch of one will direct a power equal to that used by the three largest steamships in the world. The table will be placed on a stand raised some feet above the floor of the power house and in the center of it. Every group of indicating instruments is in plain sight and the operator has under his eye at every movement the fifteen big generators.

Venture not upon the threshold of wrong.

#### Nicholson File Co.'s Most Recent Purchase.

The following circulars, having reference to another important purchase of an old established File plant by the Nicholson File Co., are sufficiently self-explanatory to make much additional comment unnecessary:

Office of Kearney & Foot Co., 100 and 102 Reade Street, New York City.

The Nicholson File Co., of Providence, R. I., having purchased the property of the Kearney & Foot Co., of Paterson, N. J., the business of this company passes wholly into their hands. The works of the company at Paterson, N. J., and Kent, Ohio, will be under their control and management from this date, and all accounts due this company at this date must be paid to them.

The long and successful career of the Nicholson File Co. has made the name a synonym for all that is of good repute, in quality of goods, and in business methods, and will secure to them the ready transfer of the trade which has been so kindly bestowed upon us, and for which we take this occasion to extend our most hearty thanks.

KEARNEY & FOOT Co.,  
JAMES D. FOOT, Pres't.

March 11, 1901.

Office of Nicholson File Co., Providence, R. I., U. S. A.

Having become sole owners of all the property of the Kearney & Foot Co. of Paterson, N. J., the factories of this company at Paterson, N. J., and Kent, Ohio, will be operated by us, in the continued manufacture of the well-known K. & F. brand of files.

All orders and inquiries for prices, all remittances, and all correspondence in connection with the business of the Kearney & Foot Co. should be addressed to the Nicholson File Co. at Providence, R. I.

A stock of the K. & F. files will continue to be carried at the store, 100 and 102 Reade Street, in New York City, for the convenience of those doing business in that city, or in the adjacent cities, whose wants require the immediate filling of small orders.

We hope to retain the trade of all who have heretofore dealt in the K. & F. files, and it shall be our aim in the conduct of our business to merit their continued loyalty to this brand of files.

NICHOLSON FILE Co.,

March 14, 1901.

SAM'L M. NICHOLSON, Pres't.

The Central Supply Co., of Des Moines, Iowa, is a newly incorporated concern. Its members consist of five traveling men, who have formed themselves into a company for the purpose of acting as Western sales agents for Eastern factories. They have completed contracts with the following firms: The Barnes Mfg. Co., of Mansfield, Ohio, Iron Pumps and Fittings; the Baxter Stove Co., of Mansfield, Ohio, Stoves and Steel Ranges; the Moline Pump Co., of Moline, Ill., Wood Pumps and Stock Tanks; the McCormick Mfg. Co., their line of Lawn Swings and Shoveling Boards; the Gurney Refrigerator Co., Fond du Lac, Wis., for their line of Refrigerators and Ice Chests. They expect to add Buggies, Wagons, Buggy Poles and Shafts, Rope and Binding Twine, and take up, from time to time, Hardware and Implement Specialties. They have a large three-story warehouse located on the Des Moines Union tracks for the storage and distribution of the goods they sell. Their goods are arriving now daily, and it looks as though the boys have struck on a good plan for themselves and the factories they represent.

"If we will all pull together, brethren," said the pastor of a church which was in financial distress, "we can do something."

Thereupon the Wealthiest Man in the congregation hastily drew his leg in out of the aisle.—*Detroit Free Press*.

## THE PAN AMERICAN EXPOSITION, 1901.

THE PAN-AMERICAN EXPOSITION TO BE A MAGNIFICENT SURPRISE.

It is promised for the Pan-American Exposition that it will surpass in beauty any previous exposition in the world's history. It is also expected that it will outrival its predecessors in many other ways, for at no time have such wondrous achievements in all arts, such perfection in the hundreds of trades been attained. But the purpose of this article is to treat, in a general way, of the plan of the Exposition, the symmetry of arrangement and the exterior beauty that represents the careful expenditure of several millions of dollars. Accompanying this article is a birdseye view of the

sition, as seen in the foreground just north of the Lake. On the northern shore of the Lake is situated the life-saving station erected by the Federal Government, where daily exhibitions will be given by a crew of ten men showing the uses of modern life-saving apparatus as employed upon our coasts. Hidden from view, upon the southern bank of the Lake, a beautiful casino and boathouse have also been built by the City of Buffalo for Exposition uses.

The symmetrical grouping of buildings will be at once noted by the observer. Beginning at the formal approach, just north of the Lake, the eye follows northward between

Exposition plot, showing the magnificent work in its completed state. The view is from the south and shows an area one mile and a quarter long and half a mile wide, there being 350 acres in the enclosure. In the immediate foreground is a portion of Delaware Park, one of the famous beauty spots of Buffalo. The view shows the Park Lake with the North Bay at the left, and in the left foreground south of the bay may be seen a portion of the Albright Gallery of Art, a beautiful permanent building of white marble, the gift of John J. Albright, of Buffalo, and costing over \$400,000. North of the Bay is the New York State Building, also a permanent structure of marble. These two buildings are in the style of Greek temples, one containing reminders of the Parthenon and the other resembling somewhat the Erechtheum upon the Acropolis at Athens.

Between the North Bay and the Lake the City of Buffalo has built, at large expense, a new and beautiful bridge of heavy masonry, known as the bridge of the Three Americas. This bridge carries the broad thoroughfare which leads from the main southern entrance to the approaches of the Expo-

two rows of ornamental columns to what is known as the Forecourt. East of this are the State and Foreign buildings, forming in themselves a very interesting feature of the Exposition. Near these, also, are the buildings for the special ordnance displays representing the products of several hundred manufactories in this line of work. West of the Forecourt will be the outdoor horticultural displays and the Women's Building. We cross now the Triumphal Bridge, which will be remarkable for its tall piers, richly ornamented with statuary, the product of the genius of Karl Bitter, the Director of Sculpture, and other famous sculptors. On either side are the Mirror Lakes, which form a part of the Grand Canal, more than a mile in length, which surrounds the main group of buildings. We come next to the Esplanade, which is nearly two-fifths of a mile long and 540 feet wide. The western end of the Esplanade is enclosed by the Horticulture, Graphic Arts and Mines Buildings. The eastern end is shut in by the Government group of three large buildings. Sunken gardens, with elaborate fountains and many groups of sculpture occupy the two

arms of the Esplanade, and the decorative features throughout this broad space are very numerous and beautiful. North of the Esplanade is the Court of Fountains, with the Ethnology Building on the right and the Music Building on the left. Two subordinate courts also open into the Esplanade from the north, the one on the right being known as the Court of Cypresses, and the one on the left as the Court of Lilies. Next, north of the Ethnology Building on the right, and fronting upon the Court of Fountains, is the Manufactures and Liberal Arts Building, and on the opposite side the Machinery and Transportation Building. In the Court of Fountains is a large pool, having an area of about two acres, and containing many beautiful fountains. Proceeding again northward we come to the Mall, a broad avenue, half a mile long, extending from the eastern boundary to the western gate of the Exposition. Fronting upon the Mall on the right is the Agricultural Building, and on the left the Electricity Building. We now arrive at the

splendor. More than 200,000 lamps will be used in the electrical illumination.

It should also be added that the Midway at the Exposition will be the most extensive and novel that has ever been prepared. It will be 3,000 feet long, having more than a mile of frontage. Over thirty very interesting features, many of them covering several acres, will make up this gigantic collection of wonders.

#### CASINO AND BOAT HOUSE.

The new Casino and Boat House on the south bank of the Delaware Park Lake, a little to the east of the Bridge of the Three Americas, is, in a sense, a tribute paid to the Pan-American Exposition by the City of Buffalo, though it will be of service for many years after the Exposition has become history. It is a very attractive building, with many conveniences which will be greatly appreciated by visitors.

The first or basement story is built with Buffalo limestone, very rustic in character and decidedly picturesque. In this

most conspicuous feature of the Exposition, the massive Electric Tower, 391 feet in height. This tower stands between the Court of Fountains and the Plaza, in a broad pool, about two acres in extent. This will be the most ornamental feature of the great Exposition, and will be the centerpiece for special and elaborate electrical illumination. Immediately north of the Electric Tower is the Plaza, with its beautiful sunken garden and bandstand in the center, the Propylaea, or monumental entrances, at the north, the entrance to the Stadium on the east and the entrance to the Midway on the west.

It should be understood by every intending visitor that the Exposition will present the most beautiful spectacle that twentieth century genius can provide. By day there will be a most pleasing display of floral and fountain effects. The many buildings with their elaborate and delicate tracery of ornamental plastic work, and their radiance of color, the many groups of statuary in every part of the grounds will constitute a picture never before paralleled. At night all the buildings will glow with the soft radiance of thousands of electric lights, making a scene of unrivaled brilliance and

story will be a restaurant and lounging room. A corridor extends through the entire length of this story of the building, affording ample room for the storage of bicycles, and other uses. The basement story will be surmounted by a balustrade of Indiana limestone with turned balusters. Over a large portion of this story will be an open terrace covered by a pergola. Perhaps the term peristyle would best describe this part of the structure. The columns introduced here are free Doric. The terrace will be of concrete construction, with granolithic floors. The building material above the basement story and aside from the terrace will be white bricks, with a roof of rich red Spanish tiles. The second story will be devoted to amusements, and the third story will be occupied as living rooms by the lessee of the building.

Underneath the basement story is the place of storage for boats during the winter, and extending out over the water is a boat platform, 128 feet long and 22 feet wide.

The building covers an area of 109 by 73 feet. Its cost is \$30,000.

Life is not a holiday, but an education.

### New England Hardware Dealers' Association.

The regular monthly meeting of the New England Hardware Dealers' Association was held at the United States Hotel, Boston, March 13th. About fifty were in attendance. In accordance with their usual custom, the deliberations of the association were preceded by a first-class dinner, succeeding the enjoyable discussion of which the regular business of the meeting was taken up, followed by the usual entertainment in connection therewith. The dinner having been disposed of, Secretary James A. Farless read the minutes of the previous meeting, which were approved. George J. Mulhall, chairman of the Nominating Committee, presented the names of the following as members of the Pricing and Investigating Committees:

**PRICING COMMITTEE**—John B. Hunter, chairman, Boston; Calvin N. Nichols, Dorchester; Henry M. Sanders, Boston; James P. Mackay, Brookline.

**INVESTIGATING COMMITTEE**—D. Fletcher Barber, chairman, Boston; William E. Plummer, Somerville; William D. Parlin, Natick.

These committees were elected by the association.

D. Fletcher Barber was elected auditor of the association for the ensuing year. The first subject taken up for discussion was "How Should the Traveling Salesman Be Treated?" The treatment given the subject by the delegates present was extemporaneous in its character, and was participated in by a number of gentlemen present, including Austin H. Decatur, Elisha J. Neale, D. Fletcher Barber, Albert M. Wiley, E. F. Jones and A. S. Morss, who one and all urged that the treatment of the commercial missionary should be of an extremely courteous character, as he was invariably stocked with more or less new information which it would be desirable the dealer should be placed in possession of. The remarks of Mr. Morss, being largely of a reminiscent character, were listened to with great attention, and were thoroughly enjoyed by his auditors, which may be indicated by the extract we give herewith:

\* \* \* \* \*

The great cloud of salesmen who followed these pioneers were largely men of most estimable character, but few as deferential. On my removal to Boston, I spent much time in obtaining a better style and quality of Mechanics' Tools than could be regularly found in the market. Among other successes in this undertaking, I found the calkers, who then formed a large percentage of Boston mechanics, in possession of Tools infinitely preferable to any in the market. One day a young blacksmith showed me a sample of Calking Tools, embracing many varieties, and with four of his pockets crowded with the Tools said he was making his weekly visit to the yards to supply the workmen, who would use no other make. I offered a liberal price for a sample of each, as he positively refused to make any for the trade. Obtaining a sample, I sent it to a manufacturer, who copied the style and furnished the quality desired, and for half a century has held the market for these goods against all comers. Having secured some desirable Tools for practical workmen, the idea occurred to me to take a trip and show to the trade some of these Tools, or, rather, to realize the experience of a drummer. I first lighted at Detroit, and, making my way to the largest Hardware store, inquired for the leading member of the firm. I found he was engaged and waited until he was released, when I made known my business. Somewhat testily he pointed to a gentleman behind the counter, saying, "You will show your samples to my buyer." I replied (in my crass ignorance of drumming methods), "I wish, sir, for your own personal inspection," and, noticing his movement to leave me, I continued, "You will find it for your interest to look at my samples." Regarding me with a stare he said, "You appear to be in dead earnest, young man. Please to show up what you have."

When my samples met his eye he called out, "Jim, here are the identical goods I have written everywhere down East to find without success." Quickly he asked for prices and as quickly gave a generous order, which was followed later with others. I carried my samples to other stores with good results. After a somewhat limited experience in the drumming line I returned home.

During the course of the meeting Prof. W. E. Floyd, president, entertained the company with a number of new

tricks of sleight-of-hand, and Robert L. Van Buskirk, who can always be relied upon by the Association, favored the company with several solos, which were thoroughly enjoyed. The following entertainment committee for the meeting of April 10th was appointed by the President: William D. Parlin, Natick; S. D. Balkam, Jamaica Plain, and Charles L. Tukey, Chelsea, after which the proceedings were brought to a conclusion, and the meeting adjourned.

### New England Iron and Hardware Association.

The eighth annual banquet of the New England Iron and Hardware Association was held on Tuesday evening, March 19th, at the Hotel Vendome, Boston. In point of attendance it was the most successful banquet they have ever had, about one hundred and fifty members and guests being present. As is characteristic of all New England gatherings, the hospitality was most enthusiastic, and every one present was given a generally enjoyable time, everything being looked after to make the banquet a success in every particular. President Chamberlain was assisted by the following Reception Committee in caring for the distinguished arrivals among their guests and others, which made a very pleasant episode previous to the participation in the banquet proper, the reception being held in the parlors of the hotel:

#### RECEPTION COMMITTEE.

Allan J. Chase,	J. H. Robbins,
H. W. Waite,	Oscar A. Sheppard,
C. S. Bragg,	Henry A. Robbins,
C. F. Dowse,	Harry L. Doten.

The room and tables were handsomely decorated, in which bunting and flowers predominated. Excellent music was furnished throughout the dinner by Daggett's Orchestra, and from a selection of songs which were placed at every table all those present were able to "join in the chorus" frequently during the course of the evening.

Charles Clark Adams acted in the position of toastmaster, in which capacity his qualifications are too well known to make lengthy comment necessary. The dinner was in charge of the Committee of Arrangements, which consisted of John T. Boyd (chairman), H. W. Waite and Allan J. Chase, who might be congratulated upon the successful manner in which they had performed their various duties. It certainly was a great success.

Hon. Thomas N. Hart, Mayor of Boston, being under a previous engagement to deliver an address in another quarter, presented his compliments to the assembled company, and when the dinner had proceeded quite a little way was compelled to retire.

President Chamberlain at the close of the dinner, being received with great enthusiasm and hearty applause, delivered his annual address, from which we take a couple of extracts:

#### OUR ORGANIZATION

is the product of necessity. It came into existence because it was indispensable to the successful prosecution of our business, and not as the outgrowth of sentiment or of a desire to get together for social enjoyment. A comparatively few years ago trade organizations were not needed; profits were large, and in a fair field, with no favor, each individual concern was amply able to take care of itself. Now, however, the increase in the amount and intensity of competition, the consolidation of manufacturers into large corporations, the increased expense of doing business, and the more exacting demands of our customers have made mutual co-operation an absolute necessity to individual preservation. Our association has long since proved the wisdom of its founders, as each of its members can fully testify. It was laid out on broad lines, and its early officers were men of such a calibre that on the foundations which they builded the structure of their successors has been reared with surety and ease.

#### NECESSITY OF TRADE ORGANIZATION.

Let us consider some of the causes which made the end of the nineteenth century conspicuous for the growth of trade organizations. The first of these, and the one most promi-

nently before our minds at the present time, is the consolidation of large manufacturing interests into one controlling body, or trust. How can individuals cope with such a power as the United States Steel Corporation, which has just come into existence? How puny and inconsiderable do our New England jobbing houses seem in comparison with the piled-up millions of these giants of industry, whose capital is so large that we can hardly comprehend it! How can we command the respect to which we are entitled except by standing together for our common good? Experience has fully proven that claims coming from our association receive much more prompt and just attention than is accorded to the demands of individuals, and, moreover, it is but fair to add that the claims of such an association are much more apt to be reasonable and moderate than would those of one isolated firm. The measures that we advocate represent the united wisdom of many, rather than the thought and prejudice of one or two here and there.

He was followed by Hon. C. E. Littlefield, of Rockland, Maine, representing the Second Congressional District of that State at Washington. He delivered an address on "The American Merchant Marine," which was an extremely interesting and thoroughly enjoyable subject, holding the attention of those present nearly an hour. Toastmaster Adams then introduced the Rev. Smith Baker, D.D., of Portland, Maine, who made a brief address, in which his surplus stock of wit and numerous illustrations were given a chance to entertain his auditors. It is needless to say they were thoroughly enjoyed. He was followed by Congressman William Alden Smith, who spoke upon the subject of "Expansion and Its Relation to the Commerce of Our Country." Owing to the lateness of the hour, Mr. Smith's address was much more brief than it probably would have been. The entertainment of the evening was brought to a close by the entire assemblage singing "The Soldier's Farewell."

The banquets of the association are usually on broader lines than is the case with a strictly Hardware association, the members of the New England Iron and Hardware Association being composed of dealers representing a number of such lines as heavy Hardware, Shelf Hardware, Saddlery Hardware, Metal trades, Woodenware, and Paints and Oils—a very compact membership of solid men.

### Linseed Oil and Its Uses.

According to the New York *Tribune* the recent advance in the price of linseed oil has attracted much attention in the commercial world to the condition of this year's crop of flaxseed, from which this important oil is made. The uses of linseed oil are many and varied, but oilcloth and linoleum men are perhaps those chiefly affected by the present high values. Several of the larger oilcloth factories of the country, it is reported from Chicago, are either shut down or able to do little business as a result of the market conditions. Trade in the United States is said to require something like 40,000,000 gallons of linseed oil annually.

Estimates of the year's crop of flaxseed have been steadily reduced of late. The crop year is supposed to begin in September, but it is as yet practically impossible to gauge the yield for this year accurately. The first estimates of the total product were about 25,000,000 bushels. Now the figures are about 16,000,000 bushels.

The commercial uses of flaxseed, the vast amount used in making linseed oil and the methods of handling great quantities in bulk, are matters outside the range of the average man's knowledge. Each bushel of flaxseed yields a little over two gallons of oil. The pulp or cake remaining after the extraction of the oil has a value as fodder, and is an important by-product. While cottonseed meal and rice meal are used to some extent as substitutes for oil meal, yet there has never been found a satisfactory substitute for linseed oil. The painter, the white lead maker, the oilcloth manufacturer must have linseed oil, and so the farmer in the far Northwest tends carefully his flaxseed crop and the mills crush the slippery seed in order that their wants may be supplied.

In the process of extracting the oil from the seed it is crushed by rollers, going through set after set until it appears as fine meal. Then it is steam-heated in tanks to free the oil. As it comes from the tanks, a sticky, sweet-smelling mass, it is shaped by a small press into blocks, and these blocks are put under powerful hydraulic presses. The oil begins to flow in the gutters as soon as the power is put on, but it is an hour before the press is opened and the oilmeal taken out. The oil passes through various refining processes which prepare it for market. The cake is either shipped unbroken for export or is ground into oilmeal for the home market. Germany is a large importer of oilmeal.

### Effect of Machinery.

Three industries are given by the New York *Evening Telegram* as typical of the saving effected by the substitution of machinery for hand labor. Forty years ago one man took 750 hours to perforate 150,000 bank checks, for which he was paid \$150. Now the same work is done by machinery, six men being employed an aggregate of nine hours and fifteen minutes. They get about double the wages per hour, yet the labor cost is only \$3, instead of \$150. Seventy years ago, using quills and ruler to rule paper, it took 4800 hours to do work that is now done by machines in two and three-quarter hours. The hand workers got \$1 a day, while the operator of the machine is paid \$3.50 a day. The labor cost of producing a given quantity is 85 cents, as compared with \$400 in the old way. Machinery now makes 100 pairs of men's cheap grade shoes in 154 1-2 hours, as compared with 1436 1-2 hours by hand, the labor cost being \$400 by hand and \$35 by machinery. Instead of one man being employed to do everything in the manufacture of women's shoes, it now takes 140, each doing an entirely different operation on the machines. What required thirteen hours of labor forty years ago is now done in an hour. The third example is in bread making. One thousand pounds of dough for biscuits is rolled, cut, and prepared for baking in three hours and fifty-four minutes, as against fifty-four hours by hand. These instances are typical of a hundred other industries in which time and labor have been saved by machinery, while the market has been broadened, prices of the product cheapened, and wages advanced.

### American Farm Tools for Germany.

Baron Hermann, agricultural expert of the German embassy, has received word from the German Government that a specialist, designated by the agricultural societies, will leave Berlin soon for the United States to make careful inquiry into the use of American agricultural machinery, with a view to its introduction into general use in Germany. Baron Hermann for some time has been urging on the German authorities the marked advantages of American agricultural machinery. He looks upon the move as one likely to prove beneficial both to German agriculture and to American manufacturers. The agricultural sections of Germany are being depopulated, while the manufacturing centres are being overcrowded, and it is felt by the German Government to be desirable to give every modern facility to the agricultural class to increase the productive capacity of the farms to their full limit.—*Exchange*.

The Manufacturers' Trading Co. is the name of a new firm who, as manufacturers' agents, have established offices at 296 Second Street, Memphis, Tenn. They purpose giving manufacturers permanent representation in the South, selling on account of the manufacturers, they shipping and billing direct, and crediting the company with their commission as selling agents. They intend traveling from three to five men, and feel that it would be greatly to the interest of reliable manufacturers to open correspondence with them. It is a section of the country where it costs more to travel than any other part, hotel rates and railroad fares being higher than in the East or West, and this keeps out the representatives of a number of manufacturers whose products might be of interest to the buyers in quantities in that territory.

### Southern Hardware 'Jobbers' Association.

C. B. Carter, the Secretary-Treasurer of the Southern Hardware Jobbers' Association, recently forwarded the following letter to the members, having reference to the annual meeting in June next:

To the Members of the Southern Jobbers' Association.

Gentlemen—The meeting in Asheville of the Executive Committee of our association, adjourned after three days' deliberations.

The most important matter under consideration was that of the dates and place for our eleventh annual convention. The vote of our individual members was greatly in favor of Asheville, and after the members of the committee had looked over the city, ascertained the hotel facilities, transportation accommodations, etc., and had viewed the magnificent scenery in and around the "Land of the Sky," they too recognized the many advantages of Asheville for our annual convention, and accordingly cast a unanimous vote for that point. The dates for the convention were fixed for the 4th, 5th, 6th and 7th of June, and the Battery Park Hotel for our headquarters. The committee was very sorry indeed to disappoint our Cleveland friends, who were so anxious for our association to come to that city; however, they recognized the fact that sentiment should not prejudice them in selecting the place, and knowing the best interests of the

association would be promoted by the convention being held in Asheville, they accordingly decided in favor of that point. We shall give you further information regarding Asheville very shortly, in order that you may fully appreciate the attractions and advantages of this point.

Many matters of great interest to the Southern Hardware jobbers were considered and acted upon at the meeting, which will be presented to you in the near future. We would also state that a very interesting programme for the annual meeting has been outlined, and it is very important that each and every member of our association should be present this year to receive full benefits for the meeting, and we hope you will make your arrangements to meet with us this year without fail.

### Hammers Made of Rawhide.

"The common idea of a hammer, no doubt," said a dealer in tools, "would be that it was an implement made to pound with, and having a head of iron or steel. The pounding part of that would certainly be all right, but not all hammer heads are made of metal; there are some hammers, in fact, with head made of rawhide.

"Where the head would be on an ordinary hammer there is on the rawhide hammer seat at right angles across the end of the handle, a short section of iron pipe. The rawhide that forms the hammer head is first cut into an oblong strip, which is then, beginning at one end, snugly rolled up. The roll thus formed is put through an iron pipe, being made long enough so that it will project an inch or more at either end. The ends of the solid rawhide are trimmed off flat and true, like the face of any hammer, making this a two-faced hammer.

"The rawhide hammer is used for various purposes, largely in place of a mallet, for instance, for pounding on punches,

## Paint Prospects

This season is the paint dealer's opportunity. There will be more paint sold than ever before.

Our constant gains in S. W. P. sales show us this. We never before had so many new agents on our books nor so many gallons of paint ordered from us. Past years have shown big gains, but the percentages this year far exceed all others for the same period.

S. W. P. dealers all over the continent anticipate a big year in good paint. They are preparing to take advantage of the opportunity the good times offer.

It is not too late for you to get in line. We can make prompt shipments. We can give you advertising helps that will bring the trade your way. We can help you personally and put more spirit and "go" into the paint business than your locality ever saw before.

"B-13" illustrated booklet on our Paints and Methods.

and on chisel handles. It is used where pounding is to be done on polished metal surfaces; it serves the purpose without scratching the metal. Rawhide hammers are made in various sizes.

"Then there is a rawhide implement that is called a mallet, in which the head is formed in the same manner as the rawhide hammer head, but joined in the handle direct, without being held there in a holder. The rawhide mallet is also made in various sizes; it is a smaller and lighter tool than the hammer.

"Another rawhide pounding tool is the rawhide maul, heavier than the hammer, and made in various sizes. The head of the rawhide maul is made of disks of rawhide laid together to a sufficient thickness and held together by iron caps top and bottom, through which, as of course through the rawhide as well, the maul handle passes. The block of rawhide thus made is turned into the usual maul form. Built up as it is of compacted layers placed crosswise of the handle, the striking surface of the maul, as is the case with the hammer and the mallet in the manner in which they are made, presents the rawhide in a mass edgewise. The rawhide is used, for example, by artificial flower makers, pounding all day long on dies and punches, cutting out flowers and leaves.

"These rawhide hammers and mallets and mauls cost about three times as much as corresponding wooden mallets would cost—they last about ten times as long."—*Exchange*.

"You used to be something of an altruist," said the friend.

"Yes," answered Willie Washington. "I was a Theosophist for a while, too. But I had to give it up. I've tried being a whole lot of things, but I never get far enough along to find out what the names by which they are called actually mean."—*Washington Star*.

## RECENT TRADE PUBLICATIONS.

W. J. ADAM, Joliet, Ill. Pamphlet catalogue, 48 pages, covering the line of Adam's Woven Wire and Ornamental Steel Fencing, Steel Posts, Steel Gates, Slat Fencing, Portable Corn Cribbs, Window and Door Guards, Stable Fixtures and Jail work; in fact special Steel Work of all kinds, including Bale Ties, Green Bone Cutters, etc. The catalogue is fully illustrated, with all the articles referred to above, together with descriptions and dimensions and other particulars necessary to facilitate the sale of articles of this description. This includes a number of wire specialties not usually found in an ordinary catalogue, such as Grave Guards, Cemetery Fence, also Hay Racks and other stable fixtures.

GRAY & DUDLEY HARDWARE Co., Nashville, Tenn. Illustrated catalogue of Saddles and Harness and Saddlery Goods manufactured by them, the catalogue being denominated Saddlery Department No. 5, full catalogue size, 9 1-2x12 inches, and comprising 108 pages. It is well printed on good paper, fully illustrated, in which every article is displayed in a manner that would be readily understood by the dealer. List prices are attached to everything shown, and a discount sheet accompanies the catalogue, which is intended for dealers only. Included in its contents are Saddles in large variety, Harness, all the usual separate parts of the same, Halters of every description, Horse Collars and Hames in every variety, Whips and Whip Lashes, Curry Combs, Horse Brushes and Spurs; in fact an extremely large variety of the class of goods usually represented in a catalogue of this character.

F. A. HERRICK Co., Jackson, Mich. Pamphlet catalogue of 24 pages, covering their line of store fixtures, including their Patent Tool Racks, Tool Brackets, Sampling Hooks, Auger and Bit Cases, Hammer and Hatchet Cases and Axe Racks, a line of important appliances that would be found useful in any Hardware store in the United States. These have all been tried and tested for years by the trade, and wherever introduced have met with increasing popularity. There is a want for appliances of this character in all properly equipped Hardware stores. A saving of time can be had by an equipment of this character, a much better exhibition is given of the goods displayed, and in fact great convenience is one of the most prominent characteristics in each of these store specialties. It would be good policy for our readers to write to the company for one of their catalogues and thus stimulate a want that they have no doubt frequently experienced.

R. D. CONE Co., Winona Minn., have recently issued their Spring Circular of imposing pretensions, of 128 pages, covering their wholesale line of Shelf and Heavy Hardware, Iron, Steel, and Wood Stock. The catalogue is fully illustrated throughout, being actually filled with illustrations describing fully the articles represented, which take in the usual assortment emanating from a jobbinghouse of this character, an enumeration of all the various lines being given on the fourth page of cover under the heading of "We carry in stock a full assortment of the following lines of goods for which we respectfully solicit your mail orders," with the statement that mail orders are shipped on day of receipt, and goods billed at lowest market prices. When it is considered that the lines enumerated count up 140, some idea may be entertained of the stock of goods carried by this progressive house.

LUFRIN RULE Co., Saginaw, Mich., 1901 Catalogue No. 6, embracing the line of Measuring Tapes, Rules and similar goods manufactured by this well known house, including "Reliable" Steel Measuring Tapes in several varieties, "Rival," "Challenge" and Engineers' Pattern Steel Tapes. Metallic Measuring Tapes in all the popular styles, including the "Junior Metallic" and "Sterling" pocket steel and linen tapes. Included in the contents are illustrations and full descriptions of the "Universal" Measuring Tapes, a leading production of this company, which are shown in all their various styles and varieties, and are popular goods with the Hardware trade. Folding Steel Pocket Rules and Folding Steel Rules of other kinds are also included in the assortment of this catalogue, which takes in as well Hickory Board Rules in a number of styles and Log Rules. This is a catalogue that should be in the hands of a Hardware dealer wherever found.

STOWELL MFG. & FOUNDRY Co., South Milwaukee, Wis. 1901 Special Catalogue No. 5. Pamphlet catalogue of 48 pages, embracing their entire line of Door Hangers and Rail. The various other lines representing goods manufactured by this extensive plant form a special and separate catalogue running from No. 1 to No. 6, No. 1 representing their General Line, No. 2 Registers and Furnace Goods, No. 3 Railroad Hangers and Supplies, No. 4 Wire Workers' Goods, No. 5 Hangers and Rails, and No. 6 Malleable Hardware. This will give a pretty good idea of the extent of the production of these well known works. In the catalogue under review, full descriptions are given of the Stowell Steel Parlor Door Hangers, with graphic illustrations showing the operation of the same; Matchless, Nansen, Atlas, Magic and Inter-State Door Hangers, together with the styles that have been longer on the market, Climax, Wild West, Anti-Friction Railroad and Street Car Hangers, etc. This is a very neat catalogue, covering a line of goods all by themselves that would be found useful to any Hardwareman carrying such goods in stock.

GENEVA TOOL Co., Geneva, Ohio, have recently issued one of the most attractive catalogues that have been brought to our notice, covering their line of production. They state in their prefatory remarks: "Our factory facilities are the most complete to be found in the steel goods business. We have ample capacity, and the most improved machinery, enabling us to successfully meet the large and constantly growing demand for high grade goods. Our growth has been steady and substantial, and the opening of the new century finds us grateful indeed for the successes of the past." The contents of the catalogue would justify this statement. It is a pamphlet catalogue of 96 pages, printed on superior coated paper, and filled with illustrations of the highest style of art. It is printed with a great deal of taste, and altogether presents an appearance that would be sure to attract not only our domestic buyers but those abroad. Every line of goods represented has its accompanying illustration. No economy in regard to properly displaying the goods is manifest in any part of the catalogue. Full descriptions are given throughout with list prices printed and a discount sheet accompanying each catalogue. A telegraphic code is given in connection with the catalogue, covering all possible requirements for ordering goods. A description of the various grades of steel goods made by them occupies a full page, and hoes are treated in a like manner.

## NEW GOODS AND SPECIALTIES.

### Herrick's Tool Rack No. 1.

F. A. Herrick Co., Jackson, Mich., are the inventors and manufacturers of the valuable article of Hardware store equipment of which we give an illustration in the course of this article. It is called Herrick's Tool Rack, No. 1, and in its utility is capable of holding 292 Tools and Handles. It is a well-known fact in all Hardware stores that it is a dif-

HERRICK'S TOOL RACK No. 1.

ficult matter to make a proper display of haying tools and garden rakes, manure forks, shovels, etc., from the fact that convenient appliances are not usually found in a Hardware store where a large number of these specialties may be distributed and economize space. From this necessity, the article that we illustrate herewith was invented and placed on the market, and wherever it has been introduced throughout the country it has seemed to be a welcome addition to the usual equipment of a Hardware store, and as the number of testimonials which the manufacturers will gladly furnish any dealer requiring the same, will admirably demonstrate. As the manufacturers state in the circular they send the trade, this is one of the several articles manufactured by them that is gotten up by "a Hardwareman who knows the needs of Hardware merchants," and they argue that such fixtures are silent salesmen, the zeal of which can always be depended upon, as the goods are placed in a salable shape before the possible customer, and may be handled and placed and replaced with impunity without giving the proprietor of the store any anxiety. Our subscribers should write for a complete catalogue showing several other articles of equal utility.

### Glass Lined Refrigerators.

Cooper & McKee, 113-121 Gwinnett Street, Brooklyn, N. Y., in addition to their regular line of new Columbia, new Domestic, Champion and Household Refrigerators, have lately placed on the market an entirely new line of Glass Lined Refrigerators, a cut of which we give in this article. After two years of expensive experimenting, the actual demonstration has resulted in perfecting plans whereby they are now able to place before the public a superior refrigerator manufactured on absolutely hygienic principles. Their improved system of construction for this important class of refrigerators is new, and they have been able to add many novel features that cannot be found in any other make. In their construction they have embodied all the important

GLASS LINED REFRIGERATOR.

improvements that concentrated action and science have devised. They are of cabinet workmanship, and are handsomely finished, the trimmings, combination spring catch locks and hinges being of solid bronze. They are provided with ball-bearing wood wheel casters, and an automatic syphon attachment which is under absolute control of the lower door. These refrigerators are made of hard wood, golden oak finish, heavy raised panels, double walls all over filled with "Neptune Insulator," consisting of two thicknesses of non-absorbent fiber, together with one-half inch of pure hair between and formed into shape by a most ingenious quilting loom, thus insuring uniformity in thickness and density. It has proved from actual tests to have no equal for resisting outside temperature, thus causing a great saving in the consumption of ice. The ice chamber is made of sheet steel galvanized, therefore practically indestructible. The structural detail of the ice chamber is made on lines so near perfection that at no time can an access of moisture accumulate. The hot and cold air flues are so scientifically arranged that a cold, pure, dry air is always in circulation. The food compartment, also doors to same, are lined with one-quarter inch opalescent, milk white, polished plate glass.

No metal is used in corners to rust and corrode. All glass is set glass to glass, with ground edges. The shelving is constructed from aluminum, which will not rust, corrode nor tarnish. The waste pipe can be easily removed and the whole interior cleansed in a few moments. The lowest possible temperature is gained and maintained.

#### The Clipper Lawn Mower.

The Clipper Lawn Mower Co., Norristown, Pa., are placing on the market, through the Hardware and Implement trade, the Clipper Lawn Mower, which is a light mower designed more especially for the clipping of weeds, dandelions

THE CLIPPER LAWN MOWER.

and plantain, which, by the aid of a machine of this construction, may be cut as closely and finely as grass, and being made for the express purpose, is less liable to get out of order than the ordinary mower designed more especially for grass. It is in point of size more readily used in the mowing of irregular surfaces and spaces, such as those between posts and fences, walks and shrubbery. The Clipper Mower is not analogous to other lawn mowers, inasmuch as it does not mow down the grass preparatory to cutting it. The finger bars and fingers thereon as they progress gather in the grass with a degree of uniformity in nearly an upright position, and the vibrating or reciprocating motion of the knives shears off the grass in an extremely thorough manner. It will be noticed, by reference to the illustration herewith, that the cutter bar is directly in front of the wheels. The wheels travel over the ground where the grass is cut, never rolling down the standing grass with the wheels. The small gauge wheels at the side are to gauge the height you desire to cut the grass. The knives may be readily sharpened in the machine with a small file or whetstone, or they can be taken out and ground. It is made in five sizes: 12, 15, 18, 21 and 24 inch.

#### Griswold Field Fence.

The Dillon-Griswold Wire Co., Sterling, Ill., who have been manufacturers of wire fencing for a number of years,

GRISWOLD FIELD FENCE.

have recently placed upon the market a new field fence to which they call the attention of the trade. The main features, the manufacturers argue, of a good fence, lie in its construction. The claim is made that the Griswold Field Fence is scientifically correct, every effort being made to increase its strength, extend its durability and still preserve the ornamental appearance that should be a characteristic of any metallic fence. An indication of its strength may be obtained from the fact that the top and bottom wires are No. 9 gauge; the intermediate bars No. 11, and the mesh or side wires No. 13. The stays are placed 9 inches apart,

and the fence is constructed so that the lower heights are made, in the parlance of the implement trade, pig tight, while the higher fence is so made that it forms the usual obstruction for cattle. It is made in several heights, according to the demands of the trade, the 18-inch having 5 bars; 24 and 33 inch, 7 bars; 39 and 50 inch, 9 bars, while the 56-inch is constructed of 11 bars. It is put on the market in rolls containing lengths of 10, 20 and 40 rods.

#### "Wagner" Household Specialties.

Wagner Mfg. Co., Sidney, Ohio, are the manufacturers of a number of household specialties that have been found

FIG. 1.—HOTEL WAFFLE IRON.

very popular sellers by the Hardware trade. Among these we illustrate herewith the Hotel Waffle Iron (Fig. 1). These irons are made in a new and desirable style, as will be indicated by the cut, and operate with equal ease on gas, gasoline or ordinary cook stoves. They are easily cleaned, the pans readily separating at the hinges. The hinge consists simply of two half balls cast solid on the pans, and when placed together in the socket of the frame form a perfect ball bearing. One iron is adapted for the use of a large family or boarding house. Its capacity is six waffles, three in each pan. A larger one is also made for hotel use, the capacity of which is twelve at one filling, each pan baking three waffles, each 2 5-8 x 4 inches in size. The pans are quite deep, allowing the batter to raise and bake a much lighter waffle than if baked in a shallow pan, and the frames and pans are so arranged they can be used on any regular gas or gasoline stove.

The "Wagner" Improved Broiler, which is shown in Fig. 2, is made in one piece, and can be used with equal results on gas, gasoline or ordinary cook stoves. The channels in the broiler catch the juices of the meat, and the openings allow the heat to pass through, being only on the sides of the

FIG. 2.—"WAGNER" IMPROVED BROILER.

raised channels, the juices being retained and not destroyed. The long wood handle is a feature that will be appreciated.

#### Gem Flue Stops.

The J. L. Clark Hardware Co., Rockford, Ill., are the manufacturers of the Gem Flue Stops, which are patented by them for a number of useful improvements in this simple article. The special merit of these stops lies in the method of their fastening. This consists of two wires, arched in form, and crossing at right angles to each other. Where the wires cross they are notched, which locks them securely. In this manner four points of contact are obtained instead of two, as in the case with the majority of other stops on the market. To the centre of the blank the

wires are secured by a cleat. This method permits the wires to fold down flat and facilitates packing. Fig. 1 shows a flat stop, which is a novelty inasmuch as previously there has been but little attention paid to making a stop of this character. Being Flat, it permits being papered over after being placed in its desired position. Otherwise it combines all the essential features of the ordinary stop with the addi-

FIG. 1.

FIG. 2

tion of a patent fastening. These stops are finished in a grey-colored lacquer, with an artistic chromo glued to the centre. No. 2 is a brass-finished flue stop, ornamented with a chromo above referred to. The cleats at the centre are not soldered on the blank, but are fastened by means of four ears that go through four slots in the blank, and these ears are clinched on the opposite side, preventing any loosening at the fastening or dropping down. Fig. 3 is also a brass-finished article, similar to Fig. 2 in style. This stop differs from Fig. 2 in regard to securing the wires to the blank. Instead of the cleat at the centre of the blank, these

FIG. 3.

FIG. 4.

have raised sockets formed from the stock of the blank itself near the outer embossed rim. The shape of the wires differs from that of the other styles, the sides being straighter, thus allowing a longer bearing on the sides of the thimble. All the Gem Stops are held so securely that they cannot be blown or jarred out in any manner, and are claimed to be absolutely dust and soot proof. They are put up in boxes of one dozen each, containing an assortment of chromo designs, and the general appearance of Figs. 2 and 3 is shown in Fig. 4, giving a very good idea of the ornamental appearance of these stops when placed in position.

#### U. S. Ratchet.

The Chain Stay Fence Co., Sterling, Ill., are the inventors and manufacturers of the U. S. Ratchet, which is an article

that is in great demand wherever the construction of wire fence is desired. We illustrate this article herewith. It has a number of admirable features that recommend it to the trade. It is not only complete in its construction for the purpose designed, but the frame is made of steel, making it a very strong and durable article. It makes it unnecessary for holes to be made in the end post, as it can be

attached to any kind of a post, either wood or iron, and whether large or small. It overcomes the objectionable feature of the wires corroding or rusting, as in the use of the ordinary ratchet where the wires must pass through the end post. It allows the wires to be slackened or the tension to be increased with equal ease. It is provided with no small parts that are separable and apt to get lost. It requires no special wrench to operate. Any wrench that will fit on the square part of the shaft can be used. It can be used on any kind of fence, whether smooth or barbed. Taking it altogether, for a little article of such general utility, it should be part of the Hardware stock of every dealer in the country.

#### Tippecanoe Lawn Swing and Reclining Chair.

The Tipp Building & Mfg. Co., Tippecanoe City, Ohio, are the manufacturers of the Tippecanoe Lawn Swing and Reclining Chair, an illustration of which we present in this article. It is made by the company suitable for two passengers or four passengers, the one we illustrate herewith being the two-passenger design, and is made of hard wood painted a bright vermilion and varnished; has an adjustable back; is built extra strong, having reference to the rough usage which such an article receives in constant use. It is designed to be first-class in every particular, and will carry 600 pounds safely. They have found in the distribution of the Tippecanoe Lawn Swing that a regular demand

TIPPECANOE LAWN SWING AND RECLINING CHAIR.

exists in all sections of the country for something of this description, and it has proved beyond doubt to be one of the most popular articles they have ever placed on the market. While originally intended for the amusement of children, the manufacturers state they have found that grown people find actual comfort and complete rest in its use. In point of size it is 8 feet high, 4 feet 9 inches wide, has 8 feet 4 inches spread, and the sides are 9 inches wide, there being 32 inches space between seats. They are distributed packed one in a crate, the weight of which is 110 pounds. A special feature of the Swing is its noiselessness, which is made possible by the manner in which the Swing is attached to the rod of the stationary part. This company has been in business since 1864, and has shipped goods in this line to every part of the United States.

#### "Rider" Bicycle Saddle.

The Rider Saddle Co., 188 Grand River Avenue, Detroit, Mich., are placing before the Hardware and Bicycle Sundries trade their latest improved Bicycle Saddle. It is claimed to possess unique features of its own that place it beyond the pale of competition. The principal point to which reference is made, and it is made with sufficient justification to back it up, is that "its nose is adjustable, soft and flexible." It is constructed throughout of the very best material for the purpose; base is of the best cold rolled steel plate; the springs for upholstering the seat are 26 in

number and are of tempered steel. Each spring is held in place by a light brass socket securely fastened to the base at the lower end, and to a leather covering at the top end, thus retaining each spring in its proper position indefinitely. Over this is placed a half-inch covering of best wool felt; then the whole is covered with superior 4 ounce saddle leather. It is intended that this peculiar construction shall give perfectly free circulation of air, and make possible a cool and comfortable saddle. They have been on the market

"RIDER" BICYCLE SADDLE.

for upwards of a year, and have been extremely popular wherever introduced. A guarantee goes with them that they will last for years, and prove as good as new. The unique features of its construction are the upholstered seat and the adjustable nose. These features make the saddle popular. The nose can be made perfectly rigid in order to make it suitable for racing men, or can be adjusted so as to allow its deflecting full length, thus preventing its touching the body at any particular point. These improved features

SECTIONAL VIEW.

make it a desirable saddle for the trade to handle, and an inquiry regarding the same should be followed up.

#### Ole Olsen Lawn Rake.

The Piqua Handle and Mfg. Co., Piqua, Ohio, are the manufacturers of the Ole Olsen Lawn Rakes and C. M. Avery & Co., 165 Lake Street, Chicago, Ill., are the selling agents for the same. This improved lawn rake, of which we give an illustration (Fig. 1), has met with great success in its distribution through the Hardware trade. The manufacturers state that the handle, head and teeth are made of well-seasoned, straight-grained, hard wood, all of which are oil-finished. The malleable ferrule, which connects the head to the handle, is possessed of considerable strength and forms an attractive feature of the rake, giving it an appearance of its solidity and strength. The teeth are made of extra selected stock, and so constructed that when once driven into position there is no fear of any shrinkage taking place. They have an even temper, and differ from metal teeth, as they cannot bend nor clog. In Fig. 2 the knob is shown at the end of the teeth, being set by a patented

FIG. 1.—OLE OLSEN LAWN RAKE.

FIG. 2.

process which holds the teeth rigidly, and prevents them from dropping out at any time. Attention is called to the fact that the curved heads of the rakes admit of only four to six teeth coming into contact with the surface of the lawn at one time, the teeth on either side of the centre doing their work perfectly without tearing up the grass. Another advantage obtained from the head being curved is that in raking the materials are thrown toward the centre of the rake. When desired, however, the rakes can also be furnished with straight heads.

#### No. 1900 Champagne Tap.

The C. T. Williamson Wire Novelty Co., Newark, N. J., among their numerous specialties, are placing before the Hardware and Housefurnishing trades, an especially desirable Champagne Tap, which we illustrate in the course of this article. Quite frequently the requirements of a sick room, especially during the convalescent stage of an illness, make an article of this description very essential. It has

NO. 1900 CHAMPAGNE TAP.

frequently been difficult to secure one that will hold the gas after the tap has been inserted in the cork. The one illustrated herewith is the No. 1900 Champagne Tap, which has been recently improved, and is confidently placed before the trade guaranteed to meet all the possible requirements, being so constructed as to have a Seat and Direct Cut-Off, which prevents any escape of gas. These two features, which will be noticed in the illustration, make this tap absolutely airtight, and therefore impossible to leak while a drop of wine remains in the bottle, so it keeps it in just as good condition as the first that is drawn off. The tap is made from the best material; nickel-plated, and polished; is sent out wrapped in tissue, packed one each in a paste-board box, and accompanied by a gimlet for boring the requisite hole in the cork. Each and every tap is carefully tested before leaving the factory, and the manufacturers guarantee it will not leak.

#### Cars Built in the United States in 1900.

The total number of cars that have been built by the car building works in the United States during 1900 is 124,106. This, of course, does not include the cars built by the railroads in their shops. Of the 124,106 cars 113,070 are freight, 1515 passenger, and 6091 street cars for use in America, and 2561 freight, 121 passenger and 748 street cars for export. In 1899 the total output of these same works was 123,893 cars, divided as follows: 117,982 freight, 1201 passenger, and 4710 street cars for use here, and 1904 freight, 104 passenger, and 206 street cars for export. The extension of the steel car industry is shown by the fact that of the total freight cars that will have been turned out last year 14,464 were all steel, 447 of these being for export. In 1899 the total was 10,500, while in 1898 but 2700 were built. More cars for passenger service will probably be built in 1901 than were in 1900.—*Exchange*.

Merchant vessels built in the United States and officially numbered by the Bureau of Navigation, Treasury Department, during the calendar year 1900, comprised 1102 of 365,791 gross tons, compared with 954 of 267,542 gross tons during 1899. Steel steam vessels numbered 92 of 196,957 gross tons, compared with 86 of 126,768 gross tons in 1899. The greater part of this increase is on the great lakes—from 14 vessels, 50,836 tons, in 1899, to 33 vessels, 108,511 tons, in 1900. Steel steam vessels built on the Atlantic coast numbered 51 of 78,982 gross tons, compared with 63 of 73,808 gross tons in 1899.—*Exchange*.

# REVIEW OF THE MARKETS.

**Wire Nails:** The demand for Wire Nails still continues extremely large. The indications point to a fear among the dealers that an advance may possibly take place at an early date, and orders have in consequence been more than usually liberal. Quotations continue as previously quoted, f. o. b. Pittsburgh, terms 60 days or 2 per cent. discount for cash in 10 days.

To jobbers in carload lots.....	\$2.30
"    less than carload lots.....	2.35
To retailers in carload lots.....	2.40
"    less than carload lots.....	2.50

**New York Prices:** There is no let-up on the demand for Wire Nails, all the reports being that purchases are made freely. Complaints are made by the jobbers that deliveries are not as prompt as they would like to have them, and seem to fear somewhat the supplying the demands of their own customers. Quotations remain as follows:

To retailers, carload lots on dock.....	\$2.53
Small lots at store.....	\$2.55 to 2.60

**Cut Nails:** The quotations on Cut Nails are now made in conformity with a resolution of the manufacturers at their last meeting, in which they adopted a plan of making a delivered price f. o. b. Pittsburgh plus the actual freight to point of destination, instead of following the previous plan in accordance with "the manufacturers' rate book." The trade regard this change as being a desirable one. Cut Nails are in excellent demand, and quotations are as follows, f. o. b. Pittsburgh plus actual freight to point of destination, terms 60 days, or 20 per cent. discount in ten days.

Carload lots.....	\$2.00
To jobbers in less than carload lots.....	2.05
To retailers in less than carload lots.....	2.10

**New York Quotations:** With an increasing demand for Cut Nails, New York quotations have been fully sustained. These deliveries have been made in accordance with the understanding referred to above in regard to charges for freight. The quotations are as follows:

To jobbers in carload lots on dock.....	\$2.15
"    less than carload lots on dock.....	2.20
To retailers in less than carload lots on dock.....	2.25
Small lots from store.....	\$2.25 to 2.30

**Barb Wire:** Barb Wire continues in steady demand, which interferes somewhat with prompt delivery from the mills. They are using every possible facility to supply the trade at this period of the year when the demand is ordinarily a large one. Quotations are as follows, f. o. b. Pittsburgh, terms 60 days or 2 per cent. discount for cash in ten days.

To jobbers in carload lots, Painted.....	\$2.60
"    Galvanized.....	2.90
"    less than carload lots, Painted.....	2.65
"    Galvanized.....	2.95
To retailers in carload lots, Painted.....	2.70
"    Galvanized.....	3.00
"    less than carload lots, Painted.....	2.80
"    Galvanized.....	3.10

**Ellwood and Baker Wire** is 5 cents and Washburn & Moen Glidden 10 cents per 100 pounds higher than the prices above named.

**Plain Wire:** The market on Plain Wire is well sustained, the demand being a heavy one, orders from manufacturers and others being large, indicating the prosperous conditions surrounding all grades of manufactures in which wire is largely used. The market is firm at the following quotations, f. o. b. Pittsburgh, terms 60 days or 2 per cent. off for cash in ten days:

	Base sizes.	
	Plain.	Galv.
To jobbers in carload lots.....	\$2.25	\$2.65
"    less than carload lots.....	2.30	2.70
To retailers in carload lots.....	2.35	2.75
"    less than carload lots.....	2.45	2.85

The above prices are for the base numbers, 6 to 9. The

other numbers of Plain and Galvanized Wire take the advances indicated in the following table:

Nos.	Plain Fence Wire Advances (Catch Weights).	Galvanized.
6 to 9.....	Base.....	\$0.40 extra.
10.....	\$0.05 advance over base.....	.40 "
11.....	.10 " " " ".....	.40 "
12 and 12½.....	.15 " " " ".....	.40 "
13.....	.25 " " " ".....	.40 "
14.....	.25 " " " ".....	.40 "
15.....	.45 " " " ".....	.75 "
16.....	.55 " " " ".....	.75 "
17.....	.70 " " " ".....	1.00 "
18.....	.85 " " " ".....	1.00 "

For even weight bundles, 50 pounds or over, 5 cents per bundle advance on above.

**Strap and T Hinges:** Under date of March 15th an entirely new price list of Strap and T Hinges was adopted by the manufacturers. We give the new list below, by which it will be observed there is considerable of a change in many of the list prices, which, no doubt, has been done with a view of allowing a larger base discount than previously prevailed. The list we give is issued by the Stanley Works, New Britain, Conn., and is, we understand, in conformity with corresponding lists issued by other manufacturers who have all agreed upon the same.

LIGHT STRAP.							
3	4	5	6	7	Inch.	Per Dozen	Pairs.
\$1.55	2.05	2.50	3.25	3.95			
8	10	12	14	16	Inch.	Per Dozen	Pairs.

## NICHOLSON FILE CO.

All orders and correspondence  
should be addressed to the

MAIN OFFICE  
AT  
PROVIDENCE

Where they will receive  
prompt attention

S. M. NICHOLSON, Pres. and Gen'l Mgr.

NICHOLSON FILE CO., PROVIDENCE, R. I.

Works, New Britain, Conn., in connection with the change in discount on Strap Hinges, announce the following, which applies to the list prices in their 1895 catalogue:

	Discount.
Japanned Light Strap.....	60 %
Japanned Heavy Strap.....	50 and 10 and 5 %
Japanned Light T.....	60 %
Japanned Heavy T.....	50 and 10 and 5 %
Japanned Extra Heavy T.....	55 %
Japanned Hinge Hasps.....	50 %
Japanned Long Chest.....	60 %
Japanned Crate Hinges.....	60 %
Galvanized Hinges with Iron Pins.....	65 and 10 %
Galvanized Hinges with Brass Pins.....	60 and 10 %

**Carriage Bolts, Machine Bolts, etc.:** In common with other goods in the heavy Hardware line, a slight advance has been made in Carriage and Machine Bolts, Lag Screws, etc. We give the complete set of discounts, although a few of them are the quotations that have been current for some time, and have not been advanced:

	Discount.
Common Carriage Bolts.....	70 %
Machine Bolts with H.P. or C.P. Plain Nuts.....	70 and 10 %
Machine Bolts with C. & T. Nuts.....	70 %
Machine Bolts without Nuts.....	70 and 20 %
Machine Bolts, Blanks.....	70 and 10 %
Bolt Ends with H. P. or C. P. Plain Nuts.....	70 and 10 %
Bolt Ends with C. & T. Nuts.....	70 %
G. P. Coach Screws.....	75 and 15 %
Cone Point Lag Screws.....	80 %
Skein Screws.....	75 and 15 %
Forged Set Screws and Tap Bolts.....	65 %
Plow Bolts and Guard Bolts.....	60 and 10 %
Washer Head Coach Screws.....	75 and 10 %
Stud Bolts.....	70 and 10 %

**Nuts:** The manufacturers of Hot Pressed and Cold Punched Nuts, at a meeting held recently, announced the following advanced prices, which contemplate the usual extras to large buyers:

	Off list.
Hot Pressed, Square, blank, or tapped.....	5.60c.
Hot Pressed, Hexagon, blank or tapped.....	6.30c.
Cold Punched, Plain, Square.....	5.20
Cold Punched, Plain, Hexagon.....	5.60c.
C. T. & R., Square.....	5.40c.
C. T. & R., Hexagon.....	6.10c.

The demand for these goods has been remarkably good for some time, and the slight advance indicated by the above quotations is not deemed to be of a character to affect the market unfavorably.

**Wrought Butts:** In sympathy with the revised quotations on Strap and T Hinges, manufacturers of Wrought Butts state that an advance of 10 per cent. has been made over the quotations that formerly obtained in the market.

**Spiral Screw Drivers:** In our Review of the Markets in our issue of March 10th, the types made us misquote the revised prices on the Spiral Screw Drivers controlled by Voigt, Starr & Co., 67 Reade Street, New York. Jones Reversible No. 1 should be \$13.50 per dozen net, and No. 2 \$12.00 per dozen net. With these two exceptions the prices given at that time are correct.

**Steel Shears:** The Carrier Cutlery Co., of Elmira, N. Y., announce the following quotations on their make of Straight and Bent trimmers:

Japanned, 70 and 10 per cent. discount from regular list. Nickel-Plated, 66 2-3 per cent. discount from regular list.

**Cotton Belting:** The Rossendale-Reddaway Belting and Hose Co. announce the following as their current quotations: Sphinx brand stitched cotton belting, 60 per cent.; Competition brand, 70 per cent. Quotations on Endless Thresher Belts of their make are as follows:

4 ply, 6 in., 12 cents; 7 in., 14 cents; 8 in., 16 cents.

**Linseed Oil:** The Dean Linseed Oil Co., under date of March 15th, 1901, quote as follows:

In lots of less than 5 barrels.....62 cents per gallon.  
In lots of 5 barrels or more.....61 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time.

Bolled Linseed Oil, 2 cents per gallon higher than Raw.  
Calcutta Oil, 85 cents per gallon.

### THE PHILADELPHIA TRADE.

The tone of the Hardware market to-day is unquestionably strong, while the Springlike weather is having a very beneficial effect on trade. Not only are orders fair in number, but the frequency of the word "Rush" indicates the goods are wanted for immediate consumption; in fact, there are many reasons for believing that stocks throughout the country are low, and that a good demand may be expected during the coming Spring.

Locally, one of our worst draw-backs is the threatened strike in the coal regions, and, while it is difficult to get at the facts of the case, it does not seem as if the sympathy of the public was as strongly with the miners now as during their last strike, and it must be recognized that public sentiment is a great aid in matters of this kind. Trade in the coal regions has already been affected greatly by the threat of the strike, and is not likely to be improved until this matter has been finally settled, but elsewhere the outlook is bright, while the successful advances in prices are imparting a feeling of confidence to the trade, which results in much freer buying. During the past few days advances have been announced in Strap and T Hinges, Wrought Butts, Washers, Screw Hook Hinges, Screws, Hames and other lines, and we hear of others which are in contemplation.

BIDDLE HARDWARE CO.

### THE BALTIMORE TRADE.

Due to seasonable though unsettled weather, trade continues active, but not brisk, and we find the retailers are still not inclined to purchase speculatively, although most of them realize the possibility of much higher values prevailing shortly.

Strap and T hinges, tacks, and a few other items have gotten into line for revision of prices, and numerous other goods are trembling, as it were. Collections are coming in more freely, and we are now awaiting the advent of the Spring boom.

H. W. WEBB & SONS.

**THE BIRMINGHAM TRADE.**

We are daily receiving notices that, owing to the heavy advance on raw material, our friends are compelled to withdraw prices and take advantage of at least a part of the advance, and are kind enough to still leave us a part for our share. It is wonderful to note how the concentration of manufacturers produces such an effect on raw material. It may be that these advances arise naturally out of the conditions, and are justifiable. If so, then we are glad, for we are always happy to see improved conditions which will give volume to trade and a firm tone to the market. We hear that the conditions in the eastern hemisphere are not so jubilant, and the prospects are not so bright. We would like to see the conditions everywhere more hopeful; then we would feel less fear that our prosperity was temporal. We are glad to see Mr. Andrew Carnegie set our wealthy people such a generous example, which we feel sure will do much good, even beyond the expenditure of his own money. His example should be emulated, and no doubt it will. The true philosophy of life is to love your neighbor as yourself, and if such doctrine shall be the foundation principle of these large corporations our anxieties would be relieved, and we would look on them as benefactors, rather than a threatened evil. The business world has long sought relief from competition and to reach a point where they would have a monopoly. Possibly this idea has been dominant in the formation of the consolidations. What is to become of individual effort? Human nature is so constituted that we need some stimulus to urge us to our best efforts, and the question is, If we can get away from competition, will we not relax into a state of ease, and cease to make progress, as we have done under the force of competition and rivalry? We are hopeful, however, that good will come, even though we do not see fully how it is to be worked out. We have a great country and a great people, and we have hopes that they will solve all questions for the best, even though we cannot see the result.

MOORE & HANDLEY HARDWARE CO.

**THE CLEVELAND TRADE.**

The large orders for goods may mislead manufacturers. The tendency to advance in prices has created a speculative demand that may not continue, and the increasing output may create a surplus.

The present condition of England and Germany indicates that we may not expect continued orders after the old orders are completed. The intense activity will surely moderate. The large amount of paper being issued by telephone and suburban railroad companies, combinations and new banks cannot always remain unpaid. So much of it is being held on a margin that conservatives begin to think the danger line is in sight.

It is hardly possible that all business rules are abrogated or so radically modified by our prosperity that caution will be relegated to old-fogysm.

Anticipation of advance has largely stimulated purchases, and the amount of speculation that has been induced needs to be carefully considered before we are stamped into a boom.

Cool heads can hardly be expected under such remarkable conditions, but it is to be hoped that a "remnant," although submerged now, may be on the "topmost wave" later when sanity returns.

A big nation and a big people are subject to economic laws and must pay the penalty of disobedience. It is better to have a day of fasting occasionally than to wait until it is forced upon us.

Trade is excellent, many prices advancing.

THE LOCKWOOD-TAYLOR HARDWARE CO.

**THE PITTSBURGH TRADE.**

Pig iron, steel and iron continue to advance in price, notwithstanding the large production is taxed to its utmost. A still larger consumption has developed in this marvelous

country of ours, and buyers force prices up by demanding early deliveries and offering a premium for same.

England and Germany wonder at the productive capacity of our works per man employed, and even at half our wages cannot compete, because it takes three or more men to do the work of one here.

Building is very active in Pittsburgh this year, especially in the large class of houses, office buildings, etc.

Our Exposition Company lost its main building by fire last Sunday and this will be immediately rebuilt on a larger scale, and contain a large music hall.

St. Patrick's Day ushered in Spring weather, the six weeks of ground hog weather having been completed on that day. We expect a rush of business from this time on, as the cold weather held back those buyers who do not stock up until goods are called for.

We note in the reports of recent State Conventions of Retail Hardwaremen, the general expression of opinion that trade should move through the old established channels from manufacturers, through jobber and retailer, to the consumer. Of course, trade, like the forces of nature, will move in the direction of least resistance, despite resolutions and conventions, but we believe the jobber and the retailer can distribute to the consumer, to better advantage than the catalogue house upon the same conditions and terms, and that it is to the advantage of both jobber and retailer, to respect each other's rights, and work together for our common good.

LOGAN-GREGG HARDWARE CO.

**THE MINNEAPOLIS TRADE.**

We are having our first considerable snowstorm of the season, and while it is not quite as pleasant as the spring-like weather we have had so much of during the past few weeks, we cannot help feeling that it is just the thing that we require. We have had very little snow during the Winter. This will do a great deal of good in the way of helping to draw out the frost, and as it melts will largely go into the ground, where it will be needed later.

Last Fall the farmers had ample time, and with good weather conditions, to do their Fall plowing; now, with plenty of moisture assured for seeding, conditions could not possibly be any better so far for good crops, and with good crops and fair prices, we are absolutely sure of good business.

The prospect for building in the city here, we are told by many of the older contractors, was never so bright as it is at the present time—more work in sight than ever before, and considerable large work. There are the new Chamber of Commerce, a flat building, with fifty-six apartments; another with thirty—all strictly modern and up to date, while in the retail district there is considerable building. The new heavy Hardware house is getting well under way, and the new jobbing Hardware house is getting its building in

**THREE-BAR LEATHER**  
shoe-soles and top-lifts (for heels) are the best.

Write us; we'll give you points.

**Baxter Schenkelberger & Co,**

350 Congress street, Boston

shape for occupancy. We understand it is purchasing its goods and getting ready to do business. A very satisfactory feature of this is that there is undoubtedly room for these new establishments, as the country that they will cover is growing rapidly, and will absorb a great many more goods than it has been possible to dispose of heretofore. There is probably trade enough going away from the Twin Cities to furnish them with all the business that they will care to handle.

Logging operations are about over for the season. They have had a remarkably good Winter and a very large quantity of logs has been put in. The price of lumber is somewhat higher than was prevailing a few years ago, but there seems to be no reduction in the volume of business—in fact, we believe the trade has never been in so prosperous a condition as it is now, and has been for the past two years, with every indication that it will continue for some time to come. They are getting the mills ready for an early start. This gives steady employment throughout the season to several thousand men—in fact, there undoubtedly will be a shortage of help in almost every line here this coming season.

W. K. MORISON & Co.

#### THE DAVENPORT TRADE.

Trade continues lively, especially in staple and seasonable goods.

There is apparently no speculative demand, for the orders are small, indicating that consumers are buying for present wants only.

It is difficult getting enough of the best brands of barb wire and field fencing to fill urgent requirements. Manufacturers of rope and binder twine predict a famine in these lines, unless Manila fibre comes in in larger quantities, and that very soon.

It is impossible to forecast the future market on goods close to the raw material made from steel and iron.

Notwithstanding the unusually wretched weather, even for March, and the almost impassable condition of the roads, the sales footings so far this month exceed those of a year ago.

The Iowa Hardware Jobbers hold their regular quarterly meeting at Des Moines on the 20th inst.

SICKELS, PRESTON & NUTTING Co.

#### THE CHICAGO TRADE.

Business with us is "booming," so much so that our capacity is being taxed to the utmost. The indications also are that it will so continue during the entire Spring season. The upward tendency of the market has seemed to enthruse most of the trade, as orders coming to us by mail and from

our salesmen are for good, liberal quantities, instead of broken packages, as has been the case for some time. The advances that have taken place recently will doubtless be followed by a great many more, which the trade at large appears to realize; consequently are taking advantage of the opportunity to cover their probable requirements now, at prices ruling at present. Our city trade is very active indeed, and as soon as the building season opens up proper, we look for a very heavy demand on edge tools and builders' Hardware particularly.

WELLS & NELLEGAR Co.

#### THE SAGINAW TRADE.

The season is very backward. The river is frozen over, and we had sleighing here Saturday, March 16th. The ship owners are painting their boats and getting ready for the opening of navigation. Business is about the same as last year. They have commenced building the sugar-beet factory; also the plate-glass factory. It will take the production of seven thousand acres of beets to keep the sugar-beet factory going.

MORLEY BROS.

#### THE SAN FRANCISCO TRADE.

Local trade conditions remain as noted in this correspondence two weeks ago—remarkably favorable. Drier weather has enabled fruit-growers to begin plowing their orchards, and the same clear skies have given an impetus to the growing grain all over the State. Crop conditions were seldom better than at present, though there is plenty of time for frost and north winds to do damage. Wholesalers and exporters report a continued active demand for most kinds of merchandise, and few, if any, of the retailers are complaining. In the same line of thought embraced in the standard commercial reports the middle of the month, it might aptly be said of structural material that it is still a feature, and that the rapid development of newly discovered California oil fields is creating an unusual demand for plates, pipes and drilling machinery. Funds are still in ample supply, and collections are up to the average. The shipping trade of the port is still heavy.

Secretary and Manager O. F. Sites, of the Palace Hardware Co., and President of the California State Retail Hardware Association, remarked to-day (March 16) that within the next week full executive committees representative of the several Hardware associations in the State will be officially notified to meet at Sacramento as the executive board of the State association to ratify or otherwise deal with the constitution and by-laws and formation of the State society that has thus far resulted from the work of the minority number of the members of these several executive committees.

As distinguished guests of the city, twenty-four members of the Chicago Commercial Club, including a few of this club's guests representing the commercial clubs of Boston, Cincinnati and St. Louis, are here for a few days. Among

## Improved Carpenters' Tools.

SOLD BY ALL HARDWARE DEALERS.

this list of visitors are William J. Chalmers, President of Fraser & Chalmers, manufacturers of mining machinery, Chicago; Adolphus C. Bartlett, Vice-President of Hibbard, Spencer, Bartlett & Co., wholesale Hardware merchants, Chicago; Franklin H. Head, iron manufacturer, Chicago; Christopher Hotz, of Schuttler & Hotz, wagon manufacturers, Chicago; Edwin C. Goshorn, manager of the National Lead Co, Cincinnati, and Isaac W. Morton, of the Simmons Hardware Co., and H. N. Davis, President of the Smith & Davis Mfg. Co., both of St. Louis.

Articles of incorporation were filed in the office of the Secretary of State, at Sacramento, last week, for the J. H. Barker Co. The incorporators are J. H. Barker, Mrs. Alice Barker, A. B. McClure, Thomas Barker and Mrs. Jennie Curran. The capital stock is fixed at \$10,000, and the new enterprise will transact a general Hardware business.

TRADES PRESS ASSOCIATION.

### Law of £ s. d.

If you deposit money in a bank and leave it there for over six years without adding to it, drawing on it, or dealing with it in any way, it comes under the statute of limitations, and is lost to you forever.

Suppose you bought a gold ring and, without saying anything about payments or delivery, you turned round to examine a clock and a magpie flew in and carried off the ring, it would be your loss. You would have to pay the jeweler, while he need not give you another ring. If you bought a horse, and said you would call for him in the evening, and if the stables were burned and the horse destroyed before you called, you would have to bear the consequences. But if anything remained to be done to the property purchased, the seller would be responsible. Suppose he undertook to put a nail in the horse's shoe, or suppose the jeweler said he would polish up the ring, then the loss would fall on him, not you.

If you wrote from London to a miller in Bristol offering to sell him a cargo of wheat at 30 shillings a quarter, and he wrote a letter accepting your offer and posted it the same

day, the contract would be completed. Suppose, now, the letter got lost, you concluded that he was not going to buy, and you sold the cargo to some one else you would be liable for damages to the first buyer. And the worst of it is you could get nothing out of the Postmaster-General.

Every one knows that he cannot be made to pay for any beer or spirits he drinks in a public-house after the event. But it is not generally understood that if you lend money to a man to buy drink, or if you give him the loan of a jug to bring home the beer, you cannot recover either loan at law. But if the thing drunk was only soda-water, lemonade, or ginger-ale, the law would enforce payment.—*Answers.*

### Furnace Gas for Motive Power.

Of particular interest to iron smelters is the utilizing of furnace gas as motive power. Whereas formerly this gas was only used for reheating and for producing steam for the fan machinery, it is now used directly in specially constructed gas machines. It is first cleansed from dust and cooled by means of flowing water. Besides small gas machines which drive electric light machines, gas motors are now built which drive fans of 600 horse power. According to Weddinf, a recognized authority, the furnaces of Germany alone produce gas of 500,000 horse power; those of the whole earth, some 2,500,000 horse power. From this it is evident that startling developments may be expected in the iron industry.—*Exchange.*

### Professional Reader.

A large industrial corporation in New England keeps a young woman constantly employed in reading trade journals. She has a regular system of marking items to call the attention of various heads of departments thereto, and makes clippings for scrap books of articles pertaining to the business. Every large industry would find profit in such a plan. Many valuable ideas are lost because people are too busy to read the papers for themselves.—*Exchange.*

## A 20th CENTURY PRODUCTION "THE" TRAP IS "AT THE TOP"

As compared with all other traps, it is SUPERIOR. It is ALL METAL and will never warp nor split like wood block traps. It can be washed and kept clean. "THE" Trap will never spring of its own accord, but will always spring for a mouse. It is easy to set. It has the safest set and quickest trigger ever produced.

TRAP SET.

The manner of baiting "THE" is superior, crumbs of bait being put in the bait box either before or after it is set, and "THE" trap can then be put in a less accessible place, frequented by mice.

The bait cannot be touched by mice without springing "THE" trap.

BAIT BOX, SEE?

"THE" stamped on every trap, and is a guarantee that it is the BEST.

FOR SALE BY JOBBERS EVERYWHERE.

## Are You Using one of Herrick's Tool Racks If Not, Why Not?

F. A. HERRICK & CO., Walker, Iowa.  
I have been using Herrick's Patent Tool Rack for nearly one year, and do not hesitate to say it is far superior to any device for the purpose I ever saw. It holds a complete variety of steel goods in neat, strong and compact. In fact, I do not see where any improvement could be made. It shows goods to good advantage. Customers can see at a glance what they want. I believe anyone will sell enough more goods in one session to pay for the rack. I would not be without one for twice the price of them. Respectfully,  
H. M. HAMBLIN.

All we ask is a trial in order to get testimonials like the above.

F. A. HERRICK CO.,

JACKSON, NICH.

No. 01 Tool Rack.

## HARDWARE DEALERS' RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

### New Hardware Stores.

Albany, Tex.—Dodson Bros.

Boston, Mass.—The Burditt & Williams Co. has been incorporated to deal in Hardware; capital, \$75,000; promoters, Charles A. Burditt, Joseph Williams, James A. Munroe, Joseph H. Williams.

Bloomington, Ill.—J. V. Milner Hardware Co. has been incorporated; capital stock, \$10,000; incorporators, John V. Milner, Walter Milner and Jennie F. Milner.

Columbiana, O.—The Columbiana Hardware Co., capital stock, \$100,000, has been incorporated by W. F. Carr, P. H. Tolles, C. H. Gale, E. A. Foote and William S. DeGarmo.

Guthrie, Okla.—Jacob Anderson, 124 E. Oklahoma Street.

Lebanon, Pa.—Unger & Zimmerman.

Lyons, N. Y.—A. E. Marshall.

Lynchburg, Va.—Shanks & Bell, 921 Main Street.

Marion, O.—Edward F. Weber, East Centre Street.

Milford, Mass.—Norris & Staples, 18 Exchange Street.

Milwaukee, Wis.—A. G. Kiefer, 435 Milwaukee Street.

Monroeville, Ind.—J. D. Shefferly.

New Haven, Conn.—Articles of incorporation of the George H. Baker Co., with a capital of \$4,000, have been filed with the State secretary.

Prescott, Ark.—The McDaniel-Milburn Hardware Co. has filed articles of incorporation with the Secretary of State. The capital stock is \$50,000. The officers are: John M. Milburn, president; P. S. Harrell, vice-president; O. R. McDaniel, secretary and treasurer.

Salisbury, N. C.—The Rowan Hardware Co. has been chartered, with headquarters at Salisbury. The incorporators are R. B. Wood, J. T. Sassamon and P. A. Hartmon. The capital stock is \$10,000.

Sauquoit, N. Y.—H. A. Hull.

South Lima, O.—Wm. Nungester.

Toledo, O.—H. O. Porter, West Side.

Williamstown, Mass.—Perry A. Smedley.

### Changes and Improvements.

Ann Arbor, Mich.—The Moore Hardware Co. has decided to go out of business, as the store which it occupies has been sold to other parties.

Baton Rouge, La.—The Hardware firm of A. Doherty & Co., composed of William Garig and Anthony Doherty, has ceased by limitation. Mr. Garig filed a suit in the district court asking that a receiver be appointed, and in the meantime that the assets of the firm be sequestered. The concern is perfectly solvent, but the partners failed to agree upon a liquidation of its affairs.

Cambridge, Mass.—The Hardware business of H. E. Fitzpatrick & Co., 1174 Cam-

bridge Street, has been purchased by E. Totman & Co., who will continue the business.

Cheboygan, Mich.—John H. Clune has purchased the Hardware stock of the late Capt. John R. Clark. The price was \$1100.

Elbow Lake, Minn.—A. J. Hauge has sold a half interest in his Hardware store to his brother Jens, and the business will be conducted hereafter under the firm name of Hauge Brothers.

Claremont, N. H.—Henry O. King has bought an interest in the Hardware business of Geo. H. Stowell.

Fabius, N. Y.—Lewis Bramer, Hardware merchant, has sold one-half interest in his business to Edward Rowley. The firm is now Bramer & Rowley.

Green Bay, Wis.—The J. J. St. Louis Hardware Co. has changed its place of business from the present location on Pine street. The company will move into the postoffice block.

Jonesboro, Tenn.—W. R. Lowry, of Madisonville, recently bought John B. Simpson's Hardware store.

Lincoln, Ill.—The Hardware store of Frank Frorer has passed into control of E. W. Yeager & Son, the consideration being in the neighborhood of \$12,000.

Lockport, N. Y.—The final papers have been signed whereby Leroy L. Chadwick and Fred D. Morris have bought the business of the F. D. Morris Co., formerly J. S. Woodward & Son, and in future will conduct this Hardware store as a co-partnership, under the firm name of Chadwick & Morris, at the old stand, 38 Main Street.

Louisiana, Mo.—The Frier-Jasquin Hardware Co. has purchased the Lynott business house, on Main Street, and are having it remodeled into a commodious and up-to-date business house for their own use.

Oneida, N. Y.—Henry M. White has purchased the Hardware stock of the estate of the late Charles H. Conley and will continue it with his plumbing business, and will cater to the trade in the store on Madison Street, where the Hardware stock is now located.

Oxford, N. Y.—The Hardware firms of Hopkins & Meade and W. P. Boname have consolidated and will hereafter be known as The Oxford Hardware Co.

Riverside, Cal.—The Hardware store of A. B. McCormick and the extensive pipe, plumbing and tinning business of D. Ormand has been consolidated. The business of Mr. Ormand has been moved to the building now occupied by A. B. McCormick, at the corner of Main and Eighth Streets, and other buildings and yards will be prepared as soon as possible to accommodate the increased business.

Syracuse, N. Y.—Diel & Co., Hardware dealers, have consolidated with the Syracuse Hardware Co. They will continue to

carry on their business at 225 West Fayette Street until May 1, in the meantime selling as much of their stock as possible. Whatever is left at that time will be added to the stock of the Hardware company, and the store closed.

Thomasville, Ga.—F. B. Coleman, formerly of West Plains, Mo., has bought out the Hardware business of Wertz & Son. The latter will continue their repair business.

Uhrichsville, O.—The Hardware stock of Samuel H. Adams, deceased, has been sold at public auction.

Urbana, O.—W. W. Lindley has purchased J. C. Glenn & Sons' Hardware store and will conduct the business at the old stand. He will put Frank L. Hutchins in charge of it.

Waterford, N. Y.—The Hardware firm of Carter & Lund has been dissolved, Nelson Lund retiring.

### Business Embarrassments.

Marshall, Tex.—W. H. Sedberry, Hardware dealer, has filed a petition in bankruptcy.

Port Chester, N. Y.—James W. Davis, dealer in Hardware and paints, has filed a petition in bankruptcy here, with liabilities \$9,964, and assets \$7,670.

Poughkeepsie, N. Y.—Charles E. Schou, Hardware dealer at 273 Main street, has made an assignment to Mayor George M. Hine.

### Fires in Hardware Stores.

Braddock, Pa.—Edmunds & Williams. Loss, \$3,000.

College Springs, Ia.—Stevenson & Co. Loss, \$16,000; partially insured.

Creston, Neb.—Florer & Co. Partially insured.

Dayton, Ohio.—Kramer & Viet. Loss, \$1,500. Fully insured.

Fountain, Colo.—Thompson & Eichel. Partially insured.

Granger, Tex.—S. D. Davis. Loss, \$12,000; insurance, \$1,500.

Great Barrington, Mass.—Platt & Turner. Total loss.

Omaha, Neb.—Morton & Sons Co., 1511 Dodge Street. Damaged by water; fully insured.

Park River, N. D.—Lofthus, Bannerman & Booth. Loss, \$5,000; insurance, \$3,000.

Wapakoneta, O.—Fisher Hardware Co. Small loss.

### Burglaries in Hardware Stores.

Eveleth, Minn.—E. M. Osborne. Knives and revolvers.

Marlin, Tex.—W. M. Gunnell. Firearms.

Marlin, Tex.—C. B. Spencer. Pistols.

Minneapolis, Minn.—J. H. Smith Hardware Co., 214 Hennepin Avenue. Razors and cutlery.

Norwich, N. Y.—C. H. Latham. Small loss.

**Union Hardware Co.,  
TORRINGTON, CONN.**

N. Y. Office in charge of TOWER & LYON,  
95 Chambers St., New York.

BRIE, PA., March 13th, 1900.  
GENTLEMEN:—Replying to your favor of the 9th would state that we have received the Miller ladders and have given them a very good test, and would say that we consider them the best ladder we have ever had.

Yours very truly,  
EDISON ELECTRIC LIGHT & POWER CO.

For Catalogue and Description, Write to

**MILLER LADDER CO.**  
204 Orleans St., Chicago, Ill.

The "Miller" is a radical departure from the conventional style of step ladder. It has an individuality entirely its own which has won for it recognition as the standard ladder in the decorating trades.

## HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers over the country, are requested to contribute to this page. News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

### New Companies, Etc.

Camden, N. J.—Beaver Tool Co. has been incorporated; principal office, New Jersey Corporation Guarantee and Trust Co. Building; objects, manufacture tools and Hardware of all kinds; capital, \$50,000. Incorporators: W. C. Hack, W. J. Stokes and A. W. Simon.

Camden, N. J.—The Springer Mfg. Co. has been incorporated. Principal office, New Jersey Corporation Guarantee & Trust Company Building. Objects, manufacture of machinery, tools, etc., for creamery, dairy and farm use. Capital, \$100,000. Incorporators: William H. Ramsford and Max Phillips.

Dalton, Ga.—The Dalton Union Stove and Mfg. Co. has been organized, with \$10,000 capital. Sherry McCuley has been elected president; A. J. Showalter, vice-president; C. G. Spencer, secretary, and P. B. Trammell, treasurer. Work and contracts have been begun.

Dover, Del.—The Magneto Electric Co. of New York has been incorporated; capital, \$1,000,000; incorporators: Louis E. Niles, Springfield, Ill.; William S. Van Prockin, Amsterdam, N. Y.; William H. Rower, Jr., Troy, N. Y.

Louisville, Ky.—Ikluza Eye Bolt Co. has been incorporated; capital \$5000.

New Castle, Pa.—New Castle capitalists have formed a company to be known as the New Castle Stove and Range Co. It will be capitalized at \$500,000 and all the stock will be held in this city. The works will be the largest of the kind in the country and will employ 1,000 men. The promoters are Wm. Patterson, Geo. W. Johnston, Hon. John P. Brown, C. H. Akens and Chas. J. Kirk.

Rochester, N. Y.—The Gas Stove Improvement Co. has been incorporated in Albany, with a capital of \$25,000. The directors are: Jennie Schwarzschild, W. F. Balkam and Sol Wile, of Rochester.

St. Louis, Mo.—St. Louis Trunk, Hardware and Mfg. Co. has been incorporated. Capital stock, \$10,000. Joseph Christopher, William Herkert and Frederick Herkert are the incorporators.

Springfield, Ill.—Carbon Drill Co. has been incorporated, capital stock \$5,000; incorporators, James R. B. Van Cleave, Nicholas Dubois and James L. Cook.

Syracuse, N. Y.—The Schillinger Stove Co., of this city, has been incorporated at the office of the Secretary of State, with a capital stock of \$20,000. The directors are: Louis Schillinger, Jr., L. J. Schillinger and J. T. Shea, all of this city.

Youngstown, O.—The Mahoning Rubber Co. has been organized with a capital stock of \$400,000. The following officers were elected: President, H. K. Wick;

vice-president, A. E. Adams; secretary and treasurer, John Tod; superintendent, J. S. McClurg.

### Changes and Improvements.

Hartford, Conn.—The copartnership heretofore existing between C. P. H. Cook and E. E. Lathrop for the manufacture of Hardware, etc., under the firm name of The Cook & Lathrop Co., has been dissolved by mutual consent. Mr. Lathrop retires from said firm, and the business will be continued by Mr. Cook, who assumes all indebtedness and will collect all accounts.

Marietta, O.—The Marietta Stone Co. have about completed arrangements to build a large grindstone shop upon a strip of ground just leased by them near their prospective quarries at Mile Run. The company expect to put up the buildings at once, so as to get started early in the Spring.

Meriden, Conn.—Architect David Bloomfield has completed the plans and specifications for the two-story brick addition to the Miller Brothers' Cutlery Co. factory, which is to occupy a space thirty-five feet wide and seventy-three feet long. This will make over 5000 square feet of floor space in the factory.

Peoria, Ill.—Stockholders of the Avery Planter Co., one of the leading manufacturers of farming implements in the West, have voted to increase their capital stock from \$600,000 to \$1,000,000, growing business demanding the increase.

Philadelphia, Pa.—The G & H. Barnett Co., Black Diamond File Works, have recently purchased two properties, one 36 x 100 feet, the other 90 x 100 feet. These properties adjoin the Barnett Company's present works and will be used to further extend their facilities for the manufacture of files.

Racine, Wis.—Wolf, Fayer & Heller, of Chicago, manufacturers of refrigerators, bar fixtures, etc., have consolidated with the Racine Refrigerator Co., of this city, and the combined companies have purchased a site for a factory near Racine Junction. It is expected to have the factory in operation June 1 and 150 men will be employed at the start.

Somersworth, N. H.—Assignee B. F. Nealley of the Somersworth Machine Co. has sold the stove works of the company at Salmon Falls to parties in Plymouth, who will continue the business under the name of the Somersworth Foundry Co.

Southbridge, Mass.—J. M. Cochran, counsel for United States Knife & Cutlery Co., of Southbridge, has filed a petition in Supreme Court for dissolution of the corporation, and an order of notice was issued returnable on first Monday of May.

Westerly, R. I.—The co-partnership heretofore existing between Charles D. Wilcox and John B. Sullivan, under the name of Sullivan and Wilcox, and doing business under the name of the Westerly Granite

### Recent Embarrassments.

Horseheads, N. Y.—The Terry Mfg. Co., manufacturers of Hardware specialties, and L. G. Terry & Co., manufacturers of wire and hemp cordage, the latter firm being composed of Le Grand G. Terry, Arthur S. Terry, Arthur Perkins, special partner in L. G. Terry & Co., have filed a petition in bankruptcy court and have been adjudicated bankrupts. All parties reside in Horseheads.

### Recent Fires.

Brooklyn, N. Y.—The immense plant of the Standard Rope and Twine Co., at the corner of Waterbury and Ten Eyck Streets, has been damaged by fire.

Gardner, Mass.—The plant of the Central Oil and Gas Stove Co. has been damaged to the extent of \$200.

### Miscellaneous.

Cleveland, O.—The Cleveland Cap Screw Co., which was recently incorporated at Columbus with a capital stock of \$25,000, has completed its organization by election of officers, as follows: President, D. J. Kurtz; vice-president, Fred E. Bright; general manager and treasurer, H. V. Bright; secretary, S. M. Mathews. The company has just purchased the plant of the Grant Machine Tool Co., located between Clarkwood Avenue and the C. & P. railway crossing, giving 35,000 square feet of floor area.

Le Roy, N. Y.—The Le Roy Plow Co. have chosen the following directors: Butler Ward, C. N. Keeney, P. Gleason, Edwin Hall, T. W. Larkin, O. F. Woodward. The directors have elected the following officers: President, Butler Ward; vice-president, C. N. Keeney; secretary and treasurer, T. W. Larkin.

Norwich, Conn.—The Hopkins & Allen Arms Co., at its annual meeting, elected the following named officers: President, A. H. Brewer; vice-president, Charles H. Osgood; secretary and treasurer, Charles B. Lee.

Syracuse, N. Y.—At the annual meeting of the stockholders of the Syracuse Chilled Plow Co., the following directors were elected: Austin C. Chase, Francis Hall, Joseph C. Willetts, James Manning, Thomas J. Leach, Jonathan C. Chase, Harry Wiard, Carlton A. Chase and William W. Wiard. At a subsequent meeting of the directors the following officers were chosen: President, A. C. Chase; vice-president, Francis Hall; secretary, Joseph C. Willetts; assistant secretary, William W. Wiard; treasurer, James Manning; assistant treasurer, Carlton A. Chase; superintendent, Harry Wiard.

Wrightsville, Pa.—At a meeting of the stockholders of the Wrightsville Hardware Co., held recently, the old board of directors were elected to serve for the ensuing year.

## Columbian 1000-Shot Air Rifle.

Patented  
Oct.  
24, 1893.

CHAMPION  
MODEL.

This Air Rifle possesses advantages over all the Air Rifles now  
on the market. The materials used in its construction are  
the best. The appearance and workmanship is far ahead of  
any other Air Rifle made. It has an adjustable sight it shoots stronger  
and more accurate, less liable than any other to get out of order, all  
parts are interchangeable. We think we have the right to claim this as  
the "Champion" of all Air Rifles. List, per doz., Enameled, \$30.00; Full Nickel, \$42.00.

# PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished the dealer upon request, by the manufacturer quoted.

### NEW YORK STAMPING CO.,

North Eleventh and Berry Streets,

Brooklyn, New York, U. S. A.

Catalogue on Application.

## PAINT THAT LASTS

Cheap paints are expensive  
because they do not last.

### American Seal Ready-Mixed Paints

are the best because they last the longest, look the best and give entire satisfaction. The test of time proves this. They are made of the purest linseed oil, white lead, zinc and color. An honest painter prefers American Seal Ready-Mixed Paints because he knows it's to *his* interests to do a good job. It is to *your* interests to see that he does use them. They are made to last whether used for house, floor, carriage, enamel, interior or roof. They are always ready for use.

Manufactured by **WM. CONNORS PAINT MFG. CO.,**  
**TROY, N. Y.**

### "MATHER THOUSAND MILE AXLE OIL."

A pure lubricant, especially prepared for "Thousand Mile," "Long Distance" and Roller Bearing Axles.

Guaranteed to run longer than any other oil or grease made.
